Hollingsworth's letter was primarily to tell Strauss that the case will remain open, and that the FCC will continue to monitor operations of the net. Hollingsworth also reminded WA4JTK that Amateur frequencies are shared spectrum and a net has no greater rights than any other licensed operator on any given frequency. As such, a net has no right to take over a frequency from legitimate ongoing communications unless the frequency is voluntarily relinquished. If the frequency is not so relinquished, and the net changes frequency, it must exercise good Amateur practice in choosing an adjacent frequency that does not disrupt the existing communications

But it was in closing his letter to Strauss that Hollingswoth has set the stage for another major change in the way all United States licensed hams

operate. Since the advent of D-X spotting nets in the 1970's, it has become common practice for hams to use only their call sign suffix when getting onto a net list or contacting a D-X station. This is especially true in pile-up conditions and most contest operations. Speaking on the RAIN Enforcement Log report, Hollingsworth and the FCC are saying no more:

Hollingsworth: "The problem with identifying by the last two letters of the callsign is that if the station is not acknowledged and the contact made with the DX station, then you have the station making a transmission -- or maybe several transmissions -- without a full identification."

Hollingswoth says that the practice of identifying using only the last two or three letters of an Amateur call sign is a violation of Part 97 of the Commission's rules. That a station identifying by only part of its assigned call sign is not complying with the clearly written rules regarding station identification, and such practice must not be condoned by Strauss or his group.

In other words, the FCC is ordering Strauss -- and by inference -- all other net operators to ignore any station that identifies by using only his or her call sign prefix. The FCC is also telling the rest of the ham community that there could be severe penalties if this warning is ignored.

>From Miami, I'm Bill Burnett, KT4SB reporting for Newsline.

According to discussions heard on the air, the D-X and contest communities are upset by the FCC deciding to enforce the full call sign rule. They say that contest scores will plummet and the number of stations making contact with rare D-X operations will diminish as a result. (FCC)

*****

FCC FALLOUT: NEW COORDINATORS SPRING UP

The FCC's D'wana Terry's letter that calls for more diversity in ham radio repeater coordination is already having an impact. Newsline's David Black KB4KCH reports:

You can add yet another repeater coordinating body to its ever growing list of who is assigning repeater frequencies in Southern California. This one calls itself the Southern California Frequency Management Group. It currently serves only the 70 centimeter band and says that its purpose is to challenge the decision of the Southern California Repeater and Remote Base Association to change 70 centimeter repeater bandplan from 25 Khz to 20 Khz spacing.

The leadership of the new group are the same people who's letter to their congressman brought the response from the FCC's D'Wana Terry. They say

that the Southern California Frequency Management Group represents what they see as a majority view in the local ham community. One that favors adoption of 12.5 kilohertz spacing in the 70 centimeter repeater subbands. S-C-F-M-G eventually sees coordination of repeaters 6.25 Kilohertz spacing once technology allows.

S-C-F-M-G claims that its approach will more than double the number of available repeater frequencies in the geographic area. This they say, will reduce congestion, and allow for additional interested parties to install new repeaters in the region.

But even with the D&#65533;wana Terry letter now on the public record, the Southern California Frequency Management Group will probably to face an up-hill battle for public recognition. The coordination body it is challenging -- the Southern California Repeater and Remote Base Association is considered one of the most politically entrenched organizations of its type that exists anywhere in the nation. SCRRBA has the all important recognition of the National Frequency Coordination Council and through N-F-C-C the defacto recognition of the Federal Communications Commission itself. It also has a high level of visible support from its coordinated repeater owners and from the elected Southwestern Division ARRL officials.

On the other hand, the SCRRBA decision to adopt 20 Khz spacing has been met with open disdain in other parts of the country. As reported in Worldradio Magazine, hams attending last August&#65533;s Huntsville Hamfest who are involved in 70 centimeter F-M activity called the 20 Khz plan a cruel hoax. They say that the rest of the nation will almost assuredly adopt 12 point 5 Khz spacing with Northern California possibly leading the way. This would effectively isolate Southern California as a 20 Khz island in a 12 point 5 kilohertz world. And most important, 12 point 5 kilohertz also appears to be the plan that Arizona will opt for even though that state has been a traditional SCRRBA allies.

> From the south-east bureau in Birmingham Alabama, I&#65533;m David Black, KB4KCH, reporting for Newsline.

Most communications experts agree that its all but impossible to place an F-M voice signal into a narrow 6.25 on 70 centimeters or a splinter 7.5 Khz channel on 2 meters. These channels are spaced to close and would cause massive interference to adjacent operations. Also, there is no plan to market ham gear that will operate on either of these two untried standards. HAM RADIO MAY JOIN THE INTERNET IN THE U-K

United Kingdom hams may be permitted direct connection of their stations to the Internet by years end. This as the nations radio regulators look for ways to encourage more people to join the hobby. Jeramy Boot, G4NJH, has the story from Nottingham England:

David Hendon, Chief Executive of the Radiocommunications Agency on the 29th of
October announced the start of a two month consultation period hopefully leading to limited amateur radio access to the Internet by the turn of the year.

Mr Hendon, speaking at the ' Making Connections' roadshow in London spoke of the important role amateur radio had, in the past, played in encouraging young people to take up a career in radio engineering. He spoke of the decline of amateur radio world wide and he emphasized the need to make amateur radio an attractive pursuit for young people to take up. Linking amateur radio to the Internet would be an important step forward.

It is hoped, subject to licensing considerations, that limited access perhaps via the Repeater Network would be in operation by Christmas. However, he stressed that this would just be the start. The amateur community would be consulted fully to ensure the best possible use was made of this initiative.

Jeramy Boot, G4NJH.

Jeramy Boot says that more details on the project will be released by the Radiocommunications Agency in the near future. (FCC)

*****

FCC TO TUCKER FAMILY: WE WON'T KEEP IT SECRET

A request from the Tucker family of La Mirada California to suppress all publication of materials involving their dispute with the FCC over club call signs has been turned down by the agency. In a letter to attorney George L. Lyon, Jr., the agency says that Section 0.457 of the Commission's rules specifically describes materials that the Commission does not routinely make available for public inspection. It says that for materials not specifically listed in Section 0.457, are covered in another part of the rules known as Section 0.459. This, says the FCC provides a mechanism by which any party submitting information to the Commission may request that the information be kept confidential.

Attorney Lyon represents Kathryn, Roy, Eric, Kent and Nancy Tucker. The FCC had questioned the family's need for thirty-six club calls. In his initial response, Lyon had passed along the family's wish to suppress all public release of the discourse. In turning down the request the FCC says that a

party seeking confidential treatment under Section 0.459 must first submit a statement containing the reasons for withholding the materials from inspection and of the facts upon which those reasons are based. Mere conclusionary or generalized allegations cannot support a request for nondisclosure, the FCC says. (FCC)

*****

FCC OFFERS TUCKERS A COMPROMISE

The FCC has also offered a compromise to the Tucker family on the call sign issue. The agency propose to consolidate the club station call signs held by the family. Roy, Kathryn, Kent and Eric Tucker would be permitted to retain three calls each. Nancy Tucker would be allowed to retain the two club call signs she already holds.

The FCC has given the Tuckers twenty days to decide. It adds that if no response is received within the twenty days, the agency will adjust the Tucker family Club call sign holdings in accordance with the plan. (FCC)

*****

MORE CLUB CALLS CANCELED

Meanwhile, the FCC notified James Schliestett, W4IMQ, of Cedartown Georgia that it is accepting his request to cancel eight club station call signs for which Schliestett was the responsible party. Schliestett has requested he be allowed to retain W4CAN and W4HTS as club station call signs. He has been asked by the FCC to provide further information on these two call signs so that a decision on their disposition can be made.

The agency has also notified Thomas R. Reynolds, KF6UJP, of Covina California that it is canceling four club station call signs granted to him in the last six months. The FCC said Reynolds failed to reply to a September 15 request that he provide justification in writing for the four club station calls. (FCC)

*****

NO LICENSE - STAY OFF THE AIR

The FCC has told a former San Antonio Texas ham to stay off the air or face the consequences that come from operating without a license. In a November 3rd letter to Roger G. Morgan, the F-C-C says that it has evidence that the former KB5URM is continuing to operate radio equipment and is the source of malicious interference with repeater operations in the San Antonio area.

Back on May 20th, was ordered to appear before the FCC in Dallas for a retest. He did not show up and his license was canceled on August 30th. Now the FCC is telling the former ham that it knows he is still on the air and warning him that he will face a fine, criminal prosecution and a seizure of his radio gear if he continues to be heard on the air. (FCC)

*****

SBE WINNERS

The Society of Broadcast Engineers has honored some hams for their contributions to that industry. Newslines Don Wilbanks, KC5MFA, reports:

Three radio amateurs were among the winners of the Society of Broadcast Engineers' annual awards. Named Broadcast Engineer of the Year was Dane Ericksen, N6AJY, of Sonoma, California. A member of the SBE Board of Directors and chairman of its FCC Liaison Committee, Ericksen is a senior engineer for Hammett & Edison Inc. His career experience includes a stint at the FCC's San Francisco field office. Co-named as Educator of the Year were Michael P. Scott, KB7UXU, of Puyallup, Washington, and Bruce Ziemienski, WA6NOV, of Riverside, California. Scott is lead instructor in the communications technologies department of Bates Technical College. Ziemienski is director of engineering/operations at Armed Forces Radio and Television Service Broadcast Center.

Newsline wishes to add our congratulations to the recipients on getting these awards. (SBE, ARRL)

HAMS TAKE OVER AS PHONE LINE IS CUT

Hams in and around Redwood City California sprang into action on November the 2nd. This after a contractor laying fiber-optic lines caused an outage that affected nearly 5,000 people and knocked out 911 emergency response phone service in parts of San Mateo County.

San Mateo Sheriff's Department spokesman George Barry said that phone service was out from about 9:30 a.m. to 4:30 p.m.. He says that his department dealt with the outage by using amateur radio operators to relay information. They were backed up by cellular phones, extra deputy patrols and walk-in centers at area fire stations to manage emergency situations. Barry says that there were about 20 requests for service during the telephone outage.

A spokesperson for Pacific Bell, said the outage affected 4,700 telephone lines. Customers were able to make local calls, but 911, information and long-distance services were unavailable. (Repeater Owners Remailer, Published News Reports)

BRITISH RADIO HOAX ENDANGERING AIR TRAVEL

A search is under way in the United Kingdom for what authorities are calling a radio hoaxter who is putting the lives of air travelers at risk. Q-News Graham Kemp, VK4BB, reports:

A wireless operator is endangering thousands of aircraft passengers and crew by transmitting bogus control tower instructions to pilots flying in and out of a major British airport .

Airline chiefs say the hoaxer, who broadcasts on the same frequency as air traffic controllers, has given false orders to pilots on the ground at Manchester Airport and has issued dangerous instructions to airborne captains approaching the airport to suddenly climb or descend.

In one case, it is understood he gave a pilot clearance to line up for a take-off that would have caused a catastrophic collision. When the captain checked the instruction, air traffic control said no such order had been issued and told him to halt the aircraft immediately.

A major hunt is underway for the man, who is thought to have broadcast from a car park at or near the airport.

British aviation authorities have changed the frequency used at Manchester airport. They have also put out an airmens notice to pilots. It says -- be alert. (Q-News)

*****

AO-27 PIRATE OPS

XE2BSS and XE2EKY say over the AMSAT BBS that they are hearing pirate operators on the A-O 27 satellite. According to the two Mexican hams, the stations are actually transmitting on 145.850 MHz simplex for commercial purposes and are apparently unaware that the are being relayed world wide through the A-O 27 bird. They say that they believe the signals are coming a city near the border called San Luis in the Mexican state of Sonora. (AMSAT BBS)

*****

OLYMPICS WANTS HAM SATELLITE BAND

The planners of the upcoming Olympic games in Australia want access to a ham band. According to VK2YC, Australian telecommunications regulators are in discussion over a request from the International Olympic Organizing

Committee for use of frequencies in the 5.7 GHz Band for television broadcast links during the Olympic Games. The frequencies that they want are from 5650 to 5670 MHz. These are the same ones that will be used by the upcoming Phase 3 D ham radio satellite which is slated for Launch on an Airainne 5 booster early next year. (Q-News)

*****

HOUSTON AMSAT NET LOOSES SATELLITE FEED

Houston AMSAT Net manager Bruce Paige, KK5DO, tells Newsline that the end of November will mark the end of the nets live feed by satellite. Thats when the satellite time provided by Mike Reynolds, W0KIE, on the General Electric One satellite's Wisdom Channel will be lost.

Paige says that the termination of the feed is the result of The Wisdom Channel moving towards more digital signal processing . This says Paige requires the audio subcarrier that the net has been using. As a result, the final Houston AMSAT Net by satellite will air on November 30, 1999 at 8PM Central Standard Time. It will run for 30 minutes and will mark the end of this particular satellite feed.

Paige does say that he is working on getting a new C-Band satellite channel and hopes to have it on-line before the first net in December. He says that if it all comes together in time, the December 7th Houston AMSAT Net will mark the nets 300th satellite feed. (KK5DO)

*****

REPEATER OWNERS TECHNICAL NET

If you are repeater owner or are thinking of putting a system up, then tune your high frequency radio to 14.309 MHz every Tuesday evening at 8 P-M Eastern time. The reason? That's the home of the newly created Repeater Technical Information Net and as those who have already signed in will attest, it provides a wealth of information for current or new repeater owner operators. Again the time and frequency for the Repeater Technical Information Net is 8 P-M Eastern, Every Tuesday evening on 14.309 MHz in the 20 meter band. (Repeater Owners Remailer)

*****

DX

In D-X, Russ Pillsbury, K2TXB reports an exciting Earth - Moon - Earth United States to Japan contact on 2 meters. According to Russ, the C-W contact was made at 17:18 U-T-C on October 30th on 144.017. Russ tell Newsline that he heard JL1ZCG calling C-Q and gave him about a 45 second call. He came right back to Russ with his calls and an O-O-O report. O-O-O is typical for an E-M-E contact. At the time contact was made., the moon was at about 3 degrees elevation at K2TXB's QTH. (K2TXB)

Also, six meters remains a vibrant D-X band. At 17:08 U-T-C on Sunday, November 7th, W2DRZ says that 50 MHz opened from the United States east

coast into Zimbabwe. He says that N2ODU worked several stations on 50 point 125 and 50 point 150 MHz during that event. (VHF Reflector)

Also KA2AEV reports over the VHF Reflector that the members of Antigua DX-pedition team will have a temporary beacon active while we are in the shack on 50.101mhz for the duration of their operation. It will operate on C-W signing V-26-O-C. QSN reports will be appreciated. (VHF Reflector)

And Tim Totten N4GN reports that thirty-five year old Jeffrey Steinman, N5TJ, piloted the EA8BH contest station to a new claimed single-operator, all-band world record of some 27 million points. This, in the recent C-Q World Wide SSB contest. The score included the passing of the 10,000 QSO mark for the first time in the history of this contest for a single operator category station. QSL EA8BH via OH2BH. (N4GN)

*****

CELLPHONE CW

And finally, when VK7JG turned on his new cellular telephone, he was caught off guard when it emitted a string of Morse code dots and dashes. And not just random gibberish either. The phone said "Connecting people to people" in Morse.

Well, it turns out that Joe's new phone was a Nokia model 5110. This phone lets you select from the menu several alert messages -- all in Morse. Joe thinks that the person who wrote the software had to have been a rather enthusiastic C-W operator. (Q-News)

Daren,

Get on the Web. Look through my links. There are many pointing to
software and sites with links to other sites. I put a few software sites
at the top for you, but many of the sites called "links" near the bottom
have software sections.
I use Super Morse and have it hooked up to my Kenwood TS-830 and use
it to send CW from the keyboard...copy by ear though. I want to do the
same thing, but haven't had time to try some of the other modes yet.

Regards Steve K9DCI

I have information from http://4x4central.com

They say that the fuel pump is the culprit -- at least 90% of it.
Apparently there was a Service Bulletin from Ford on it back in 1991.
The number of the bulletin was 1917-5. The said the part you need
is a Filter Kit, Ford Part # E7PZ9B357A.

I called a Ford dealership in here in Phoenix and the parts man
didn't know anything about it. He "SAID" he'd try to find out for
me. I'll let you know. Meanwhile, someone else might want to see
if their Ford dealership knows anything about it.

What has Ford got against hams? They've been creating havoc for
us since at least 1949 that I know of. You'd think they would
have it figured out by now!

Doc, Mahan used to be on the liberty net years ago. He may be 'anti' but that is misleading. It is because of his apparent dislike for the people who are on there, not because he disagrees with their politics. Mahan is a racist. He is not your friend. He is a disgrace to amateur radio and hopefully the FCC will succeed in revoking his license. No matter what your politics are, do not make Sidney your cause. Sidney does not have the basic intelligence to believe in a particular political position or have a learned opinion. Just hope the FCC can make this guy go away.

73

KR4AJ

Note: BLB did not have the intelligence to pass the code test either.

I did most of my learning of code on the air as a Tech+ and a General.
So what you say is not true, in my case at least.

As long as you do the best you can, that's all that counts Brian. What
might be a trivial exercise for one person, is a tremendous achievement
for another. Keep up the good work.

The implication is obviously "everything else that is tested". So yes,
1B tests one thing. 3B tests everything else (that is tested) in ham
radio combined.

Well, even _that's_ not true. The things in element 4A are not tested in element 3B; the things in element 4B are not tested in 3B; the things in element 2 are not tested in element 3B; and the things in element 3A are not tested in element 3B. Element 3B does not comprise even a majority of what is tested. There's considerably more falsehood in your statement than truth. Why not try to be more accurate when contriving these "truisms" of yours, Cecil?

I have about 20 programs on the list already. Thanks to all who have send me URL's etc. I also found a location with some already on it. However, I am only going to list Logging and Contest software that offer either a Demo or are Free. So you can try and then buy. Take a look at

http://www.mindspring.com/~w4pw/logging.htm

Thanks again and more to come on that page. I may even try to list some stars, depending on feedback from users.

Jim, thank you. It is an unappreciated job, and your kind words mean much to me. I have amassed quite a tape library (I keep the copies, the originals go to the FCC), consisting of mostly the usual Extra rantings, but a few gems as well. Soon I plan to wire my CD-writer to the audio output of my HF rig so that I can attain true low-fidelity in less storage space. I'm not sure if I am permitted to master a "Best Of..." CD, or if the Communications Act(s) prohibit the sale of Extra's making asses (some only half a hog's ass) of themselves on the air. It should be a big hit at Dayton next May. Please wish me luck.

HA Ha Ha HA! ROTFLOL!! (that means "Rolling On The Floor Laughing
Out Loud")

Next time you hear Grouchy Rude and Mean, er... KK5UM...er NU5M or
whatever ask him:

1. Why he and Pig-Pen-Pete kc4if drove all the way down to florida to
see KA4MUJ when he was alive, parked outside of his house for 5
minutes, and when Mike's boy came out and started walking twoard
them they both TOOK OFF like a couple of scared jackrabbits. Baaa Ha
HA!!
The big truck driver from Ohio (HA HA!!) in his texas cowboy boots
and 10-gallon hat with the fake accent and the Asshole from Ashville
in his big greasy bib overalls with no shirt, greazy ballcap and
converse hi-top sneakers...both of them standin across the street
from MUJ's house too scared to step on his property with both their
collective thumbs up their fat asses! R.O.T.F.L.O.L. !!!!!!!
(Have this on TAPE from the lips of KA4MUJ [SK] if you want a copy
folks)

2. Prison guard?? Ha! He was nothing but a 2nd class boiler attendant.
Didn't even have a black seal licence. All he did was what the *boss
man* told
him to do---> "Turn that valve" - "Mop that spill" - "Go & get me a
BigMac" etc..

3. Welched on a bet with MUJ and FZ concerning: "..You prove to me
that WB2OTK
ever told a lie at any time on ham radio - junt name it once" Fred
tried to milk
this one for weeks. Would repeat himself over and over and over and
over and over
again and again and again... (Fred must really have hisself a BAD case
of Obsessive Compulsive Disorder - repeating oneself is a classic
symptom)

4. The other bullshit story about how he went up to see kc1zq. Another urban
legend tale from the big truck driver who sais he's a Texan, but is really from
Ohio.

Want more . . . .? I have over *700 tapes* from the "glory days" of 14313 in
my archives. and believe you me, this is just the tip of the iceberg.
Someday let me relate you the KV4FZ/Wm. Weatherwax - NAB story, or how the old
"Nerd Net" cleande up 14313 in just ONE DAY, or REAL connection between the
late Doris Parnecello - Ruth Hoffman and Radiosigs (that last one is a true
soap opera....remember the famous "open up a can of worms" line...???

That ham radio is multi-faceted is all this Newsgroup demonstrates. Sure, I view the copious drivel as you do. But I also realize that free speech is represented here. If Ignorance needs voice, let it be manifest here.

Most people are savvy enough to realize that no institution can be stereotyped by just one of its poles. For every ignorant diatribe, there is brilliance somewhere in another ham forum. Unfortunately the nature of the beast we call Internet is that it caters to the lowest common denominator.

Let's not assume that it speaks for all hams.

Cordially (73),

I just have to jump in here.

The above statement is inaccurate and intentionally
misleading. (In other words, it a flatassed outright
lie.)

If an applicant misses 4 questions on the Morse exam
they will not qualify for the license or advancement
they are seeking. Period.

If they miss only 4 questions on any other subject they
will pass very nicely.

Due to my maritime days, I equate MCW with A2A (what used to be referred to as just A2 prior to 1979); I keep forgetting that A2A is something HF amateurs are not familiar with hearing -- it's prohibited due to it's wide band nature. (Even keying a transmitter using an unfiltered power supply will make you unpopular with hams on adjacent frequencies.) Again, in my mind, MCW = A2A.

What are you hinting at with that "all the other subletters" remark?
It's been my box for 22 years. The only other amateur who has used
it is Mike. Who knew he'd go nuts ordering a bunch of club calls;
I certainly didn't anticipate that. I told him to cease doing that,
which he did. This is old news.

Hams open their homes to other hams on vacation, loan them their
cars, their stations, and in general, show just plain hospitality.
Even if you vacationed here over a long period and needed a place
for important mail to come, I'd let you use it (only if you upgrade,
though).

At the same time you took an interest in my box, the catalogs began
appearing; too much of a coincidence. Prior to that, the box was
devoid of catalogs.

Right; that would be a score of 60%.

>If they miss only 4 questions on any other subject they
>will pass very nicely.

The above statement is intentionally misleading.

One needs to only earn 70% on the code element, while passing
the Extra written requires getting at least 75%, the Advanced
and General written exams require one to earn at least 74%
(miss 7 on the General, and you're out the door).

We work with percentages due to the base quantity not being
constant from element to element. There are plenty of elementary
texts which will show you how to work with percents, or just
remember this proportion:

amount p
------ = ---, and once you find p, p/100 = p%.
base 100

The tough part for some folks is distinguishing between the amount
and the base in a given problem. Don't make the mistake of believing
that the the larger quantity is always the base!

I'm sitting here listening to WB0CXJ and some really weak (QRP?) station whining and crying about the Liberty Net on 3950. As usual, WB0CXJ's signal is off-frequency, which almost makes him sound like the "Doofus Duhhhhh" guy, except that "Doofus" isn't as weak as CXJ. These guys are hilarious. Their whole life is driven and ruled by the Liberty Net. They hate it so much, yet they are too stupid to realize that it has become their master!

WB0CXJ just said something about "The Liberty Net has to realize that they can't use 3950 every night". The Liberty Net guys are hardly ever on 3950 any more except for Saturday. What the heck is he talking about? The old "East Coast" gang on 3950 has, for all intents and purposes, abandoned 3950 and gone their own ways. About the only time you hear them anymore is during the Liberty Net on Saturday night.

These Liberty Net haters are just consumed with hatred and revenge. Pathetic.

It looks like they just don't learn. I believe they are stupid and
can't. First is was WB9BCC telling every one he had received the Medal
Of Honor.

He was proven a fraud and untruthful by KT4TR. And very lucky he was
not arrested for impersonating a M O H hero. It is against the law!!

Now we have a report from "WAIVER BOY TOM" WB3HGW that truck driver-
prison boiler attendant Fred Roll is telling Tom he is a Veitnam POW.
No record of this can be found. Do we have another "Fake hero" like
WB9BCC AKA
Dwyane on our hands? Can these "Good fellows " never learn a lie like
that can be checked out. Now AF2Y ,as he did for WB9BCC, will be
telling every one what a hero Fred is,

Shameful Glory bandits!

I am making a public retraction about KK7HO - only because I don't want to be sued and I don't have the money. I work 2 jobs just to keep myself fed, clothed and a roof over my pitiful little soul. I did not want to do this, but feel complled anyway. Would anyone help me? I'm at a impass in my life, and I really don't what to do about it. I really like the Liberty Net, I agree with alot that they stand for. I just really don't like those nasty JEWS. So I am taking back what I said about that KK7HO is a jammer, only because I don't want get into leagal trouble, hell, I can't even afford a lawyer, let alone a trip to Las Vegas.

Your latest has went to far Lloyd N0KED - Liberty Net Jammer gets a warning letter! I DEMAND that you make a clear "retraction" and correction or i will proceed with legal remedies. This is NO JOKE. YOU are not anonymous, as are the others. If I do not see a retraction of the statements you made implicating me as a "jammer", "criminal" "Shopping for the murder of" within 10 hours of the reciept of this E-mail. i will proceed with whatever legal recourse I have available. This e-mail has return reciept requested. Sincerely,
Timothy Volz.

It isn't worth it Lloyd. Ihave tried to be your friend and you will not allow it. You are associated with people that have a bad influence on you (my opinion). You also KNOW that I am not a jammer and did not do the other things that you stated in your Post that went to thousands of people. I will proceed with any and all recourse, it's up to you. I suggest it stop today, with retraction.

: >The statement(s) above, are in the present tense, not future tense. I didn't
: >say "will", I said "do".

: Regardless of what tense you choose to be in, this is an HF-oriented
: thread regarding HF access without knowledge of Morse.

Weeellllll excccuuuuuussssssssee me! :) But YOU mentioned TECH
privliges on HF not me. So I inquired as to what privileges they have
(NOW). Your answer is somewhat evasive.

: >: >: and there are no sending speed limitations on HF, and MCW is
: >: >: not permitted on HF, as usual, you're trolling.

: >: >MCW isn't allowed?

: >: Not in the context of amateurs utilizing it for CW encoded via
: >: Morse. I'd love to be able to carry on a QSO using MCW -- it
: >: sounds quite pleasant through the BFO (sort of like sending code
: >: on a piano keyboard [using all the keys at once!]).

: >????? Why would you use a BFO to listen to MCW ??????

: Sorry, I thought you were familiar with how MCW is utilized in two-
: way Morse communications;

I am that's why I can't figure out what YOU are talking about. You use a
BFO to receive MCW??? One purpose of MCW is to allow a station that
doesn't HAVE a BFO to be able to receive it.

; since MCW is not permitted in that context
: on the ham bands, we'll draw from its use in the maritime bands:

Why would we want to do that? MCW -is- used on ham bands. My repeater IDs
that way, and has done so since 1976. 10m repeaters do the same.

: The modulation of the tone is set way below 100% (my Mackay 500 kHz
: transmitter has the tone factory-set at about 50% modulation);

50 percent modulation of what type of carrier? (AM no doubt). You do not refer to percentage of modulation on SSB signals where a "BFO" is normally used.

From ARRL Handbook, 1992, page 9-10;
" Amplitude tone-modulated Morse
This type of modulation, often called 'modulated' CW (MCW), was lumped under an ambiguous pre-WARC '79 emission symbol of A2. MCW or A2 meant that a Morse-keyed tone modulated a double-sideband AM transmitter. ..... "

: otherwise QRM is caused to adjacent channels due to its wide-band
: nature.

Wide-band? Why would a single tone modulated AM transmitter be -wider- than the same transmitter used for voice modulation?

; Hence, a receiving station would have quite a bit of trouble
: copying transmissions with his BFO off.

How does using a BFO at the -receiver- change the bandwidth of the -transmitter-?

; Also, turning off one's BFO is
: inviting disaster (literally!), for once the traffic from the A2
: transmission has been copied,

A2 is transmitted by an AM transmitter. Why are you using a BFO to receive AM? (Exhaulted carrier receiption?)

; one's memory cannot always be trusted
: to turn it back on again; missed calls might mean missed calls for help.

: >; But it's wide band nature is why it's prohibited;

: >It is?

: Yes. On your receiver, with BFO on, the harmonics would seem to
: extend several kilohertz on either side of the transmission
: frequency. That's the whole point of using it (off the ham bands,
: though).

So OFF the ham bands, one uses a BFO to narrow an AM transmitters bandwidth and ON the ham bands you don't??? (Dick, are you ghost writing Jeffs stuff now days?)

: Note the FCC's push (in the early days) for well-filtered power
: supplies. Today, a CW operator using a poorly-built supply will
: literally stand out from the crowd with his wide-band signal,
: having a 120 Hz "tone" modulating his carrier. (I'm told this is
: pretty common among Cuban hams.)

Canadians have a 100 Hz tone in some areas around the Great Lakes. :)

But in cany case you are talking about on/off CW not, "MCW" as the term is normally used. This has nothing to do with using a BFO to receive AM/FM

"MCW".

....

Jeff I think you may be a mite confused about what is happening in your transmitter (which I can't understand what you are using a 500 Hz rig for). It is most likely a true CW rig that has a tone generator in it to allow transmission of MCW to a station who doesn't HAVE a BFO. But when it is transmitting MCW it is doing so as an AM rig. Hence the setting of the "modulation" to 50%.

And the above one is also funny!

Lloyd, you sh*t on millions of fine people with your repeated attacks on Jews, blacks and gays. And yet if someone does a childish web page with YOUR name on it, you go into CAPITAL LETTER HYSTERICS.

And writing a "detraction" will only make matters worse; a "retraction" will work much better.

More unasked-for advice: instead of reading all the fire-and-brimstone passages during your next Bible reading, instead read Jesus' Sermon on the Mount; "Judge Not, For You May Be Judged".

I know this is nothing new to this group but here goes it any way.

Everyone asks why Ham Radio is dying? All they have to do is look at this newsgroup as it reflects the current state of affairs.

For example,
A new person (usually someone in tech school or college working on an EE degree) who thinks Ham Radio would be a good hobby, in addition to computers, happens upon this group. While some good posts exists, they see a lot of BS, and I mean meaningless BS, about Porkbutts, Liberty Nets, Hams trashing other Hams, and other trite dribble. They think to themselves, gee Ham Radio is a large pile of BS and do not develop any further interest in becoming a Ham Radio Operator.

Lord knows I have tried to visit this group hoping things have changed, it always is the same BS posts that have absolutely no meaning to me. The references have long past into the bit buckets were they belong. My best advice to all those who want to fight over this trite, meet at high Noon in some western town on Main Street and have your last physical fight. Put this BS to bed and keep it off the internet.

No one except ya'll care about your pet causes.

Janet's attitude is a sad example of today's young swi..
I mean people. They've never done anything except poke
bread earned through the sweat and blood of others
into their smart mouths and whine
"what have you done for me *lately?*"

A person is the totality of what they have done throughout
their lives- not just lately. My father doesn't like to talk
about WW-II, either. And he was in the deepest hell of combat
you could imagine. But I'm glad someone does. If they hadn't,
I wouldn't have known just how brave and honorable a man
I call "daddy," which deepens my love and respect for him.

It is naive' and typical of young semi-adults to assume that
what a person is doing at some moment (like telling tales
of yesterday) is the sum total of who they are,
what they've done and what they will ever be.
Only the young are that pitifully simple.
Most of us old farts
have accumulated a few deeds worth recounting
while we were busy feeding and clothing YOU,
so you could have the freedom to denigrate and belittle us.

May your children treat YOU with the same level of
care and respect you have shown us.

If a few vets want to sit and swap yarns at the VFW...
THEY BLOODY WELL EARNED THE PRIVILEGE.

To the new comer who looks at this group in disbelief at the state of ham radio I say this. If you really look at all the crap posted, one must remember it's the same people...maybe 7 or 8 that put the bad light about ham radio on the internet. Even on the "hot spots" (14.313-3.950) on the hf bands you still have the same few hams (maybe 25..??) that cause 99% of the trouble on the bands. The rest of the 600,000 plus hams in this country are sicken by the words and actions of these trouble makers. The barf boys..the liberty net people are without a doubt an extreme minority. Their issues are only important to them..not to the vast majority of ham operators. Ham radio is a great hobby...don't let the few discourage your interest.

3002. ADV: DSP Training Course 12/6-8/99 San Francisco Bay Area

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-15 00:00:00 UTC
From: Besser Associates <info@bessercourse.com>
Message-ID: <wtWX3.14218$dp.416754@typhoon-sf.snfc21.pbi.net>
Source record: 127470

Besser Associates is offering their acclaimed
DSP Made Simple for Engineers class in
Mountain View, CA on 6-8 December 1999.
This 3-day class is particularly well-suited to those involved
in RF and Audio signal processing, and computer programmers,
who need to learn the fundamentals of DSP. Details of this
course, including target audience, learning objectives, course
outline, materials descriptions, and past student comments
are appended to this posting as items "A" to "I".

To register, please contact Besser Associates at 650-949-3300.
For additional course offerings, please call Besser Associates
or visit http://www.bessercourse.com/ to view our public course
catalog and current schedule.

------detailed course information follows------

A. BESSER COURSE TITLE:
"DSP Made Simple"; a 3-day tutorial course on digital signal
processing (DSP).

B. TARGET AUDIENCE
* The primary audience is practicing RF (and Audio) hardware
Engineers and Technicians who need to understand digital
signal processing (DSP) because of its ever-increasing
role in the processing of real-world signals.

* While DSP Made Simple is not a "programming course", it is
particularly well suited for computer programmers because
of their increasing need to understand DSP algorithms.

* In general, this course is beneficial to anyone involved
in the acquisition, generation, transmission, manipulation,
or analysis of signals.

C. WHAT THE STUDENT GAINS FROM THE COURSE:
* The ability to apply DSP techniques to real-world
signal processing problems in their work.

* A solid grasp of DSP basics and the ability to move
gradually to more sophisticated DSP concepts and
applications.

* The ability to speak the language of DSP.

* The ability to understand written descriptions (articles,
application notes, textbooks) of DSP methods used

in practice.

To register, please contact Besser Associates at 650-949-3300.
For additional course offerings, please call Besser Associates
or visit http://www.bessercourse.com/

D. COURSE OUTLINE

_____
DAY 1
DISCRETE SEQUENCES AND SYSTEMS
* Discrete Sequences, Their Notation, and Representation
* Signal Amplitude, Magnitude, Power Definitions
* Signal Processing Operational Symbols

PERIODIC SAMPLING
* Periodic Sampling and Aliasing
* Sampling Low-Pass Signals
* Sampling Bandpass Signals
* Spectral Inversion in Bandpass Sampling

THE DISCRETE FOURIER TRANSFORM
* Understanding the DFT Equation
* DFT Properties
* Shifting Theorem
* Inverse DFT
* DFT Leakage
* Use of Windows
* DFT Results Interpretation

_____
DAY 2
THE FAST FOURIER TRANSFORM
* Relationship of the FFT to the DFT
* Hints On Using FFTs With Real-World Signals
* FFT Input/Output Data Index Bit Reversal
* FFT Software Availability

FINITE IMPULSE RESPONSE DIGITAL FILTERS
* An Introduction to Finite Impulse Response Filters
* Convolution In FIR Filters
* FIR Filter Analysis and Design Examples
* Half-Band FIR Filters
* Phase Response of FIR Filters (Group Delay)

INFINITE IMPULSE RESPONSE DIGITAL FILTERS
* An Introduction to Infinite Impulse Response Filters
* The Laplace Transform
* The z-Transform
* IIR Filter Design and Analysis Methods
* Pitfalls in Building IIR Digital Filters
* Cascade and Parallel Combinations of Digital Filters
* Comparison of IIR and FIR Filters

_____
DAY 3
ADVANCED SAMPLING
* Quadrature Signals and Quadrature Sampling
* Quadrature Sampling With Digital Mixing
* Digital Resampling
* Decimation
* Interpolation
* Decimation and Interpolation in Combination

QUANTIZATION and A/D Converters
* Finite Word Length Effects
* A/D Converter Operation
* Effective Bits
* Improving A/D Performance
* A/D Converter References and Internet Sites

ADDITIONAL TOPICS (If We Have Time)
* Reconstructing a Continuous Signal
* D/A Converters
* Floating Point Number Formats
* Block Floating Point Number Format
* Matched Filters

E. WHAT THE COURSE DOES NOT COVER:
The DSP Made Simple Course does not cover the hardware architecture of commercial DSP integrated circuits. Likewise, while the course introduces the topic of commercially available DSP design software packages, no computer programming is performed as part of the course.

To register, please contact Besser Associates at 650-949-3300. For additional course offerings, please call Besser Associates or visit http://www.bessercourse.com/

F. COURSE HANDOUT MATERIAL
* The training material comprises 475 pages of class handouts. With the typical lecturer, the student must decide between taking notes, or paying attention to what the lecturer is saying. The training handout solves this "note-taking" dilemma. The DSP Made Simple training material provides a "bulletized" description of each DSP topic in addition to an abundance of diagrams. A textual description summarizing the key DSP concepts are included at the bottom of each handout page.

* The book "Understanding Digital Signal Processing", written by the instructor and published by Addison Wesley. (This text is Amazon.com's top-selling DSP book.)

* Pertinent DSP documents, such as tutorial articles on DSP, lists of DSP-related Internet sites, vendor application notes, etc.

G. COURSE LECTURER:
RICHARD LYONS is a Consulting Systems Engineer, and lecturer with Besser Associates. He has been the Lead Hardware Engineer for many multi-million dollar signal processing systems for both the National Security Agency (NSA) and TRW Inc. An experienced lecturer, Richard has delivered signal processing seminars and training courses throughout the US and Europe. He has written numerous articles on DSP topics, and authored the course text "Understanding Digital Signal Processing". Richard is a member of the IEEE and Eta Kappa Nu, the electrical engineering honor society. The instructor can be reached at <riclyons@ix.netcom.com>.

To register, please contact Besser Associates at 650-949-3300. For additional course offerings, please call Besser Associates or visit http://www.bessercourse.com/

H. WHAT'S GOOD ABOUT THE COURSE
* Instead of overwhelming the student with complex mathematics, the lecturer uses intuitive explanations and well-chosen examples to develop a fundamental understanding of DSP theory. (A recipe for technical material that's too rich in equations is hard for the beginner to digest.)

* The practical aspects of signal processing techniques are stressed as opposed to mathematically rigorous discussions of discrete system theory. THIS COURSE TEACHES THE STUDENTS HOW TO USE DSP IN THEIR WORK.

* Comprehensive in scope, and gentle in approach, the course gives the student a thorough grasp of the basics and the ability to move on to more sophisticated DSP concepts and applications.

* In addition to covering the key practical aspects of DSP, a collection of tricks-of-the-trade used by DSP professionals, to make their processing more efficient, are introduced throughout the course.

* In terms of DSP training, this course is the beginner's best opportunity to efficiently and thoroughly learn the fundamentals of DSP.

I. QUOTES FROM RECENT STUDENTS:

"Excellent course for engineers wanting to get (an) insight into DSP."
- George Hughes, Lockheed Martin

"This course takes the mystery out of DSP. Rick has a knack for presenting information in a way that is very logical and easy to understand."
- Dale Laing, Lockheed Martin

"Lyons presents a very solid engineering perspective of the subject with a minimal, yet sufficient, amount of math."
- Gene Kozin, Itron Inc.

"Lyons' is an excellent communicator of highly technical material. He uses plenty of real examples to translate theory to something of utility."
- David Day, Day Test and Measurement Inc.

To register, please contact Besser Associates at 650-949-3300.
For additional course offerings, please call Besser Associates
or visit http://www.bessercourse.com/ to view our public course catalog
and current schedule.

When you feed a (sine wave) audio tone into the audio input of a SSB rig you get *real* CW out, not MCW. Increasing the level of the audio signal (percentage of modulation?) increases the power out of the CW signal (as long as things stay linear). The frequency of the tone will determine the offset from the suppressed carrier. I once had a rig that generated CW this way...

I know this is nothing new to this group but here goes it any way.

Everyone asks why Ham Radio is dying? All they have to do is look at this newsgroup as it reflects the current state of affairs.

For example,
A new person (usually someone in tech school or college working on an EE degree) who thinks Ham Radio would be a good hobby, in addition to computers, happens upon this group. While some good posts exists, they see a lot of BS, and I mean meaningless BS, about Porkbutts, Liberty Nets, Hams trashing other Hams, and other trite dribble. They think to themselves, gee Ham Radio is a large pile of BS and do not develop any further interest in becoming a Ham Radio Operator.

Lord knows I have tried to visit this group hoping things have changed, it always is the same BS posts that have absolutely no meaning to me. The references have long past into the bit buckets were they belong. My best advice to all those who want to fight over this trite, meet at high Noon in some western town on Main Street and have your last physical fight. Put this BS to bed and keep it off the internet.

No one except ya'll care about your pet causes.

**No, the reason why it's in temporary trouble is because of a schmuck like the guy using "IVAN IVANOVICH" as a name which means he's unidentified just like the unidentified idiots on ham radio who play music and jam in every way possible because they know that the FCC will catch the obvious rather than the clandestine. If Ivan were indeed serious about ham radio, he wouldn;t have to hide behind a stupid and phony ID while posting drivel and nonsense. He'd be a man and ID correctly and state his position instead of bellyaching like a sneaky weasel. Once the "Ivan Ivanoviches" in ham radio are caught and tossed out, we'll have a much better time if things.

I suppose it _could_ be... but in fact, it isn't true. Many
Esperanto-speakers are more-or-less enthusiastic Mac users. The
Hypertext Esperanto course for English-speaking beginners was orignally
developed for the Mac, and I had Esperanto fonts on my Mac long before I
encountered a good set for an IBM-compatible.

But neither one of you guys seems to be too terribly concerned with
reality.

George Partlow
Esperanto-speaker for more than 20 years, Apple user for more than 15

Interesting that Finnish is not on this list, since AFAIK there are more
personal computers per capita in that country than in any other. Maybe
Apple figures they all already own IBM-compatibles and don't want to
switch!

Stephen, or Steven, I won't argue with you about the link, I had it referenced in my sig. file so what. The other posts containing it were what I belived that you were refering to. Maybe you were maybe not, Ok nuf said about that.
>In reference to the hate directory---that web site mentioned was put by a college professor for law enforcement agencies.

>In reference to the hate directory---that web site mentioned was put
>up by a former non-participant of the Liberty Net.

The web site is put up by a professor who was never a part of the "So called" net. Your statement above makes no sense.
How can some even be a "former Non- Participant" whew??
>And if you check the links in that hate directory, you can't even find the
>Liberty Net mentioned in the WIN page.

The liberty net is in the Hate Directory not the Western Imperative Netwerk page. That page is referenced as the liberty net "folk? journal web page.
http://www.bcpl.net/~rfrankli/hatedir.htm
If it's inaccurate talk to the one that put it up. They had to have a "reason for listing the net.

>Tim you seem to be overly infatuated with the Liberty net.

Steve don't flatter yourself. Infatuated is the wrong term for sure. Distgusted probably better describes it. Had the net, and Vic in particular, not moved in on qso's, jammed, harassed, Lied, heckled and ran others off, etc. I suspect the "So called" net would not be having the problems that they do now. It's not just me Steve, there are many others out there, as you well know, that dislike the activity that has been exhibited. Granted here lately the net has seemed much more civil and and less combatant on the air but have stepped up the attacks on the Internet. Hell you now have Vic, kkkevin, FRG9600, N2SAG, N0VFP, and who knows who else all with multiple libelous defamatory webpages about other amateurs or the FCC on the Internet. I bet you think SAG's webpage about Dave (kji) is funny don't you? You tell me???

>you spend too much time posting about and
>listening to 3950.

Funny, I hardly spend anytime "reviewing" the BS posted here by some of the NO NAME net members. Then i respond.

>I do have one question to ask of you. Why is it that you continually
>advertise this 3950 opinon web site and all of these links? Is it that
>you
>get paid to do this?

Not hardly, who the hell would pay for that?
Makes no sense Steve. Honestly - I continue posting the "OPINION PAGE" because the net members, with their multitude of screen names continue with their lying BS. How they can tell some of the bare faced lies they do is beyond me but integrity never was a strong prerequisite for joining the net now was it?

>I just can't understand how advertising a web site that
>has a little man exposing himself and then peeing on call signs can be
>funny.
My website doesn't have that.
I bet you would think it was funny if the callsigns were changed. Of course you would, but you would so NO right now. Had one of your homeys put it up with mine and the others calls on there you'd laugh at it - don't lie.

>I hope you are being paid because if you are not---well then maybe I will
>just
>have to chalk it up to One who flew over the kkkoo kkkooo's nest.

If you think i'm getting paid your the one that's cuckoo? I've heard it all now. Hey Steve who's paying me? The ADL, SPLC, CFR, Bildeburgers, Trilateral, UN, Illuminazis? Actually I get the black-op funds left over from area 51.

>73's and no I will not make my opinion heard on the 3950 opinion
>page.----N8WGM

That's fine, i have the page for those that wish too. You were not asked to anyway.
That's what I should do --Ask for some more Opinons! SEND THEM IN FOLKS.

3-7's from Las Vegas.....KK7HO

: get *real* CW out, not MCW.

Well sort of. You really get a single tone SSB signal. ;)

I used the SSB example to discount that Jeff is using a BFO to receive a
SSB generated tone. TNX for the support.

: Increasing the level of the audio signal
: (percentage of modulation?) increases the power out of the CW signal (as
: long as things stay linear). The frequency of the tone will determine the
: offset from the suppressed carrier. I once had a rig that generated CW this
: way...

(You getting this Dick? "Suppressed carrier" and all that techy stuff?)

Yes it's commonly done that way. Now explain how he controls the "wide
band" -transmitted- signal at the RECEIVER ;-)))

You should see how my old Central Electronics 20-A "exciter" generates
SSB, AM, PM and CW. (The rig is still on my desk next to the 75A3 and the
Harvey Wells.) A guy once asked me what the AM/PM was for. So I told him
that I used AM in the morning and PM in the..... :)

So, Tim, you now admit that the page is yours? Some months ago you
were denying that.

For example, on the eighth of August of this year, in your message
number <19990808173600.14794.00004342@ng-cj1.aol.com> you stated:

> Kkkevin I've told you before that it's not my web page

But today you state "I have the page" and openly admit you operate
it.

Which is it, Tim -- were you lying then, or are you lying now?

Honor bright,

Kevin, WB4AIO.

Lloyd,

If you hate Jews, does this mean you have contempt for Jesus and the Old Testament?

Jesus was a Jew. Do you hate Jesus?

The Old Testament was written by Jews. Does this invalidate that book?

What about Abraham? Do you hate him?

You can quote the New Testament all you want, out of context, but Christianity is NOT about hating anyone. If you think you are justified in hating anybody, you are a sinner. Christianity is about the love of God, love of your fellow human.

You might as well seek out the local chapter of the KKK because that is where you belong. That is a group of ignorant fools who might actually like you.

but then again...

Actually,

This was an experiment for my Phsyc 102 class.

My methodology was to post a controversial topic to a target newsgroup group, after looking over other newsgroup in my hobby interest this was one was a ripe candidate. (i.e. This one seem to have the most easily provoked individuals on it.)

This was done to support my hypothesis, people who exhibit paranoid tendencies will transfer their prejudices to others of unknown origin, out of fear for the unknown.

So have fun picking at my post and keep on supplying the needed data.

++++++++++++++++++++++++++++++
BTW to answer all my fan posts:

1. Have no idea why one of ya'll would think I was a dental school drop out. Then again there is so much off the wall abstract thinking going here trying to get the point always hard to do.

2. I do not look at this group on a regular basis, only when I need a good laugh.

3. I do visit technical newsgroups to gather useful info for my station operation.

++++++++++++++++++++++++++++++

73 ES CUL,

Ivan Ivanovich

Oh BTW did anyone get all the hidden humor in my sig file.

That's great Brian. Everyone should have a hobby. If you like, I can
make tapes of the fine "operators" on our local 147.435 and 145.460
repeaters to compliment your collection - or you could get them from
Riley.

3052. HELP! Motorola Micor Repeater Problem!

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-16 00:00:00 UTC
From: radiotek@pacbell.net
Message-ID: <38319cfa.11117922@news.pacbell.net>
Source record: 127350

Hello all,

We need some help with a problem with our Motorola Micor radio.

We are trying to turn a VHF Hi Motorola Micor Base Station into a
2m Repeater!

This is what we have so far:

Receiver is tuned to our frequency
Transmitter is tuned to our frequency
The duplexer is tuned to our frequency
CR957 (Diode on Receiver Interconnect Board) was removed
We have our repeater controller hooked up, as well

Here is our problem:

Our problem is with COS (COR) in the receiver. We are able to duplex
the radio, but once we throw the radio into transmit, the receiver's
COS goes down to .6 v!!!! This is a problem. The radio is duplexing
fine, but the COS level goes away once we start transmitting!

Any help is appreciated! We need help, please.

If you can help, Please E-mail me or call me.

E-mail: radiotek@pacbell.net

Phone: (661) 272-6949

Thank You & 73,

Mike KQ6MU

In the context of upgrading from tech+ to general, which was
the original context, 4A is irrelevant. If I say, the sun
will come up tommorrow, you might logically ask, "what does
that have to do with upgrading from tech+ to general". Your
statement may not be inaccurate, just irrelevant to the
stated context.

The fact remains that when upgrading from tech+ to general,
13wpm Morse code skill is considered equal in importance to
everything else in amateur radio combined that is tested on
the general written exam. Doing a logical extension, 13wpm
Morse code skill is considered equal in importance to the
sum total of all the Q&As in the general question pool.
IMO, that's way too high. Your opinion may vary.

Here's exactly what you wrote in it's entirety:

"The implication is obviously "everything else that is tested". So yes,
1B tests one thing. 3B tests everything else (that is tested) in ham
radio combined."

How does this statement establish the context you now describe? My
response specifically addressed this comment and was entirely accurate.
I simply pointed out the inaccuracy in your statement. Now you want it
to say something other than what it said. I'm sorry Cecil, but you
can't change horses in the middle of a stream. You were wrong. Happens
to the best of us - in your case, you did it to deliberately
misrepresent the nature of testing in the Amateur Service.

> The fact remains that when upgrading from tech+ to general,

>The web site is put up by a professor who was never a part of the "So
>called"
>net. Your statement above makes no sense.

Tim you misunderstand.......the site mentioned AT the hate directory is a site that is put up by a person who does not even check into the net....The WIN netsite is not part of the Liberty Net.....

>>In reference to the hate directory---that web site mentioned was put
>>up by a former non-participant of the Liberty Net.

Ok, the person who runs that site is not a regular participant.....he does check in maybe once every 6 months to a year. I haven't heard him on the air for over 7 months now.This linking of the Liberty Net with this site is erroneous.

>The liberty net is in the Hate Directory not the Western Imperative Netwerk
>page. That page is referenced as the liberty net "folk? journal web page.

If you check, the Folk journal page is put up by someone who is not associated with or a regualr participant of the Net.

>>Tim you seem to be overly infatuated with the Liberty net.
>
>Steve don't flatter yourself. Infatuated is the wrong term for sure.
>Distgusted probably better describes it. Had the net, and Vic in particular,

Ok, maybe infatuated is not the right term....maybe you seem at least to many to be overly concerned with what is discussed. I will say this. You seem to agree with much of what is said on the Net. You also seem to disagree with some of the comments. I don't agree with all that is said. If I disagree, then I'll say so or just turn the VFO. I have heard comments on other frequencies that I totally disagree with. But I do not attack anyone for their beliefs...and hate directories stink of political correctnes. And PC is BS.

>Had the net, and Vic in particular,
>not moved in on qso's, jammed, harassed, Lied, heckled and ran others off,
>etc.
>I suspect the "So called" net would not be having the problems that they do

Well Tim, I've been on 3950 since 1991...almost 8 years. In that time, I remember running mobile on 3950 and being totally jammed of the band by K5BLB back in 1992. I also monitor 14.313 and have heard many hams conspiring to jam the Liberty Net and 3950---AF2Y comes to mind. The 80 meter band had not yet come into propogation and yet these lids were talking about jamming ---just because of what was being discussed on 3950. So it's not because of moving in or on a frequency that is the problem.....it's trying to prevent anyone from

discussing certain subjects.
>you now have Vic, kkkevin, FRG9600,
>N2SAG, N0VFP, and who knows who else all with multiple libelous defamatory
>webpages about other amateurs or the FCC on the Internet. I bet you think
>SAG's
>webpage about Dave (kji) is funny don't you? You tell me???

No I don't think that the Castle web page is funny.It was not meant to be. I do know this. The person who put up this site does have a profound dislike for the activities that have been going on with 3950. And even the now defunk WB2OTK made mention on the air that Dave deserved what he got. And all that Kevin Strom has done is document the comments and jamming. These recordings are not libelous...I have heard many of these when they were transmitted. And after all, wasn't it Riley Hollingsworth who made mention in his letter to Vic to use the internet? Well they are-----and they are quite sucessful at it. At least they do not resort to PEE GIFFS that were coppied from another site...I still don't understand the humor of a little man walking across the screen and peeing on a call sign.

>Funny, I hardly spend anytime "reviewing" the BS posted here by some of the
>NO
>NAME net members. Then i respond.
>

As I have stated before, there may be some folks who use aliases... I do not. It does seem to me that there are some folks who do not even listen to 3950 who just like to get in here and make all kinds of trouble......just to watch you or KJI or AF2Y get all in a tizzy.

>>I just can't understand how advertising a web site that
>>has a little man exposing himself and then peeing on call signs can be
>>funny.
>My website doesn't have that.
>I bet you would think it was funny if the callsigns were changed. Of course
>you
>would, but you would so NO right now. Had one of your homeys put it up with
>mine and the others calls on there you'd laugh at it - don't lie.

NO and sorry. The peeing man is not funny no matter what. And the use of perverted phoenetics is not funny either. My callsign is not N8Wide goober mouth. It is November 8 Wiskey Golf Mike. Yours is Kilo Kilo 7, Hotel Oscar. Not the Hoe.

>If you think i'm getting paid your the one that's cuckoo? I've heard it all
>now. Hey Steve who's paying me? The ADL, SPLC, CFR, Bildeburgers, Trilateral,
>UN, Illuminazis? Actually I get the black-op funds left over from area 51.

By the way . , it's the Illuminaties not illuminazis. I was saying that I hope you were being paid. If I made as many posts as you, I would want at least to be paid for doing so. Making posts should be profitable...l there are so many who spend time reading them....and use them as entertainment. Maybe you should contact these groups and ask for payment. The groups you mention would like

to silence the Liberty Net.

If all the exams were combined into one, there would only be one class
of license, it would be one big mother of an exam, and there would be
fewer new operators. Sound good to you?

> : Do you think it does?

> Apparently no one does since we still have elements 4 to pass (in
> addition to -another- code test to prove our

Cecil said all the testing material in ham radio is on the 3B exam, so
evidently at least one person thinks it does - contrary to any and every
indication.

Nope, that's not what I wrote "in its entirety". Here is the context
from the rest of what I wrote:

"The present testing
setup considers Morse code to be as important as everything
else in ham radio combined in upgrading from tech+ to
general, for instance."

I don't think you missed it since you said later:

> > Jim Kelley wrote:
> > > The upgrade from new Tech+ to General requires element 1B and element

The English language is not context-free, Jim, even if you would like
for it to be. You just cannot pick out an isolated sentence and argue
anything logical about it. You proved you knew the context of the
thread by reposting it. Taking things out of context is a typical
PCTA tactic. Witness the present attacks on NCI.

That's not true, Jim. Here is the context stated by me and then
restated by you. How can you forget the context of a posting that
you restated just yesterday?

Please notice the title - same as this one. I defined the context
of tech+ to general last Sunday. You agreed with that context
on Monday. This is Tuesday - same thread.

Cecil,

There exists NO context in amateur radio in which that is a true statement. Element 3B does not represent "everything else (that is tested) in ham radio combined" for the upgrade from Tech+ to General. Period. No way to fix it man. Give it up. The only way to make anything resembling that statement to be true would be to say that element 1B is equally important to element 3B. The words "equal to everything else in ham radio combined" make yours an incorrect statement.

As I said before, element 3B does not comprise all of amateur radio, testing or otherwise. Your claim, that we've listened to for far too long, is wrong. It is a complete overstatement of the truth. It is without merit. It is a lie. Your intellect is sufficient for you to understand why this is true. Therefore, you are simply being argumentative for it's own sake.

The General exam is all that is necessary. It was once all that was necessary for 100% priveleges, and there's no reason that it cannot be so again. Is knowing how to be a VE necessary to at the Extra level, when even the lowly General can be a VE? Doesn't the ARRL and W5YI instruct volunteer examiners on how to be VE's and how to proctor the exams?

I am not referring to SSB but rather A2A. Two-way A2A transmissions
on the HF ham bands are not permitted. That's why I used the maritime
bands as an example of why one would not turn their BFO off to receive
such signals. The tone is, at best, modulating the carrier at 50%.

It's still not true, Cecil. I can't understand why you want to continue
to re-post obvious falsehoods. Element 3B does not constitute
everything else in amateur radio combined for that upgrade, or for
anything else. Sorry OM.

Brian wrote:
> The General exam is all that is necessary.

From a radio-electronics standpoint, the General exam is a glorified Technicicans exam. (Hint: It's part of the same exam.) Come back when your a General or above and lecture to us about it. Okay? The Advanced exam is the meat of the amateur radio curriculum, and the Extra continues on a bit from there. You should know that since you claim to have passed them.

> It was once all that was necessary for
> 100% priveleges, and there's no reason that it cannot be so again.

Is there something to be gained by throwing out the only Part 97 manifistation of the rules which provide for advancing skills in the communication and technical phases of the art?

> Is knowing how
> to be a VE necessary to at the Extra level, when even the lowly General can be a
> VE?

As I recall, only about 5 questions on the Extra exam related to rules and regulations - including VE questions. Nice try.

You're pulling my leg, right, Jim? Isn't element 3B the general class written exam which is taken from the general class question pool which covers everything else in ham radio that is tested for the general exam except for Morse code?

> As I said before, element 3B does not comprise all of amateur radio,
> testing or otherwise.

But we were talking in context specifically about upgrading from ***tech+ to general***. You even repeated that boundary condition in an earlier posting. You cannot wiggle out of it. Element 3B is taken from a question pool that comprises everything else besides Morse code that is tested for the general class exam. That's all there is - there ain't no more.

You are denying reality, Jim. One must pass the 13wpm Morse code exam.
One must pass the 3B written exam. That's all one has to do to upgrade
from tech+ to general. Therefore, except for the Morse code test, element
3B is everything else combined in ham radio that a tech+ must know
to upgrade to general. Denying that fact is ridiculous.

Dear Cecil Moore, W6RCA

I'll put this in really simple terms, once again, so that you can understand (hopefully you will try, and please refer back to your original statement). Contrary to what you have repeatedly said here on the newsgroup, element 3B does not comprise everything (other than Morse code) in ham radio combined.

Is everything in ham radio combined (aside from code) covered on the General written exam? If not, then your statement, as written, in any context, is incorrect. That fact cannot be any more plain to see. Here's why.

No single written exam contains "everything" in amateur radio. Element 3B contains only what is contained in element 3B - not everything in ham radio combined. Therefore, the Morse code test can NOT be considered as important as EVERYTHING else in ham radio combined. Element 1A is considered to be only as important as elements 2 and 3A for Tech+, element 1B is only as important as element 3B for General, and element 1C is as important as element 4B for Extra. But code is not considered as important as EVERYTHING else in amateur radio combined. Your words, sir. Are you getting any of this yet, or do you continue to refuse to get it due to your excessive and unreasoned obstinance?

Furthermore, there are two classes of license for which code is considered to be of no importance at all, which by your reasoning would make code infinitely less important than everything else in amateur radio combined. How can it be both infinitely less important than everything and equally important to everything? I suggest to you that it is neither.

Your argument is bogus and senseless, sir.

Tim Volz, (aka KK7HO) threatens to sue other amateur
radio operators for telling the truth about his criminal
activity. His crimes include conspiring to commit the
murders of W1WCR and another amateur radio operator.
This discussion can be heard in his own words at:

http://members.xoom.com/frg9600/500.wav

What Volz fails to mention, is that any legal action
he cares to bring would include a stint for him in the
dock to answer these and other charges. There is
ample evidence of his crimes, some of which are listed
below.

This is why Volz's threats of litigation will never happen.
His threats ring hollow and amount to another KK7HO lie!

Please stop the jamming and spamming KK7HO.

Latest example of KK7HO's
criminal jamming operation:
http://members.xoom.com/_XOOM/sixisone/k5blb_kk7ho_obscenejamming_19990509_0254cdt.wav

Volz's "mean spirited badgering" of Harvey:
http://members.xoom.com/_XOOM/sixisone/volz.wav

Further info on KK7HO is at:
http://www.angelfire.com/ky/libertynet/KK7HO.html
http://x34.deja.com/getdoc.xp?AN=325442830&CONTEXT=936559274.177930328&hitnum=50

KK7HO is an embarassment to the amateur radio service.
To complain about Volz's criminal actions on 3.950, email Riley
Hollingsworth, at: rholling@fcc.gov

To complain about Volz's internet newsgroup harrassment

Jim Kelley wrote:
> Is everything in ham radio combined (aside from code) covered on the
> General written exam?

Yes it is. Everything one needs to know (except Morse code) in order to
get a general class license is contained in the 32B exam. 3B obviously
covers everything in ham radio that the code test doesn't, i.e.
EVERYTHING ELSE needed for the general ticket.

> No single written exam contains "everything" in amateur radio.

Everything one needs to know to obtain a general class license
(except Morse code) certainly is. That is all I am saying and
that is proven by the context that you agreed to yesterday, i.e.
tech+ to general upgrade requiring exactly one code exam and
one written exam.

> Element
> 3B contains only what is contained in element 3B - not everything in ham
> radio combined.

You are trying to play word games. We are talking IN CONTEXT only about the
tech+ to general upgrade. You admitted that is exactly what we are talking
about. And I repeat: Everything one needs to know to qualify for the
general class license, except Morse code, is on the 3B exam - EVERYTHING!
You are choosing to argue out of context. Old trick - doesn't work.

> Therefore, the Morse code test can NOT be considered as
> important as EVERYTHING else in ham radio combined.

Of course it is for the tech+ to general upgrade. Each exam is a stand-
alone exam. 13wpm Morse code is considered equal in importance to everything
contained on the general written exam, i.e. everything else in ham radio
that a prospective general class ham is tested for.

> But code is not considered
> as important as EVERYTHING else in amateur radio combined. Your words,
> sir. Are you getting any of this yet, or do you continue to refuse to
> get it due to your excessive and unreasoned obstinance?

Jim, You understand (and understood) the context was going from
tech+ to general requiring exactly one Morse code exam and one written
exam. Here's what I said:

"The present testing
setup considers Morse code to be as important as everything

else in ham radio combined in upgrading from tech+ to
general, for instance."

Note the qualifier: "in upgrading from tech+ to general".

Here's what you said the next day indicating that you understood that
we were talking about the tech+ to general upgrade only. Deny it all
you want. Here's your posting:

> > Jim Kelley wrote:
> > > The upgrade from new Tech+ to General requires element 1B and element
> > > 3B. For your statement to be true, element 3B would have to contain
> > > everything in ham radio besides element 1B.

And it does contain everything in ham radio that a tech+ needs to
achieve general status, except for Morse code. My statement is still true.

The general exam was the hardest I took. I flunked it the first time.
The advanced was trivial. 'Course that was 25 years later after a
EE degree.

3122. Meteor Observations, Finding Transmitters

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-16 00:00:00 UTC
From: Wayne Watson <mtn_view@sirius.com>
Message-ID: <38324DAC.C0C7655A@sirius.com>
Source record: 127420

Here's a cute little puzzle for you. To do radio meteor observation work via shortwave (HF) radio,
one needs to know a reasonable xmitter some 150km distant that is not beyond a signal skip distance.
The idea is to tune to it and then put some nice meteor detection software called r_meteor to work
to detect the presence of meteors. Here's a segment of the s/w Help file from r_meteor that talks
about choosing a station:

==========
The disadvantage of short-wave signals is that they are often strongly reflected by the ionosphere.
As a result, care must be exercised in choosing a transmitter which is, in radio parlance, 'inside
the skip distance'. This implies that, at the operating frequency, the transmitter is too close to
allow 'sky-wave' propagation (too acute an angle of reflection at the ionosphere) but too far to
allow 'ground-wave' propagation (by line-of-sight or terrain diffraction propagation). The former
limit is strongly frequency-related and depends on the time of day and the properties of the
ionosphere (linked to sunspot levels) while the latter is weakly frequency-dependent but typically
demands a range greater than about 150 km at short-wave broadcasting frequencies.

If you have trouble identifying suitable short-wave transmissions that are located within the skip
distance, your local radio amateur (radio ham) club may be able to advise. An up-to-date list of
broadcasting stations (as well as utility stations) on CD-ROM is available from Klingenfuss
Publications, Hagenloher Str.14, D-72070 Tuebingen, Germany. The CD-ROM comes with search software
which makes identifying a suitable transmitter a simple matter.
==========
The real question is is there some sort of software or books that would tell me what stations in my
area I should tune to for a signal that is some 150km or more distant? I'm at 39.296 deg. north,
and 121.015 degrees west.

I noted with some interest on the latest "Enforcement Log" program by Riley Hollingsworth (available at http://www.rainreport.com) that an amateur, to be named next week, located in Glendale, West Virginia, was just cited for intentional interference and broadcasting.

One of the most foul-mouthed and vituperative individuals in the radio newsgroups, and also one of the most strident in his defense of known jammers on amateur radio, is a licensee whose address in the QRZ database is in that city.

Could it be that KC8JBO, Roger Wiseman, has been caught in the act?

With hope,

Kevin, WB4AIO.

Nope, I didn't. I haven't changed my opinion at all. Yesterday I said the sun was out. Last night I said the sun was not out. You would choose to leave out the context of whether it is day or night and accuse me of denying something. Old trick, doesn't work.

> Now you say it again. Your mind has
> evidently enabled you to produce high scores on an IQ test. But
> indications are that somethin's definitely broke in there, Cecil.

You keep trimming out stuff trying to hide the context, Jim. The context is and was the general class exams being taken by a tech+. "Everything in ham radio combined" that a prospective general needs to know, except for Morse code, is on the general class exam. Please stop misquoting me and trying to change the context.

Here, let me state it again. "Everything in ham radio combined", except Morse code skill, that a tech+ needs to know when upgrading to general is on the general written exam taken from the general Q&A pool. Therefore, when upgrading from tech+ to general, Morse code is considered equal in importance to "everything else in ham radio combined" that a general is expected to know to pass the written exam.

All the obfuscation in the world cannot change that fact. When the general code requirement is reduced to 5wpm, it will no longer be true. But it will then probably be true for the general to advanced upgrade.

Acutally, in most of the equipment I have measured, it appears to be
down about -50 to -60 dB. If one presumes the audio tone to be
somewhere <2 kHz, one can presume that any such weak signal near the OOK
CW tone is a supresssed carrier, but some of the mixing products that
abound in modern rigs can also be +- 2k from the desired signal. Even
if it is down -40 dB from an S9 signal, and the resultant -113 dBm
signal can be detected from over-the-air signals, not all analyzers are
capable of detecting down to -113 dBm. Heck, some inexpensive receivers
I have seen are not capable of -113 dBm. :-)

: >: such signals.

: >I said nothing about two way conversations.

: Then we're talking apples and pineapples; my contention has been that
: 2-way MCW (A2A) is not permitted on the HF ham bands. That's why I
: gave the marine band example. We didn't turn our BFO on and off
: and on and off and... with each reception of some transmission;
: transmissions from ships were of short duration.

You originally said that MCW is not allowed on HF or ham bands (I'm not
sure which came first). Nothing about two way conversations on either AM
or FM.

: >And even if I had, I was
: >asking why you were using a BFO to receive MCW. (Especially if the mode
: >being used was FM! :)

: FM? A2A is not FM.

MCW isn't ONLY used on AM, is is also used on repeaters to ID and as code
practice (two way, and on FM).

: >;The tone is, at best, modulating the carrier at 50%.

: >And what mode -is- a carrier that is being modulated by a tone at 50%

: A2A, which is what I think of when "MCW" is mentioned.

Fine. And you don't -NEED- to use a BFO to receive it. :)

: >And again, why would you use a BFO to receive such a mode?

: Because: Transmissions were of short duration: "XSV DE 3GML QRU? K"
: By the time the watch-stander turned off his BFO (why would he?)
[snip]

This is not a mode -requirement-, you are discussing an operator preference.

Huuuuuuu Jeff, go back to your original statement, something to the affect of, "MCW is not allowed on ***HAM*** bands". Several of us gave examples that it IS being used and I asked why you would use a BFO to receive MCW in affect on HAM BANDS since that was what the original statement was about.

: >Forgeting to turn the BFO on or off is an operator problem not a mode
: >attribute that one HAS to do it receive it. But this whole discussion did
: >divert us from the fact that MCW -is- used on HF. And has been for many
: >years.

: Not 2-way A2A (which is MCW).

MCW is *also* used on FM. A2A was not a paramater in the -original- statement. You -have- been taking lessons from..... :)

: You're thinking of F2A (and at times, J2A) while I've been discussing
: A2A.

I've been discussing "MCW" in general on either AM/FM (I excluded J2A since you DO need a BFO to receive that mode no matter what).

But you DON'T ***need*** a BFO to receive AM or FM no matter WHAT frequency you use it on [Marine/ham/.....]. :)

No I don't. I just include only those statements or responses that are inaccurate, and those to which I am addressing. I simply included your statement which disputed mine. If you don't like seeing your words come back to you, choose them more carefully.

> "Everything in
> ham radio combined" that a prospective general needs to know, except for
> Morse code, is on the general class exam.

If that's what you had written originally, we wouldn't be having this discussion. Remember that the next time you write: "The Morse code test is as important as everthing else in ham radio combined" - a statement in which there is no truth in any context.

> Please stop misquoting me and
> trying to change the context.

If you really think that's what I'm doing, then you have a bigger problem than I previously thought. Maybe time for another break in the action OM.

But the sentence before that one I said I was talking about a tech+ to
general upgrade. You trimmed out the first sentence which was the
context and then took me to task. And of course, that statement is
true in the context of a tech+ to general upgrade. In that context,
the Morse code test is indeed considered "equal in importance to
everything else in ham radio combined" on the general written test.

That's exactly what you did do, Jim. I just don't know if it was
deliberate or accidental. Look back at all my postings on the
subject. I told you over and over that you were quoting me out
of context yet you continued to do so. What do you expect me to
think?

Being a UNIX person who used USENET for nearly 10 years now, I remember the old tradition of putting newer comments at the bottom, but nowadays I realy prefer putting newer comments at the top. It really does save on scrolling. Comments at the bottom just really annoy. For what its worth, nearly all email communications in the company I work for have replies where the newer comments are at the top.

Oh, and nearly all newer UNIX newsreaders automatically quote below the line where new text is written, so I guarantee its not a Microsoft thing, but perhaps a more sensical thing.

A friend of mine is looking for a copy of an article entitled "The Perversity of Inanimate Objects" which was printed in the UK magazine "Wireless World". As far as he can remember the date of publication was round about July 1957.

I would be very glad to hear from anyone who could provide me with a photocopy of the article.

Ahh, I see. So if I were to say "On this newsgroup, Cecil makes himself appear to be the biggest fool in the entire world", that would be true even though the statement "Cecil makes himself appear to be the biggest fool in the entire world" might not be. Excellent point. 8-|

Prior to reading your informative posts, I would have thought the best way to make the point would be to simply say "Cecil makes himself appear to be the biggest fool on this newsgroup". Thanks for the logic lesson.

Don't worry about it Ed. If anyone is really interested, here is a
"little" background material to help clear the facts up.

This is a repost of a repost of a repost that I did while trying to get
Dick's mind on conversation #1. Don't let him sucker you into this morass
with his "confusion" over two separate conversations (both started by
him). If you care to take the time to read this long repost you will see
that I NEVER asked him to listen to a signal 40 dB below S0 as he keeps
insisting. In fact, I asked him to repost the article where he got the
idea that I did (he never did of course).

He's just trying the big (may I say this) *LIE* and hoping that -someone-
will back him up. So far NO one has because I never said it. Why would I,
most of us know you can't hear 40 dB below S0 with normal ham equipment
and there's no reason why I would expect him with TWO spectrum analyzers
(maybe in series :) to do it. But I would expect him to be able to see 40
dB below *0* dBm etc. but alas, he can't seem to be able to type the
words that he can.

Let it drop Dick. You know you can detect the suppressed carrier, but are
just to mule headed (and part of a farm animal) to admit it! :-)
.....

Thu, 19 Aug 1999 22:46:11 Re: When Will The Fat Lady Sing?
dixie@townsqr.com babled:
;James Rosenthal wrote:
[snip]
> Why is that? I can detect two signals 40 dB different in level if one of
> them is S-9 even with my receiver. I am still amazed that you can't
admit
> that you can too! (Just say, "Yes I can too".)

; The signal level under discussion was S-0, no movement of the meter
;whatever, and YOU took it upon yourself to change it to S-9! No one said
;anything about not being able to find a signal that was 40 db below S-9

;but you!

Dick,
CAN YOU COPY TWO SIGNALS 40 dB APART IN LEVEL IF ONE OF THEM IS A S-9?
Can you STILL do that if the signal generator is a SSB transmitter being
modulated by a single tone (set to S-9 on your monitor)? Please notice
that I haven't here or *ever* asked if you can do this with the reference
level signal set to S-0.

1. Stand up, I don't want the blood circulation to your brain to be
restricted.

2. I will -again- post the major parts of our "debate" to *AGAIN* attempt
a reboot of your memory bank. (Although it appears that the core(s)
refresh line may be disconnected.)

In the re-posts you will find pieces of conversation of;
#1. You challenged "anyone" to determine if a PSK signal was being
generated by a SSB transmitter or not.
--> THAT IS THE ONE THIS IS **ALL** CONCERNED ABOUT! <--

#2. At a slightly later date you started **ANOTHER** conversation about
not being able to copy a weak PSK signal but you -could- copy the ID.

I AM, AND HAVE BEEN TALKING ABOUT THE FIRST (#1) CONVERSATION. You very
conviently always talk about the 2nd one because you are too stuborn to
admit that you made a mistake in the FIRST (#1) conversation and it *IS*
possible to determine if a signal is coming from a SSB transmitter under
the conditions *you* defined (NONE). I then set up the condition that the
single tone (PSK in the situation you set up) was at a level of S-9 so
it would be possible to hear or see the suppressed carrier of the SSB
transmitter (either on another receiver or a spectrum analyzer).

A week or two LATER you posted ANOTHER coment (nothing to do with #1) that
you were unable to copy a PSK signal but could copy the ID (conversation
#2). And since that date you have "confused" the two conversations as a
way of diverting the fact that it -is- possible (I gave several different
ways to do it) determine if a PSK signal is being generated by a SSB
transmitter (conversation #1).

;After, all, that's about S-2+. The most deaf receiver in ham radio can
;copy that.

So what's YOUR problem then? Why do you say it takes an engineer and a
spectrum analyzer to DO it? (Especially since YOU have TWO analyzers!)

; *I* was discussing the PSk31 signals I had been monitoring that were
S-0
;and of which I could not lock and print the PSK31 but I COULD copy their
;morse code ID.

(This is conversation #2 again.) You must not be standing yet!
THERE WERE TWO (2) *DIFFERENT* CONVERSATIONS GOING ON.
Think #1, #1, #1, #1.....

; SO you just decided arbitrarily to change the signal levels to S-9!

No Mr. Hard Head, that was a ->CONTINUATION<- of the FIRST (#1)
conversation. Can't you separate them in your mind? It's easy #1 and
#2 are TWO (2) ***DIFFERENT*** conversations. Think #1, #2, #1, #2.......
Now concentrate on conversation #1, that's the one we've been in for 5
months!

;It's all there in dejanews for anyone who wants to look it up.

I'll even make it easier, part of it is below (again-again).

;I'm tired of wasting time with screwballs like you.

Try to remember which conversation we are talking about and you won't
appear to be so screwy.

;W0EX
What happened to your friend el "ex-"ismo ?

The following is a review of some of the posts;
//
/// This one is your intial challenge to determine the transmitter type.
\\\
****
Mon, 08 Mar 1999 23:56:06 Re: PSK the true(r) power levels

dixie@townsqr.com wrote:
;James Rosenthal wrote:
> Dick Carroll (dixie@townsqr.com) wrote:

;Anyone encountering a PSK31 carrier on the air without
;knowledge of how it was being generated hears a carrier,
;and could not determine it to be SSB-based. It *IS* a
;modulated carrier.

(Anyone? Please notice at this time you haven't added the "modifiers"
which I'm sure are to come after you read this.)

There you go again, don't you ever learn to stop using all inclusive
words? Watch, I will blow your WHOLE argument away because I can find a
-single- example of how I can tell the difference!

HOW? You look at the spectra of the signal and you can SEE the original
SSB suppressed carrier! It's only going to be ~35 dB or so down from the
main bang. If necessary, I can always narrow the B/P of my detection
system WAY down because the carrier is continuously on the air at one
discrete frequency. Think "intercept receiver", it's built in. Just as
you can tell who is operating (manual) CW by listening to their fist,
a signal is also identifiable by it's "carrier" signature.

; ANY continuous waveform upon which modulation rides is a carrier.
; Tough stuff, OB but that's the way it is.

The tone you "hear" is NOT the *original* "carrier" if generated by a
SSB transmitter. The carrier in a SSB generated RF signal is STILL

riding along with what you hear. What do you call THAT signal? Sure it is ~37 dB down. If the other guy is runing 59+, that signal may very well be audible at your quite location. Certainly in your non-modified very first statement, down the block from a SSB transmitter site.

;The means by which the carrier is generated is immaterial.

So is a "small" (-35 dB) nail stuck in your foot!

;It shouldn't take an old Fort Monmouth hand to tell that to a great
;engineer.

Were you based in that building right next to where they fired the howitzer shells down the measuring range? Rather loud to say the least. I was impressed with how -small- the V-2 rocket was.

;Your SSB carrier is long gone, previously filtered and *replaced with a
;heterodyned signal that becomes the carrier*.

Not true, the "real carrier"(c) is only suppresed, NOT -replaced- nor -eliminated-. It is STILL right there where it always was. If you are runing 1 Kw output on -your- fake carrier, the "real carrier"(c) is also being *transmitted* at a 100 mW to 1 watt level. Even a 1/2 watt makes a pretty good CW QRP rig doesn't it?

;By your definition all OOK CW issuing from a SSB-capable transmitter is
;also SSB. Nonsense.

Nonsense? Only if you don't want to admit that the signal being transmitted is *generated* by a SSB transmitter. The fact that the tone is switched ON/OFF at a Morse encoding rate doesn't change the situation.

; You could just as well generate an on-frequency signal and
;phase modulate it for PSK31, then key it for CWID. You'd
;have identical results, but a much more complex system of
;signal generation, at RF instead of audio frequency.

I agree, but THEN the "tone" would *be* the carrier because, as you said, it is the "on-frequency signal". *That* is the subtle difference Dick.
~~~~~~~~~~~~~~~~~~

....
The above is part of the original posting you made! That post included my
first "-40 dB below S9" statement and subsequent postings were in
relation
to demonstrating that even YOU could determine if a PSK signal was sent
by
a SSB transmitter. I gave three different methods of doing just that. And
you reluctantly agreed with me at the time. Nothing about you digging

around in the noise. So I'll ask AGAIN, why are you (still) bringing the subject up?

So may I suggest **YOU**
;Look it up- it's all there.

;Am I surprised you continue your ridiculous line?

Is it ridiculous to expect someone to remember what the subject of a conversation is? Especially so with Deja News (and being able to save the conversation as you are having it via computer).

;Of course not! You wouldn't have started it if you were gonna back out
;of it later!

Huuuu? Actually Dick, it's been OVER for almost a month now until
YOU
brought it up AGAIN!!

;You would do well to understand what you are trying to criticise before
;stepping off the end of the pier....

;Dick C

You would do more better to *remember* -what- we are talking about and staying on subject! The 40 dB down conversation was not about [me] "CONVERTED MY WEAKSIGNAL SITUATION TO A S-9 SIGNAL SITUATION", it was in relation to determining if a PSK signal was being transmitted by a SSB transmitter.

So take your Prozac and have a nice nap.
--
Jim Rosenthal, WA4STJ

//
And here is an example of a post where Dick refers to his "WEAKSIGNAL" PSK experience and starts claiming that -I- said he should be able to hear a signal 40 dB below S-0 (which I never did).

Think Dick, if *YOU* know a signal 40 dB below S-0 can't be heard with your
RECEIVER, why would I as an RF engineer with >40 years experience expect
YOU to do it! That's why I kept saying set the single tone PSK modulation of the *SSB* transmitter to S-9 and listen for the suppressed carrier (~40
dB down) with the modulation removed (on your receiver in one example, with
a spectrum analyzer in another etc)! You kept claiming that the suppressed carrier was "*completly* eliminated" (and couldn't be found).
.....
In the following post Dick states his PSK experience, basically CONVERSATION #2.

[snip to 40 dB stuff]

: As for you---you fit right in with Cecil...any engineer
: who insists that a signal 40 dB down from S-ZERO can be
: easily found is a complete idiot if he thinks that all hams
: are dumb enough to swallow that.

Please re-post where I said "40 dB down from S-ZERO". I distinctly
remember always giving S units that were 40 dB different with the lower
unit >>S1. I typically used "S9" as the higher reading.

*>>> Dick never re-posted that. (Because I never said it.) 8/20/1999

To use similar terms as you just did (above), I think YOU have been
"dumbed down" if you think you can fool people into believing I said 40 dB
below S-ZERO. What I/we DID say is right there in Deja News for anyone
caring to look.

This is an illustration of why people sometimes call *you* a lier(c).

; Yeah, there are undoubtedly
: plenty of them within No Cajones International who won't
: know better, to be sure... So tell us, Sir Engineeeer, just
: how many microvolts is an S-ZERO signal, HUH James???

I have no idea what "S-ZERO" is on *YOUR* receiver. Ship it to me and
I'll measure it for you at $xx/hr. (2 hrs minumum charge, plus
handling/shipping/insurance etc.)

How do you know the signal wasn't -really- S minus 1 or 2? Since the S
meter stoped "reading" when it got to zero.

: That is, after all the level of the weak signals I was copying on
: PSK31, and the entire object of the conversation at the time
: you made your testosterone-laden "ass-ertion".

Great, do you think you could ALSO copy a signal 40 dB STRONGER than that
"S-0" signal? *THAT* was the object of the conversation we were attempting
to have. Remember when you gave us a lecture on "S" units and 40 dB would
be 6.6667 units higher? So on your absolutely calibrated S meter, can you
-also- copy a signal at S 6.6667?

: Dick C
--
Jim Rosenthal, WA4STJ

//

Dick a simple question: (IN RELATION TO CONVERSATION #1 - #1 - #1 - #1)

Can you copy the suppressed carrier of YOUR *own* transmitter with another
receiver with the no modulation being applied to the transmitter? If the answer is "yes" then my example(s) that one can determine if a signal is being generated by a SSB transmitter sending PSK is true.

If the answer is "no" then it is more than obvious that you just want to keep the NG hopping for your own amusment OR you need to get your other receiver repaired.

Your (reluctant) friend,--
Jim Rosenthal, WA4STJ
.....

Anyone have any doubt if I ever asked Dick to listen 40 dB below S"0"???

Jim R.

Well it doesn't 'work' for a lot of us regardless of the time-honored tradition'. I get no joy wading through several requotes trying to dig out the most recent reply. Having the reply first puts it right there to easily read no hunting involved. The other way you mention is not better..it is a paradigm.

Question: Even if all of the things the B.A.R.F is telling me about this conflict are true, it is just old history and needs to be put aside. Why can't the B.A.R.F. just forget about the past and go on with its Ham Radio life? Doesn't the B.A.R.F. think that this whole affair has gone way too far?

Answer: I wonder. would you feel the same way if it was your license that had been put in jeopardy by a hate group that refuses to discuss the possibility of a negotiated settlement? I wonder. would you sit back and calmly watch while a cabal of money chiselers concocts a false indictment that eventually costs you your honest livelihood? I wonder if you would put up with having your radio life. and your private life. destroyed by hired goons who get their orders directly from Net Headquarters in Clearwater? Maybe you would.

I don't know you at all. and I have no way of knowing how you might react to injustice and foul play. If the "Nets" had perpetrated this conspiracy on you (simply because they could not deal with the truth), would you have run into hiding like a scared rabbit? After reading some of your other comments. I have a hunch that you just might be in there battling for what you think is fair and true. right up to the final hour.

The B.A.R.F. stands by its membership no matter what the odds. When we are wrong. we admit it, apologize, and move on. We all make mistakes in judgment. and sometimes even mistakes in our actions. That is a part of being mortal human beings. However, when we are right. and we know we are right. and there is no other available alternative but to fight on. then fight on, we shall. regardless of the cost.

The B.A.R.F understands that the life of one solitary, innocent, soul. far away in the American Virgin Islands. means but very little to the vast majority of Hams. Everyone has their own troubles to worry about. paying the mortgage. putting the children through college. and, most importantly, maintaining good and wholesome relationships in the family. Perhaps the B.A.R.F. is not for everyone. We accept that possibility as an exercise of personal choice and good conscience. But, please do not ask us to abandon the principles that we hold most dear based upon the conjecture that a few of our frequencies might become slightly less chaotic.

Right now. KV4FZ rarely operates more than a few hours a week. The B.A.R.F. is seldom mentioned or discussed over the air. And what do we have? We have bedlam and jamming that is worse than it has ever been before now. Does anyone really believe that quenching a centuries old evil desire for a scapegoat will calm our troubled bands? Of course, it will not.

Yet, that is what we always hear from the "Nets": "Just get rid of Herbie and everything on the bands will be just fine!" Sure. Sure it will. Nobody will ever again challenge the practices and ethics of the "Nets", right? Nobody will ever again be the victim of another "Net" vendetta, right?

Next time. it could be you. or me. or some other plain, garden variety Ham, who shows enough courage to speak up and tell the "Nets". "What you are doing is wrong. and it needs to stop!" All this notwithstanding (regardless of what has transpired in the past. or even what is being perpetrated today, right now) the B.A.R.F. remains committed to a negotiated settlement of this clash. The B.A.R.F. repeats, once more, its challenge to the "Nets". name the time and place. agree to mutually acceptable referees. and the B.A.R.F. will be there. prepared to accept a mutually satisfactory, negotiated compromise. But the hate campaign against KV4FZ. his family and friends. and anyone who dares to challenge the "Nets" must immediately be suspended. What more can the B.A.R.F. offer?

I thought it was more in context of the CW test being as/more important than
the rest of the test(s), since you can NOT fail that portion of the test
for any class and get a license. But you can fail..........

I was totally sold on Prodigy which of course is a pay ISP, but tried Alta Vista,didn't care for the style of banner ads. then tried NetZero, same results, then tried World Spy, which has NO BANNER ADS but had trouble logging on and logging off and usually had to restart computer after a session, took it off and tried Freei.net which is great. Has a banner ad but is unobtrusive, every thing works great. I think this will be my regular ISP, also has regular POP3 mail also.

Howdy,

We are looking for a way to contact the 400 or so U.S. Leap Day Baby Hams out there. Use to be you could use a qrz or similar database search of the birthday and there you have it. But, now what do we do. Would appreciate anyones help in figuring this out with the old database or some clever way to get something fresh. Figure one in one thousand four hundred and sixty into 600,000 hams. Be cool if we could get the international database as well. Your thoughts will be appreciated!
Someone had actually compiled a list in the past, but all sorts of search engine time and no results....

thanks in advance if you have some ideas.

Youngblood, did you really have to pay the FCC 2.5K as a result of your meddling, instigating, horrendous on-the-air behavior, lying, jamming, reading police reports, financial disclosures and everything else that classifies you as a Herbie-sucking schweinhund or were you just satisfied having received a plethora of warnings from Riley Hollingsworth? By not taking you off the air for long period of time, Riley sent a mixed instead of a clear cut message which said that obnoxious slobs like KT4TR WOULD BE TOLERATED. Furthermore he sent another unclear message intimating that it's okay for some hams to cut up some hams but not alright for those same targeted hams to defend themselves by cutting up the instigators and you and Queenie and the Long Island Rabbi and stupid Joe from Barnwell and the Eagle Rocket Scientist are prime examples of Riley's folly. And if you had any guts in that ugly frame of yours you'd put your name and callsign behind your ratty postings instead of hiding behind the apron skirts of "hammer007." AF2Y, Doc, said that!

To exhume the bones of an old but very contentious thread,
he insisted that he could find the "carrier" (pre-mixed)
frequency -on the air- of such a signal that was received at
a signal level of S-0 (zero). When I protested(I had said he
as an engineer might find it find it with his spectrum
analyzer), he arbitrarily enhanced the signal level to S-9.
Then he criticised my technical abilities by insisting
that I had said one couldn't find the original carrier
(oscillator) signal from that S-9(ssb generated) signal off
the air with a spectrum analyzer.
Lame, very lame, in the extreme.

Hi, Chip,

Let me add that such efforts extend well past Part 97. Although about 2000 hams and organizations filed comments with the FCC wrt the restructuring NPRM, how many filed comments with respect to the FCC's Notice of Inquiry and followup NPRM on Part 15 devices and limits? The League carefully watches all FCC rulemaking activity and offers comments and influence on anything that could affect Amateur Radio.

Such efforts extend past the formal rulemaking process. ARRL staff and officers have contacts throughout the FCC at the staff level. Just as one example from my work, a few years back, when the FCC was rewriting their material on RFI, I worked closely with Tom Hora, the FCC staffer who led the team who wrote the book. The result, seen at http://www.fcc.gov/cib/Publications/tvibook.html, says the "right" things about RFI and Amatuer Radio.

Such efforts extend well past the FCC. ARRL represents the interests of Amateur Radio on various "industry" commmittees such as the IEEE SCC-28 (RF exposure standards), ANSI C63 (RF Interference) and a few others. It also maintains formal and informal liaison with industry through the Society of Cable Telecommunications Engineers, the Home Phone Networking Alliance, etc. Again, drawing on my own work, note the opening lines on the RFI pamphlet published at http://www.cemacity.org/gazette/files/whattodo.htm or the results of work in progress documented at http://www.arrl.org/tis/info/rfiteljx.html.

As long as the League keeps funding this sort of activity and does it reasonably well, I, too, will pony up my dues dollars every year. I have my disagreements with ARRL actions from time to time, but I feel that, overall, the organization does a lot of important things that need support. If they stop those important things, I am outa' here. :-)

Automotive Fuel-Pump Noise

Q: I just bought a new car and installed my HF amateur transceiver in it. I followed the manufacturerï¿½s installation guidelines and everything is working out okay, except that when I turn on the engine, the noise level on every ham band goes up. The problem is very bad on 80 meters, about S7, but it is still S3 on 10 meters. The noise does not vary with engine speed and sounds the same across all bands. What causes this?

A; There are a lot of things that can generate noise in automobiles, but the symptoms you describe sound like they are being caused by a noisy electric motor. Other possible noise sources are ignition noise and computer noise (most cars nowadays have computers controlling most engine and vehicle functions). Ignition noise is an ï¿½impulseï¿½ noise, and at low engine speeds it would exhibit a ï¿½pop popï¿½ sound. At higher speeds, this would change into a low-pitched whine. Alternators can exhibit a similar whine, but in both cases, the noise would vary significantly with motor speed. The computers used in modern cars can also generate noise, but much like home computers, the noise tends to consist of various birdies, bleeps and buzzes that definitely vary as the receiver is being tuned. The fact that the noise is constant across each amateur band and does not vary with engine speed points toward a small electric motor as the noise source.

Most motors in vehicles operate intermittently. If the noise occurred only when you ran your windshield wipers, for example, you would suspect the wiper motor instantly. In most modern vehicles, the fuel pump is electric and it runs continuously as the motor is running. In most cases, this type of continuos noise is caused by the fuel-pump motor. It could be caused by other motors in the car, but the fuel pump is the most likely suspect. There is one test that you can perform that is diagnostic: Leave the car sitting overnight. With the vehicle off, urn on the HF receiver and adjust for normal reception. Then, turn the ignition switch on, without starting the car. If the noise appears for a second or two, then disappears as the fuel system pressurizes, the fuel pump is the source of the noise.

The bad news is that the fuel pump is generally located inside the gas tank. This usually means that this is not a job for a backyard mechanic. Some automobile manufacturers know about this problem. They

have issued service bulletins that cover adding a filter inside the tank to cure fuel-pump RFI. Ford, for example, has published a bulletin, appended to the end of this message.

In the Ford TSB, the filter is installed inside the gas tank, with series inductors and parallel capacitors for each lead. Ford does not offer that this technique will work on any other vehicles.

If you have a fuel-pump noise problem, the place to start is with your dealer or automotive service person. They can determine if there are any service bulletins that apply to your car. This is especially true if your car is out of warranty. In all cases, all work on vehicles should be done by people who are qualified to do the work and who are familiar with the vehicle.

The ideal place to install the filter is right at the pump, which is inside the fuel tank. It is electrically possible to install the filter on the leads where they enter the tank, but if the tank is not well shielded, electrical noise could still be radiated by the leads between the filter and the motor. On lower HF, however, this radiation will be minimal and it may be possible for your dealer to install filters to the wires external to the gas tank.

Hams have reported various degrees of success using various filtering techniques. In some cases, ferrite inductors have been added to both wires feeding the fuel pump. It is usually more effective to use a separate choke for each wire. In general, at upper HF, one of the split bead types can be used, with a couple of turns of wire on each bead. At lower HF, it will be necessary to use a ferrite toroidal core, perhaps an FT-140-43, with at least 10 turns of wire. In addition, it may be necessary to try a 0.01 uF capacitor across the two wires, perhaps on each side of the chokes. Some have reported good results using just the capacitors. There are also mechanical considerations, too. Splicing wires can result in mechanical failure, or corrosion, with the result being a motor that will not run (these things seem to happen at the worst possible times!). In addition, heavy chokes or capacitors can vibrate as the vehicle goes over bumps, ultimately causing the wire to fail.

One last possible solution may involve replacing the fuel pump motor with an aftermarket electric fuel pump. The aftermarket pump may be less noisy and it may be easier to add the appropriate filtering to the external wires. These aftermarket pumps are usually installed external to the gas tank. It will still be necessary to remove the in-tank fuel pump, but once this is done, the external pump can be easily maintained. Your auto parts supplier should be consulted to determine which ones can be used in your car. Unfortunately, ARRL doesnï¿½t have any information about which ones are electrically quiet.

ARRL also wants to stress that any cure should be applied only by qualified repair personnel; gas tanks are not places for the backyard mechanic.

1998 Navigator

The Problem:
Electrical noise on radio speakers caused by in-tank electric fuel pump.
The Fix:
Installaition of an RFI filter (Part No. F1PZ-18B925-A) on the fuel pump inside the fuel tank. *Note: some light trucks may require one RFI on each fuel pump on multi-tank vehicles.
Test Procedure:
Fuel pump radio noise is relatively constant and changes only slightly with vehicle speed. If the frequency of the noise varies, or the noise

comes and goes with vehicle speed, then it is NOT the fuel pump, and this fix will not be effective. Use the following procedure to determine if the fuel pump is the cause of the radio noise.
1. Turn the radio on.
2. Turn the ignition key to the RUN position, but do NOT start the engine.
3. The fuel pump should run for about 1 second with the key in the RUN position with the engine not running. Listen for noise in the radio. If the noise is present while the pump is running, and stops when the pump stops, then the noise is being generated by the pump and this procedure should help.

Tim Volz is not going to sue anyone for an even more basic reason. He can't afford to. The only Court of Competent Jurisdiction for interstate disputes is the Federal District Court and there is simply no way Tim could afford to go there. Even is Tim could prevail in such an action--and he could not--none of his tormentors have sufficient resources to make such an action practical. As to a competent attorney taking such a case pro bono I'm laughing so hard it hurts.

Bottom line, Tim's threats of legal action are like the rest of what he says, Codswollop. BTW Tim trying to shout down someone on the radio is malicious interference and that is exactly what it was Saturday night when you tried to shout down that fellow who referred to a URL you are fond of posting.

Tim you are a lowlife lying jammer and an embarrassment to the human race in general and amateur radio in particular. Would you like to sue me now?

11 Nov 1999 15:36:57 PST
From:
"Chris Knight" <c_knight56@hotmail.com>
Organization:
Knight Industries
Newsgroups:
alt.shenanigans

A few days ago, i discovered this article within a newsgroup. This article
assured me I could wasily make thousands of dollars within weeks. The
article stated that all I had to do to get these results was send $1.00 to
each of the six names given within the article. I would then add my own
name and address at the bottom of this list (at position number 6) and post
the article in a minimum of 200 newsgroups. By the way, there are thousands
of newsgroups.

So after thinking it over, and talking to a few people first, I thought
about trying it. I figured what have I got to lose except 6 stamps and
$6.00, right?

Like most of us I was a little skeptical and a little worried about the
legal aspects of it all. So I checked it out with the US Post Office
(1-800-725-2161) and they confirmed that it is indeed legal!

Then I invested the measly $6.00...plus postage... well GUESS WHAT!!...
within 7 days, I started getting money in the mail! I was shocked! I still
figured it would end soon, and didn't give it another thought. But the
money just kept coming in. In my first week, I made about $20.00 to $30.00
dollars. by the end of the second week I had made a total of over $1,000!
In the third week I had over $10,000.00 and it's still growing. This is now
my fourth week and I have made a totoal of just over $42,000.00 and it's

still coming in rapidly...

It's certainly worth $6.00, and 6 stamps, I spend more than that at McDonald's!

Let me tell you how this works and most importantly, why it works... so,

make sure you print a copy of this article NOW, so you can get the information off of it as you need it. The process is very simple and consists of 3 easy steps:

Step 1:
Get 6 separate sheets of paper then write the following on each: "Please

put me on your mailing list."

Now get 6 US $1.00 bills (or equivalent in your local currency) and place
ONE inside EACH of the 6 sheets of paper so the bill will not be seen through the envelope to prevent thievery. Next, place on paper in each of
the 6 envelopes and seal them. You should now have 6 sealed envelopes, each
with a sheet of paper stating the above phrase, your name and address, and a
$1.00 bill. What your are doing is creatign a service by this. This is absolutely legal! Mail the 6 envelopes to the following addresses:

#1 Kevin Brooks
PO Box 309568
Denton, TX 76203

#2 Yaw Bonsu
1113 Abrams Rd #174
Richardson, TX 75081

#3 Karina Gomez
10770 NW 40th St
Sunrise, FL 33351

#4 T. Smith
2769 Jester Lane
Columbus, OH 43231

#5 S. Moss
13803 108th AVE NE
Kirkland, WA 98034

#6 O. Salinas
P.O. Box 270962
Dallas, Texas 75227-0962

Now take the #1 name off the list tha tyou see aboe, move the other names up
(6 becomes 5, 5 becomes 4, etc...) and add Your name as number 6 on the list.

Step #: Change anything you need to, but try to keep this article as close
to original as possible. Now, post your amendee article toa t least 200
newsgroups. Remember, there are tens of thousands of newsgroups and more

are being added every day! All you need is 200, but the more you post the
more money you make!

That's it! all you have to do is jump to different newsgroups and post away,
after you get the hang of it, it will take about 30 seconds for each
newsgroup!

**REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL
MAKE!!
BUT YOU HAVE TO POST A MINIMUM OF 200**

That's it! You will begin receiving money from around the world within
day's! You may eventually want to rent a PO Box due to the large amount of
mail/money you receive. If you wish to stay anonymous, you can invent a
name to use as long as the postman will deliver it.

JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT

P.S. Don't know How to post in the newsgroups? Well do exactly the
following
below:

DIRECTIONS - HOW TO POST TO NEWSGROUPS
1. You do not need to re-tup this entire letter to do your own posting.
Right mouse click somewhere in this document and then click on
"select-all". At this point the entire letter should be highlighted.
Then,
from the
'edit' pull down menu at the top of you screen select 'copy'. This will
copy the entire letter intot he computers memory.

2. Open a blank 'notepad' file and place your cursor at the tope of the
blank page. From the 'edit' pull down menu select 'paste'. This will
paste
a copy of the letter into notepad so that you can add your name to the
list.
Remember to eliminate the #1 position, move everyone up a spot
(re-number
everyone else's positions), and add yourself in as #6.

3. Save your new notepad file as a .txt file. if you want to do your
posting in different sittings, you'll always have this file to go back
to.

(NETSCAPE USERS)
1. Within the Netscape program, go to the pull-down window entitled

'Window', select 'Netscape News'. Then from the pull down menu
'Options',
select 'Show all news groups'. After a few moments a list of all the
news
groups on your server will show up. Click on any news group you desire.
From within this news group, click on the 'TO NEWS' button, which should
be
in the top left corner of the news groups page. This will bring up a
message box.

2. Fill in the subject. This will be the header that everyone sees as
they scroll through the list of postings in a particular group.

3. Highlight the entire contents of your .txt file and copy them using
the same techniques as before. Go back to the news group 'TO NEWS'
posting
you are creating and paste the letter into the body of your posting.

4. Hit the 'Send' Button in the upper left corner.

(INTERNET EXPLORER USERS)
1. Go to news groups and select 'Post and Article'

2. Fill in the subject. This will be the header that everyone sees as
they scroll through the list of postings in a particular group.

3. Highlight the entire contents of your .txt file and copy them using
the same technique as before. go back to the news group 'TO NEWS"
posting
you are creating and paste the letter into the body of your posting.

4. Hit the 'Send' Button in the upper left corner.

(E MAIL USERS)
1. Start by e-mailing people that you know personally.

2. Go to any e-mail database and search under e-mail addresses. (There
are thousands of them!) E-mail everyone that you can.

THAT'S IT! All you have to dod is jump to different news groups and post

away, or e-mail it and after you get the hang of it, it will take about
30
seconds!

THE MORE YOU DO , THE MORE MONEY YOU WILL MAKE
That's it! You will begin receiving money from around the world within
days! Again, you may eventually want to rent a PO Box due to the large
amount of mail you receive. if you wish to stay anonymous, you can
invent a
name to use, as long as the postman will deliver to. Now the Why part:

Out of 200 postings, say I receive only 5 replies (a very low example).
So

then I made $5.00 with my name at #6 on the letter. Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at #5 and only 5 persons respond to each of the original 5, that is

another $25.00 for me, now those 25 each make 200 MINIMUM posts with my name at #4 and only 5 replies each, I will bring in an additional $125.00! Now, those 125 persons turn around and post the MINIMUM 200 with my name at #3 and only receive 5 replies each, I will make and additional $626.00! OK, now here is the fun part, each of those 625 persons post a MINIMUM 200 letters with my name at #2 and they each only receive 5 replies that just made me $3,125.00!!! Those 3,125 persons will all deliver this message to 200 news groups with my name at #1 and if still 5 persons per 200 news groups react I will receive $15,625.00! With a original investment of only $6.00! AMAZING! And as I said 5 responses are actually VERY LOW! Averages are probable 20 to 30! Let's put those figures at just 15 responses per person. Here is what you will make:
at #6 $15.00
at #5 $225.00
at #4 $3,375.00
at #3 $50,625.00
at #2 $759,375.00
at #1 $11,390,625.00

When your name is no longer on the list, you just take the latest posting in the news groups, and send out another $6.00 to names on the list, putting your name at number 6 again. And start posting again. The thing to remember is, do you realize that thousands of people all over the world are joining the Internet and reading these articles everyday, JUST LIKE YOU are now!! So can you afford $6.00 and see if it really works?? I think so...

People have said, "What if the plan is played out and no one sends you the money? So what! What are the chances of that happening when there are tons of new honest users and new honest people who are joining the Internet and news groups everyday and are willing to give it a try? Estimates are at

20,000 to 50,000 new users, every day, with thousands of those joining the
actual Internet. Remeber, play FAIRLY and HONESTLY and this will work. You
just have to be honest.

Make sure you print this article our RIGHT NOW, also. Try to keep a list of
everyone that sends you money and always keep an eye on the news groups to
make sure everyone is playing fairly. Remember, HONESTY IS THE BEST
POLICY.

You don't need to cheat the basic idea to make the money!

GOOD LUCK to all and please play fairly and enjoy the huge rewards from
this, which is tons of extra CASH.

Gosh, I am sorry I missed the thread. :-)

Okay, let's analyze this. Lets assume S9=50 uV at 50 ohms, or -73 dBm. Lets assume 6 dB per S unit. Let's assume that the S0 signal is 9 * 6 dB below -73 dBm, or at a level of -127 dBm. This is lower than most spectrum analyzers can measure. It could also be detected with the receivers used in most amateur equipment, although -127 dBm is about the limit of the band noise on some frequencies in some areas. Now, let's assume that the carrier is suppressed 40 dB -- the carrier would be at a level of -167 dBm.

Amateur receivering equipment, with a typical 500 Hz minimum bandwidth, could not even come close.

> When I protested (I had said he as an engineer might find it find it
> with his spectrum analyzer), he arbitrarily enhanced the signal level to S-9.

At an S9 starting signal, the -40 dB suppressed carrier would be at -113 dBm, or at about S3. This could be detetected by most amateur receivers and by the spectrum analyzer in the Lab, which appears to be capable of about -120 dBm at 10 MHz.

Which is exactly what Jim R. was saying. A -113dBm suppressed carrier
could be detected between marks when using an audio tone modulating
an SSB transmitter to generate pseudo CW.

<< Most people are savvy enough to realize that no institution can be stereotyped by just one of its poles. >>
**Now wait a minute. Why bring the Polish into this argument? The next thing I'll read is your calling them dumb Polacks? That isn't fair since I know a lot of smart Poles. Here's my extensive list.

Give me a break Bob. It reminds of the story of the fellow who walked into the store and asked the counterman for a pound of kielbasa. All the clerk did was to look at him. He repeated, "Give me a pound of kielbabsa" as the clerk contnued to stare. The customer then said, "I'll bet you knew I was Polish" to which the clerk replied, "How come?" "Because" the customer said, "I asked for kielbasa. " "No," said the clerk. I knew it because this is a hardware store." Now come on Bob, are you going to start a nationalistic war on this board with your cutting comment? You owe every Pole who hangs out here an apology so render it and hope they can read. You ought to be ashamed of yourself, Bob Sherinovski which I know was your original name when your old man got off the boat at Ellis Island. There's a little bit of Pole in every man but you think with yours.

==========================================================================
BSSClub proudly presents
==========================================================================

Project: ST1-64 PIC Basic Interpreter
Version: 2.0
New features:Added compiler into the intermediate code, developed
serial port downloading working under Windows.
Description: Basic Stamp I compatible firmware for 16C84 or
16F84 with 64 bytes of memory and intermediate code
compiler

ST1-64 is a virtual machine running on a PIC16C84 or PIC16F84
microcontroller that interprets the intermediate code, stored in
the internal on-chip 64 byte EEPROM memory. The machine is fully
compatible with Parallax Basic Stamp 1 Basic interpreter with the
only exception - the program memory has only 64 bytes. Now
the distribution includes its own compiler allowing both parallel
port and serial port downloading. When using serial port downloading
the systen does not need to be run under MS DOS and can be run
also under Windows, WIn95 and Win98.

The firmware and compiler can be downloaded free of charge from

http://www.geocities.com/SiliconValley/Cable/7772/

This software is property of BSSClub and you are free to use it
for your personal use as you see fit.

Folks,

I privately e-mailed a poster to this group, telling in a friendly way that 190 lines of useless fullquote below a 2-liner comment is not something regulars in Usenet like to see. In addition to that, I hinted to visit news:newusers.answers to get some background on posting below a quote and snipping redundant stuff of the reference posting.

Well turned out _I_ am the idiot - not him. Here's why:

"Hello Peter,
You may not be aware but Outlook Express always places the reply at the top of the message as opposed to the bottom. This is particularly useful in longer threads where there may be parts of several requotes. So with a reply posted with Outlook Express the reader sees the new reply at the top instead of having to scroll through tons of requotes to get to the new info. it is the new trend you should start getting used to. As far as my requote practice exactly how long did it take your news reader to download that message? 1 second? 2 seconds? My friend you are simply over reacting -or- you are lonely and have nothing better to do then nit pick at other peoples messages. In either case I now have a kill filter set up on you. Good bye"

[Rest of my previous mail mercifully snipped]

OK, Micro$oft redefines Usenet and its users gladly accept it. I really like this company and some of its users.

>I said nothing about two way conversations.

Then we're talking apples and pineapples; my contention has been that
2-way MCW (A2A) is not permitted on the HF ham bands. That's why I
gave the marine band example. We didn't turn our BFO on and off
and on and off and... with each reception of some transmission;
transmissions from ships were of short duration.

>And even if I had, I was
>asking why you were using a BFO to receive MCW. (Especially if the mode
>being used was FM! :)

FM? A2A is not FM.

>;The tone is, at best, modulating the carrier at 50%.

>And what mode -is- a carrier that is being modulated by a tone at 50%

A2A, which is what I think of when "MCW" is mentioned.

>And again, why would you use a BFO to receive such a mode?

Because: Transmissions were of short duration: "XSV DE 3GML QRU? K"
By the time the watch-stander turned off his BFO (why would he?)
the transmission was over. And with the tone modulating the carrier
at 50% or less, he might have a lot of trouble hearing the transmission
without his BFO on. And why would you expect operators on adjacent
frequencies to turn off their BFOs? That would hinder reception of
the QSO they're engaged in (but your MCW (A2A) transmission would appear
as a "wide-band" signal to them.)

>Forgeting to turn the BFO on or off is an operator problem not a mode
>attribute that one HAS to do it receive it. But this whole discussion did
>divert us from the fact that MCW -is- used on HF. And has been for many
>years.

Not 2-way A2A (which is MCW). That's why everyone strives for a T-9 signal; anything less means increased bandwidth which can get you a pink slip. (Here's a challenge: Remove the filtering in your power supply and join me on the low end of 20m with your "MCW" signal modulated with its 120 Hz "tone" -- let's see how popular you'd be! And don't expect the folks on adjacent frequencies to turn off their BFOs -- that will hinder their own QSOs.)

You're thinking of F2A (and at times, J2A) while I've been discussing A2A.

Back in the days when only women wore earrings and men walked the surface of the Moon, the Motorola HT-220 was the hottest handheld on the market when it was introduced in 1969. Tougher than a pit bull, this VHF or UHF business band handheld in a weatherproof housing was the envy of ham radio operators for its compact size and performance.

The HT-220 Page has been updated and includes photos and discussion of special HT-220s such as the Secret Service, Medical ECG, and Touch-Tone models. This website has information including model tables, frequency conversions, parts and accessories, manual numbers, tech tips and stories.
See http://www.batnet.com/mfwright/HT220.html

Comments about the HT220 by visitors to this webpage:

"THOUSANDS STILL IN USE."
"I use both VHF and UHF models everyday."
"I've taken VHF units up to 220 MHz (a real 220 220)."
"HT220 is truly an object deserving of such a shrine!"
"It was and still is a engineering marvel."
"They are very easy to re-condition."
"I still think it is the nicest looking, most purposeful radio ever produced."
"The HT-220 still lives!"
"I cut my teeth on the HT-200 and went on to the HT-220."
"I can remember in the mid-70s the envy we all felt for the BMOC that had an HT220."
"What is that?!?" (from a generation X-er first seeing a HT220)

Peter Lemken posts his email:
>"Hello Peter,
>You may not be aware but Outlook Express always places the
>reply at the top of the message as opposed to the bottom.

Actually OE puts the *cursor* at the top of the quotes when you hit "reply to group" to get a reply window. Simply hitting the "home&page down" keys together will put the cursor at the bottom if you wish to start there. Blaming OE or MS for an (alleged) incorrect reply to Usenet, when in actuality a person is too lazy to move a cursor seems a bit silly.

But the bigger question is where should the reply be, above the quotes or below the quotes? I agree with Peter that it is easier to read a thread with the reply at the top simply because it saves a lot of scrolling. However, the correct Usenet *tradition* has always been to put the reply at the bottom of the quotes. And blind tradition, even in the face or valid reasoning, seems to stymie change. It's kind of like the ham code test...

My kill file for this group is not small. I have to update it
frequently to keep up with all the bogus IDs. I think that most will
concur with you: the signal to noise ratio here is quite poor.

: > a signal level of S-0 (zero).

Sorry Dick, you are -still- mixing conversation #1 up with conversation #2.

Conversation #1 was the one where you stated that NO ONE could tell if a PSK signal was being generated by a SSB transmitter. I posted away you could do it.

Just read the posts. I initially asked you to set the PSK signal to 0 dBm on your analyzer and look for the suppressed carrier that would be aprox 40 dB down from 0 dBm. We later changed the paramaters to 40 dB down from S9 since you didn't seem to be able to figure out how to get your transmitter to read 0 dBm on your analyzer when it was on the air OR through an attenuator.

: Gosh, I am sorry I missed the thread. :-)

Your not the only one in this conversation that "missed" it ;-)

: Okay, let's analyze this. Lets assume S9=50 uV at 50 ohms, or -73 dBm.
: Lets assume 6 dB per S unit. Let's assume that the S0 signal is 9 * 6
: dB below -73 dBm, or at a level of -127 dBm.

Never any mention of detecting a suppressed carrier 40 dB below S0. That is just figment of Dicks imagination.

Dick "confused" receiving the ID of a PSK signal that was just in his noise level (a conversation I labeled #2 to help HIM figure out what -he- was talking about) with the initial coversation (#1) of determining if a PSK signal was being generated by a SSB transmitter. I gave him 3 or 4 different ways even HE could do it, but he always "confused" conversation #1 with his out of the body experence of PSK at S-.00569 or so. ;)

; This is lower than most
: spectrum analyzers can measure. It could also be detected with the
: receivers used in most amateur equipment, although -127 dBm is about the
: limit of the band noise on some frequencies in some areas. Now, let's
: assume that the carrier is suppressed 40 dB -- the carrier would be at a
: level of -167 dBm.

: Amateur receivering equipment, with a typical 500 Hz minimum bandwidth,
: could not even come close.

: > When I protested (I had said he as an engineer might find it find it
: > with his spectrum analyzer), he arbitrarily enhanced the signal level
: > to S-9.

Do you mean to tell us that you can not receive your OWN transmitted signal at S9 on a monitor located near the transmitter? The whole exercise was to allow YOU to hear the suppressed carrier of a SSB transmitter.

Dick, really old bean, read the several times I reposted the exchanges for you and stop playing dumb (your too good at it).

: At an S9 starting signal, the -40 dB suppressed carrier would be at -113
: dBm, or at about S3. This could be detetected by most amateur receivers
: and by the spectrum analyzer in the Lab, which appears to be capable of
: about -120 dBm at 10 MHz.

Yep, and even Dick should be able to understand that some of the QRP rigs he works put out LESS power than the suppressed carrier of a 1 Kw SSB rig. (But since I proved to him that one can tell if a PSK signal is being generated by a SSB rig he can't bring himself to allow that his very first statement was "not correct"! :)

> *IF* I had said "Extra" yes, but I didn't, so I am. ;-)

You said "learn CW". One must "learn" more CW to make it to Extra than to make it to Tech+. I believe that is among the things you are objecting to. Is it not?

[...]

Actually, it's not "blind tradition" to place one's reply after the matter to which one is replying. It's only natural.

Many begin reading a thread somewhere in the middle, and the quotes help establish the context of the reply. It's jarringly unnatural to read a reply before its query, or a refutation before its thesis.

It's simply kindness to others (which is the basis of manners and etiquette, including Netiquette), and kindness to the language, to place things in a logical progression.

And it's also a kind consideration for others' time which should impel us to rigorously trim the quoted material to the absolute minimum necessary to fairly establish context.

Auto-quoting and human laziness are, each of them, banes of our existence.

But the two in combination are quite intolerable.

With all good wishes,

Ummm, no, this NG is much worse. This news group is one of the things
I would caution any prospective ham to stay away from. Of course, I'd
also caution against 75 meter SSB activity, 2 meter FM activity in
many areas, and the activity on 14.313.

Ignore that and the s/n ratio goes up dramatically.

All of the amateur radio community was listening this morning as the twin dummies from Tampa and Clifton engaged in the same old activity as before. After KE9RY and KT4TR were engaged in good amateur radio practices . The Clifton idiot and the notorious one from Tampa went to 1.9 kc away and started to conduct conversation for the purpose of interfering with the two individuals using freq.14313.

I had previously informed Mr. Hollingsworth of the FCC that in my opinion KE4TEW would never change his radio antics and that had in fact made a serious mistake by allowing him to get away with radio practices that degrade our hobby.

Today was the perfect example of how the problem still exist and how KE4TEW and AF2Y continue to be the problem. There is no excuse for this type of practice to continue and AF2Y will be dealt with by the FCC.

3205. AF2Y sees 14.313 JACKALS & SNAKES

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-17 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19991116214306.11459.00000177@ng-fs1.aol.com>
Source record: 127425

Attention fellow hams. Did you know that 14.313 is now ruled by KT4TR,KE9RY, K2IVX, WA4KBX, K3QAM heh..heh..Pittsburgh..Pittsburgh...and other assorted, as they mistakenly think, buddies of Riley Hollingsworth? When these geeks are on, all pretending to be Shirley Temples singing "On the Good Ship Lollipop" while actually being troublemaking,scheming conniving liars, don't anyone go near that frequency.KEEP AWAY! You will be 'REPORTED" to Riley. That's right, "REPORTED" just like kids used to turn in their own parents to the KGB in the now,thank God, defunct Soviet Union. If I didn't have it on tape I suppose no one would believe the preposterousness of it but I do and a copy can be had for ten dollars. Remit to Doc,AF2Y at P.O.Box 1347,Clifton,NJ 07013 and make the check out to CASH..Heh...Heh...Heh...Pittsburgh..Pittsburgh..heh..heh. Or you can make out a check to my favorite charity-me." Anyways," as KE9RY would say which loosely translated means either "Duh" or "I don't have a clue," the situation on that frequency has turned from intolerable due to jamming to insufferable and deplorable due to all this cloak and dagger intrigue by buffoons who consider themselves useful agents of Riley Hollingsworth. Give me a break-he's simply being kind to dumb animals. Come to think of it I know of someone else who thought he was point man for the FCC-Herbie "Goodbye" Schoenbohm,KV4FZ. Remember how he and his nitwits used to "police "the 20 meter band by while trying to destroy the Intercon net? Remember how Schoenbohm and his yokels considered themselves impervious to FCC retaliation? Yep, and I remember how the banana picker from High Anus, Mass., Lloyd Montcalm, the Jolly Green Nazi, used to write stupid letters to the FCC about the so-called illegalities of phone patching and in return the FCC used to write back, calling him a schmuck in nice terms. I call him a schmuck in bad terms. What's happened to those BARFies aside from misery and death? Were the fools able to convince the FCC of the "illegal phone patching done by Jews on Intercon to steal money from phone companies." I didn't say it, KV4FZ did and Mike Galego was the deputy Fuehrer and Billy Gasell, WB4GDP the Gestapo Meister and WA2EXQ the zoo keeper ad nauseum. No, the FCC bought none of that racist crap and THEY GOT THEIRS..straight ahead, Justice! History is repeating itself with a new cast of characters whom I call the JACKALS. Now take KT4TR for example, a braying ass if there ever was one. He used to collect warning letters from Riley to paste over the holes in his shack's plasterboard. Here was the same snake who used to call Don Anderson's, W4JYZ's parole officer in an attempt at getting the gentleman thrown off ham radio. The same guy who used to dig up arrest records and financial reports to broadcast in violation of ham radio decency and would still be doing it had it not been for Riley intensely disliking it. In fact K3CQR told me that "Badblood" paid a $2,500 fine for carrying on like the lunatic he is but I myself never read about it. Don't getme wrong-Bill's a great guy but perhaps he got his facts wrong with this one? And this KT4TR crackpot has the audacity to accuse anyone of misconduct and to try and make Riley believe it? "Anyways," there I go again trying to emulate a great mind, do you see the hypocrisy in what I'm describing? The

MAJOR incident happened this morning at about 1200 Z. For years I'm on 14.313 or thereabouts at that time talking and treadmilling simulataneously. I take exercise very seriously and if I influence others out there to get off their behinds, I'm happy. I talk and treadmill to speed up the "torture" because I'm on a manual mill walking at a 20 degree incline at about 3.5 miles an hour for 20 minutes and if you think that's chopped liver, try it. And so I'm minding my own business calling CQ and an unidentified jerk comes in to tell me to give up ham radio. Me, an Extra Class license holder using the top rated wire antenna in North America? I should get off ham radio and leave it to a coward like that hit and runner? A joke, no? I then heard just a trace of buckshot from a few "killerhurts" below and it was my bosom buddy, Jim Dale, KE4TEW, calling me. He stays off .313 due to the snakes there lying in wait. And so Jim, one of the greatest hams to ever hold a ticket, and I had a pleasant chat; then I signed. Just before going QRT I was getting really stepped on by an extremely dirty signal and sure enough, it was Youngblood, the paperhanger, and his motley crew. They were huddling on .313 talking about how AF2Y intentionally jammed them and they got a vote of approval from that idiot Joe,WA4KBX, whom I hardly can understand after years of trying. Youngblood said he was going to send an e-mail to Riley about me and blah blah blah. I say HORSEBLEEP! And the tape I have proves TR and his thugs to be nothing more than low class connivers. About a half hour after exercising and showering, the latter of which the Stump Jumpers never heard, I got a phone call from another great ham from Tampa, KE4VI who said, "Watch out Doc. They're trying to set you up. I heard everything and you were completely innocent. I hope Riley doesn't believe them." Under different circumstances, I would have taken on that crew of jackasses right on frequency and done 'em in but the spectre of Riley gave me cause to reflect. He wants no on-the-air confrontation and I respect that because to put it bluntly, I'm not out to lose my license. I mean in life one's gotta know when to hold and when to fold and I folded.Heh...heh...heh...Pittsburgh..Pittsburgh..I got the best..Queenie.Queenie. Then to top it off I got a nasty e-mail from K2IVX, Lenny Schaier, a turncoat conspirator who defies description except for the fact that his treachery greatly exceeds his common sense and ability to write an intelligent message. That's the fellow who went on this esteemed board of geniuses to request tapes of AF2Y to doctor and to send to Riley in hopes of his taking me off the air. This K2IVX is simply not too bright by not knowing he's met his match, BIG TIME. " Anyways VE9ZL lives in Communist Canada"..I didn't say it, KE9RY did and I'm merely emulating one of the great minds in ham radio, instead of putting myself in harms's way by countering the viciousness of this contemptible group on .313, I decided to rip them to pieces right here on the Internet for the world to see rather than for some to hear. This posting is just the beginning of my defense; things will become much hotter. For a man I befriended and felt for to come out on world wide radio using his wattage and a beam that takes up half of Eagle, Wisconsin to slander me with this ridiculous concocted story about my besmirching the memory of his daughter, nothing but hearsay invented by insidious architects of hate, is too much. Not one shred of proof exists of anything so heinous but a dope will believe anything if he's conditioned to do so. What's worse-the believer of such garbage or those having perpetrated it? Being that I don't know, I'm going to tear all of them up and be done with it." Anyways" that's my stance on the

issues. I will NOT be intimidated on or driven off my home,14.313. I will abide by Riley's demands to keep a lid on the pot,ON THE AIR but to defend myself by telling world hamdom of the deceit and lowliness of these pawns of Schoenbohm and Youngblood, is my prerogative and responsibility which I'll exercise. Of course the lowlifes do have an option to get me off their backs-apologize. Perhaps Riley will read this and intervene and understand where I'm coming from? I feel that if they are made to understand that maliciousness towards AF2Y on the air is NOT helping ham radio and that they are violating Riley's edict, then prospects look good for a gigantic simmering down of things. I believe Riley doesn't like to hear anyone attacking or provoking anyone on ham radio since it's counterproductive to the hobby / service. I concur and have mellowed. Let's see if the other side sees the big picture. "Anyways."

Doc, Mahan used to be on the liberty net years ago. He may be 'anti' but that
is
misleading. It is because of his apparent dislike for the people who are on
there,
not because he disagrees with their politics. Mahan is a racist. He is not your
friend. He is a disgrace to amateur radio and hopefully the FCC will succeed in
revoking his license. No matter what your politics are, do not make Sidney your
cause. Sidney does not have the basic intelligence to believe in a particular
political position or have a learned opinion. Just hope the FCC can make this
guy
go away.

73

KR4AJ

Note: BLB did not have the intelligence to pass the code test either.

>info I'll need to find the cowardly LIAR. Take a LOOK see if you can help.

Gee Tim. You accused me of being a Liar about a posting about running illegal
power on 11 meters (which I did not). You pointed out that it was from me
because of the header. I guess you found out that it is possible to make
postings that are not true.
I do agree that these posts are in bad taste and should stop. But I
will also point out that somebody out there does not like you very much. Gee I
wonder why that could be?
You see Tim, there are web sites out there where you can send messages
without eve being traced. You will not find who this person is.

Source record: 127082

Is there a fairly low cost SW/HF rcvr with the ability to be controlled (tuning) by a PC? I found a
Drake 7030 for about $800.00, but that's too high for me.

Source record: 127083

Uh-ohhhhh .. someone's going to list the 3950 jammers tonight. Call CNN ! ! ! This will be a first. What a novel idea. Listing jammers on RRAM. I know .. we all feel so silly .. wonder why none of us ever thought of it before.

Ok "jammers" the gloves are off. Someone from the "jammer" side of the house needs to come back and list the "netters" if this thing goes down. That'll show 'em. (Whoever 'em is).

I'm especially alarmed by this, since I'm a "Tennessee guy". And I am about to have my life "f***ked up" by this person.

I say "this person" because I'm ready to bet $500.00 that "this person" who promises to f**k my life up is NOT Lloyd Davies.

I have my differences with Lloyd Davies. In fact, I terminated my acquaintance with him a few months ago due to these differences. But at least he has enough backbone to post in his own name and not forge posts in someone elses name.

So go ahead. List the "jammers" (like it's never been done before). F**k my life up. But the bet still stands. I say it was NOT Lloyd Davies who made the post. I'd even go so far as to bet that it was not a "netter", for that matter. Takers?

You're a hard man to get thru to Jim. Here's what you said:

: > Learning CW teaches you one
: > thing, the -skill- of sending/receiving code (period).

I was not taught just one thing while I was learning CW. I was not taught "ONLY THE SKILL OF SENDING/RECEIVING CODE". How can you presume to tell me otherwise? You haven't done it, and you do not share my experiences. How can you claim to know better than I what I learned? That's silly. It's the same as the argument the Cecil has with Dick about how he passed his Conditional way back when. Cecil lived it, and Dick didn't. I had never operated HF before. I had never worked DX before. I had never operated an HF rig before. I had never built an 40 meter antenna before. These are things I taught myself while I was learning CW. My interest in learning the code, my privileges in the CW portions of the band, and my CW operating provided me with experiences I would not have otherwise obtained under the current regulations.

So your statement in NOT strictly true. Back to you.

You're right, it's not Lloyd Davies. The message which began this thread is from an AOL account which has the letter "o" where N0VFP has a zero.

It seems to me that forgery is not only dishonorable, but it is something that a poster's critics wouldn't want to do, if they were smart: it muddies the record of what a poster has actually said, and also gives him, to use CIA terminology, "plausible deniability" for even the worst behavior from that point forward. Since if he was once forged crudely, why not skilfully forged many times?

So, to whomever is forging N0VFP and KK7HO -- please stop it.

Honor bright,

Kevin, WB4AIO.

Bob,
To begin with you most certainly said that Herbie was convicted by a lynch mob as well as Malcolm Ford stole from his own company. It's on tape. To deny the irrefutable is absurd; what you're doing is simply covering your tracks and that's it.
Now pay attention. You keep insisting that the calls traced back to Herbie were never made. Why? Because the recipients of them were unable to pinpoint FZ as the caller. And for a good reason. I am not a lawyer; my son is but I can still put two and two together. It's called deduction.
KV4FZ is malicious beyond description. Remember Pat Miler's tape that supposedly meant nothing? FZ was on with Tony Benvenutti discussing how, with the evil use of a computer, it can be made to act as a piano going up and down the scales picking off access numbers to bankrupt John Ackley? Come come. Bob. Don't play naive. That tape showed INTENT to bankrupt Ackey and it carried over to Malcolm Ford's company too. Herbie thought it would be great fun to get into Ackley's system and make God knows how many calls with subscriber's access codes since each call would cost them forty cents. And Herbie knew that at the end of the month when they got the bills for all the calls they never made at 40 cents a pop, they'd be furious enough to leave Ackley's company, thereby bankrupting him. Herbie himself said so-I have that on tape too. FZ decided that he would set himself up as the authoritative source as to whom and whom not ran a legal long distance phone service from St.Croix. He was insanely jealous of John Ackley because John was SUCCESSFUL and he wasn't. The scheme Herbie concocted to harm John was then aimed at Malcolm. Have the computer make the calls, hang up, ring up a toll for the subscriber, get the subscriber mad at the end of the month and he would leave CALLS. Now is that too hard to figure out? And you still wonder why those called and questioned never heard of Herbie? It's because Herbie hung up without talking to them; all he was interested in was to create a financial burden for each subscriber which then would translate into gigantic losses for Ackley and Ford. The reason it's hard for you to understand what FZ is really about is because unlike him, your brain is not malignant. You hate no one. You're jealous of no one. You're not anti-social. You're not a scam rip-off artist. Schoenbohm IS. Get it? Reads my lips Mr.Sherin...YOU BACKED AND ARE STILL BACKING A THIEF, a malicious rotten anti-social,anti-Semitic thief who "got" his and is getting more. You're into psychology and cannot recognize Schoenbohm pathology? When he played with those access codes, it may have been a real joke to him but nonetheless he was breaking the law and thumbing his nose at the agency which oversees American telecommunications-the FCC. And it became so incensed over the illegal actions of Schoenbohm, the "army" was summoned and justifiably.
Moreover to show you just how rotten he is,you went out of your way for the man. You were ready to be called to the witness stand to proclaim how wonderful he was. Because of you, two of the three counts were dropped and he took $300 from you for a linear stored in the Caribbean, knew it was busted crap and

refuses to refund your hard earned money. And you still love him? You still stand up for him? Wise up, Bob. Screw the guy-he's worthless garbage! You know what it all comes down to, don't you? My assessment of the dork is RIGHT and yours is WRONG. Period!

My Ford dealer, Earnhardt's Ford in Tempe, came through like gangbusters. He faxed me Service Bulletin 99-12-9 which basically states the same thing that W1RFI included in his post. In addition, there were a couple of diagrams showing the exploded view of the pump. Basically, you just cut the wires and insert the RFI filter. Pretty simply AFTER YOU GET THE TANK OFF.

They made a point of telling you not to do any of this soldering with a torch. I presume most people are smart enough to know this --- maybe not!

It appears that Service Bulletins 91-17-5, 98-7-3 and 99-12-9 are all the same, proving that Ford doesn't seem to want to do anything to fix the situation since 1991 (or before).

It seems like a lot of work. I think I'll trade my Explorer in on a Chevy.

: > -is- true ;)

: You're a hard man to get thru to Jim. Here's what you said:

: : > Learning CW teaches you one thing, the -skill- of sending/receiving
: : > code (period).

That's true.

: I was not taught just one thing while I was learning CW.

That's very possible. I learned how to put a bandage on my arm while
learning the skill of riding a uncycle!

; I was not taught "ONLY THE SKILL OF SENDING/RECEIVING CODE".

It would follow that during the period you were learning the -skill- of
Morse code you learned code. During the time you were learning which end
of a soldering iron to hold on to - you were not "sending by ear and
receiving by...." ;)

Of course I'd be the happy to admit that in the process of getting code
skill someone could have sent, "grasp *cool* end of soldering iron!". ;-)
But by then you -already- had some skill in Morse code. Maybe not
-enough- to get a Tech+ ticket, but you were getting there.

; How can you presume
: to tell me otherwise? You haven't done it, and you do not share my

Why not, Dick is telling me I said "below" when I said "stronger"? :-/
PCAs tell us that we have to know code because.....

: experiences. How can you claim to know better than I what I learned?
: That's silly.

I think this discussion has gotten way off the original humorous intent
of the first few posts. I still like the FCC's idea that the code test is
nothing more than a test of the "skill" of knowing Morse code.

Therefore when you "learn" Morse code you are basically obtaining the
"skill" to use Morse code. It is entirely posible that while getting that
skill that you will pick up -other- information similar to reading a book.

After all, W1AW sends QST articles as part of code practice, so it follows
that one would "learn" about the content of the article while

increasing/getting Morse code skill. Although some PCAs think that you
might actually be "memorizing" things you learn and that is frowned upon =:o)

; It's the same as the argument the Cecil has with Dick
: about how he passed his Conditional way back when. Cecil lived it, and
: Dick didn't. I had never operated HF before. I had never worked DX
: before. I had never operated an HF rig before. I had never built an 40
: meter antenna before. These are things I taught myself while I was
: learning CW.

Which letter of learning Morse code taught you to build an antenna ("A"? :)

Your experiences are/were due mostly to the result of getting a license
that requires the "skill" of Morse code. IF you learned Morse code but
didn't get a license you would NOT have worked DX on HF etc unless
you went to a ham station where -that- operator HAD gotten the license by
also having Morse code -skill-.

Most Cbers haven't learned code. Do you think they are all ignorant of
many of the things YOU learned because of code (somehow)?

; My interest in learning the code, my privileges in the CW
: portions of the band, and my CW operating provided me with experiences I
: would not have otherwise obtained under the current regulations.

To each his own. Would you believe, when I learned to -ride- a unicycle, it
also taught me how to -build- a beach buggy? NO? Me neither, because it
didn't. Would you believe that by having the skill to read, that I could
get a lot of information that would help me build a beach buggy? (Yes.)

As long as you put the "CW portions of the band" qualifier on your
statement, yes. But people who don't use code can learn all the other
things (except use code) that you did. Not having skill in one mode does
not precude one from learning theory etc. And that is basically what the
FCC said when they said the test for Morse code tests a -skill-. The
other tests cover the rest of the requirements.

: So your statement in NOT strictly true. Back to you.

What ever. How 'bout we're -both- right? :)

: ac6xg

Hey Doc, I guess I chose poor woids! The term "Leftie Lenny" was
a term widely applied to the storm which was in Hitler Herb's
neighborhood this past week. The Islanders called the storm a pet
name "Leftie Lenny" since it moved from West to East and developed
in November, two rare events. In any case my contacts tell me
that Herb the Turd KV4FZ has been running around all over St Croix
with his HT on simplex and the local radio clubs don't want any
part of him! They know he likes to use natural disasters to grandstand
and inflate his pachyderm-sized ego, so they aint giving him the
chance
to do so on the Net! Serves him right. (He did something like this
a few years ago, stockpiled cell phones and water in some storage
shed one of his feral kid owned and after the storm hit he tried to
sell
the stuff to his neighbors at 10000 times cost. What a scumbag!
What eles are we to expect from a slime who sold w4afx a bum amplifier
and has yet to refund his money. Hope this clears stuff up!
(one thing for sure - 20 Meters stinks much less now with no KV4FZ on
it!!)

Thanks for speaking up about that Kevin, We've had our differences also but at least "You" have enough integrity to use your name, callsign and stand by what you said. Going to the extent that this anonymous (for the moment) poster has is cowardly. I wonder if it was someone from the white race?
Question for reply has been set. :-)

> -enough- to get a Tech+ ticket, but you were getting there.

All I have to show is that I learned more than just how to send and receive code when I was learning CW to prove your statement wrong. And I'm telling you that I did. Can you prove me wrong?

> ; How can you presume
> : to tell me otherwise? You haven't done it, and you do not share my

> Why not, Dick is telling me I said "below" when I said "stronger"? :-/
> PCAs tell us that we have to know code because.....

I don't care about what Dick tells you. Cecil has told me that power is coveyed by coaxial cables. Do you find that relevant to this discussion?

> : experiences. How can you claim to know better than I what I learned?
> : That's silly.

> I still like the FCC's idea that the code test is
> nothing more than a test of the "skill" of knowing Morse code.

I do too. But you have assumed that skill comprises only knowing how to send and receive it. I would claim that someone skilled in it's use would know how to communicate with someone in an amateur radio QSO with it, rather than simply be able to associate dits and dahs with the corresponding letter and numbers.

> Which letter of learning Morse code taught you to build an antenna ("A"? :)

Most of the letters in the alphabet helped me to learn about 40 meter antennas.

> Your experiences are/were due mostly to the result of getting a license
> that requires the "skill" of Morse code. IF you learned Morse code but
> didn't get a license you would NOT have worked DX on HF etc unless
> you went to a ham station where -that- operator HAD gotten the license by
> also having Morse code -skill-.

Like you, I had no skill communicating via CW even though I knew all the characters when I got my Tech+. It was after that that I acquired skill in using it. Is any of this sinking in yet?

> Most Cbers haven't learned code. Do you think they are all ignorant of
> many of the things YOU learned because of code (somehow)?

I don't know. Wouldn't each of them be different?

> : So your statement in NOT strictly true. Back to you.

> What ever. How 'bout we're -both- right? :)

I never said you were all wrong, Jim, so of course!!

To All,

AOL has a very clear Terms of Service (TOS) agreement with regard to harassment and the use of language, etc. which, in my opinion, Radiosigs@aol.com violates on a regular basis. Please help me remind AOL that they do have an obligation to enforce their own rules. AOL, in their words at least, seems to know the difference between 1st amendment rights and the assumed right to harass and be hurtfull; it's time we told them to enforce there own rules.

The contacts I know about are:
catrep280@aol.com and Tosusenet@aol.com. If there are other contacts that you know of that can help this newsgroup get rid (at least temporarily) of this nasty individual, please let me know.

Thanks in advance,

Len

One of the old Army Officers I served under use to make a huge pot and then
come back in add a few grounds and water and re-brew the coffee the next
morning. Now that was coffee, one cup and you could stay up for two days.

Kevin,

As much as I usually agree with you, I do differ on this one,
KK7HO has been working hard at pissing off everyone on
this newsgroup for over 2 years now. Something like this
was inevitable.

Need I remind you that just 2 days ago Volz spewed:

>Oh, kkkevin you simple minded fool. Is there much of a difference between
>having it and operating it? Is it my page? Is that what you are asking. If so
>the answer is NO. You go back to the drawing board ok, you bore and disgust
>me. If you had any common sense you'd know ....well never mind. you always have
>lacked common sense.
> You crack me up mr. White supremacist national alliance wanna-be super
>sleuth.
>You spend all your days and nights listening, recording, transcribing, spin
>doctoring, accusing, denying and for what? To claim that you have caught some
>imaginary discrepancy.
>KKKevin, it doesn't matter who's page it is. i'm sure not going to come right
>out and tell YOU. LOL Even if you knew, would you be any further ahead than
>you are right now? Your Ridiculous!

Volz deserves everything he gets. The issue of his alleged homosexuality came
up over a year ago, after a story about his operating a gay outcall service using
amateur radio and the gay newsgroup "soc.motss". See:
http://x27.deja.com/getdoc.xp?AN=327873674&CONTEXT=942987020.388628556&hitnum=1

With all the venom that Volz continually spreads he shouldn't be surprised when
this type of thing happens.

With all that said, I do agree that forging his name on posts -is- hitting below
the belt, and that's as close as I'll ever come to agreeing with Tim Volz.

> I will spend the rest of my days finding The LYING SOB that put this in here.
> Mark My Word. YOU WILL BE SORRY. I'm not gay and am tired of the defamatory
> LIES and libel. STAY ANONYMOUS YOU SOB-

As one of Tim Volz's heros, Malcom X, stated 36 years ago,
upon learning of the assassination of president John F.
Kennedy:

"This is a case of the chickens coming home to roost."
The same could be said about Volz sowing what he reaps.

And I wonder if he will really spend the "rest of his days"
hunting for the forgery's author? This sounds just like another
hero of Volz, OJ Simpson's statement about finding the killer
of Nicolle Brown Simpson , and Ron Goldman.

As Volz spends the rest of his days finding for the poster,
perhaps he will run into OJ Simpson looking for the killer
on a Las Vegas golf course.

This is Volz's tactic #1. The most used of the three tactics he employs here in the newsgroups. The three have been outlined in previous messages. Tactic #1 is Volz's feeble attempt at changing the subject of the post by diverting the issue to the identity of the poster.

Volz packages these juvenile messages with lots of "LOL"s and "ROTFLMAO". These are acronyms that are poplar in the junior high schools. (Laughing Out Loud and Rolling On The Floor Laughing My Ass Off). Apparently Volz thinks this is advanced 'internet speak'.

Doug Smith <w9wi@bellsouth.net> writes:
>Whether one quotes at the top or bottom really makes absolutely no
>difference, as long as they edit out that part of the quote (most of
>it..) that's irrelevant to their reply, and intersperse their comments
>among that part of the quote that's relative to that comment.

There's a simple test that some news posting programs make: Is the
amount of new text larger than the amount of quoted text? If it is
not, and the quoted text is more than a few lines, then it rejects
the posting and tells you to edit it some more.

Unfortunately, the web browsers that pretend to be newsreaders don't
seem to have any such rule. But it turns out to be a useful visual
guideline when reading news too. If I see an article where most of
the lines start with ">" (at least on the first page, which is all
I see initially), it's a pretty strong sign that the person who
wrote it can't extract the essence of the argument they are responding
to. That often means that the new stuff they write isn't worth
reading - or at least isn't worth the *extra* effort of going through
all the quoted stuff. So I often skip such articles entirely.

Hmm - sounds like a good option for newsreaders to have: junk any
articles that contain more quote than new content.

>previous replies is unnecessary for you. Idiots like me tend to want to read
>what has been written before, not just the last out of context reply with�ut
>any reference.

It's conventional to quote *small*, *relevant* portions of the previous
article to provide context for new material. It's seldom useful to
quote the entire article, though. If one particular reader (e.g. you)
really wants to read the entire previous article, any threaded newsreader
should take you to that article with a single keystroke or mouse click.

From there, you can go back to the article previous to it, or to another
branch of the replies - so the discussion *is* available for reference,
at least until the articles in question expire.

Dave

Where is Lloyd Davies? I ran him off and aren't you glad I did? If one provides truth over and over again, then a meatball is washed up,so goodbye Lloyd. Do we really need someone like that on this forum of scholars preaching anti-Semitism? Jews this-Jews that. The only ones he likes is orange jews probabaly provided by the Vero Zero. Thank you Jehovah. Thank you Jesus. Our prayers are answered.

Since they won't answer me, will someone be good enough to find out and e-mail the answer to the following query:providing that 14.313 is not in use at let's say 1200 Z, on 11/18/,would it be okay for me to call CQ UNHINDERED while treadmilling? In other words in case I do make a QSO, will someone find out if the JACKAL PACK, KT4TR,KE9RY,WA2EXQ,K3QAM..Queenie..Queenie..I got the best..heh..he.heh..bougt it in Pittsburgh..Pittsburgh..heh..heh.,WA4KBX, Litle Abner from Barnwell, anyways KE9TR, Lennie the shill and a few other palookas are going to report me to Riley for QRMing them despite their absence? Will they try to entrap me and create an argument hoping to convince Riley that I was the instigator? Come to think of it I can match a small section of my brain against all of tbeirs put together and still come WAY out on top, so don't bother answering this query.Tnx anyways.

I completely concur with Doc, I made the same statement 3 years ago to Kevin Strom, on 3950, work as hard as most Jewish people do to support their family, and reap the fruits of your labor. I would suggest to you Lloyd, find a Jewish businessman, work hard, and get him to take you under his wing, and you too, with hard work, will be just as successful, as it has nothing to do with being Jewish. : >
: > In what way is the resultant signal different from a CW signal?

: To exhume the bones of an old but very contentious thread,
: he insisted that he could find the "carrier" (pre-mixed)
: frequency -on the air- of such a signal that was received at
: a signal level of S-0 (zero).

For the umptinth time Dick,

****
* PRESENT THE POST WHERE I SAID FOR YOU TO LISTEN 40 dB BELOW S-0. *
****

I have never said this to anyone on the NG, BUT if you *CAN'T - you are
are continuing to spread a boldface LIE.

I have asked you for over 1/2 year to produce this 40 dB below S0 post and
you simply ignore the request and keep blabbering about it.

; When I protested(I had said he
: as an engineer might find it find it with his spectrum
: analyzer), he arbitrarily enhanced the signal level to S-9.

Not true. Present the post! Can you really NOT distigish between two
different conversations (#1 and #2) (BOTH of which *YOU* yourself
started)?

#1 = Basically, "prove that a PSK signal is generated by SSB rig"
#2 = your comments about receiving the PSK ID but not the PSK copy
near S0. You made a big deal that CW could be copied and PSK
could not.

At that point I asked you if you could copy a signal 40 dB **HIGHER** than
that "S0 (or there abouts level) signal as a means of attempting to
illustrate that those levels would be similar to a single tone SSB signal
and the suppressed carrier.

: *Then* he criticised my technical abilities by insisting
: that I had said one couldn't find the original carrier
: (oscillator) signal from that S-9(ssb generated) signal off
: the air with a spectrum analyzer.

Apparently you have mixed up my illustration to my telling you to look 40 dB **BELOW** S0 either intentionally or you can't grasp the significance of the difference in "ABOVE" and "BELOW" in relation to the weaker signal. One you CAN detect and the other you can't. I asked you to look for the one you COULD detect with common equipment (a ham receiver).

You actually claimed that the carrier was "eliminated" and/or "gone". One might question the technical understanding of another who claims that a carrier suppression of 40 dB down causes it to be "gone" when a reference tone is set to either S9 on a receiver or 0 dBm on a spectrum analyzer.

You even took me to task concerning the actual level of the carrier suppression of our ICOM rigs, so you obviously DO have knowlege of what is going on. In another post you mentioned the S9 level that I always used. (see long post in this thread for details).

If the suppressed carier is "gone", why can another knowlegeable person (perhaps even YOU!) SEE the signal 40 dB down from the single tone at 0 dBm? Did you ever actually perform any of my suggested experiments to prove to yourself that the suppressed carrier is not truely "GONE"? Or do you really know that it isn't and just can't bring yourself to admit what I said was true in CONVERSATION #1?

: Lame, very lame, in the extreme.

Yes, your understanding of what we were discussing was lame. And your lame attempts to obscure the true discussions are open for all to read.

Dick, to put it in the varacular, "you got your thing caught in a wringer" and just can't figure out how to get it out without obfuscation and claiming that others are doing it.

Now, if you still claim I told you to look 40 dB ***below*** S-0, go to Deja news or wherever and present the post (in all it's context)!! I have presented reviews of what occured several times for months now and you just don't get it.

James, YOU are a true dingaling! I said **OF COURSE** any
ham can see a 40 db below s-9 signal! that's above S-2 and
any receiver with a working S-meter can and WILL show it, no
test gear needed! But that wasn't the issue. The issue was
**looking for that 40db suppressed carrier below the s-0
PSK31 signals I was listening to**! You just interjected
this other bullshit trying to make some big Engineering
splash, see if we can "embarrass" an extra who isn't an
engineer!
You haven't mentioned a single thing yet that I am not
fully familiar with!

You're a horses ass of Cecilian proportions! No less! Go
sit on your sprectum analyzer!

Well at last, KK7HO tells the truth!

This day will be recorded as one of the greats in newsgroup history. I'll bet Tim feels much better now.

They say that when a closeted gay 'comes out' he will be at peace with all the demons that have been tormenting him all these years.

Maybe now that TIm's come out, we'll return to civility on this newsgroup again!!

...and let me say, "Way to Go" Tim. That took guts to admit.

---

ps, why was everyone always picking on you, Tim??

I looked for the same a few months ago, and when I could not find one,
started working on a program myself. I will post some screenshots to
www.leune.org/radio/hfblog/ later today to give you an impression.
This project is under construction, and there will be no quick
results! I'm sort of short in time at the moment.

Check out e-bay auction for a used Radio Shack HTX-100. Search on "HTX-100".
You almost always get a hit. It's a pretty nice preassembled 10 meter radio
that usually goes for $130 to $170, depending on condition, phase of the moon,
and number of crazy bidders who want it. I got mine for $150.

Imputing authorship to me of something I've never seen before is
reckless enough. Doing so when I've been publicly critical of that
which you impute to me is actionable defamation per se. Honorable Doc,
I respectfully request the standard retraction here.

Bob Sherin, W4ASX
Miami, Florida >>
<<Oh Bob,I'm so sorry for hurting your feelings and I most certainly retract anything negative ever said about you.You are a shining example of how a Jew should act vis a vis Herbert Lucifer Scumbaum. Yes, every Jew in ham radio should have done what you did- hop a plane and go to St.Croix to speak up for the man in court and for the same guy who was dead set on ruining Intercon because "it was controlled by Jews to steal money from phone companies." If you never heard the tape, I'll send it to you however if I've done anything to disturb you Mr.Sherin, I beg your forgiveness.From now on I shall only view you from the positive rather than negative side. By the way didn't WB4GDP constantly use the word "reckless" while threatening everyone who opposed him? From what I heared a couple of irate hams got reckless in Ocala and beat hell out of him. Remember those days, Bob? Indeed and I even remember how Willie used to rag on you with snide anti-Semitic remarks while you were doing everything to help his mentor,KV4FZ.Simply put Mr.Sherin I never understood your support then or now in light of the horrendous reputation of Herbie and his ilk and it still bewilders me and I'm sure a lot of folks.And I must say this:you weren't on the air for a long time because everyone thought you had turned on FZ after he sold you that linear stored in the Caribbean. You complained and rightly so about being hoodwinked out of $300. I think you asked for a refund but never got it. Then after quite an absence you show up here and still defend the convicted thief and according to the FCC, a Grade A liar too. HUH?

Let's go back to that period after Dec.30th, the day on which KV4FZ was SENTENCED. Before that time and considerably after you were Herbie's on-the-air lawyer, remember? In fact I remember your telling everyone that you were going to write a book about FZ's battle with the government. Daily you used to get on and openly state that Malcolm Ford stole from and bankrupted his own company, CALLS. That it was a lynch mob jury and you were so sure that Herbie would beat the rap. You fell so much in love with your prowess in jurisprudence, you said that you were going either to law school or become a paralegal. What happened ,Honorable Bob?

Check out http://radio.linux.org.au and look for logging programs.
There are a half dozen or so, one or two of which I don't mind too much.

I confess that I don't find any of them to be ideal. I've never really
looked at Windows programs to do the job because I don't want to be
running Windows for much longer. I will start to code my own for linux
in the near future I expect.

Obviously there is no right and wrong in this case -- I've been on usenet
for years and I'm not about to change my opinion on this one!

A little selective quoting would do everyone a favour. Almost everyone
who replies at the top is guilty of excessive quoting.

No, it doesn't. Again, I advise you to read news:newusers.answers in order to understand what Usenet is about. I don't care about _your_ convenience. But then, you are just behaving on Usenet as other people do in a pile-up: Yell, no matter what the DX-station (or commonsense) tells you to do. A LID, in short.

Anyone who understands, and has any appreciation of, the
term "wasted bandwidth" will instinctively edit quoted text
to some minimum. There are times when most or all of the
post you're responding to is needed to make the point.
Rarely.

Dick

Whether one quotes at the top or bottom really makes absolutely no
difference, as long as they edit out that part of the quote (most of
it..) that's irrelevant to their reply, and intersperse their comments
among that part of the quote that's relative to that comment.

Quoting the entire original message -- and then including one's comments
in one block after (or before) the quote -- is absolutely useless.
(unless the original post was short, but even then not a good idea) You
might as well not quote at all.

I can't remember *ever* seeing a reply where it was necessary to quote
all of the post being replied to. It is especially difficult to think
of a situation where it was necessary to quote both the entirety of the
post being replied to, and the post to which it was a reply.

Now, how about those Leonids?

It seems to me that you're missing the point. A kit may be wanted for
the sake of building it, not just because a kit is perceived to be cheaper
than an already built rig. The building of a kit may be as much fun,
and educational, as the actual use of the rig once it's finished.

Converting a CB set might fit the need, because changing something into
something that is useful feels good. It's an intermediate step,
with cheap and easy to get on one hand, and still some sense of
accomplishment on the other. And once a CB set is converted, someone
is more likely to modify it to fit their needs, since it was cheap
in the first place and they are already familiar with the rig, than
if they've bought a commercial rig that they worry about resale value
on.

3289. To AF2Y: My Inside Story With KV4FZ

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-18 00:00:00 UTC
From: Trebb@webtv.net
Message-ID: <21951-38341E74-18@storefull-246.iap.bryant.webtv.net>
Source record: 127168

Good points: some on the mark, others off.

No, I didn't say Malcom Ford bankrupted his own company because I didn't know the scope of his efforts at his company, Calls. By the end of the trial, however, it was clear that Herb had had no effect upon Malcom's operation, and that Malcom had made a mess of his own affairs. The centerpiece of Malcom's complaint, The John Ackley list of allegedly illegal calls which had given rise to the trial, was also proven, fabricated. There is no question, however, that Herb had toyed with Call's access codes.

Up to my point of involvement in the late 80's, I had revelled in some twenty years of pro se legal experience in connection with my business. Having been raised by a fine, brilliant Constitutional scholar who was a Boston attorney, I cut my teeth on the Bill of Rights. Dad, like the famous Sam Ervin, carried the Constitution in his breast pocket.

Up to the mid-80's. I knew little about Herb and his troubles with the government, nor had I any experience or knowledge in criminal law. But like my Dad, I was a Constitution thumping American, and I had conversed with Herb on ham radio. Before the trial, he telephoned me and asked if I'd come down and help him legally. Never one to turn down a friend in need, I agreed.

At the trial, I learned fast. And what I learned is what every defense lawyer knows: there are times when the government will stop at nothing to prosecute a case. When I saw the level of prosecution, involving the FBI, FCC and Secret Service, I was astounded. Here was a disordered guy who played around with those codes under everyone's eyes, kidding about it on ham radio, and he was being treated like a major criminal. (e.g. the Secret Service and/or FBI tailed us everywhere, and we knew that our phones were bugged.)

No question in my mind, Herb had committed a misdemeanor, but the felony charges were another matter. When I saw bogus evidence entered in a sneak attack on Herb, I vowed to myself that I would never let this fly in my country. As Herb was forced to the stand to defend himself, trumped-up computer printouts were piled around him. To those of us who watched, including the Jury, it had all of the appearances of a hi-tech counterpart of lynchings in chains and shackles.

And so the government led the Jury to its verdicts through unsavory behavior. Notwithstanding Herb's misbehavior, the government's conduct was unacceptable to me. Upon arriving back, I took to the law library, quickly finding a Supreme Court case out of the Virgin Islands where compulsory process (prosecutorial misconduct in withholding exculpatory

evidence) had been violated. Working that line of law up into a talking paper, I submitted it to Herb, who put it in the hands of Counsel. As a result, two guilty verdicts were reversed by the Judge. Only possession of a counterfeit access device (a number in Herb's head) with intent to defraud held up--and that is bad enough.

I did indeed pursue the legal career, finding work as a paralegal and completing my undergraduate degree. Taking the LSAT, I was told that my score was in the upper 18th percentile, but, turns out, that is the lowest score of those accepted. In my late 50's. I was turned down by all three law schools to which I applied, so I decided to pursue a twopronged career in Teaching and Psychological Counselling.

For your part, Doc, I'm afraid deep animus has driven you to associate others' behaviors with mine. I never said the jury had a lynch mob mentality but I did say the government had. I was vocal on ham radio with all the trespasses I observed of Herb's rights yet I surely didn't defend any of his behavior I considered bad.

Indeed, after putting my heart, body and soul into his case, I became but another object of his misbehavior: Herb sold me a corroded amplifier which he promised to take back and refund my $300. To this day, he has failed to make good on that promise.

Congratulations on turning fair-minded.

You see, Doc, I was taught that I am responsible for my own behavior, not anyone else's. No matter how disordered, I would defend again and again deprivation of such person's Constitutional rights. To me, that is supreme and inviolate.

Dick - I SEE THAT YOU -=STILL=- HAVEN'T PRESENTED THE POST TO PROVE THAT
I WANTED YOU TO LOOK 40 dB BELOW S-0!!
.....

Dick Carroll (dixie@townsqr.com) wrote:
: James, YOU are a true dingaling! I said **OF COURSE** any
: ham can see a 40 db below s-9 signal! that's above S-2 and
: any receiver with a working S-meter can and WILL show it, no
: test gear needed!

That's strange, at one point you said it would take very expensive
equipment to detect it. At that point I mentioned that if you set the
single tone to S9 on a receiver you could detect the carrier. But you
continued with other distractors.

; But that wasn't the issue.

Yes it *was* the issue in conversation #1,

; The issue was **looking for that 40db suppressed carrier below the s-0
: PSK31 signals I was listening to**!

This thread came several *WEEKS* after conversation #1 was going on. You
were using it to "prove" that PSK couldn't be copied below the noise
(which no one had claimed anyway.)

Dick you dingaling - you have merged conversations #1 and #2 in your mind.

The 40 dB below *S-9* is coversation #1.
The PSK weak signal conversation is #2.

; You just interjected this other bullshit trying to make some big Engineering
: splash, see if we can "embarrass" an extra who isn't an engineer!

But you make it so easy sometimes ;) Especially when you claim the
suppressed carrier is "gone" (conversation #1).

: You haven't mentioned a single thing yet that I am not
: fully familiar with!

(I'm quite sure of that!)

But;
Then why didn't you just admit at the time that one can tell that a
single tone being emitted by a SSB transmitter is detectable because the
suppressed carrier would be the give away? As usuall you kept modifing
your original challenge and adding distractors etc etc.

: You're a horses ass of Cecilian proportions! No less! Go
: sit on your sprectum analyzer!

I'm so glad that you keep these discussions on higher plane.

One egregious sin that OE commits, however, is that
it also puts the .sig at the top. Or did, in 4, at any
rate. I haven't bothered checking on 5, because I
know the odds that MS has suddenly pulled their
head from their ass and conformed to a standard
they didn't write.

Some questions about FRS

1. Does anyone know about a site that details the capabilities and restrictions concerning the use of FRS for commercial activities - is there a problem with tying up the frequency to transmit bursts of data?

2. Can this frequency support digital transmission?

3. Can distance from transmitted to receiver be accurately gauged depending on the power output to any degree of accuracy (5%-10%%)

4. Ideas about the cost of a transmitter? A receiver?

Please reply to post or lreed@alumni.prinNOSPAMceton.edu

I don't think so. Maybe you should read what I DID say again.

>It must have really been awful in the olden days when THE GENERAL EXAM
> CONVEYED ALL AMATEUR PRIVELEGES.

If we were considering reverting the service back to the time one-tube
transmitters, yours might be a good idea. What happened to the claim
that you wanted to "modernize the service"?

Your motivations in all this are made clearer, in every post Brian.

> Of the other license classes which may exercise VE "priveleges," how many VE-type
> questions are on their exams?

VE's with any class license are still required to know the things
covered on the Extra exam. It's not clear exactly what you are
complaining about. Your point is vague, if not nonexistant.

>see.

Call me pessimistic but I'd say we've been trolled.
A successful troll at that, my hats off.

a) "I privately e-mailed a poster to this group" doesn't explain why
he cross posted this to multiple groups. I'm reading from adfp.

b) He waved the Microsoft is evil flag, seeking knee jerking salutes

c) As much as needless quoting seems to be all the rage these days, I
can't blame Microsoft. Not for the inability of it's end users to
grasp what constitutes proper behavior, when firing off a single
synapse in the direction of inquiry, would yield all the information
needed about this oft spoken topic.

Hello Leftie Lenny and BYE BYE Herbie!
BAAAAA HA Ha Ha HA!!
Last woids I got from a friend on the
Islands is KV4FZ's antennas have been
blown out to sea and his tin shack & tar
paper roof are gone. Looks like Hemorohid
Herb the 14313 Turd won't be back on the air for awhile
Baaaaaa Ha Ha Ha Ha !! phuckin love it open
the champagine. >>
<<You call him "Lefty" Lenny which I take to mean a leftwinger. Now we all know that a leftwinger is close to Socialism while a rightwinger is close to Fascism. I therefore consider Lenny to be a CONFUSEDWINGER since he's a Jew who supports the neo-NAZI anti-Semitic dirtbag Schoenbohm as well as FZ's pals who, for the most part, supported and still suppport the idea of Intercon being controlled by Jews to steal money from phone companies and if you don't believe it, I have the sonovawhore Schoenbohm saying it. What then does it say about "Lefty" Lenny? He's a treasonous creep who pretends to be a Lubavitcher but in really is just a turncoat. A louse who calls Rabbis to report a fellow Jew. A scumbag who comes on this board to plead for doctored tapes to submit to Riley Hollingsworth to entice him to take yours truly off ham radio. Yes, I have that bit of Schaiercrap neatly stored on my hard drive to use against him at the proper time. As I said before, the French Resistance(Maquis) during W.W.II used to shoot a man like that who prefers crawling into bed with devils than being called a kike. Why I'd be surprised to find out that Lenny hadn't written to the Appellate Court in D.C. begging them to overturn the FCC's decision to remove the Virgin Islands' cancer from this hobby/service but then again, judging by the way he expresses himself on this forum, it might behoove Herbie Hitler if he wrote NOTHING on his behalf. You say Schoenbohm's antennas were blown out to sea? You know why? Because an octopus has a better chance in the future than Herbie of getting a ham ticket.

: > : test gear needed!
: >
: > That's strange, at one point you said it would take very expensive
: > equipment to detect it. At that point I mentioned that if you set the
: > single tone to S9 on a receiver you could detect the carrier.

: Un-huh. That's when you "shifted gears" to *your*
: "conversation number two".

Sorry Dick, I said that in conversation #1.
^^

You know, if you'd just take the time to read my repost-repost of what
we said, you wouldn't be digging such a deep hole for yourself.

: I personally never had more than one,
~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~

(Maybe it was your evil twin that *I* had the conversation with? ;)
"Someone" was signing your posts with some "ex-" call letter stuff for
awhile.

Dick, don't you realize that you were having *two* separate conversations?
One about PSK/SSB. And the other, starting >week later on "weak signal"
PSK. Why would I even mention -anything- about 40 dB in a weak signal
post otherwise? No wonder you're convinced that I said something I didn't
say. Read the partial repost - I said, "40 dB **STRONGER**".
~~~~~~~~^^^^^^^^~

; and tried to remind you of the subject, IE PSK31 at
: signal level of S-0, but you were evidently already outta sight,

Do you even remember your challenge for "anyone" to prove that a PSK
signal was being transmitted by a SSB rig? Do you really think that you
can change what *YOU* posted in two separate conversations by just saying,
"I personally never had more than one,". Go to Deja News if you aren't sure.

; no catching up to you to steer you back onto the main
: track. Ah, well......so goes it I guess.

What a lame excuse. You've been doing your best to confuse the "track" as
much as you can since 4/xx/99.

In anycase;
JUST ->> PRESENT THE POST <<- where I told you to listen 40 dB below S-ZERO.
(That *IS* what you claimed I said.) ^^^^^^^^^^^^^^^^^^

Otherwise you are just babbling and taking up bandwidth to drag this
farce out as long as you can.

GLENDALE, WV: The FCC sent a Warning Notice November 9, 1999, to General licensee
Roger L. Wiseman, KC8JBO, citing evidence that the licensee had been "deliberately and maliciously interfering with the radio operations of other licensed amateurs" on 20 meters. "This interference has occurred at various times in the last several months and includes broadcasting music and other unidentified transmissions," said a letter from FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth. Hollingsworth warned that continued operation of the type described could result in a fine or license revocation proceeding, and he requested that the licensee contact him to discuss the allegations.

Answers (I won't quote your questions)

1. It's FAMILY radio service, not commercial. Regardless of mode, you can't use it for commercial service. FCC rules may regulate mode -- with the FCC's current enforcement climate, you may not want to test this. How big a data burst?

2. Absolutely yes, but within the limits of the license. Any frequency can support digital comm, but the available bandwidth limits usability.

3. Absolutely not, since it's UHF and prone to reflection and atmospheric vagaries. You should see what a few watts can do under tropo ducting conditions.

4. Starting around $49. for some nice Motorola transceivers.

Other bands are available, such as the 900 MHz ISM, with more lax regulation than FRS. In addition, you could develop your modulation schemes on amateur radio bands (within the limits of your license, of course) and port them to the nearest commercial band. Commercial licensing is neither free nor easy.

It's hoped that a "warning letter" is all that is needed.
It is an effiecent use of resources to attempt to gain
compliance with paper before spending money and expending hours
running this person down.

Mr. Strom- I'm curious. How can you "know" that he is guilty?
Hearsay by fellow hams isn't good evidence.
Unless there has been a near-field DF by properly trained
personel, you can't say you "know."

I'm also curious as to how the FCC could have "caught"
those two guys jamming from a mobile unless they were mobile
themselves in the area, which is unlikely. Are they relying
on ham hearsay in that case?

Regards,
Dave S.

How do we know that this is a letter from Hollingsworth and that it is not
just another internet hoax?

I disagree.

My response (as reposted by Marksman), was a reply to a question posted in misc.survivalism/alt.survival by a person who was looking for a rugged portable handheld to be used in a survival or preparedness situation.

Both m.s and a.s are groups where the discussion topics vary widely. I have no idea who posted this to talk.politics.guns

: All I have to show is that I learned more than just how to send and
: receive code when I was learning CW to prove your statement wrong. And
: I'm telling you that I did. Can you prove me wrong?

Can you prove I didn't really learn how to build a beach buggy by learning how to ride a unicycle ;) I extended my knowledge of welding by building the unicycle first :)

It was so long ago that I used two Crosley connecting rods, two 1940 Ford generator bearings a wrist pin from a Hudson 6 plus various bicycle parts.

: > ; How can you presume
: > : to tell me otherwise? You haven't done it, and you do not share my
:
: > Why not, Dick is telling me I said "below" when I said "stronger"? :-/
: > PCAs tell us that we have to know code because.....

: I don't care about what Dick tells you.

Now that you mention it..... I don't either ;-)))) He speakith with forked toungieeee.

; Cecil has told me that power is
: coveyed by coaxial cables. Do you find that relevant to this discussion?

I can give you a definite "maybe" on that one. :)

: > : experiences. How can you claim to know better than I what I learned?
: > : That's silly.
:
: > I still like the FCC's idea that the code test is
: > nothing more than a test of the "skill" of knowing Morse code.

: I do too. But you have assumed that skill comprises only knowing how to
: send and receive it. I would claim that someone skilled in it's use
: would know how to communicate with someone in an amateur radio QSO with
: it, rather than simply be able to associate dits and dahs with the
: corresponding letter and numbers.

Not really, a ham that doesn't speak English could actually pass our 100% copy exam and not be able to communicate otherwise in code. He would have no idea what those squigily lines mean. Just as I can't read Arabic.

On the other hand, an English speaking person knowing code -itself-
wouldn't be impowered with anything other than a way to communicate. Same as
talking. It's a tool. What one -does- with it is up to the individual.
Techs basically "never" use code, yet can and do learn much the same things
you did but on different frequencies.

: > Which letter of learning Morse code taught you to build an antenna ("A"? :)

: Most of the letters in the alphabet helped me to learn about 40 meter
: antennas.

(Darn, and I had to learn about the antenna stuff separately from learning
code.)

Ahhhh, "helped me to learn". But if you hadn't learned code (remained a
Tech for instance) you could have just as easily learned the same things.
Many SWLs build their own dipoles etc.

: > Your experiences are/were due mostly to the result of getting a license
: > that requires the "skill" of Morse code. IF you learned Morse code but
: > didn't get a license you would NOT have worked DX on HF etc unless
: > you went to a ham station where -that- operator HAD gotten the license by
: > also having Morse code -skill-.

: Like you, I had no skill communicating via CW even though I knew all the
: characters when I got my Tech+. It was after that that I acquired skill
: in using it. Is any of this sinking in yet?

Yes, one doesn't have to know Morse code to learn things other than the
"skill" of using Morse code.

And as I said in the very begining, "you had -enough- *skill* to get the
license".

: > Most Cbers haven't learned code. Do you think they are all ignorant of
: > many of the things YOU learned because of code (somehow)?

: I don't know. Wouldn't each of them be different?

Exactly, and many of them -do- know much theory and other stuff without
knowing CW. (Of course we know *more*, but that's besides the point ?;-)

: > : So your statement in NOT strictly true. Back to you.
:
: > What ever. How 'bout we're -both- right? :)

: I never said you were all wrong, Jim, so of course!!

"All wrong", I like that. (Hand extended and a harty laff. ;)

I could only catch bits and pieces of another Tolassi ham radio disgrace today so can someone tell me what happened? Why did KE9RY, KC3AU and Kerry from Georgia(I forgot his call) blow up. I think KE9RY was running traffic for an MM someplace near Hurricane Lenny and David said something to tick off everyone. I couldn't hear KC1ZQ since there was no propagation between VT and NJ but it must have been improper for such a reaction to occur. Maybe David thought that Riley wasn't listening? I'll bet he was, so maybe it's goodbye David.? You know David is no dummy; his ham obstreperousness is put on but he's gone too far. He was sanctioned once by Riley and should have known his limitations.

Howdy.

I was asked to add a prefix look up utility. It is now available on the QSL page at http://hfradio.org - If you need to know where a prefix is from, simply enter the call or prefix and see what country it is assigned to.

Don't forget: http://hfradio.org, a non-commercial site offering:

+ Azimuth Map / Equidistant Map Creation (choose any QTH as center, many options)

+ Propagational Resources (live, real-time reports, eAlert service (sign up for automatic email solar/geo reports, complete with Aurora index))

+ News, and DX information and reports

+ QSL Manager and Callsign Lookup center

+ Swap and Shop

+ FREE HOME PAGES THAT YOU CAN USE TO POST YOUR OWN HAM OR SWL SITE

+ Bookstore - SWL and Ham related books. Over a 1000 titles so far.

+ Plus more (Directories, etc.)

This is my offering to the community, all funded by me. I am working hard to bring excellent content to the site. I have need for others who might wish to assist. I need a Software editor -- someone who can review and post software links, etc. Let me know if you are interested. (See the site on how to email me).

If you feel up to it, after looking around the site, drop me a note (you'll find my address on the site) and share your thoughts.

73!

3350. The Telegraph and the Golden Spike: Origin of the word "ham"?

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-19 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <813027$10b$1@news.hawaii.edu>
Source record: 127044
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.boatanchors,rec.radio.amateur.policy

Here's a fascinating page from Coe's book, The Telegraph:

The telegraph was on hand to record a great moment in railroad history when the transcontinental [railroad] line was completed in 1869. The following news dispatch to the New York Times tells the story of the final ceremony:

WASHINGTON, May 10, 1869 -- The completion of the Pacific Railroad monopolized public attention here today to the exclusion of everything else. The feeling is one of hearty rejoicing at the completion of this great work. There were no public observances, but the arrangements made by the telegraph company to announce the completion of the road simultaneously with the driving of the last spike were perfect.
At 2:20 this afternoon, Washington time, all the telegraph offices in the country were notified by the Omaha telegraph office to be ready to receive the signals corresponding to the blows the hammer that drove the last spike in the last rail that united New York and San Francisco with a band of iron.
Accordingly, Mr. Tinker, manager of the Western Union Telegraph office in this city, placed a magnetic bell-sounder in the public office of that company, corner Fourteenth St., and the Avenue, connecting the same with the main lines, and notified the various offices that he was ready. New Orleans instantly responded, the answer being read from the bell-taps, New York did the same. At 2:27 o'clock offices over the country began to make inquiries of all sorts of Omaha, to which that office replied: "To everybody, keep quiet. When the last spike is driven at Promontory they will say `Done." Don't break the circuit but watch for the signals of the blows of the hammer."
[Telegraph wires were connected to the metal head of the spike maul and to the spike. Each blow of the hammer on the spike was recorded as a tick on the nationwide telegraph network.]
At 2:27 p.m. Promontory Point, 2400 miles west of Washington, said to the people congregated in the various offices:
"Almost ready. Hats off; prayer is being offered." A silence for the prayer ensued. At 2:40 the bell tapped again, and the office at the Point said: "We have got done praying. The spike is about to be presented."
Chicago replied: "We understand; all are ready in the east."
From Promontory Point: "All ready now; the spike will be driven. The signal will be three dots for the commencement of the blows."
[Then came the signals corresponding to the actual blows of the hammer.] For a moment the instrument was silent, then Promontory sent the word "done," and the continent was at last spanned with a

continuous rail line from east to west.

Maybe this news story has given meaning to the word "ham," as in "hammer fisted"??? (Just kidding, guys!)

Anyway, it sure is fascinating to imagine wires connected to the hammer and the spike, and with each blow of the hammer, every telegraph sounder in the country clicked!

I fully understand the point. I've been watching this thread since the original posting. and the poor guy doesn't have any solid leads for how to fulfill his son's Christmas wish. He never said that a kit was a requisite.
In the absence of perfect solution, an alternative is often appreciated.

Joe

Are there any HF amp kits avaliable any more? I would like to build my own amp but do not have the means to do the metal work. I can handle the electronics so I figured a kit would be my best option. I would like to build a HF amp and a 2m amplifier. Any help or suggestions would be appreciated. I guess plans would be ok if there was a source for the metalwork also.
Please reply to blueglow@mindspring.com

Yes - FRS is for voice communications ONLY.

"You may use an FRS unit to conduct two-way voice communications with another person. You may use the FRS unit to transmit one-way communications only to establish communications with another person, send an emergency message, provide traveler assistance, make a voice page, or to conduct a brief test."

Business use is OK - but nothing but voice.

It's 1306 Z on Nov.19th and just checked my e-mail to see if Riley has sent me a "nasty" after having been "reported" by the "esteemed" group holding forth on 14.313 every morning, JACKALS INC. I am pleased to see nothing received from Riley therefore I want to thank K2IVX, KE9RY, WA4KBX for failing. I tell you it's a mechiah knowing one's ham ticket has lived to another day. Bless you. AF2Y hunters. You'll never outwit me but I invite you to try and sweat and still come up emptyhanded. Incidentally, although I'm outraged over the awfully concocted story about my having disparaged the memory of Tom's daughter for whch he fell hook, line and sinker, nonetheless I must be candid by saying that KE9RY did a wonderful job with that boat in the area of Hurricane Lenny which proves what a good antenna will do., Let's keep in mind that public service is ham radio's keyword and byline and anything we do to help our fellow man in distress is of greater importance in this hobby than anything else. And of course had Intercon stay put on 14.313 where they belonged instead of having acquiesced and run away to .300 thanks to the pressure from the BARFies and Stumpers, THEY, instead of KE9RY would have been able to handle the situation admirably. The situation at sea put a feather in the hat of KE9RY and plucked many out of those worn by Intercon members.

Hi Folks,

We have a coworker who is taking a trip from lake Ontario to the Bahamas on a sailboat. he is equipped with a packet set-up; IC HT, PK-80 TNC, 30 watt amp, and a J-pole antenna. He also has a tem meter rig. Is there anyone who could provide some local packet node information and help him to log on to a node so that he could send packet mail/messages back to us here in NY state. I don't know if DX cluster or std. packet would be best. He is currently in Ft. L., and someone who could be on a local 2m repeater to help him would be greatly appreciated. Thanks in advance,

What power level did you have in mind?

If you're looking for 20 watts up to 600 or so, you can get kits
for the Motorola Application Note amplifiers from folks like
Communications Concepts and Mainline.

If you want more than that you're almost certainly on your own.
References to "metalwork" usually imply a tube amp, and few of
the good designs require more than hand tools (and patience :-)
to make.

Big amplifiers need big power supplies (figure 50 volts at 50
amps for a big solid-state amplifier, 3000 volts at 1 amp for
a U.S. legal limit tube amp). This can be a bigger challenge
than the amplifier itself.

One could call the person holding the hammer and making the blows a
"hammer", could one not ? Then if one is a hammer, does he not "ham"?
chortle

I just got a copy of Bob Leger's message in my behalf.

It has been brought to my attention that there are some folks that take offense to the posts of radiosigs@aol.com.

There is now an effort to send untrue complaints regarding this gentleman's to the attention of AOL.

These same folks that are sending these complaints to AOL are the same who have been sending complaints to the Federal Communications Commission regarding the members actions on the Amateur Radio ham bands.

I urge you to not take serious these complaints. If you read the posts of Radiosigs@aol.com you will find that he has not targeted any individual, but merely has an opinion of a certain group or groups of individuals actions and antics on the ham bands.

Thank you in advance,

Bob Le'ger/rcleg@aol.com

WHAT SNEAKS! THEY CAN'T GET ME OFF THE AIR BY WRITING UNSCUPULOUS LETTERS TO RILEY. K2IVX's APPEAL TO GET TAPES OF ME TO TURN INTO RILEY MUST HAVE FAILED. AND NOW THIS? WOW-TALK ABOUT HITTING BELOW THE BELT. CREEPS ARE EXACTLY WHAT THAT JACKAL GROUP IS. I AM SHOCKED BUT THEN AGAIN I KNEW WHAT KIND OF MENTALLY HOMELESS PERSONS THEY WERE. INCIDENTALLY I GOT A CALL AN HOUR AGO FROM A GENTLEMAN KIND ENOUGH TO TELL ME WHAT KC1ZQ WAS DOING YESTERDAY TO ANNOY THE FOLKS AT SEA, KE9RY, KC3AU AND KERRY. I CAN'T FAULT THEM. DAVID HAD NO BUSINESS TOSSING BARBS AT THOSE IN TROUBLE AS WELL AS THOSE TRYING TO GET THEM OUT OF IT. HE CROSSED THE LINE AND WOULD BE BETTER OFF ON CB IF THEY'D HAVE HIM. FURTHERMORE THIS MORNING WHILE TREADMILLING, ON 14.316 I WORKED VK6ALF WHO GAVE ME A 5/6 ON A RELATIVELY DEAD BAND. DON'T BELIEVE ME? ASK K4AVY WHO BROKE IN WHILE MOBILING AND WORKED HIM ALSO. I MUST THANK WB2OTK FOR TELLING ME THE SPECS FOR THAT "CLOUDWARMER " WIRE BEAM. WHAT A HAM! WHAT A MAN! WHAT AN ANTENNA!

First K2IVX reports me to my Rabbi who asked me what was wrong with him. Then he gets on this esteemed NG to request tapes to get me in trouble with Riley. Now he urges everyone to contact AOL. He's HAPLESS AND HOPELESS COMPARED TO THE WIT, WISDOM AND GUILE OF AF2Y. Give it up Lenny. I speak the truth and you can't take it.

Hello,

I am looking for a VHF PA for a GE master II mobile radio. 110 watts.
Working and clean.

I live near Morristown NJ. (Northern NJ)

Please email back

thanks, Bill DiCarlo

Communication Concepts advertise regularly in the magazines,
and a very quick search of the web came up with:

http://www.communication-concepts.com

Mainline's web presence (http://www.mainlinegroup.co.uk)
only seems to be a placeholder, but their phone number last
time I ordered from them was +44 116 2777648. Probably
subject to yet another U.K. number reorganization. :-(

Apparently Riley took a liking to Tom,KE9RY, at the recent Milwaukee Hamfest but I hope nothing rubbed off on the former. Now let me explain. Get this scenario.
At a future Hamvention the guest speaker is Riley Hollingsworth. The auditorium is jammed packed and he's introduced. Riley walks to the podium, raises his hands to indicate silence would be appreciated, the crowd settles down, he clears his throat and begins "Anyways."
Can you imagine the reaction? Catcalls and dozens upon dozens of tomatoes are thrown at him, drenching him with stains. And as he walks off stage, a Liberty Net advocate, for who's platform Riley has no use, stands up and screams as he might for all dissidents,"And you're red too."
Doc, AF2Y. Radiosigs@aol.com

Marksman <marksman@juno.com> wrote ...
:

This should have been posted in the amateur radio
groups. Or Rec.Radio.CB as they deal in "outlaw"
radio.

: Sparhawk Knight wrote:
:
: > Has anyone prepared a FAQ or website that sets out information on
: > handheld radios (tranceivers) in an easy to understand language?
: >
: > I personally am confused about:
: >
: > 1. what is the 'best' handheld for a survivalist -primary purpose is
: > communication with group members around our property and while
: > 'travelling'?
:
: ****NOTE to all and sundry HAM's who will undoubtedly start having
: apopleptic fits at what I'm about to post. The following is for a
situation
: involving a TEOTWAWKI-type scenario and is suggested for educational
: purposes only. Under such circumstances, if the user were to be the
object
: of a foxhunt by overzealous, post-TEOTWAWKI HAM's searching for a
ticketless
: illegal, they would probably be met with equally overzealous use of force.
: This author advises anyone and everyone who is interested in pursuing the
: interest of radio communications to be good little citizens, give the FCC
: your name, social security number and home address so that they may
license
: you properly and you will then be allowed to purchase and use the
following
: gear with the included caveats.****
:
:
: To Sparhawk,
:
: IMNHO, try finding a Pre-1999 Yaesu FT50 at a HAM swap meet. They are
: obscenely simple to freeband (open up to reception and/or transmission on
a
: very wide number of frequencies). Another good one that doesn't need
much
: modifications to receive a ton of freqs (including, but not limited to: AM

: and FM radio, Shortwave, TV sound, police, fire, FEMA, State agencies,
: Federal Agencies, 800 mhz and some 900 mhz (with the cell freqs blocked.
.
: .no, honest!)). Neither of these are inexpensive, running about $300 -
$400
: apiece. Both are extremely durable and conform to several mil-specs for
: water-resistance, shock and dust.
:
:
: >
: > 2. what affects the range of a handheld (I want about a five mile
: > range)?
:
: Good luck without a repeater. I've barely pulled 5 miles under the best
of
: conditions with the small "rubber ducky" antenna on my handhelds unless I
: was plugged into something other than the standard battery pack.
Everything
: in your environment affects transmission and reception from how hilly (or
: not) the ground is to solar flares.
:
:
: >
: > 3. are throat mikes/ ear-pieces a gimmick or real advantage in certain
: > situations?
:
: Both have their advantages. I have a couple of different ones, but they
are
: also expensive if you're looking for waterproof ones. You will also have
a
: difficult time finding any specifically made for HAM radios. Luckily, the
: commercial brand of Yaesu (called Vertex) has a lot of high-quality throat
: and bone-conduction mikes available from aftermarket producers (do a
search
: for "New Eagle" on the web).
:
:
: >
: > 4. can you encrypt/scramble communications with a handheld?
:
: Yes, you can illegally modify a Digital Encryption System board into your
: handheld. You may want to get a business radio (e.g., a Motorola Sabre)
: which already has the board installed. Again, check legal issues here.
The
: FCC has deemed it to be against the law to encrypt amateur radio signals,
: but a few have done it. DES systems are also a touch expensive (around
$600
: for state-of-the-art boards. . each) and I'd recommend having someone who
is
: an accomplished radio repair person do the installation which will also

add
: to the cost.
:
:
: >
: > 5. why the interest on the signal ranges of handhelds?
:
: See above comments upon what you can receive.
:
:
: >
: > 6. can a base station be used to boost the range of handhelds in a
: > geographic area?
:
: Yes, and some handhelds can do this also. Do a search for (IIRC) the
: Kenwood TK-G71 which has a built-in cross band repeater.
:
:
: >
: >
: > I am not a HAM operator and training in such is a way down my list of
: > priorities. What I do need immediately is to set up some form of basic
: > 'portable' communication system that is secure as possible.
:
: See above. Also I'd suggest going legal. HAM's are known to have little
: else to do but play frequency cop and will actually get together to track
: you down if they find out you're transmitting without your license. And
: this is painfully easy to do. Some look at it as a sport. When they find
: you, they will turn you over to the Federal Authorities.
:
: Unless you want the FCC SWAT/HRT team kicking in your door, go get a basic
: No-Code Technician's license. Practically anyone with an IQ over 80 who
can
: remember a few basic rules can get it. Go to Radio Shack and buy their
: 6-tape No-Code license instruction tapes and listen to them on the way to
: work. The tapes cost about $30 for the set and teach you everything you
need
: to know to get started.
:
: However, even the highest level of amateur licensing will not allow you to
: transmit encrypted messages. . .so I'd suggest saving that for a true
: TEOTWAWKI scenario.
:
:
: >
: > I have run a search on the newsgroup but recent posts on this topic
: > were scarce. I would appreciate any help that is out there.
:
: Few people here will talk that much about it. Again, HAM's can be a bit
: overeager in their flaming of such suggestions. Some of what you've

: discussed can actually be dangerous if you don't know what you're doing.
If
: you have a powerful transmitter and your mike locks open on a freq used by
: cops, fire or emergency personnel, it can cause a major problem to them,
so
: there are some true concerns to be worried about.
:
: >
: >
: > John M
: >
: > PS: as an aside I note on 'Die Hard 2' the radio used was a Kenwood TH -
: > 450-AT. Does such a radio with such capabilities exists - I cannot find
: > it on the Kenwood site.
:
: Probably, but remember the terrorists were government guys with access to
: the best equipment. There's a lot of stuff that is simply not sold to
: regular people.
:
: Oh to have the set up that I had when in the military, but alas, I cannot
: afford (or will not spend) $2 - $4K on a handheld that eats up batteries
: like a member of Overeater's Anonymous who's fallen off the wagon at an
: all-you-can-eat salad bar. Lithium-Ion batteries cost big $$ and alkaline
: AA's drain very quickly when you start adding DES capability and transmit
on
: the highest power settings.
:
: Just some thoughts, hope they help.
:
: Geoffrey L. Hardin,
: geoffh@abcs.com
:

:
: > What's the best Y2K handheld ham radio,
: >
: > Yaesu FT51 HP
: >
: > ICOM 32W
:
: I don't have any experience with the FT51, but I have both the FT50 (which
: is extremely mod'able) and the VX5R which I highly prefer over the FT50.
:
: the VX5R is a Tri-Band, you get 50, 144 AND 440. It mods out rather
easily
: and also has the ability to pick up AM/FM stations, TV sound, Aircraft,
and
: Shortwave. Downsides are that with AA battery pack, the VX5 only puts out
: 1/2 watts, but you should be able to easily come up with a way to make a
: larger battery pack that uses the external DC plug to boost that, if
: necessary.
:
: The FT50 is an ideal "survival" radio (don't limit your preparations to
Y2K,
: there are more important scenarioes that threaten you everyday and which
: happen all over the country). I've beat the hell out of mine and it still
: works.
:
: Yaesu's FT50 and VX5 are Mil Spec 810 C/D/E.
:
:
:

You are so rught Mr Brew!!

Mr Hollingsworth will take care of "Dopeing Jimmy" soon. He whined about his xyl being sick to Riley and also about his need to get back on the air because of her sickness? Out of the goodness of Rileys heart he took pity on the skumbag. Put him on probation for a year. With the help of Dr Hate AF2Y, it looks like Jimmy is on the way out of ham radio.
All I can say is hooray!! We don't need people like him in amateur radio anyway!!

Juicelikaf2ysux

Un-huh. That's when you "shifted gears" to *your*
"conversation number two". I personally never had more than
one, and tried to remind you of the subject, IE PSK31 at
signal level of S-0, but you were evidently already outta
sight, no catching up to you to steer you back onto the main
track. Ah, well......so goes it I guess.

El Stinkeee wrote in message
<80veks$ks5$1@birch.prod.itd.earthlink.net>...
>Hello Leftie Lenny and BYE BYE Herbie!

Hey Doc, I guess I chose poor woids! The term "Leftie Lenny" was
a term widely applied to the storm which was in Hitler Herb's
neighborhood this past week. The Islanders called the storm a pet
name "Leftie Lenny" since it moved from West to East and developed
in November, two rare events. In any case my contacts tell me
that Herb the Turd KV4FZ has been running around all over St Croix
with his HT on simplex and the local radio clubs don't want any
part of him! They know he likes to use natural disasters to grandstand
and inflate his pachyderm-sized ego, so they aint giving him the
chance
to do so on the Net! Serves him right. (He did something like this
a few years ago, stockpiled cell phones and water in some storage
shed one of his feral kid owned and after the storm hit he tried to
sell
the stuff to his neighbors at 10000 times cost. What a scumbag!
What eles are we to expect from a slime who sold w4afx a bum amplifier
and has yet to refund his money. Hope this clears stuff up!
(one thing for sure - 20 Meters stinks much less now with no KV4FZ on
it!!) >>
<<Thanks for the clarification. I got news for you buddy-the Lenny in Port
Washington is as dangerous as the Lenny in the Caribbean. Glad to hear
"Tannenbaum" on St.Croix is having his miseries. Couldn't happen to a bigger
s.o.b and the rat is ghetting it good. Years ago when that bastard was
trivializing the Holocaust with his weasel pals, I prayed right on the air to
Jehovah to destroy him and his rats. One by one they're falling-either
sickness, death, calamity---vengeance is mine sayeth the Lord but doesn't
sayeth sound a bit fairyish? Thumphthin that Tiny Tim would hath said. Yep.
Herbie the Rat has stolen, chiselled, defrauded, lied and corrupted. The single
most rotten despicable individual to ever hold a ticket and as Frank sang,"And
now, the end is near, he faces the final curtain. And this my fellow hams I
speak since I am certain. He's been on too long and now it's time to pay.He's
gone so far and the FCC will do it their way."
By the way I saw Paul Anka sing it on stage at Bally's in Las Vegas since he
supposedly wrote "My Way" for Sinatra and if you've never seen him in person,
you're missing something!

Why I feel that most survivalist talk is foolishness, my suggest
would be to buy the Bendix King VHF-HI or UHF radios. The
Army uses them (PRC-127) as squad radios. Many of the guys
in the local Emergency Management and volunteer fire departments
have bought them as well. These units have 15 channels and
can be field programmable.

For long range communication, the SGC-2000 is a commerical
radio used by boaters, the military and others for HF commo. It
covers 1.8 to 30 Mhz. With the little work it will HF data as well.

If you would become a Ham, you might have learned this
already. That is why I cross posted it to Rec.Amateur.Equipment.

Where is that required? Indeed, when I passed my 5wpm
Novice the ham that administered the test simply sent
a paragraph from a QST magazine. There is nothing
in Part 97 that specifies content of what must be used
for the CW test. There is a basic set of characters
that one is reuired to learn, but there is no requirement
that anyone learn what the Q-signals mean as part of
the CW test.

Basically NOTHING except for being overworked. The C.I.B. of the W.T.B of the F.C.C.finally moved it's rear end last January in an attempt at reinforcement, MAZEL TOV. Suddenly they found funds? Bull, they were there all along but suddenly they realized that the big boys in Switzerland were eyeing our freqs. for pecuniary advantge to the detriment of us. And so they gave Riley H. a butterfly net and told him to go nab them all. IMPOSSIBLE. Overwork creates mistakes and he's made a few but......identified creeps are being hounded down while the unidentified seem to be making hay while attention is diverted away from them. Furthermore it more or less forces Riley into a position of paying attention to fraudualent reports the likes of which come from Polly, and Youngblood and Lenny and Tom. It entices a gyy like Schaier to get on this forum to ask geniuses to send him tapes of AF2Y jamming when he knows damn well he isn't. And so here's what's needed. Finally we should all be forced into forking over ten bucks a year to renew our tickets and those bucks should fund ten enforcers, one from each callsign district. In this way the C.I.B will make CONCENTRATED efforts into cleaning up things instead of expecting Riley to be everywhere anytime. Or is it anytimes like anyways?
Doc, AF2Y. Radiosigs@aol.com

3400. Riley Reminds "nets"

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-20 00:00:00 UTC
From: kk7ho@aol.communicate
Message-ID: <19991120120042.09875.00000272@ng-cf1.aol.com>
Source record: 126935

FCC LETTER INCLUDES OPERATING REMINDERS FOR NETS

FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth recently took advantage of an enforcement-related letter to issue some operating reminders for nets.

On November 3, Hollingsworth wrote Alan E. Strauss, WA4JTK, of Carol City, Florida, to follow up on earlier complaints about the "14.247 DX Group," for which Strauss serves as net control. The FCC had contacted Strauss earlier this year regarding complaints that the 14.247 DX Group monopolized that frequency and interfered with ongoing amateur communications. The November 3 letter included correspondence the FCC received on August 4 that Hollingsworth said conflicts with Strauss's explanation of interference alleged to have occurred to the net in July. Hollingsworth said the case will remain open, and the FCC will continue to monitor net operations.

Hollingsworth used the occasion of the Strauss letter to again point out that amateur frequencies are shared, and no net has a greater right than any other ham to a given frequency and cannot take over a frequency unless it is voluntarily relinquished.

If the frequency is not relinquished, Hollingsworth said, amateurs must exercise "good Amateur practice" in choosing another frequency that does not disrupt existing communications. "A net 'taking over' a frequency from existing legitimate communications or deliberately operating disruptively close to existing legitimate communications will be considered to be engaging in deliberate interference," he wrote.

In article <3835EA17.BDD@texas.net>,
jstrohm@texas.net wrote:

> 1. It's FAMILY radio service, not commercial. Regardless of mode,
> you can't use it for commercial service.

Not exactly correct.

From the FCC:

The Family Radio Service ("FRS") is one of the Citizens Band Radio Services. It is for your family, friends and associates to communicate among yourselves within your neighborhood and while on group outings. You cannot make a telephone call with a FRS unit. You may use your FRS unit for business-related communications. Expect a communication range of less than one mile.

FRS Rule 3 - Types of communications.

(a) You may use an FRS unit to conduct two-way voice communications with another person. You may use the FRS unit to transmit one-way communications only to establish communications with another person, send an emergency message, provide traveler assistance, make a voice page, or to conduct a brief test.

(b) The FRS unit may transmit tones to make contact or to continue communications with a particular FRS unit. If the tone is audible (more than 300 Hertz), it must last no longer than 15 seconds at one time. If the tone is subaudible (300 Hertz or less), it may be transmitted continuously only while you are talking.

(c) You must not use an FRS unit in connection with any activity which is against federal, state or local law.

(d) You must, at all times and on all channels, give priority to emergency communication messages concerning the immediate safety of life or the immediate protection of property.

(e) No FRS unit may be interconnected to the public switched network.

FRS Rule 4 - FRS units.

(a) You may only use an FCC certified FRS unit. (You can identify an FCC certified FRS unit by the label placed on it by the manufacturer.)

(b) You must not make, or have made, any internal modification to an FRS unit. Any internal modification cancels the FCC certification and voids your authority to operate the unit in the FRS.

(c) You may not attach any antenna, power amplifier, or other apparatus to an FRS unit that has not been FCC certified as part of that FRS unit. There are no exceptions to this rule and attaching any such apparatus to a FRS unit cancels the FCC certification and voids everyone's authority to operate the unit in the FRS.

For complete information, see the Commission's Rules for the Family Radio Service, 47 C.F.R. 95.191-95.194.

For general information, please contact the FCC National Call Center toll free at 1-888-CALLFCC (1-888-225-5322) or e-mail callctr@fcc.gov. For specific information, please contact the Public Safety and Private Wireless Division of the Wireless Telecommunications Bureau at (202) 418-0680 or E-mail wtbinfo@fcc.gov.

I don't know who you are but I hope that you are only saying those horrible things to get back at AF2Y.

I am Jewish and greatly offended by your words and his. Wouldn't it be better to let him slop in the sewer by himself? Why would anyone want to be in the gutter with him?

Normally I wouldn'y even try to communicate with someone who has written what you have. But yesterday I got a real surprise-- someone who has written some of the most horrible stuff about Jews wrote to me and apologized for suggesting that all Jews were like Doc or that Jews even condoned his behavior. I don't know your faith but whatever it is, I'm sure there is at least one person of your faith you dislike because of their behavior.

I don't expect an apology nor am I asking for one. I am however asking that you consider the individual you are dealing with and think about whether just ignoring him might be a better strategy. It has worked on 14.313 and would work here if we all just considered AF2Y's motivation. I promise you that if he didn't have an audience he would just go somewhere else to stir up hate and bring out the worst in people.

Think about it,

Len

3403. Re: Lloyd, where are you?

I don't recall that he indicated any such thing; and if he did he
was wrong. Furthermore, I don't see how anything you said
contradicts my statement that the Net discusses current events and
meets weekly.

I can only observe that if the purpose of the Liberty Net was to
"cause trouble," then the Net participants must be supernaturally
patient people, since for the first 22 years of its existence there
was no trouble whatsoever associated with it.

Any subsequent "trouble" can be laid directly at the feet of those
who purposely interfere with the Net.

> If not, then why did he ask
> Misek for its justification and why did he suggest a move to the Internet?

I can't read minds, though I suspect that lies told to him by those
who would like to see the Net shut down were a major factor. All the
information I have about that subject is posted at:

http://www.3950.net

> Can
> you explain why the LibNet is in Ray Franklin's Internet Hate Directory?
> Hmmmmm?>>
[...]

Actually, Franklin's laughable collection (which can be seen at
http://www.bcpl.net/~rfrankli/hatedir.htm) is chock full of links
and references that haven't even existed for years. The page in
question was not a Liberty Net page, but rather a page which at one
time made a reference to the Liberty Net, but no longer does so.
Look for yourself.

The numerous current pages dealing with the Liberty Net aren't
listed there, for some reason or other.

The really frightening thing is that Franklin and his ilk are promoted as "authorities" by the various groups, led by the Anti-Defamation League of B'nai B'rith, who would like to censor the Internet. It's quite appropriate that Franklin chose as his symbol a book being burned.

With good wishes,

Kevin, WB4AIO.

The L.A. Jammers are still at it on 147.435 Mhz.. Riley won't touch them.??? The Saddle Peak Repeater, W6NUT is loaded with jammers such as Dave Weiner, AC6AK, Jeff Jurenka, KD6GDB...and WH6CSG....

These idiots are running high power remotes, (hundreds of watts) to get the upper hand on an 80 WATT REPEATER.!!!

Talk about stupid.....The MORON of the pack, KD6GDB also records the conversations on the repeater, and sends them to Riley Hollingsworthless....

Message-id: <3836D32E.5AD1DECB@avotec.com>

I don't know who you are but I hope that you are only saying those horrible things to get back at AF2Y.

I am Jewish and greatly offended by your words and his. Wouldn't it be better to let him slop in the sewer by himself? Why would anyone want to be in the gutter with him?

Normally I wouldn'y even try to communicate with someone who has written what you have. But yesterday I got a real surprise-- someone who has written some of the most horrible stuff about Jews wrote to me and apologized for suggesting that all Jews were like Doc or that Jews even condoned his behavior. I don't know your faith but whatever it is, I'm sure there is at least one person of your faith you dislike because of their behavior.

I don't expect an apology nor am I asking for one. I am however asking that you consider the individual you are dealing with and think about whether just ignoring him might be a better strategy. It has worked on 14.313 and would work here if we all just considered AF2Y's motivation. I promise you that if he didn't have an audience he would just go somewhere else to stir up hate and bring out the worst in people.

Think about it,

Len >>

3410. ARRL refutes PCTA assertions that "HF is safe from commercial interests"

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-20 00:00:00 UTC
From: "Carl R. Stevenson" <wa6vse@fast.net>
Message-ID: <8179ql$7t8$1@news5.fast.net>
Source record: 126945
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

-----BEGIN PGP SIGNED MESSAGE-----
Hash: SHA1

Dave Sumner's annual "Please send us money to protect amateur frequencies"
letter contained the following contradiction of the typical PCTA assertion that
"HF
is safe from commercial interests, so why does the ARS need more HF operators?"
(A variation on the PCTA's "Let them eat VHF" theme ...)

****
"We even face new pressures in the high-frequency bands below 30 MHz, recently
thought
to be of little commercial interest. We amateurs have made great strides in HF
digital
communication. Unfortunately, there is a down side to our success. The new modes
and
techniques that amateurs have pioneered have led to a renewed interest in HF
communication
among commercial users, government agencies and humanitarian organizations.
Fixed
service bands, long thought to be territory for future expansion by HF
broadcasters and
amateurs, are coming alive with signals.

The long-awaited realignment of the 40-meter band to better serve the needs of
HF
broadcasters and amateurs could come up as early as 2003. Unfortunately, so
could the
adequacy of the HF broadcasting bands between 3900 kHz and 10 MHz. Yes, you read
that correctly: 3900 kHz. In other parts of the world the upper part of our
75-meter band
is a broadcasting band, and the broadcasters would dearly love to use it here."
****

There you have it ... even the ARRL admits that our HF allocations are not
"safe from desires by commercial interests." Interesting that many from the
NCTA have been saying that all along ...

Dave also said:
****
"Another item on the WRC-2000 agenda is the setting of the agenda for the next
WRC.
probably in 2003. As important as issues such as Little LEOs may be for us, the
agendas
for future conferences are equally important."

****

This is pretty obviously the part where the ARRL/IARU will attempt to
once again get "Consideration of S25.5" bumped from the WRC Agenda
... since it's pretty that postponing consideration of S25.5 is the ONLY way
that an ITU Treaty requirement for Morse testing will be preserved.

I have no problem with the ARRL spending my money to legitimately
work to protect amateur bands from commercial encroachment.

However, I *DO* have a problem with them spending my money to stall
the end of code testing requirements in the ITU Treaty by working to get
the item bumped from the agenda again and again.

Thanks for the post Carl..You changed my mind about the ARRL. I thought they were worthless and had betrayed the ham community. If they are helping delay a nocode HF treaty (other than CB)...they are OK in my book. Hell I might even join up again if that's really whats going on.

For anyone thinking that the Liberty Net has a "hold" on 3.950 and that David Castle and friends have no right to be there ahead of them, Riley says you're WRONG. Read.

Hollingsworth used the occasion of the Strauss letter to again point out that amateur frequencies are shared, and no net has a greater right than any other ham to a given frequency and cannot take over a frequency unless it is voluntarily relinquished.

It's your money ... spend it as you see fit.

However, I don't see my post as "an anti-ARRL article" ... I
merely pointed out that the ARRL itself has refuted the PCTA
assertions that "HF is safe from commercial interests."

I also stated the opinion that the ARRL will fight like hell
to stall consideration (removal) of the ITU Treaty requirement
for Morse testing. It's not at all clear to me how that opinion
is "anti-ARRL" ...

It was reported today that Riley Hollingsworth, special counsel for the FCC has EVIDENCE that KC8LBO has been involved in music playing and other activities that have put his lisence in jeopordy. Roger Wiseman has for a long period of time been associated with the "THUGS" of amateur radio. Lets stroll back in time and determine when Roger Wiseman came in the picture. If one would recall, it was when W4NTI went to OHIO and became good friends of KC8JBO through e-mail or other means of communication. Go back in the DEJA archives and review all of the postings that welcomed ROGER WISEMAN to ham radio. You will see that they were associated with WB2OTK and AF2Y, who made nightly comments and welcome statements to WISEMAN. The point man for these nightly discussions was RAMBO DAN, who would threaten to cut your head off when he had consumed enough of that JIM BEAM.

All of these perverts and jammers have a common thread, WB2OTK, W4NTI, KC8JBO, KE4TEW, AF2Y. If you need proof, then listen to 14313, you will hear all of these misfits grouping together to degrade our good hobby.

3429. 3950 Jammer Receives Warning Letter

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-20 00:00:00 UTC
From: Kevin Alfred Strom <kevin.strom@innocent.com>
Message-ID: <3835F26B.AED9AEB6@innocent.com>
Source record: 127002
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

Below is Riley Hollingsworth's warning letter to N0KED, Darrell Berg, an individual known to make unidentified illegal transmissions on 3950 kHz. Berg is part of the group which routinely attempts disruption of the Liberty Net and its participants. The Liberty Net is a current events discussion net which has been meeting weekly for the last three decades. Though the Net meets on Saturday night, its participants sometimes QSO on or around 3950 on other evenings. An html version of the letter is available at:

http://www.rrsta.com/rain/fcc/letters/bergwarn.html

For more insight into the 3950 situation, see:

http://www.3950.net

and

http://homepages.go.com/~wikk3/hollings.htm

---begin letter---

November 2, 1999

CERTIFIED MAIL□RETURN RECEIPT REQUESTED

Darrell E. Berg
6643 Leesborough Avenue
Eden Prairie, MN 55346

Subject: Warning Notice: Amateur Radio License: N0KED

Dear Mr. Berg:

The Commission has monitoring evidence that you have been deliberately and maliciously interfering with the radio operations of other licensed Amateurs on 3.950 MHz. This interference has occurred at various times in the last several months and includes broadcasting and unidentified transmissions.

The Commission generally relies upon the Amateur Radio Service to be self-policing.

Operation of the type described above is contrary to the basis and purpose of Amateur Radio and degrades the service for legitimate users. This serves as a Warning Notice that such operation will not be tolerated. Additional incidents of operation of the type described above will result in a monetary fine being levied against you and in revocation proceedings before an Administrative Law

Judge.

You are requested to contact me at 717-338-2502 to discuss this matter.

Sincerely,

W. Riley Hollingsworth

Legal Advisor for Enforcement
Compliance & Information Bureau

---end letter---

With all good wishes,

Kevin, WB4AIO.

I suppose you could say that many of Mr. Hollingsworth's letters might constitute supposition, and perhaps some of them do; but to state categorically that his statements _are_ supposition, without you yourself knowing anything about the evidence, is merely a gratuitous assertion on your part.

I happen to have personal knowledge of the Berg case, and there is no doubt whatever that Mr. Berg is guilty as charged.

Happy hamming,

Kevin, WB4AIO.

Polly, you've run out of Creedence Clearwater Revival records? Hell, I haven't heard you spin "Proud Mary" in more than a year. Or for that matter Brother John's mournful rendition of "Oh Herbie." How about giving us some Spike Jones and the City Slickers since that kind of music must be endearing to rednecks in your area. By the way, what ever happened to the guy built like a 5 iron, Billy Jack Moore? Fell into the cup on the 18th hole?

Polly, how about the harp you used to blow on .313? Forget about the cacophony with the accent on phony thanks to 30 years of harmonica lessons which got you nowhere? You used to carry one quite a bit before Riley showed up. Remember your mimicking a parrot with "Herbie's still here?" I think you and Youngblood promised to help him go to the Supreme Court, remember that? And you blame others for jamming? And you walk around in church vestments in your Baptist Bupkus Shrine? And Jesus loves you too? POLLY H. ASHLEY WITH THE H STANDING FOR HYPOCRISY!

Oddly enough I had a DECENT QSO with David last week and it appeared he had straightened out his act after telling him that I was not going to speak to him if he were confrontational. He admitted that it's all a game-he has fun letting off steam and starting fights. He simply doesn't know when enough is enough and the importance of ham assistance in times of crises. And so with that I say goodbye David and I hope you buy a nice SWL receiver.

1) Berg was on the air, bemoaning his fate and reading the letter on
the air a few nights ago.

2) The letter is posted, along with many of Hollingsworth's other
enforcement letters, in the archive at the Rain Report web site.
It's my understanding that Riley Hollingsworth himself is making
these available for this purpose. (The url to retrieve the letter
was in my original message on this topic, which began this thread.
The main url for the Rain Report is http://www.rainreport.com)

3) In his weekly audio program, "Enforcement Log," also available
through the Rain Report site, Mr. Hollingsworth announced the
warning letter in his own voice. As of earlier this evening, this
was still the current program. In the next few days, it will move to
the "last week's show" spot, but should still be downloadable for
another week.

I regard this as sufficient evidence of the letter's existence.

With good wishes to all,

Kevin, WB4AIO.

Notice that AF2Y can't deny the qrming he has and still does. He just spins it to some person he calls "Polly". He will not be able to spin his qrming ways to another innocent when Hollingsworth "Makes the call". Then it will be "Good bye Clifton Juiceboy"

K&L went away after the feds payed them a visit. The software checked
the serial number of your hardware. They must match to work.
good luck..

From: Mike <mfe@fast.net>
Message-ID: <816cdd$oj9$1@news5.fast.net>
Source record: 127028

I am renewing my amateur radio license, AND am requesting I get my fathers old callsign..... the FCC web site is a disgrace. It took me hours to find what I needed and download it. And the forms.... 605 is a joke... I like the tiny box to put in my state, where almost the whole box is used up by the label printed in the box. Then I had to download some fee manual, and another form 159 just to attach with my check... and I think I found that I owe $14.00 for a renewal, but I don't know if I owe for requesting the vanity license.... anybody know ?? I won't even go into the online Universal License system. An utter disgrace. I put in my TIN (taxpayer ID number, which would be my SSN) and it tells me I am already registered in the system.... but I have never been on before, and if I am registered, what the hell is my password, which it is asking for ??? Any web author putting together such crap in the private sector would be fired IMMEDIATELY. The absolute WORST use of the Internet I have EVER seen, anywhere, anytime. Yaaaaaaa to government workers.
Mike

PLEASE REPLY ALSO TO ME DIRECT BY EMAIL, THANX
Mike

SB DX @ WW $OPDX.436
Ohio/Penn DX Bulletin No. 436

The Ohio/Penn DX PacketCluster
DX Bulletin No. 436
BID: $OPDX.436
November 22, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, ARRL Letter/Web Page, K2FF, WB2RAJ/WB2YQH & The 59(9) DXReport, NG3K, W3UR & The Daily DX, W4PJ, WB5KAU, K8YSE, KE9KD, KL9A, 4L5O, CT1CSN, DJ5AV & DX News Letter, DK5WL, DL1HCM, DL5EBE, DL7VRO, DK9TN, ER1DA, F1NGP, F5NOD, G3SWH, G0OFE, JI3ERV, JM1LJS, LU3FCK, OH2TA, OH9HNP, PA3GIO, PY1KS, RA3SL, VK4EJ, VK9NS, ZP5AZL, ZS5BBO and the NATAL DX GROUP for the following DX information.

3D2, ROTUMA ISLAND (and Fiji). Northern Ohio DX Association (NODXA) members DL7IO/Birgit and Holger/DL7AU will be active from Rotuma until November 24/25th, as 3D2AO/R and 3D2IO/R. They will return to Fiji after their operation and remain in 3D2-land until December 9th. This is reportedly a vacation (per Fritz, DL7VRO), but radio operations will take place. There have been QSNs reported on 30/12/10 meters CW/SSB via the cluster network. QSL via DL7VRO.

4L, GEORGIA. Look for Omari, 4L5O, to be active in next week's CQWW DX CW Contest as a Single Operator/Single Band (28 MHz)/Low Power entry. Qsl via CBA.

4S7, SRI LANKA. The "DX News Letter" announced that Felix, DL7FER, is expected to spend time here until Christmas and will operate CW/SSB on 40-10 meters (also the WARC bands). He will receive his callsign upon his arrival on the island. QSL via bureau to DL7FER or direct to: Felix Kuntzsch, Auf dem Berg 12, D-35745 Herborn, Germany.

7Q, MALAWI (Update). NODXA member Edwin, ZS5BBO, will be leaving for 7Q7-land and will arrive December 19th for a short holiday until December 26th. He will be active from the shores of Lake Malawi, signing 7Q7BO. Activity will be on 10, 20, 15 and 6 meters. He will try to be active as often as it is possible using Icom 706 Mk2 for 6m and Kenwood TS450SAT for the other bands. Edwin would likr to give as many operators as possible a new one. All QSL cards are to be sent with SASE (and 2 USD) to his home callsign ZS5BBO: Edwin Musto, P.O. Box 211032, Bluff, 4036, South

Africa. NO CARDS WILL BE ANSWERED VIA THE BUREAU. SPECIAL NOTE by Edwin: "I would like to take this opportunity to thank some of my very good ham radio friends. Firstly, thanks to John/7Q7JL for all the trouble he has gone through to help me in getting a license and callsign. Also, I would like to thank the following for their help and assistance. Special thanks to 7Q7HB, 7Q7LA and G0AIS. Without their help in some small way I didn't think this operation would be possible. Also a very big thanks to Tedd Mirgliotta (KB8NW) Editor of the OPDX and President of the Northern Ohio DX Association (NODXA) for the sponsorship of the logging software (purchased by NODXA).... 73 and hope to work all of you in the pile ups.... Any queries please E-mail me at: zs5bbo@aarrl.net (before 14-12-99)

9M6OO SPRATLY ISLANDS DXPEDITION QRT. Bob Schenck, N2OO/9M6OO, reports that they had a very sucessful 9M6OO operation with 21,000 QSOs logged. The group is currently in Brunei (V8) and is active as V85OO. NODXA's club member Jim, K8MR, reports, "I'm having a blast over here" and was operating from V8SEA station at the SEANET convention. QSL via JA0AD. He states that they (along with N2OO and N4PN) are currently at the QTH of V85AA until Wednesday and are operating as V85OO. QSL via N2OO. They are trying to pay special attention to the WARC bands and the short 160 openings. Then we will be off to 9M6AAC for the CQWW CW Contest (M/S), again QSL to N2OO. Watch for the latest updates on their Web page at: http://www.qsl.net/n2oo/borneo

9M6, EASTERN MALAYSIA. The "DX News Letter" reports that nine Japanese operators visiting the SEANET Convention in Brunei will go here after the convention and be on the air as 9M8TG. Activity will be on SSB/CW/SSTV and on 160-6 meters until November 25th. QSL via JH3GAH.

9X, RWANDA. Vladimir, RE3A, was heard on 10 meters signing 9X3/RE3A this week. He claims that he will be in Rwanda for about a month. QSL are to be sent to: P.O. Box 899, Moscow 127 018, European Russia.

A5, BHUTAN (Update). OPDX InterNet Subscribers will receive a complete press release by Jim Smith, VK9NS, about his trip to A5-land.

A6, UNITED ARAB EMIRATES. Bernie, W3UR, from "The Daily DX" provided the following press release: "Asia's biggest station A61AJ will once again hit the airwaves for the CQ World Wide CW DX Contest November 27th and 28th. Ali Al-Futtaim, A61AJ, has invited last year's Asian record breaking multi-multi team of Rich/KE3Q, Boris/T93M, Sam/T94S/PA4AO, Edin/T97M, and Bernie/W3UR back to Dubai. Joining them this year will be Jeff/K1ZM, Rol/K3RA, Phil/N6ZZ, Danny/T93M, and John/W0UN. Team members started to arrive late on November 20th. While there they plan to do some minor maintenance on the existing antenna farm. Also planned is the installation of two new serious antennas for 160 meters and multiple beverages for 80 and 160 meters. Look for activity on 10 through 160 meters (including 12, 17 and 30 meters) CW, SSB, and RTTY before and after the contest." A new A61AJ home page can be found at: http://www.qsl.net/a61aj/
QSL via W3UR.

AH2, GUAM. The Guam Contest Club will once again be active in next week's CQWW CW Contest. This club has been the Oceanic leader in the Multi-Single category in the last two years, and in 1998 they made an Oceanic record in this category. This year, due to growing sunspot number, the group will make an effort to build a much better score and aim for the World's Top 10. Operators will be Aki/JI3ERV/NH2C, Kaz/JG3RPL/N1BJ, Toshi/JR7OMD/WI3O and Hiro/JH0USD. They will use the callsign AH2R in the contest and be a Multi-OP Single-TX entry from Guam Island (KH2, Zone27, IOTA OC-26). QSL via JI3ERV (Direct or JA Bureau, NOT KH2 Bureau). Their Sunrise/Sunset will be: 2020/0750z. Any questions or comments are welcomed. Don't hesitate to E-mail the Guam Contest Club at: gcc@seo.or.jp

CQWW DX CW CONTEST ANNOUNCEMENTS. There are a few Web sites available with up-to-date announcements for upcoming operations during next week's CQWW CW Contest. Check the following Web pages:
http://www.vramp.com/~ncj
http://www.ng3k.com/Misc/cqcw99.html
http://www.cpcug.org/user/wfeidt/Misc/cqcw99.html
http://www.his.com/~wfeidt/Misc/cqcw99.html

FO, FRENCH POLYNESIA. Roger, KF8OY, is in Tahiti until November 24th and will be active as FO0MAC. Rodger plans to be active a lot of 12 and 17 meters while he is there. QSL via KF8OY. VERY IMPORTANT: DO NOT QSL via K8OU. This is a different operator and operation.

FS, ST. MARTIN. "The 59(9) DXReport" reports that a few members of the North Jersey DX Association will be active from here December 1-8th. Activity will be on 160-6 meters. No callsigns were mentioned.

GJ, JERSEY. Bert, PA3GIO, will be active from here (IOTA EU-013) as GJ/PA3GIO/p or /m, December 11-16th. Activity will be on 10/12/15/17/20/40/80 meters. QSL preferable by the Bureau to PA3GIO. Visit Bert's Jersey Web page at: http://www.xs4all.nl/~pa3gio/GJ99/

GU, GUERNSEY. Jim, G0OFE, will be active as GU0OFE from Wednesday, December 8th, until Monday, December 13th, primarily for the 10M ARRL Contest. However, he will be active on other HF bands outside of the contest; most likely 15 and 20 meters, possibly low bands as well. His contest callsign will be MU0C. QSL info for both GU0OFE and MU0C is as follows:
Bureau cards to the GU bureau, (NOT via G0OFE please)
Direct cards can be sent to G0OFE (callbook address)

HI9, DOMINICAN REPUBLIC (Cancelation). Heinz, DK5WL, reports that he had to cancel his trip to HI9 because of personal reasons. He would have been active as HI9/DK5WL in the CQWW DX CW Contest.

IOTA NEWS.....
AF-067. Look for Jim/G3RTE, David/G3UNA, Rob/5Z4RL, Ian/5Z4IC, Graham/5Z4GS and Phil/G3SWH are planning to activate Wasini Island, which also counts for Kenya for DXCC. Activity will be on both SSB and CW for a week in mid March 2000. Wasini has been activated only once before, for a 24 hour period in the 1993 IOTA contest.

KP5, DESECHEO (OPPS!! Not the prefix KP1 as reported last week). Over the past week, OPDX has learned that there are more than one group trying to activate this one. All reportedly are having the same problem trying to obtain a landing permit. Hopefully, there will be some breakthrough in the coming future.

L5/LO1, ARGENTINA. Look for LU4FPZ to operate as L5F a Single Op/Single Band (10m) entry in the CQWW CW Contest. Look for LU4FM to operate as LO1F in the CQWW CW Contest as a Single Op/Single Band (20m) entry.

LAST TWO CRACKDOWN (Update). You can find a more clarified version of FCC Enforcement Chief Riley Hollingsworth comments about the last two letter crackdowns on the ARRL Web site (http://www.arrl.net) and this week's ARRL Letter. In short, Hollingsworth states, "All we said was that if only the last two letters are given, it doesn't meet Part 97". Hollingsworth pointed out that if a calling station using an abbreviated ID is never acknowledged and given a chance to give a complete callsign, a legal ID would be lacking for that communication. To be strictly legal, stations using a suffix-letter ID always must identify at some point in the communication with a complete callsign. To be completely legal, a station using a two letter suffix ID always must identify within the first 10 minutes of the communication (and each 10 minutes thereafter) with a complete callsign. You can also hear Riley Hollingsworth's discuss this issue (using Real Audio) on the Web at: http://www.rainreport.com/

OD, LEBANON. Slavek, OK1TN, with Vladimir/OK1CW and Pavel/OK1MU, will operate in the CQWW CW contest as OD5/OK1MU. QSL to OKDXF, Bradlec 73, 293 06 Kosmonosy, Czech Republic.

OH9, FINLAND (The "BIG GUY" will be active! Tell the kids!). Santa Claus will be active as OH9SCL, December 17-19th, from Rovaniemi before he makes his world-wide tour. Activity will be on all bands and modes. There will be real time logging on the Web. For more information, check the Web page (site still under construction) at: http://www.oh9scl.com
Or send E-mail to: oh9scl@sral.fi

OH0, ALAND ISLAND. The B.I.G. Contest Station on Aland Island, OH0R, will be active during the CQWW CW Contest with, if possible, even better signals than ever before due to newly installed antennas. They will participate in the Multi/Single category with a joint venture of OH and DL teams (OH2TA/OH0TA, DL1EFD and DL3KDV) representing the Contest Club of Finland (CCF). OH0R QSLs are via OH2TA.

OZ, DENMARK. The Bavarian Contest Club (BCC) will be active from here as OZ/DJ9RR in the CQWW CW Contest as a Multi/Single/High Power entry. The operators are: DJ9RR, DJ7LX, DL8HCO, DK3LT and DL1HCM. Pre-contest activity will start November 23rd. QSL via DJ9RR (via bureau).

QSL INFO AND NEWS.....
Some QSL Manager databases have N6TR listed as manager for FR5FD. Larry Tyree, N6TR, has been asked about this and he states he knows nothing about it. The best route is direct to: Patrick Labeaume,

40 Rue Louis des Jardins, Bois de Nefle, F-97411 St. Paul, Reunion Island via France.

Some databases also list NJ2D as the manager for LA6WEA. This is incorrect. QSL LA6WEA via direct to: Kaare Olufsen, Levang, 8890 Leirfjord, Norway.

FT5WH QSLs. Gil, F5NOD, reports sending out around 350 FT5WH QSLs this past week. All QSL requests received before November 5th have been returned. He states that he has the FT5WH log for QSOs up to October 14th. He will have the complete log in January when Gilles, FT5WH, returns back home (leaves December 7th). Next batch will go out in the middle of December.

QSL cards for the following special event stations from Republic of Moldova (ER1A, ER1CW, ER27A, ER50A, ER50CE, ER7A, ER8C, ER9V, ER0ITU, and ER200P) are to be sent only to ER1DA to the following address: Valery Metaxa, P.O.Box 9537, Kishinev, Moldova, Europe (Direct or via the Bureau). Valery, ER1DA, states, "QSL cards sent to I8YGZ, RW6HS, or to any other address are as good as thrown into a garbage can for I didn't authorized them to do this, and I'll inform DXCC commitee about that." He also states that due to the considerable increase of postal charges in Moldova, it is necessary to send 2 IRC or 1 USD for direct return QSLs. Please don't send envelopes with Moldavian postage stamps for the postal charges can change any time.

Steve, P29BI, should be close to going QRT on Bougainville Island (OC-135). However, he will remain on the island until November 27th, but he must send his equipment and personal effects home early. His QSL Manager VK4EJ states that he is still waiting on some logs as the mail is sometimes slow, but will QSL as soon as he receives them. QSL to: Bernie McIvor, 30 Brennan Parade, Strathpine, QLD, 4500, AUSTRALIA

Chris, KL9A (ex-WL7KY), reports cards for KL9A, WL7KY and KL1SLE can be QSLed via NU4N, but KL9A cards have not been received from the printer yet. ADDED NOTE: Chris wants to remind everyone that Alaskan stations are NOT just KL7, WL7, NL7, or AL7. They are KL, NL, WL, and AL, ANY number, 0-9. The only exception being KL9KAA-KHZ which is South Korea.

PIRATE. On November 17th, a station signing PY0FA was active. This station is a pirate. PY0FA doesn't live on the island anymore and is somewhere in Brazil. Do not waste your time or money sending QSLs. The only stations active from Fernando de Noronha are PY0FF (Andre) and PY0FMZ (Helmut, DL2HMZ until November 25th).

PY, BRAZIL. Alex, PY1KS, states he will be active in the CQWW CW Contest as PY1KS as a Single Op/All Band/Low Power entry. He mentions to look for him 160-10 meters, but his best band is 10 meters. He will try some 80/160 meters (only 100w). QSL via PY1KS: P.O.BOX 18123, Rio de Janeiro-RJ, 20722-970, Brazil.

PY0S, ST PETER AND ST PAUL ARCHIPELAGO (Delayed Again!). Once again, the NATAL DX GROUP advises that the DXpedition has been postponed until April of 2000. The Brazilian Navy, through the Secretary for Ocean Resources, advises that the trip to the Archipelago St. Peter & St. Paul has been postponed due to the reconstructing of the wooden building and anchorage by the Navy and the Brazilian Environment Department which were destroyed by heavy seas. It should be completed by the end of March, 2000 - probably! The NATAL DX GROUP sends apologies to those who may have been disappointed; they hope to contact them on their next DXpedition.

R1, ANTARCTICA. Oleg and his colleague Alex will be using the callsign R1ANF/A during CQWW CW Contest from the Korean station "King Sejong". QSL via RK1PWA direct to: Nick Shapkin, P.O. Box 73, 164744 Amderma, Arkhangelskaja, Russia. ADDED NOTE: Oleg, R1ANF, reports that his QSL Manager Nick, RK1PWA, is having "big problems" in receiving direct QSL in Amderma. Oleg has decided to keep Nick as QSL Manager for his activities under the callsign R1ANF from the Russian Antarctic station "Bellingshausen", South Shetlands. However, for his operations as R1ANF/A from the Chinese Antarctic Base "Great Wall" (first ham activity) and the Korean Base "King Sejong", cards should only be sent to the following direct address: P.O.Box 10, Novodvinsk-1, Arkhangelskaja obl., 163901 RUSSIA. Cards will be answered after Oleg's return to Russia in spring 2000.

S9, SAO TOME AND PRINCIPE. Matt, DA1MH, and Markus, DL5OBZ, will be signing either S92CW or S92DX now through December 4th. They will be active on 20-6 meters and intend to participate in the CQWW CW Contest on 10 meters only.

V6, MICRONESIA. Hide, JM1LJS, will be active as V63LJ from Ponape from December 26-31st (possibly until January 4, 2000). Look for activity on 80-10 meters CW/SSB. QSL via JH8DEH: Akira Miyata 4-28-5, Minami Nishi 23 Jyou, Obihiro 080-2473, JAPAN.

YU8, YUGOSLAVIA. Andy, RW3AH, will be in Kosovo during the next 2 years and will use the callsign YU8/9X0A. QSL info is not known yet.

ZM7, CHATHAM ISLAND. Lothar, DJ4ZB, will travel here in the new year and be active from January 31st through March 3rd. His callsign will be ZM7ZB. His activity, reportedly, will be maninly on 10 meters using a Quad antenna. Suggested frequencies are: 28395, 28495, 28595 or 28460 kHz.

ZP5, PARAGUAY (Update). Dale Long, N3BNA, and Darrell Nerron, AB2E, will join the Multi/Multi team of ZP6T for the CQWW CW Contest. Also joining the team will be Jorge Diez Furest, CX6VM (CX5X). The ZP operators will be Juan/ZP5MAL, Tom/ZP5AZL, Anibal/ZP5VAY and Luis/ZP5WBM. The station is now equipped with 4 towers with stack monobanders from 40-10 meters and a two element wire beam for 80 meters. Also, there is a high inverted L for 160 meters plus phased beverages for low bands. Their last operation in a contest from Paraguay was in November of 1997. They will make a special effort on the low bands for those who need ZP on CW. They plan to have three stations on at the same time. The QSL Manager for this operation is Juan, ZP5MAL, which is "OK" in all callbooks.

I agree. But then someone will drag out the prom burner and clone thousands of
these things. They'll call it a ChipStick or something.

3459. WTB:Speaker-mic for kenwood tk-230

Hello...
I am looking to buy a speaker mic for a Kenwood TK-230 portable. If you have one you can part with, or know where I can get one (no local radio dealer has them around here) please let me know. Thanks

Adam

Greetings,

After a full year with our own URL, the access statistics reveal that
67 of you visit the site every day. The best day we had was over 400,
and there was not a day without a single visitor! Not bad eh?

New stuff added this weekend, a new game, bubble puzzle, and a Morse to
text decoder for your sound card. What has a game to do with amateur
radio, well strictly nothing, but if you download it, it will give you
something to do while you wait for that packet racket message to come
in.......
70 Trees all, G8ASO

Want substantiation Dave? Check out any of Wayne Green's editorials
in 73 for the past Year. He says it better than I ever could and we
are in full agreement. Also, if I did give my call, it would *shock*
alot of people, but I stand by my comments. (behind my curtain for
now...)

Ham radio is dying Dave.

(BTW, are you the Dave Heil of "Heil Microphone" fame? If so, you have
alot
to *worry about* if your sales are mainly to ham radio op's! I'd
suggest
going to the Broadcast market fast. You will not displace Seinhauser,
but
if you get 5% of this market, you'll be doing good.)

Was this one of your gay escort outings that was discussed last February?
How many clients did you have in town for it? I was wondering why it
was so quiet this weekend, both here and on 3.950.

KK7HO wrote:

KK7HO is back from his 'gay romp' in Las Vegas with his
gay pals now. The peace and quiet was nice while he was
'on duty'. But not that he's back he was squatting on 3.950
tonite, helping psycho David Castle (WA9KJI) block normal
communications. Castle was into his ghost talking until
KK7HO showed up, along with WB0CXJ. Then it got
interesting.

CXJ was whining about members of the net discussing his
jamming of the liberty net last night. He claims to have been
in the hospital last night, but he's well now, and sounded fine
on the radio tonight. Wheather CXJ was in the hospital or
not is really doesn't change anything.

KK7HO was suggesting that mention of CXJ's jamming was
"Actionable" and spent alot of time urging CXJ to sue members
of the liberty net.

It was positively nauseating. Here is KK7HO, the spineless
lyer stirring the pot, and attempting to launch an attack via
the wallet of WB0CXJ. And the feeble minded WB0CXJ,
didn't even catch on.

Please stop the jamming KK7HOï¿½.

Ham Radio is indeed dead and it is the hams themselves who killed it. The code is an international treaty requirement so neither the FCC nor the American Registry of Rotten Lids has a whole lot to say about it. The Boy Scouts required more code competence for the merit badge than we did for licensing so kwiturbitching. Incentive licensing is a basic fiasco: the old Class A, Class B system worked all kinds better but might need a codeless to fill up the VHF freqs. Even if I am one it is a fair statement that innovation has never come from Amateur Extras.

My last foray after about 40 years of operating, building, teaching, etc. was a demo for kids as part of a simulated NASA mission the Wausau WI schools run annually. I was 11 when I got my novice so I am not quite dead yet but I do have a soft spot in my head for kids. I would not subject a child of mine and certainly no one else's to 20 meters let alone 75 these days. The level of decency, intellect, and sense has dropped off the screen. We are politicized, religiosized, neticized, and lidicized beyond belief and I am old enough to remember the Old Yankee. If Brother Stair or Pastor Peters took over tomorrow how would you know? Gene Scott would raise the collective IQ and that is scary. Sad to say 3950 is not only the shape of things to come, it is the shape of what is already here. I didn't burn my license as I once did my draft card but I sometimes wonder why not.

Why is it a mystery that part of 75 is broadcast in parts of the world? It used to be 3.8 to 4 in Europe, 3.9 in Asia. The BBC broadcast from the Channel Islands was a beacon for DXers. Moving 40 always did make sense. I don't hear just a lot of activity on 30 meters anyway so what is the problem?

Ham radio is indeed dead.... and I am living quite well without it.

November zero Bravo Kilo (Beer Keg or Bionic Klutz, take your pick). My apologies to SWL's for whom the group is intended.

> LEARN OBSOLETE CODE IN 1999 WHEN FOR $700 HE CAN GET A
> GATEWAY AND BE ON THE *WORLD WIDE WEB* IN 10 MINUTES?

Welp, let's assume for a moment you're right. Doesn't the same equally
apply today regardless of whether or not there is a code test?

Why spend hundreds of dollars on an HF radio, try to find a place to put up
an HF antenna, deal with constant RFI complaints from neighbors saying
you're interfering with their $50 VCR, when all you have to do is spend
$700 at the local computer store and you're on the web in 10 minutes?

The issue of the code test is irrelevant in a discussion of the internet and
what it offers in terms of connectivity. While perhaps radio and the
internet
do compete in a minor amount, the fact of the matter is that most people,
if they are interested in "radio", will get involved in ham radio or some
other
radio pursuit. If all they want to do is chat with other people, and the
medium be damned, then a $700 computer will always win in the end.

MD

I don't see the potential for losing 100 kHz of prime HF spectrum
to be "a bunch of alarmist crap."

Are you suggesting that the ARRL is "hyping" things to raise money?
(I am not making that statement, just asking if you are ...)

> Summer is trying to leverage an Armageddon scare into coin, you're
> trying to leverage it into dumping the code tests, how predictable can
> it get?

Now that I've read a bit further down, I see you ARE saying that ...
(again, I did NOT say that ...)

As far as dumping code tests, yes, I assert that it's necessary to
promote the growth in the numbers of HF operators that will be
necessary to accomplish a couple of things:
1) replace old-timers as they die off (with the age of the average
ham, this will accellerate in coming years, without increased numbers
of replacements).
2) achieve some actual growth in numbers to provide more pubilc
service value and poltical clout

There are many good reasons to dump Morse testing ... the growth
aspect is only one of many.
```

Acording to Dr Hate, AF2Y, Dave Castle has squatters rights on a
frequency . he shouts "first come first served", but on the other hand
as he has said in the past, the Ruth Hoffman net can take the frequency
when Herb KV4FZ is already on the frequency talking to his friends.
What a hypocrite the raving Dr HATE IS.

I'll say it again: moving that 100khz down into currently
underutilized space would resolve the "loss of space" issue without
any losses at all, therefore ringing alarms abt it is a bunch of
alarmist crap.

No-sequiter, has nothing specifically to do with HF allocations which
is the subect of this thread, VHF/UHF ham radio has the same potential
problem and the VHF/UHF bands are far more threatened than any of the
HF bands despite the lack of nocodes on HF.
>

Ya wanna move nocodes down into HF do ya? Then kiss the VHF/UHF bands
goodbye, they ain't gonna be in two places at the same time. Assuming
they'd even bother with HF which I seriously doubt. If they don't put

the effort into upgrades they ain't gonna put their money into getting
into much more expensive HF radio, either.

You would support loss of privileges? Wouldn't you expect that the low end
would move down also? (Just come along, it makes the idea more interesting.)
But I guess if it's someone -else's- privileges it doesn't matter all
that much. :(

Some rigs have to actually have an optional "mod" to TRANSMIT outside the
ham bands (Like on MARS freqs).

The only thing the low-lifes at the league will fight for is higher
quality lobster bisque at the next catered lunch at Newington.....

Thanks for the post Carl..You changed my mind about the ARRL. I thought they were worthless and had betrayed the ham community. If they are helping delay a nocode HF treaty (other than CB)...they are OK in my book. Hell I might even join up again if that's really whats going on.

This is a whole new issue, needs to be clarified. Might not actually
be a real issue, might be all hype. Who knows at this point?? The plan
being discussed for 40m realignment involves shifting the entire ham
band down 100 Khz. and moving the BC stations up. Dunno what the deal
might be for 80m.
>
>Some rigs have to actually have an optional "mod" to TRANSMIT outside the

Almost all xcvrs can be unblocked. I bought a used 2m mobile rig, the
former owner snipped out one diode and used it on commercial freqs.
Yeah, I think all HF xcvrs can also be unblocked. As long as they have
general coverage rcvrs.

Actually, I just knew that a posting on this topic, that
contained as many references to the act of male self-
pleasure, would draw em in like a magnet. As to being an
"expert", well, perhaps in my day in the late 60's, but now
I seem more concerned with regualar bowel movements and
the cost of perscription drugs and HMO Premimums.
What can I say? Glad U enjoyed my post!

Hey! I got news for all of you. New Ham licences are WAY DOWN.
Average Ham age demographics are males, approaching 70 yrs.
Novice renewals are in negative figures. 80% of No-Code Techs
do not upgrade to General (HF) class. Sales of HF ham gear are
WAY DOWN. The ACTUAL attendence at Dayton-99 was 10,231 WAY DOWN
from past years figures. Get the picture yet?

Ham radio is DYING ON THE VINE. Ham radio will be DEAD by 2003.
At that point look for 75/80M to sound like 40M with 60+dB
broadcasting from one end of the band to the other.

Why? BECAUSE THE FU--ING A.R.R.L. INSISTED FOR *YEARS* TO KEEP CODE
AS A REQUIREMENT FOR HF OPERATION. IT'S TOO LATE NOW FOLKS! I ASK YOU
WHY WOULD SOME YOUNG PERSON WANT TO LEARN OBSOLETE CODE IN 1999 WHEN
FOR
$700 HE CAN GET A GATEWAY AND BE ON THE *WORLD WIDE WEB* IN 10
MINUTES?

Ham radio is DEAD. N O W L I V E W I T H I T !

During sunspot minimums, users tend to drift to the lower bands. It might not be a problem now...

If they keep catching people transmitting out of band, the FCC will make the
manufactures block it permanately as in the cell phone freqs.

: Yeah, I think all HF xcvrs can also be unblocked. As long as they have
: general coverage rcvrs.

I think more and more of the newer sets with all the fancy features have
the band plans stored in EEPROM so it would be very hard to do anything to
change them. My Icom-756 doesn't Tx outside the ham bands.

Polly, how come you have Dumbo ears with a bird's brain? I shall explain and Polly, I'll write slowly because you think slowly. Is this slow enough for you? Good. Let's begin, shall we? Intercon=good. Liberty Net=bad. Schoenbohm =bad. Hoffman =good. Things equal to the same thing are equal to each other, get it? That axiom is true therefore if Schoenbohm=bad and Lib Net = bad, they're equal to one another. Since Hoffman=good and Intercon=good, they too are equal to each other. Now since Schoenbohm=bad and Intercon=good, the only reason why Schoenbohm would ever go near the net or its frequency would be to perpetrate bad, right? It then stands to reason since Intercon=good and ham radio=good, by gentlemens' agreement, Intercon should be left unhampered to do well or if the adjective good is to be used, then let it modify deeds. I stress GENTLEMENS' AGREEMENT since all frequencies MUST be shared and no jamming must be allowed. For years however, Herbie and his clowns would occupy .313 for the express purpose of disruption because if this were not true, Mrs. Hoffman would have welcomed him as she welcomed anyone with good intentions. Now with that in mind, let's turn out attention to 3.950 =bad. Why bad?Because (1) B.R.(before Riley), anyone with a modicum of intelligence and appreciation for his fellow man and the diversity which makes America great would have known what the Lib Net stood for=bad + bigorty=evil which is another way of saying POOR AMATEUR PRACTICE. (2) Riley said this in a roundabout way to Al Parker in a widely publicized letter by me and other sterling hams. However Riley issued no such stinging letter to Mrs. Hoffman or anyone else with a keen interest in Intercon because Riley knows that Intercon=good. Mr. Castle and Mr.Volz and many others who have love and warmth and an abiding respect for America and her diversities, take exception to the LibNet. That's because those gentlemen =good and Lib Net=bad. It has become common knowledge that even heavily despised, the Lib Net, until it is finally taken off ham radio by Riley, has a right to preach hate with or without white hoods. For years, the hatemongering LibNet has laid claim to that one frequency and all Mr.Volz, Mr.Castle and others are doing are LEGALLY CHALLENGING THAT OCCUPANCY IN PERPETUITY. In other words they want to change 3.950 from a hate frequency to a love in. Therefore if they get there first, the Lib Net will have to move to burn a cross someplace else. Now you feel that Volz, Castle and others who get there first are no better or worse than KV4FZ who, SUPPOSEDLY, would get to .313 first. That's a false assuption and here's why. If Volz and Castle precede the Lib Net on 3.950 and the LibNet decides to open up on a clear 3.958, neither one would follow them and harass, while the opposite is true in the case of KV4FZ and his clowns. Volz and Castle's motive is to challenge; Herbie's was to disrupt and destroy. Finally why is Intercon still going strong and so are Volz and Castle while the Lib Net is on the way out? Because Polly, GOOD TRIUMPHS OVER EVIL..it takes time and at times it looks as if evil is unconquerable, but it does fold.

I can see lots of corollaries to this principle. Ice cream and sex
are also good; so therefore Hoffman and Intercon equal sex and ice
cream.

Thanks for illuminating your thought processes.

Wonderful world,

Dave

Can you prove that bonehead wrong? He is at least 50% correct. Ham radio is dying a slow painfull death with the ARRL sticking the knife in and twisting ever so slowly. Kill the code requirement soon and try to save whats left.

Butch WA8X (1969)

Kevin

You're making this almost too easy. Ice cream and sex are good therefore ice cream and sex are equal? Hmmm ... it's worth a try.

Hate to cut this short, but I need to run down to the super market. You know. Freezer section. :-)

Kevin if this works, you'll have a discovery far better than all those 100 mpg carburetors buried in Exxon's back yard.

But - please - when the fame and fortune start rolling in, don't forget the little people. "Netters" and "jammers" alike will thank you for centuries to come.

And honor bright to you, too, sir.

LW

you should go to rec.radio.cb.
all of the posts there from the RF police who try to shove their opinions down the throats of the cb'ers there make them sound like a bunch of goose stepping, lock necked idiots that would chase a dog from a gut wagon.
the way they act definitly isn't conducive to ham recruting.
i've told them that if they were asshole salesmen, i wouldn't buy one from them if they had the only one that i needed.
people need to learn to temper live and let live with taking their complaints through the proper channels.
if there's a jammer out there, bitching about it on these ng's is NOT the place to get it fixed. take it to the FCC.
same with rec.cb.
if there is an out-band or power problem, bitching people out there is NOT going do anything except cause sudden deafness to their views and a lot of agression against the ham community as a whole even when it is not deserved by everyone in the community. we can't go enforce the regs. so why spam the ng with all of the holier than thou crap.
personally, i like the out-bands and have been known to warm my antenna from time to time but these RF police jump on the ng acting like God and try to excersise authority they don't have along with threats and intimidation that they can't back up like hollingsworth will jump at their command or something.
it makes them look like a bunch of revolting idiots that only a few eliteists would want to associate with instead of a group of people that could be friendly and have a good time.
I WILL BE THE FIRST TO SAY THAT NOT ALL HAMS ARE THIS WAY!!!
it's the few bad apples that show up on an international forum like this that shows the world the dark side of some of the people involved in this hobby and give the rest of you a bad name.
if i were to get my ticket, and take as an example the hams that come to these ng's, i would spend more time on cb than ham.
the basic premis of ham is very attractive but the class of the majority of the people that show themselves on these ng's makes it look like an ugly hate group.
it's a very sad situation that is slowly poisoning the hobby to death.
should it improve, i'll be the first in line to get my ticket. until then, my chances of joining the ranks of amateur operators is about as good as my joining a neo-nazi or faciest or communist organization.
NILL!!!

My oh my Dr Hate, you sing a different song when your man is first on a frequency. Of course it is first come first served. But remember Screwball, that was not what you said when Herb KV4FZ was the first on 14313 or 14300. You were right in there with your tape playing and qrming like the dog you are. Shouting the net had prior rights to the frequency and Herb and his friends should leave... If Dave and Gang have the frequency first,have rights to the frequency, then why did you sing a different song when Herb and his friends had the frequency on twenty meters first. Explain please Screwball.

Rileygotcha and soon...

>Where is that required?

Never mentioned "required." But few, if any, Morse code programs
don't also introduce commonly-used prosigns. For example, my ARRL
ARRL code tapes include the prosigns:

-- -- -- -- --
KN AR BT SK DE K 73

When I sat for the code test at the FCC office in '76, I *do* recall
having to know some prosigns; there were enough of them sprinkled in
the text that one couldn't pass the then-required one-minute of perfect
copy without knowing them.

Enjoy your weekend, Bill,
Jeff

That's a pretty weak excuse for intentional interference.

Furthermore, the political and social topics of Net discussions
haven't "digressed" significantly since the beginning decades ago.

But I am very interested in one thing: How, exactly, do you know the
motivations of those who interfere?

With all good wishes,

Mr. Berg was heard, and recorded, making extended unidentified transmissions, in his own undisguised and highly distinctive voice, and also interspersing his illegal monologue with the playing of tape recordings of broadcast programs. The broadcast tapes were recordings of a program I produced several years ago.

During his monologue Mr. Berg made remarks about previous 3950 interactions, using the words "me" and "I" when describing events which happened to Mr. Berg. (It does seem incredible that anyone could be so stupid, but this is what he did. A charitable explanation might be abuse of alcohol or other drugs, but others are conceivable.)

He also made threats against me, in the course of which he disclosed his location (perhaps in an effort to make his threats seem more menacing; he lives some 80 miles away).

Comparing the voice in the illegal monologue to his recent identified transmissions, I am certain that any jury would decide unanimously that the illegal transmissions were made by Mr. Berg. I'll make the recording available for you to decide for yourself.

The Berg monologue tape is quite long, but clips from it will be posted at http://www.3950.net in the next few days to facilitate comparisons by all who are interested. (I'll also send a copy to you if you send me a VHS videocassette or a C120 cassette and a prepaid return mailer.) There's already a recording posted at 3950.net of Berg (N0KED) in QSO with KK7HO, K5BLB, and WB0CXJ openly wishing for the death of another amateur and describing how they will desecrate his remains. So comparing the voice will be quite easy.

This positive identification caused me to alert the proper authorities that Berg's QTH, Eden Prairie, Minnesota (a suburb of Minneapolis, where Mr. Hollingsworth had a Saturday speaking engagement just a few weeks ago, by the way), might be a city

deserving of some special scrutiny when unidentified comments or noises were being transmitted on top of existing QSOs on 3950 LSB. They took it from there.

(The incident I mention is far from the only one in which the same voice is heard making unidentified transmissions, by the way. I presume, though I have no inside information, that Berg was caught in the act while perpetrating further illegal behavior.)

> I'm also curious as to how the FCC could have "caught"
> those two guys jamming from a mobile unless they were mobile
> themselves in the area, which is unlikely. Are they relying
> on ham hearsay in that case?
>
> Regards,
> Dave S.

I'm not aware that Berg and Wiseman were jamming from a mobile. When I have heard Berg making illegal transmissions, it always appeared to me to be emanating from his regular fixed station.

I would hope that Mr. Hollingsworth would not use hearsay as a basis even for warning letters.

With all good wishes,

Kevin, WB4AIO.

The ham HF spectrum now consists of nine bands 1.8 thru 29.7 Mhz.
NINE. Including three completely new bands which would have been
unthinkable in days of yore. This entire discussion is completely
centered around only *two* of those nine bands with the top 100khz of
75m being the "centerpiece". Buncha alarmist crap.
>
Any possible loss of the upper 100Khz of 75m in NA is a no counter.
The middle of the 80-75m band is clearly underutilized. All that
would be required would be to move the top end of the band down
100Khz. and nothing of any real value is lost. The 80m Novice band is
dead as a doornail so there's 50 useless khz back in action right
there.
>
I noticed that nothing was said about what appears to be the upcoming
new 5Mhz ham band. How convenient.
>
Looks to me like the biggest player in the upcoming HF allocations
game should be the broadcasters, LOTTA new BC stations showing up.
Much has been made of the fact that the interest level of the general
public in HF radio, i.e., the SWLs has waned over the years as
Bearcats and all the other crap of that ilk came along which in turn
has been to the detriment of ham radio. Countless hams have come out
of the ranks of swls who tuned between the broadcasters and
"discovered" ham radio, right?
>
Therefore I submit that a renewed interest in ham radio by the public
has to come as HF broadcasting ramps up. We oughta be helping the
broadcasters instead of battling them.
>
Summer is trying to leverage an Armageddon scare into coin, you're
trying to leverage it into dumping the code tests, how predictable can
it get?

> Why I feel that most survivalist talk is foolishness, my suggest
> would be to buy the Bendix King VHF-HI or UHF radios.

And this is exactly why the poster didn't ask anyone in a HAM newsgroup. I suggested a very small handheld (

> The Army uses them (PRC-127) as squad radios. Many of the guys
> in the local Emergency Management and volunteer fire departments
> have bought them as well.

And what does that prove? Not much. The PRC-127 is very limited in it's capabilities. Yes, they are rather rugged, but for a survivalist, the VX5 (which I recommended to the original poster) is much, MUCH better.

> These units have 15 channels and can be field programmable.

And the VX5 has 220 channels and is field-programmable. Looks like the PRC-127 falls a little short (about 205 channels short to be exact).

The VX5 can accept headsets or handsets but needs none. . .IIRC, the PRC127 must be used with a head or handset.

The VX5 (with it's Lithium Ion battery) puts out 5 watts of Tx Power. . .the PRC127 only 3 with it's inferior NiCad battery.

Oh, and speaking of batteries. . .I am currently unaware of any method to recharge those NiCads in the field, say through a solar powered battery charger (something a "survivalist" may take into consideration). I am also unaware of an AA alkaline battery pack for the PRC127 (which, BTW, the VX5 does have). . .but to be honest, I do expect there to be one out for it what with the military's switch over to AA only.

You see, a person who is preparing for an extended disaster needs to do away with strict convention. He or she cannot expect a limitless resupply of parts and consumables as does the military. He or she cannot count on the myriad of exotic methods used to replace things like batteries, ammo and food. Therefore all of the tools that this person takes with them must be carefully thought out to provide the maximum advantage in the smallest package.

The Yaesu can accept NiCad AA batteries which are recharged through an inexpensive ($20) solar recharger.

Even Better, I can take almost any battery (AA, B, C, D, 9-volt, prismatic, etc.), spend less than 5 minutes and have it working through the external DC port. Oh, I can also run the radio off any automobile cigarette lighter. . .how exactly do you do this with a PRC127? What's the NSN for the cigarette light adapter or the AC adapter?

Also, the Yaesu VX5 is not limited to a very small Tx/Rx range (The PRC127 is limited to the 136 - 160 MHz). The VX5's Rx Range is :0.5-15.995 MHz, 48-728.990 MHz, and 800-998.990 MHz. The VX5's Tx Range is 50-54 MHz, 144-148 MHz, 430-450 MHz. All of these are before any modifications are done to the radio. That sound a lot wider than the PRC127, now doesn't it?

Oh, can the PRC 127 receive any of the following :

NOAA Weather Reporting Stations?
AM and FM radio Stations?
Police Bands?
Business Bands?
TV Sound?
Commercial Shortwave Broadcasts?

Can the PRC127 do a VFO or Memory Scan?
Can the PRC127 give you a temperature reading?
Can the PRC127 give you a barometric pressure reading not only for the time you need it, but also keep track of the last several readings to tell you if the pressure is rising or dropping (something a "survivalist" may want to know as it can indicate oncoming weather fronts)?.

The VX5 can. And do it for around $400. What's the PRC127 running for right now? (I truly don't know).

Why would a "survivalist" need all these things? Simply because they may be interested in receiving as much information as possible without lugging around 2 or 3 different radios. If the power goes out in your neighborhood and the TV doesn't work. . .you can turn on your VX5 to the TV sound freqs and hear updates. . .or go to the local AM news station for the same (AM stations can still transmit from the most basic of remotes. . including a gas-powered generator). . .is this a capability shared by the PRC127? No.

If the power is out to the radio and TV stations, can the PRC127 scan police and fire freqs (most police departments have a generator backup for their base stations and vehicles have a built-in recharger for handheld police radios, so power is seldom a problem for them) for updates on any situations which may endanger the "survivalist's" life? No.

But the VX5 can.

Better yet, can the PRC127 get onto the local HAM radio net to listen for arising problems? Probably not, but this depends upon the freq of the local net, now doesn't it? The VX5 will have no problems, though.

Can the PRC127 do packet radio? I hesitate to answer "no" immediately to this as there is probably a way to do so. I do think that you can encrypt the 127's transmission with a KY set, but am not sure about packet radio.

BTW, I do know that you can encrypt the VX5 (*Please note : this is an illegal modification to the radio) using one of Transcrypt's DES boards AND can do packet radio quite easily with or without the (illegal) encryption mod.

Now, there _are_ downsides to the VX5 as a tactical radio. First off, you'd better make sure you lock the keypad out before moving around with it. Even the tiniest bump may change your settings. Also, fully waterproof tactical headsets can be expensive (I have a set of Eagle conduction headsets that cost me over $350 apiece. . .but I've been using a cheap set-up (earplug and handmike in a waterproof pouch) for a while now and it seems to work rather well. . for a lot less than $350 (total cost was about $30).

Also, the backlit display may light up (if you haven't programmed the settings to do otherwise) during either Tx or Rx. . .possibly a danger at night. At least the backlight is a muted red instead of a white, yellow or green.

The VX5 is very rugged, but I would doubt that it is as rugged as the PRC127. I would have no compunctions about swimming with a 127, but I'd want to put my Yaesu in a waterproof baggie if at all possible before I swam with it for any length of time.

> For long range communication, the SGC-2000 is a commerical
> radio used by boaters, the military and others for HF commo. It
> covers 1.8 to 30 Mhz. With the little work it will HF data as well.

Well, I'm unfamiliar with the SGC-2000 unless you made a typo and mean the SCG-2000. But the SCG-2000 is a good radio, too. A bit large and expensive for the purpose.

> If you would become a Ham, you might have learned this
> already. That is why I cross posted it to Rec.Amateur.Equipment.

Who says that I am not a HAM? Do not assume that I am not. Besides, why would I want to post my real name so that I can be tracked back down to my address, etc?

Do you live in West Lafayette, Norwich or Sebago Lake? Which is your middle initial : A., L. or T.?

So you see, Greg (if that is your _real_ name), these reasons are probably why the original poster didn't want to ask a HAM group. HAM groups, just like most other narrow-topic groups, tend to have a rather myopic point of view when it comes to recommendations for a specific item's appropriateness for a preparedness scenario.

You would have this person spend money and potentially risk their life on a piece of military equipment that is extremely limited in it's abilities. Yes, the PRC127 is a good radio, but it is not necessarily an appropriate radio for a "survivalist" to use at the exclusion of another. "Survivalism" is not about running around in cammies, toting assault rifles and conducting a movement-to-contact with spikey-haired mutants (or Federals), despite what the media would have you believe.

And while you will probably take an offense at many of my statements, I ask you to honestly look at the arguments I've posted. If you can find fault with them, then please do so.

I remain,

Geoffrey L. Hardin,
geoffh@abcs.com

No new low end. He said "...move the top end of the band down
100 Khz." 80 would then run from 3500 to 3900 kc.

But even if the low end was moved down to 3400, a simple tweek of
the trimmer capacitor in my homebrewed VFO (out of Demaw's QRP
NOTEBOOK) would get me down there.

3544. W4NTI , LOSING HIS BUDDIES !!!!

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-21 00:00:00 UTC
From: hammer007 <hammer007@my-deja.com>

As fate would have it, the "RADIO RAMBO" group of AF2Y and W4NTI have been taking their lumps from the FCC. First it was that OTK guy, then it was KE4TEW who was called on the carpet and cried like a stuck pig. Not only did he cry, but he obviously did not learn his lesson, because he has been causing problems on the 20 meter band with his mentor AF2Y.

Now the likes of KC8JBO emerges as the next villain in the never ending story of, " PORKY IS GONE, AND I AIN'T FEELING SO GOOD MYSELF". This never ending saga plays like a fine musical instrument .

Tune into 14313 and listen for the group of misfits and deranged. the list of characters goes on and on. You can hear " CHI - ROCKET DAN " issue his daily barrage of death threats and you can hear the likes of K2JW telling everyone that the words of "break, break, break", signifies an emergency. So stay tuned for the gathering and lets follow the events of amateur radio, it gets better everyday. We can only hope that Riley Hollingsworth will continue to clean up the mess and more efforts will be placed on identifying the quarmers . I also noticed that in the report issued through the FCC and the ARRL, that the wording of the apparent warning to KC8JBO is revealing. There have been a few warnings issued that referred to information on one's wrongdoing. This report clearly stated that the commission has EVIDENCE that this individual was engaged in the activities noted in the report. The wheels are obviously turning !!!!

Which one of the group will be next, will it be W4NTI ????? All Riley has to do is come to this forum and check the links between noted jammers and BINGO, his work will be complete.

What do you mean by saying that you don't agree with my statements about Tom's daughter? I never made any statements. The entire thing was concocted, handed to Tom on a silver platter and he bought it. Perhaps what you were trying to say came out wrong thusly my interpretation is likewise wrong. But if you think that I did anything perjorative to the memory of his daughter, then I demand an apolgy.

> one (3 percent) of hams has greeted the FCC
> forced march into the world of computers.

Dear "mf",

Your jeremiad is a classic example of the old saw about
"figures don't lie, but liars figure".

Enrollment in ULS by amateurs is actually ahead of where
simple math suggests it ought to be. Here is why.

There is no reason for an amateur licensee to enroll in ULS
until they want to take an action on their license, such as
renewal or upgrade. Participation is driven by need, and
need only exists for those who have occasion to renew or
modify their license. So far, that is a very small number
of us.

ULS went live (for amateurs) on August 16th, just 3 months
(or 25% of a year) ago. In the 12 months between 8/16/1999
and 8/16/2000 the number of licenses due for renewal account
for 6.2% of the total.

This means that by 8/16/2000 we should expect that perhaps
8.2% (figuring an additional 2% who upgrade) of hams will
be in ULS.

Since the "expected" enrollment at this point is just over
2% (8.2 x .25 = 2.05%) of all hams, the 3% that have already
enrolled is actually 50% AHEAD of schedule.

Doncha just hate it when someone ruins your unfounded rant?

Poor wideman, another qrm'er used by AF2Y. Busted, and now left to hang out to dry. Don't worry Roger, Doc has already recruited another qrm'er, K2JW, to take your place. Play some music again, idiot.

"QRMing WILL NEVER eminate from my station EVER."
Yeah,right. Surely it will. But it will be after you lose your callsign, you qrm'ing piece of trash. You were used by AF2Y,W4NTI, and N3CND. Why? Because you are stupid, and a nobody. Would not be surprised to hear of you going to court soon. I like the way you ADMIT to being a qrm'er for the Goodfellows. We all knew already, but still nice to see you drag them down with you.

OK, Len, you just head on down there and tinker up the new
modes of the future! Meanwhile my desktop 56K modem has
almost twice the bandwidth of that *whole* allocation. Of
course, with 1W output and an antenna (including transmission
line) limited to a tiny fraction of a wavelength, ERP is
down in the microwatts, so you will be able to weak-signal
to your hearts content.

By the way, so far this license-free band (no code test
required) is populated almost exclusively by Morse code
signals. Hmmmmmmmmm -- isn't that interesting!

Wayne Green? Wayne Green is a noted loon! He's played Don Quixote in the amateur radio press for 40 years at 73 Magazine. Wayne was a crackpot crying for UFO spotting nets thirty years ago. You couldn't shock me with your call but you surprise me with your reluctance to use it to give credence to your posting. If the best you can come up with in the way of substatiantion is 73 Magazine, you'll have to sell me a bit more on the imminent demise of amateur radio.

What would the guy selling microphones be doing in Tanzania? If you knew anything about Heil Sound, you'd know that *Bob* began in the professional audio market long before he made anything for radio

amateurs.

1 -- Because it gives great practice in traffic handling. In this
past weekend SweepStakes test, a typical station transmitted and
received around 500 messages (1000 total). Each message contained
5 elements of information, or a total of 5000 distinct pieces of
information exchanged by the average operator. Some stations had
4 or 5 times that many messages exchanged.

2 -- It teaches the science of radio propagation.

3 -- It encourages experimentation in antenna design and rigging.

4 -- It stress-tests radio designs, especially receiver technology.

5 -- It increases copying skills -- information must be transcribed
exactly.

6 -- It chases the intruders off 10-meters.

(insert MANY more reasons here)

And finally, it is just great fun!

Since you have taken full responsibility for the jamming and say it
will not happen again, surely you would not be harmed by, or object
to, an honest answer to the following questions:

Did any of your jamming activities take place on or near 3950 kHz?

If so, what was the _modus operandi_ of those jamming sessions
(e.g., music, comments, white noise, sound effects, or others)?

With all good wishes,

Kevin, WB4AIO.

3573. KC8JBO & KE4TEW : "SPILL BEANS" ?????

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-22 00:00:00 UTC
From: hammer007 <hammer007@my-deja.com>
Message-ID: <81ccj3jhq1@nnrp1.deja.com>
Source record: 126805

Recently gathered information from informed sources concludes that major happenings in amateur radio will be posted on the ARRL enforcement report. Credit can possibly be given to KC8JBO and KE4TEW who possibly could have assisted in telling the truth about an amateur who provided jamming tapes and assisted in other forms of amateur radio interference. The N.J. ham will be identified soon as the main player in a orchestrated attempt to jam amateur radio frequencies in and around 14313mhz.

The to be mentioned ham was also sent a NAL in the past for his interference toward another ham in the Virgin Islands. The to be mentioned ham gave the FCC the excuse that he was testing for TVI and the case was dismissed. Stay tuned for the up and coming release. HAMMER007

This idiot is really clueless. The letter from Riley is still in his hand
and he continues to harangue hams on this group. My bet is that by Xmas
this obsessive/compulsive jamming recruit of the Goodfellows will be a SWL.

3576. AF2Y SHOWS "ASS" ON 14313

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-22 00:00:00 UTC
From: juicelikaf2ysux@my-deja.com
Message-ID: <81cdq4kgq1@nnrp1.deja.com>
Source record: 126808

AF2Y really showed the ham community what he is all about on 14313 today about noon time. He denied talking about Tom K9RYs late daighters death. To Toms credit he did not play the Clifton screwballs game very long. AF2Y was all shook up because K2IVX, Lenny, advised AF2Ys Rabbi about AF2Ys erratic behaviour. Something needs to be done about this mad dog AF2Y. Maybe Riley Hollingsworth will take action against the Doctor of Hate for running his school of qrm and interfering to teach zapped students such as KC8JBO and KE4TEW.

3578. New Ham gloat

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-22 00:00:00 UTC
From: David Adams <dadams@intellimark-mn.com>
Message-ID: <38398AA1.691D8CCA@intellimark-mn.com>
Source record: 126810

In time for Thanksgiving we have three hams at our house and no turkey.

Saturday morning 9:00 to 10:00 am, Nov. 20, my son Taylor , age 11,
passed
exam element 3A, earning him the rank of Technician Amateur Radio
Operator.
(He had passed 2A at the Hamfest in October.)

At the same time and date, my 13 year old son Stephen , KC0GRJ, upgraded
his
novice license to the rank of "Tech Plus" by passing exam element 3A.
Stephen earned his novice at the Minnesota Hamfest on Oct. 30.

Santa is pleased. Santa is very very pleased! ;^)

My secret in getting them to do it? Get rid of the TV. Get rid of the

gameboy! Actually we did that for other reasons, but Im not complaining
about the results!

I am considering getting each of them an HT for christmas. They would
both
very much like to have the Yaesu VX-5R. With 3 VHF/UHF bands, RX
coverage from 0.5 to 16 MHz, general VHF/UHF RX coverage, as well as
the ability to display temperature, and with the optional barometric
pressure sensing unit, ability to display air pressure and altitude, it
seems like a nice piece of
equipment for hiking, camping, and other activities that Boy Scouts are
frequently involved in.

My concerns about this unit are
1. price. and
2. size.

Because it is so small I worry that it would easily be lost or
misplaced, and
then stolen. Granted it's small size is a big plus in many ways, but
for a
boy who often looses things, is it the right choice?

I wonder if a little larger single band HT like the ADI AT-201HP
($143.95)
might not be a better choice. This would give them a chance to get on
the
air right away, while they save up for something better. I could offer
to
match their savings, and when they get close they could sell the first

radio
and buy the VX-5R. I think that if they have to earn it they might be
a
little more careful with it.

Does anyone have any advice regarding first step gear? What has worked
well
in your family?

How do people like the VX-5R? I have heard a few complaints that it is
not
true dual band receive, so it can't be used with a cross band repeater
or
cross band communications. Any comments?

It claims to be weather proofed. How safe would it be to take it on a
canoe
trip? I suspect that would not be a good idea.

You gotta be kidding. The last *year*? I haven't read anything Wayne Green's written since at least 1974. Sounds like he's recycling the same old ideas for the anti-ARRL people. In any event, code on HF has nothing to do with being a requirement of the ARRL. The ITU requires it, the U.S. is a member. It's up to the ITU to get its members to vote to remove the requirement. And yes, being a "no-code" ham, I would like to be able to use voice on HF too.

Begging your pardon Mr. Mayor but my personal bandwidth is
not unlimited no matter how long it takes PacBell to not deliver
DSL to La Honda. I appreciate not seeing certain threads at
all and certainly appreciate a judicious trimming of the quotes
in order to save me time. I can only cram so much text per unit
time through my eyeballs and if that isn't well represented by
the concept of bandwidth I just don't know what is.

Yep, after today's fiasco, Doc's number is up. Stay tuned to ARRL Extra for future updates.(It's hilarious how Wiseman rolled over on him!)

That is a done deal. How do you think KE4TEW and KC8JBO got to keep their license? In the words of John Lennon,"Roll Over Beethoven! and tell Scwarzbard the news!"

; Listening is one thing, transmitting is quite another.

Isn't it "illegal" to even listen? Sort of like "I'm going to blow my car horn but you can't listen to it."

: My take is that very few
: hams transmit outside the ham bands, we're not the problem.

I'm sure that the largest majority of hams don't Tx out of band. But it only takes one nut jambing a police frequency to bring attention to us. Around here the local hams helped the police find a jamber, so we got better press that way.

: >I think more and more of the newer sets with all the fancy features have

3600. Where can I find plans for a Homebrew 6M SSB or 2M SSB Rig?

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-22 00:00:00 UTC
From: a1@home.com
Message-ID: <38409bfc.32593696@news>
Source record: 126848

Hi...where can I find plans for such a rig?
Preferably one with a digital readout, but that does not matter.

Also, a special type of antenna is required for SSB, isn't it? If so,
how could I build such an antenna out of either wire or pipes?

Even better would be if you could come up with a PCB for such a
thing...one that could be downloaded and printed out...but it is not
mandatory. PCB would be nice, however, because all my wire-wrapping
attempts are very sloppy.

TNX,
Rick

KE1JA@home.com
actually...it's rick1 instead of ke1ja. But, many spam checkers pick
up on e-mails in the body...so therefore i did that.

3602. AF2Y to W8LXJ

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-22 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19991121204931.04055.00000668@ng-co1.aol.com>
Source record: 126850

Gee whiz, there I was sitting at my desk with my itty bitty Kenwood R1000 tuned to .313 and who shows up? W8LXJ-a voice from the past. I didn't know you were on the I-net and would have e-mailed you but wait a minute-many months ago if I recall, you did e-mail me; I had you in my address book; then came Hurricane Floyd;I didn't have the book backed up on a floppy and BLOOEY-we had a brownout and goodbye hard drive. I had to do a clean systems reinstall plus an AOL software reinstall too and goodbye LXJ. "Anyways" I "dint" hear from you for the longest and am happy knowing you had a good year and I wish the best for you in 2000 after of course you've digested your Thanksgiving turkey and Christmas figgy pudding, whatever the hell that crazy goyishe dish is. I heard you talking to KE9RY whom, you might have not known, has lost his mind. Claims I insulted the memory of his late daughter which of course is pure bullsnot and cannot prove the hideous allegations whatsoever except for being prompted by on-the-air phony friends. You see Tom is basically a great guy but easily manipulated by evil doers and I guess he'll have to live with the stigma and..and..and. Oh hell; if he wants to be a fool, it's his privilege. In case you didn't know it, he and his wife were to my home on May 1,1998 as a result of their coming east a few weeks after the funeral. I tried to do my best to cheer them up and Tom told me I succeeded. Unfortunately K2IVX invited himself to OUR lunch and I had the misfortune of sitting at the table with him but since there was no Rabbi in the restaurant to whom to report me, things went okay. I think Tom must somehow equate my harsh statement for phony anti-Semitic Christians to my belittling his late daughter. You know, the one about, "I hope you choke on your cookie and may your wine turn to pee." Bob, this was never meant to hurt decent Christians but only the louses who must belittle my faith to buoy theirs and since I'm good with words, I hit a home run. There must be a lot of Sunday churchgoers who are spitting out the wine REALLY fast. Anyways, it was great hearing you even though I wasn't able to work you. You see the worse elements in ham radio have become Shirley Temples on .313 who daily tap dance with "Bojangles" Robinson and sing "On the Good Ship Lollipop" while cozying up to Riley Hollingsworth. It seems that they think they have Riley in their "hip pockets" so I must be wary not to cause them to report me to him as did kids their parents to the KGB in the Soviet Union. Maybe the .313 "angels" consider the man to be Riley Beria or Andropov? Obviously I'm being facetious because R.Hollingsworth's in nobody's pocket and I have a feeling considers them to be SHARKS. Time will tell. If you haven't been following events, KV4FZ's last appeal will go down the toilet and so will he. His only option will be to operate at sea as "Rowboat Region 2." Heh..heh..heh..as Queenie would laugh and giggle like Gidget. Whenever I hear Neil Diamond's song I think of you, "Old Bob Blue, sitting on a combine.Old Bob Blue, Herbie's friend and not mine." Very happy holidays from me and my brothers Chico and Harpo.
73,

Doc, AF2Y. Radiosigs@aol.com
A man who refuses to stand up for something,
will sit down for anything. AF2Y voted by an independent research organization
as having the best wire antenna in North America. It's homebrewed, NOT bought
in Pittsburgh! Heh..heh

3603. Rules For HF Contesting

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-22 00:00:00 UTC
From: frnkburnz@aol.com
Message-ID: <19991121210107.27325.00001235@ng-fi1.aol.com>
Source record: 126851

After spending some time listening to the sweepstakes contest activity on 40 meters this weekend, I have arrived at the conclusion that only four rules apply to HF contesting. Actually, sometimes it seems as though there are NO rules where contesting is concerned, but here are my observations:

1) Always use the highest output power allowed by your license class, even if the extra power is not necessary to make the QSO.

2) NEVER ask if the frequency is in use before calling "CQ contest, CQ contest, CQ contest" over and over.

3) Always talk over the weaker contest stations which are on a frequency. This demonstrates good amateur operating practice.

4) Continue to call "CQ contest, CQ contest, CQ contest" on any available HF frequency long after the contest is officially over, and then forge the QSO times in your logbook. The ARRL will never know the difference, and a few extra points can mean the difference between winning or losing the contest in your grid square!

"Where's all the RADIO CRYBABIES?"
"I wanna hear 'em TALK TOUGH!"

3604. "OK TO QRM BAD NETS" AF2Y SAID.

Newsgroup: rec.radio.amateur.misc

Message-ID: <81aech$6lm$1@nnrp1.deja.com>
Source record: 126852

Dr Hate is at it again, in a silly post on this forum, he stated that it was OK to "QRM BAD NETS". Are you listening Mr Hollingsworth? This twisted minded screwball AF2Y, should be removed from amateur radio. He is too gutless to get on the frequencies and qrm with his voice, now he is now down to tape playing, flatulating, screaming and qrming with a 1920 type treadmill. Maybe we could all be lucky and he will pull a "RUBE".

: > : idea who posted this to talk.politics.guns
: > :
: >
: > Why I feel that most survivalist talk is foolishness, my suggest
: > would be to buy the Bendix King VHF-HI or UHF radios.
:
: And this is exactly why the poster didn't ask anyone in a HAM newsgroup.
I
: suggested a very small handheld (
:
:
:
: > The Army uses them (PRC-127) as squad radios. Many of the guys
: > in the local Emergency Management and volunteer fire departments
: > have bought them as well.
:
: And what does that prove? Not much. The PRC-127 is very limited in it's
: capabilities. Yes, they are rather rugged, but for a survivalist, the VX5
: (which I recommended to the original poster) is much, MUCH better.
:
:
: > These units have 15 channels and can be field programmable.
:
: And the VX5 has 220 channels and is field-programmable. Looks like the
PRC-127
: falls a little short (about 205 channels short to be exact).
:
: The VX5 can accept headsets or handsets but needs none. . .IIRC, the
PRC127 must
: be used with a head or handset.
:
: The VX5 (with it's Lithium Ion battery) puts out 5 watts of Tx Power. .
.the
```

: PRC127 only 3 with it's inferior NiCad battery.
:
: Oh, and speaking of batteries. . .I am currently unaware of any method to
: recharge those NiCads in the field, say through a solar powered battery
charger
: (something a "survivalist" may take into consideration). I am also
unaware of
: an AA alkaline battery pack for the PRC127 (which, BTW, the VX5 does
have). .
: .but to be honest, I do expect there to be one out for it what with the
: military's switch over to AA only.
:
: You see, a person who is preparing for an extended disaster needs to do
away
: with strict convention. He or she cannot expect a limitless resupply of
parts
: and consumables as does the military. He or she cannot count on the
myriad of
: exotic methods used to replace things like batteries, ammo and food.
Therefore
: all of the tools that this person takes with them must be carefully
thought out
: to provide the maximum advantage in the smallest package.
:
: The Yaesu can accept NiCad AA batteries which are recharged through an
: inexpensive ($20) solar recharger.
:
: Even Better, I can take almost any battery (AA, B, C, D, 9-volt,
prismatic,
: etc.), spend less than 5 minutes and have it working through the external
DC
: port. Oh, I can also run the radio off any automobile cigarette lighter.
. .how
: exactly do you do this with a PRC127? What's the NSN for the cigarette
light
: adapter or the AC adapter?
:
: Also, the Yaesu VX5 is not limited to a very small Tx/Rx range (The PRC127
is
: limited to the 136 - 160 MHz). The VX5's Rx Range is :0.5-15.995 MHz,
: 48-728.990 MHz, and 800-998.990 MHz. The VX5's Tx Range is 50-54 MHz,
144-148
: MHz, 430-450 MHz. All of these are before any modifications are done to
the
: radio. That sound a lot wider than the PRC127, now doesn't it?
:
: Oh, can the PRC 127 receive any of the following :
:
: NOAA Weather Reporting Stations?
: AM and FM radio Stations?

: Police Bands?
: Business Bands?
: TV Sound?
: Commercial Shortwave Broadcasts?
:
: Can the PRC127 do a VFO or Memory Scan?
: Can the PRC127 give you a temperature reading?
: Can the PRC127 give you a barometric pressure reading not only for the
time you
: need it, but also keep track of the last several readings to tell you if
the
: pressure is rising or dropping (something a "survivalist" may want to know
as it
: can indicate oncoming weather fronts)?.
:
: The VX5 can. And do it for around $400. What's the PRC127 running for
right
: now? (I truly don't know).
:
: Why would a "survivalist" need all these things? Simply because they may
be
: interested in receiving as much information as possible without lugging
around 2
: or 3 different radios. If the power goes out in your neighborhood and the
TV
: doesn't work. . .you can turn on your VX5 to the TV sound freqs and hear
: updates. . .or go to the local AM news station for the same (AM stations
can
: still transmit from the most basic of remotes. . including a gas-powered
: generator). . .is this a capability shared by the PRC127? No.
:
: If the power is out to the radio and TV stations, can the PRC127 scan
police and
: fire freqs (most police departments have a generator backup for their base
: stations and vehicles have a built-in recharger for handheld police
radios, so
: power is seldom a problem for them) for updates on any situations which
may
: endanger the "survivalist's" life? No.
:
: But the VX5 can.
:
: Better yet, can the PRC127 get onto the local HAM radio net to listen for
: arising problems? Probably not, but this depends upon the freq of the
local
: net, now doesn't it? The VX5 will have no problems, though.
:
: Can the PRC127 do packet radio? I hesitate to answer "no" immediately to
this
: as there is probably a way to do so. I do think that you can encrypt the

127's
: transmission with a KY set, but am not sure about packet radio.
:
: BTW, I do know that you can encrypt the VX5 (*Please note : this is an
illegal
: modification to the radio) using one of Transcrypt's DES boards AND can do
: packet radio quite easily with or without the (illegal) encryption mod.
:
: Now, there _are_ downsides to the VX5 as a tactical radio. First off,
you'd
: better make sure you lock the keypad out before moving around with it.
Even the
: tiniest bump may change your settings. Also, fully waterproof tactical
headsets
: can be expensive (I have a set of Eagle conduction headsets that cost me
over
: $350 apiece. . .but I've been using a cheap set-up (earplug and handmike
in a
: waterproof pouch) for a while now and it seems to work rather well. . for
a lot
: less than $350 (total cost was about $30).
:
: Also, the backlit display may light up (if you haven't programmed the
settings
: to do otherwise) during either Tx or Rx. . .possibly a danger at night.
At
: least the backlight is a muted red instead of a white, yellow or green.
:
: The VX5 is very rugged, but I would doubt that it is as rugged as the
PRC127. I
: would have no compunctions about swimming with a 127, but I'd want to put
my
: Yaesu in a waterproof baggie if at all possible before I swam with it for
any
: length of time.
:

VX5 has all the features you mention. However it is rather
breakable over what we use in the military. It would only
good for short term emergencies. Not not for the "end of
the world" situation that you suggest.

: > For long range communication, the SGC-2000 is a commerical
: > radio used by boaters, the military and others for HF commo. It
: > covers 1.8 to 30 Mhz. With the little work it will HF data as well.
:
: Well, I'm unfamiliar with the SGC-2000 unless you made a typo and mean the
: SCG-2000. But the SCG-2000 is a good radio, too. A bit large and
expensive for
: the purpose.
:

It is a good rugged radio. If the world ends, like you are preparing
for, then you are going to need high power, long distance communication.
Not just something for local squad level communication.

: > If you would become a Ham, you might have learned this
: > already. That is why I cross posted it to Rec.Amateur.Equipment.
:
: Who says that I am not a HAM? Do not assume that I am not. Besides, why
would
: I want to post my real name so that I can be tracked back down to my
address,
: etc?
:
: Do you live in West Lafayette, Norwich or Sebago Lake? Which is your
middle
: initial : A., L. or T.?
:

You are a little too paranoid. Hell, I work for the government.
And do things for the military that would make you very nerous.
Hell, I made some of the guys nervous in the unit when I showed
them how to make my ICOM W2A scan Cellular frequencies.
Anyone with SigInt background gets nervous thinking about
civilians with the ability to do surveillance.

: So you see, Greg (if that is your _real_ name), these reasons are probably
why
: the original poster didn't want to ask a HAM group. HAM groups, just like
most
: other narrow-topic groups, tend to have a rather myopic point of view when
it
: comes to recommendations for a specific item's appropriateness for a
: preparedness scenario.
:
: You would have this person spend money and potentially risk their life on
a
: piece of military equipment that is extremely limited in it's abilities.
Yes,
: the PRC127 is a good radio, but it is not necessarily an appropriate radio
for a
: "survivalist" to use at the exclusion of another. "Survivalism" is not
about
: running around in cammies, toting assault rifles and conducting a
: movement-to-contact with spikey-haired mutants (or Federals), despite what
the
: media would have you believe.
:
: And while you will probably take an offense at many of my statements, I
ask you
: to honestly look at the arguments I've posted. If you can find fault with
them,
: then please do so.

:

I find offense that you are that paranoid. Or that you would
think the world is coming to end. I prepare for disasters but
I am not expecting life as we know it to end. It has taken us
too long to get here. And I will fight you or anyone else who
is willing to destroy our nation, our constitution or our freedoms.

Your fear is more dangerous than what you fear. I just would
not go to the extremes that you have. However, within that
context, you are well prepared.

I have too many within the military that are just as scared as
you. My answer is that it seems that you do not trust God to
save us or you think that God will turn his back on us (Rom.
8 would suggest otherwise).

I sure can, Butch. Turn on an HF rig; utilize the bandswitch and tuning knob from one end of a band to another. Now turn on a 2m rig and do the same. I operate whether I'm overseas or back home. I find the bands crowded and find no shortages of QSOs no matter what the band. The proof is there to be found.

Hi Timmie,

If you mean "you are" then its "you're" not "your". As to your other statements Tim you blatantly lie about things that can be verified, why on earth, would I believe you about something that can't be verified. It seems you are the simple one Tim.

Funny you never have addressed the issue or your trying to shout that station down have you? Oh well I never expected you would.

What railroad tracks???
WWW also doesn't need third-party agreements!
There are more web pages than there are amateur operators!
The web goes way beyond WAC!

If your kid is past the 4th grade it's likely he won't hear anything on the radio he hasn't heard before. (That's because the radio garbage mouths act like 4th graders.) 99% of ham radio is still clean and suitable for young people. If you can trust your kid to avoid those few garbage frequencies (on your orders), then he should get along just fine. If you can't trust him, then you better follow him around day and night because there's lots worse things in this world than a few potty mouths...
(And for heavens sake keep him away from that computer!!)

3613. Digi-Voice Mode "Hams on the internet"

CQDXNET II (Digi-Voice Working Demo)

Print this for installation info.

Talk to other amateur radio operators around the world!

To install just download CQDXNET II then go to My Computer then File then New and select Folder
and name the folder CQDXNETII then copy the file you downloaded to that directory and unzip it with
winzip. You can get winzip at www.download.com then run surfcall to install surfcall and you are ready
to communicate with the world on a new mode called Digi-Voice over the internet.

For non-amateur radio operators surfcall works at
http://members.aol.com/chatterbuginn

To get software go to http://members.aol.com/plsskbkas

73 de KE6RMP

So far I talked to Australia, New Zealand, Germany, Austria, Belgium...

Okay. That's strange. I've broken more PRC77's and 68's than you can shake a stick at. I even broke some of the Sabre's and Satcoms (though the earlier models of the latter were rather delicate).

> It would only good for short term emergencies. Not not for the "end of the

>situation that you suggest.

Who said anything about TEOTWAWKI? The original poster mentioned a radio for a Y2K scenario. In my personal opinion, Y2K will not be a TEOTWAWKI scenario. It may end up being something where a person needs to receive as much information as possible to keep abreast of the situation.

Look, bud, I don't know where you get this idea that all survivalists are preparing for the end of the world, but we're not. Many of us are preparing for life's little bumps.

And exactly why will I need high-power, long-distance communication? To whom, exactly, am I going to speak? Transmitting my location in a TEOTWAWKI situation would probably be counter-productive (yes, I'm fully aware that a receiver can be found even when in Rx mode).

Oh please. Sir, if you hold more heat than the three blankets I wore (last one being the nifty little green color that you get when you complete JFK-SWC and earn the 18Bravo designation (with both the W8 -and- W9), then lay your credentials on the table. I'd be willing to swap my DD214 with your 201 file anyday of the week. Just tell me who and where your CO is and I'll have my VFW commander drop him a line to prove I am what I say.

And modifying a radio to receive cell freqs is one of the most basic mods around. Both my Yaesu FT50 and VX5 do it all day long. Anyone with half a brain and a soldering iron can do it with instructions found right here on the net.

I'd bet you're probably one of the 98-series guys, aren't you? I had a ditty-bopper that was originally a Level 2 98Charlie. He was one of the flakiest guys I've ever known. Dude could do some serious shi* when it came to commo, though. He, too, had a high opinion of himself. But you don't sound as if you've been through DLI, so let me guess. . .you're with the NRO and are attached to a military unit. . right? Please.

. . .snip. . .

>

What in the hell are you talking about?

You are offended because you think that I feel the world is coming to an end?

To begin with, I never said anything about the End of the world as we know it. YOU did.

And then you go on to say that you will fight me because I am willing to ". . .destroy our nation. . ."

NOW who's being paranoid?

I defy you to find one statement where I even mentioned a desire to overthrow, assault or otherwise topple the federal government (I did make a comment about overthrowing Illinois. . .but I consider that to be a third-world country. .

.Chicago most especially. . but then you are somewhat familiar with Illinois being from a place not too far from the border, aren't you?).

> Your fear is more dangerous than what you fear. I just would
> not go to the extremes that you have. However, within that
> context, you are well prepared.

What extremes? A guy asks a question about a radio and now I'm an extremist because I recommended he get a HAM radio? Dude, you've been playing around the electricity too much.

If you think putting away some food, water and other supplies is extreme, then perhaps you should stick to decaffeinated and stay away from newsgroups such as misc.survivalism from whence this thread originated.

> I have too many within the military that are just as scared as you. My answer
> is that it seems that you do not trust God to save us or you think that God
> will turn his back on us (Rom. 8 would suggest otherwise).

No, I don't EXPECT God to save us/me. I think God expects me to do as much as I can to save myself. If I am willing of spirit and body, then He will assist me. I'm not a Lazy Christian who believes that just because I go to church on Sunday I'll be admitted to the Pearly Gates.

Look dude, I don't know what stuck in your craw, but the fact is that we're going to just have to agree to disagree. This is turning into little more than TROLLING bait with your rhetoric. If you want to discuss the pro's and con's of one system over another, then fine, let's go. Otherwise, as far as I'm concerned, you can have the last word. Feel free to tell the world about what a paranoid, delusional and clueless heathen I am.

Too bad, too. I would have loved to discuss some of the current trends in military communication, seeing as West Lafayette is only about an hour and a half away from my home.

Ah well.

No, STUPIDASS it was just a warning letter. No visit, etc.
What I did WAS WRONG, and I apologized to Riley over voicemail and in writing. I was trying to cover up the nastiness that YOU and several others promote on the frequency. It was the wrong approach, but at LEAST I gave my word to Riley that such operations would not come from my station. Unlike you, Polly Parrot, who made unidentified transmissions for years, I heed Riley's warning. He did it for my own good, to keep a fairly recently licensed ham on the right path. He and his staff are most welcome at my QTH, and I hope he gets some of you clowns for your bad amateur practice of running down other hams on the air. It must get your goat though, that with only 100 watts I was successful, when you and big al has to use amplifiers to get the job done. Oh, well, that type of operation will NOT eminate from my station at any time.

Keep running other hams down on the air, Polly, and you'll get ANOTHER
letter in addition to the one you've received in the past. Then You'll
be off the air, but it would be no loss to ham radio.

Ham radio may well be dead or at least dieing, but I do not think that you can use Dayton as part of an argument for or against. Between 1-800 and WWW stores there is no need to go to dayton and get ripped off. LArge ugly crouds, searching for imaginary deals. I quit going after the wheel chair rowdies nearly killed my wife. Those clods drive motorized chairs way to fast in the crowded hallways. Please note, I have nothing against people in wheel chairs, it is just that some handicapped people are as thoughtless as some of the rest of the population. In densly packed hallways there is NO ROOM for motorized wheel chairs.
And just so the other folks in Dayton will not feel left out, over priced hotel rooms, rude cops,lousy food and lets thank the Hamvention organizers for such a (no)good last couple of years work.

Note the date (Nov 2nd) of Riley's letter. Just 3 days before that date we had Riley Hollingsworth here in Minnesota as a speaking guest at our hamfest just a few miles from Bergs' house. During his two days here in Minnesota, I suspect he found time to meet with Frank Evans, our local FCC guy, and see some of the sights in the area. The fall colors were beautiful in Eden Prairie.

Looks like he took some notes back to his office!

3626. AF2Y: "ARRL the parasite of ham radio?"

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-22 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19991122095909.10001.00000842@ng-fq1.aol.com>
Source record: 126874

I was interested by that subject posted here. Parasites? No! OPPORTUNISTS, yes! Sexual harassment is not about sex; it's about power. The ARRL and restructuring is not about amateur radio; it's about money. By no means do I advocate leaving it but simply understand what's going on and besides, have we a better spokesman? Ask yourselves the following. Never having been a CBer, I don't know the answer to this query: how big is the CB spectra? I assume it's a heaping tablespoon of cycles, yet why didn't the FCC ever come down on it as it's now doing to ham radio? In other words why wasn't and why isn't that specific spectrum in as much danger of being gulped up by foreign powers as is that of amateur radio? Or so it seems. You can answer that by asking yourselves: what influence does the ARRL have in CB? Hmmmm? Do you see CB rigs advertised in QST? Since we derive negatives to both, then why should the ARRL have any interest one way or the other? If you owned a widget factory, would you care what's going in U.S. Steel? Now let's look at what's been going on with the FCC vis a vis amateur radio for more than a decade. DERGULATION FOR THE PURPOSE OF EXTRICATION. In other words the C.I.B. of the W.T.B. of the F.C.C. until a year ago has been less than nonchalant about the viability of our hobby/service. How can anyone dispute it in light of the obvious being heard? It's been "sewerish", a word I just made up which fits the bill perfectly. A year ago in came enforcer Riley Hollingsworth in a most subdued manner-now he's become an unhappy angry camper. But who's to say his attitude isn't justified? After all, we are told that foreign interests are after our spectrum and all he wants to do is to secure them for the U.S.A. But once again, where was enforcement years ago in ham radio and on CB? I therefore must look at the BIG PICTURE and I see COLOR GREEN. All of this maniacal behavior on-the-air could have had a deleterious effect on ARRL membership which seems to be attested to by the seriously dwindling numbers of YOUNG persons entering the hobby/service. Like it or not, the ARRL is THE BACKBONE OF AMATEUR RADIO because it's obvious THEY plan, the FCC scans and it becomes law. Now take this ridiculous no code exam to gain hams-to inflate numbers. To hell with QUALITY-we want QUANTITY to show the world how alive and booming is American hamdom. Wow! But is it only that? Is it just to impress the boys in Switzerland? My best guess is NO because it has a green tinge to it. The only way to keep ham radio alive here-the only way to keep foreign grubby fingers off our frequencies is by keeping the ARRL as strong as Superman. Like it or not, it's the oil that keeps the entire machine going. If it goes; if it's considered nothing more than a parasite as the other poster wrote, then you can kiss your beloved ham radio goodbye! And that is precisely why I am an ARRL member and will continue to be regardless of all this inside cloak and dagger stuff. All this latest deregulation stuff is no more than another version of letting in the code free techs-INFLATION OF NUMBERS. The more coming in, the more the ARRL membership. More QSTs are sold; more ads are seen; more equipment is bought which makes the ARRL exceedingly happy all the way to the bank and which OSTENSIBLY satisfies the FCC but must be a two edged sword in Riley's

opinion. The bands will be saved from foreign takeovers yet his workload will increase drastically thanks to the influx of new hams who, according to the FCC or VEC given tests, are still bogged down in unapplicable theory since rigs are no longer built while the most important element to entrance, RULES ARE REGS, are put on the rearest and remotest back burner possible. Since code requirements will be lowered,simplyfying everything, it should be replaced by an extensive understanding of and appreciation for PART 97. If not, then the entrance of new hams will be equivalent to buying a ticket at a 7 Eleven. Just think about it for a moment. I'm on the air for 30 years and took the General, Advanced and Extra before FCC examiners on Varick Street, New York City. One either PROVED code efficency and theory then, or it was "see ya in 30." VEC's did not exist, THANK GOD. I remember those questions about Colpitts oscillators and heaven knows what other plethora of stuff demanded. And if I remember correctly, I had to also write an essay. I'm not throwing roses at myself because I was just part of an ongoing process with MEANING. But times have changed and so have standards and so has electronics, DRASTICALLY. The days of tubes and understanding schematics are gone. The Japanese have to know the newest technology which puts them one step above us; we don't. The cream of the crop here were the BUILDERS, be it from Heathkit or the ARRL Handbook. All the rest of us, I included, were appliance operators. I mentioned building from the ARRL Manual and from QST articles-both indespensable. If then the ARRL wants to remain on such a high plain today, then it must do more than to inflate our numbers to impress the world. It must stop coming up with these plans to help themselves and their advertisers at the expense of good amateur radio. It must do everything possible from being called a parasite. It must revamp their entire VEC program which is a disgrace as attested to by Riley's crackdown on illegally earned licenses. It must work in cooperation with the FCC to make the written tests applicable to modern ham radio and emphasize, to counter- balance the cw know-nothings, exactly that which Riley has been emphasizing-rules and regulations. In other words, the ARRL must begin listening to and taking seriously the voice of the people instead of foisting upon most of us rules changes that superficially look benefical but realistically are destructive.

To the best of my knowledge there are no laws against listening to
anything. As a practical matter there is no way to enforce a law like
that. There are laws against a manufacturer delivering a radio in this
country to consumers which can recieve the cell phone freqs out of the
box.

I was remiss in not commenting the first time. As I predicted a few months ago, basically no one (3 percent) of hams has greeted the FCC forced march into the world of computers.

This goes to show a few things.

1. No one cares much about ham radio anymore, except for a few thousand die hards; as suspected, the novices and codeless techs are just on paper a large portion of the time (I live near some who I didn't even realize were hams until they saw my antennas)
2. No one is keen on giving a government agency they don't exchange money with their Social Security number
3. A large proportion of hams (average age 60 now) need not worry as this will, unfortunately, be the last license cycle they'll live through

And as I said a few months ago, the FCC will use this "data" to eventually kill the ARS, as they'll point to all those who haven't registered as the "dead licensees" file, so to speak.

See ARRL starting to get nervous, yet ?

"As the most recent story in The ARRL Letter explains, all amateurs first
must be registered in the ULS in order to file applications, including renewal, modification, and vanity call sign applications. Registration may
be done via the Web. You do not need a dial-up connection to register, but a
dial-up connection is required at present to file applications. The above
URL has instructions on how to register as well as on how to make a dial-up
connection to file an application via the ULS. The FCC has indicated that
Web access to file applications is pending.

Registration is via the new FCC ULS Form 606. This form also is available as
a paper application for those who prefer that method. Amateurs also may file
applications (renewal, modification, vanity, etc.) on paper using the new
FCC ULS Form 605. Electronic filing is not required of Amateurs.

To register for the ULS, visit http://www.fcc.gov/wtb/uls and click on
"TIN/Call Sign Registration". For more information, call toll-free 888-
CALL
FCC (225-5322)."

No, because again, the amateur hobby has a tendency of generating a
burst of interest then dying off and in the meantime, guys like you go
trumpeting your blind pro-ham ARRL-line predictions.

PSK31, no-code, novice enhancement. All of these had bursts of interest then flopped in the long run. When ARRL ran the PSK31 stuff, there was a burst of sigs, then 75 percent of them vanished. Hams are too set in their ways.

And with the internet available, most hams way is on the web.

Not with concern over their licenses which they don't use.

And Jeff is right, many many of the die hard old guys aren't on the internet anyway.

Why are you always so bitchy every time you reply to anyone who doesn't kiss the League's contester ass ?

First, as to standing, we all have standing to engage in the First Amendment on this Newsgroup. If that happens to resemble what someone else would do, even as a job in another forum, it is nonetheless an inviolate right.

Secondly, I'm always stunned by the overreach without due process. These technical issues are not handled in the judiciary on a whim. For example, when there is a mailing error that affects the substantial rights of a party, the court ordinarily does fact finding. To make a ruling, it needs to know conclusively whether the party made an irrevocably harmful error, or whether someone else, maybe even the post office, made the error. The former, of course, puts the party in a position prejudicial to his case; the latter is a reversible harmless error.

Big distinction. No agency official is empowered to make these decisions lawfully without satisfying due process. Pondering this question with preconceived notions that pre-empt due process is wholly insufficient, arbitrary, whimsical and capricious. Merely believing the person to be a liar or an otherwise nefarious character from information outside the four corners of the question doesn't justify summary justice. Pulling a guy's license under such circumstances is wrong-wrong-wrong and should be redressed, if necessary, by all of us.

> just plain old *wasted bandwidth*. Your post qualifies for
> the second...

Well, you know what they say: When you disagree with someone
but lack the skills to cobble together an intelligent rebuttal,
all you can do is take the _ad hominem_ approach and toss out
childish insults in a defiant yet futile attenmpt to recover
the shards and fragments of your shattered dignity.

If opposition is really as difficult for you to deal with as
your response indicates, please bear in mind that you can
always stick a gun in your mouth and paint the wall with
your brains.

It seems as though Wayne is now waiting for "cold fusion" to make energy free and he hopes to be transported via psychic energy to Venus for his final resting place.

It used to be fun reading his rantings during the early days of 73 (37 cents and $37 for a life subscription - your life our his) and he did have some worthwhile things to say and was correct in many of his rants. Nowadays he's so far out that I don't know how anybody can take him seriously!

From: jeffreyh@Hawaii.Edu
Message-ID: <81eo0a$i2o$1@news.hawaii.edu>
Source record: 126643

In article <81c749fbj1@nnrp1.deja.com>, <nohambull@my-deja.com> wrote:
>Give me one good reason why contesting is good for ham radio.

You ask that because you don't understand the benefits of contests. Only the most efficient and robust equipment installations, from radios, operating position, lead-in, to antenna, can be a serious contender. Here, you'll find only the very best operators, knowledgable of propagation conditions, international procedures, and operating techniques who, when hearing something as simple as a single "dit", know how to interpret such a cue.

These exceptional operators and the powerhouse stations they operate are whom your community turns to when disaster strikes, for these communicators voluntarily "train" themselves weekend after weekend, in the most grueling mental and physical activity known to the amateur radio service. No other operators are better prepared for the rigors of providing emergency communications for the duration of the emergency than contesters.

Are you upset that most of the bands are crowded? Consider this:
We have parades -- lots of them. Hawaii has the distinction of having the greatest number of state holidays in the nation. Kalakaua Avenue and associated streets are blocked at least once per month for parades. Some folks gripe and complain, but notice is given well in advance, asking drivers to use alternate routes. Same thing with amateur contests -- notice is provided via the periodicals well in advance that such and such contest will be given on such and such dates. Plan ahead, and recognize that:

1. Contests fill the bands with happy operators.
2. Spectrum-hungry observers outside the amateur service will have no doubt that the ham bands are being fully utilized. (And you *do* realize how important that is, right? WARC bands are available for you and others who can't comprehend the importance of this.)
3. Contests give operators a chance to voluntarily subject themselves to long hours of operating (in a fun manner), testing both their stamina their station's efficiency, two very important qualities for those wishing to abide by S91.1(a) and (d):

97.1 Basis and purpose.
The rules and regulations in this Part are designed to provide an amateur radio service having a fundamental purpose as expressed in the following principles:
(a) Recognition and enhancement of the value of the amateur service to the public as a voluntary noncommercial communication service, particularly with respect to providing emergency communications.
(d) Expansion of the existing reservoir within the amateur radio service of

trained operators, ...

Would you rather have the bands fill with contests or filled with comms like those which occur on 14.313 Mc? The week contains 168 hours; a weekend contest uses at most 48 of 'em -- 29%. But of course, not every weekend contains a contest, so the percentage of time in which contests utilize the bands in a year's duration is lower.

No HF spectrum has been sold. It's only the UHF+ spectrum that
is being auctioned off, and a NCT license grants access to all
of our V/UHF+ frequencies. So your comment makes no sense.

Source record: 126648

I got this E from a dear friend this morning..........

Good morning Doc, although you don't have a digital readout, I think you'll get more emails sent to Riley this morning. "They" are going out of their way to watch their p's and q's and reporting every misflicker by you. You are much more intelligent than I am, and in my humble opinion, anyone else on 313. I hope you take this as constructive as it is meant. There would be no reason for me to be called for my opinion, but if I were, I didn't have the radio on. "73"

I say thanks friend but Riley's no dope; he knows the score and fully realizes that the rottenest of the rotten are the same ones playing Shirley Templeoffering roses and phony reports to "the Enforcer". And now I see that KT4TR has stooped already lower than he is by involving a man recupertaing from triple bypass which to Youngblood and his bloodletters is something to spoof. I'll get back to "anyways, youse guys" Steckbauer in a little bit but right now I'd like to address something else. W4NTI is a hell of a man who put his life on the line for the USA for more than a decade. Wounded in Nam, then after recuperating ,reupped in the Army instead of the A.F.,but simply had to bow out of the military due to injuries. And despite his heroism and fervor for this nation, became a whipping boy for the anti-social elements on .313 who think Riley's in their pocket. Now I've noticed how Dan has made a concerted attempt at withdrawing from the fracas for which he deserves kudos and one would think that the antagonists would applaud him as well. This morning I heard something quite to the contrary. That vicious hillbilly Polly who now goes by the respectable name of George since Riley took away his harmonica and rock 'n' roll record playing rights on .313 was on with KT4TR mobiling in his watermelon wagon. One would think that proper demeanor would have transpired in light of Riley's crackdown on instigation and fighting but somehow these two clowns felt immune. What I heard was their way of saying thanks to Dan, NTI, for trying to be a nice guy to all. Saying that he was still crazy and they'd simply have to put up with a "sick uncle." I wonder just how long KT4TR and W4FQF can get away with creating trouble before Riley cashes in their chips? And of course the simp from as he calls it, "Sain Louis", W0ECK or K0ECK sits there like a bobble head figurine taking it all in staying mute.
Now to complicate matters, it seems that KE9RY can't stop running off at the lips about yours truly and so I have no choice but to rebut this way. I want to avoid being jammed by him as I was yesterday while talking to WA8PBM and then slandered regarding his late daughter. I've had enough of that ingrate therefore here goes.
The boy seems well healed which is a bit perplexing for a guy who says "anyways" and "youse guys." I mean I would expect a dumb pugilist to go that route and still rake in the bucks thanks to good promoters and ringside jerks who'd pay a couple of thousand greenbacks to watch him strut his stuff, but KE9RY? Now he'll have you believe that he's home recuperating from a knee operation and is unable to work. They call it the "Nerlman Syndrome" until

perhaps his boss calls to say, "Tom, take another month off. Don't worry about a thing because Bob is here from Account Temps and he's at your desk and doing a wonderful job. In fact, Bob and I are getting along splendidly." Anyways, my question is this: whenever I hear KE9RY, he's mobiling back and forth to AES with transceivers that become outdated in 24 hours. Don't those rigs have weight? Don't they come in big boxes? Who's helping Tom, with the bad knee, shlep heavy stuff and if it's nobody, then how is he able to shlep but not work? What say,Nerlman? Furthermore I got a call from a friend who told me the secret to his income because you can bet your sweet arsch it ain't from brain power. He's an ambulance chaser. You ask how he can be one and not a lawyer? Because, as I was told, he chases them to find what route they're taking and then lies down in front of them. ACCIDENT..ANOTHER ACCIDENT. "To court, to court..off to court we go. Another suit..we'll get the loot,,to court..to court....oh.oh.oh.to court..." I don't know this to be true but the source of the info is reliable so I must remain both skeptcal but intelligently gullible. Maybe it's all wrong? Maybe he inherited dough or is being fed on the side? All I know youse guys is dat sumpin' seems fishy anyways. And whoever said that the pen is not mightier than the sword, take a lesson from AF2Y.
Doc, AF2Y. Radiosigs@aol.com

KK7HO "Stirs the pot", then plays the victim.

The only reason you psychos are on frequency, is to
"stir the pot". and then to act as if you are the victim.

This has been your juvenile tactic for over a year now
Volz. Then you try to "play the victim" and claim that
you are being "QRM"ed.

You should really change your tactic. It's getting too old.

KK7HO spun:

> Hell anytime Dave throws out his callsign you idiots call it QRM, you call
> someone making a statement QRM, You need to be able to diferentiate between
> what is, and is NOT qrm in order to have ANY credibility, It's bad enough that
> you Make all of these accusations and lies from behind an "anonymous" screen
> name on the Internet.

Please stop the jamming KK7HO ï¿½.

3653. AF2Y kicks neighbors pooch !!!!!???

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-23 00:00:00 UTC
From: brewheadbud@my-deja.com
Message-ID: <81f6v2$m3d$1@nnrp1.deja.com>
Source record: 126651

Reports out of Clifton, N.J. indicate that a resident of ABBY LANE kicked a neighbors dog shortly after going to the mail box and gathering the mail. The report comes amid recent information gathering sources have indicated that the person in question will be listed on the ARRL inforcement report within the next day. There is a possibility that the individual being implicated in amateur radio wrongdoing was not happy with the delivery that was made by the postal employee and reacted in a fit of rage and became irate. A neighbors dog approached the suspect and tried to determine if the suspect had his usual dog biscuit. When the dog approached the individual kicked the dog and yelled "RILEY". The suspect also was seen wrapping himself in wire that was use as some type of antenna. The neighbors also reported the individual yelling "QUEENIE GOT ME, QUEENIE GOT ME". If anyone in this forum has any information regarding this event will you please post your findings.

Your express superiority is only bested by your omniscience, presuming to know all of the some 500,000 hams in the U.S. I know: all of us old timers are dead, ha, ha. And if not, we're all ignorant, uncaring lids.

Far from it. Licensed in 1952 and remembering those olden days in which your assertions carry some degree of truth, the trip from there has taught me how very much I don't know. It has colored life for me as a giant learning Odyssey toward "self actualization." Learning what makes folks tick, rather than presuming superiority, has got to be the highest of life's goals.

Issue 2 1978. I have a copy infront of me now (in English)

Looking at the diagrams and photos, I hope you've got good
engineering facilities :-)

I would guess that it is out of print by now and the publishers
would not object to me making a copy.

14 A5 sides = 7 A4 copies.

(I've checked later issues for any errors/corrections/modifications
to the article, but there don't seem to be any)

Email me if you would like me to copy it for you.

Regards

Barry

How many tapes did you hand out Doc? Are you still friends with Rich after causing him to lose his liscense?Is it true you have a revocation hearing up before the commission? Is it true you fondled patients under anathesia and lost your dental liscense?Did your rabbi really kick you out of your church?

Damn, looks like we have a little Herman in training. Hit the road netcop, and take the psychotic AF2Y with you. If I have to continously monitor the whiny code/no code crap, you can read this as well, clown.

3664. AF2Y, Rabbi's and the Facts

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-23 00:00:00 UTC
From: Len Schaier <lschaier@avotec.com>
Message-ID: <383B1CFC.7C415877@avotec.com>
Source record: 126662

AF2Y has been running off at the pen with his story about me calling "his Rabbi". Maybe I should detail what really happened.

Some time ago I concluded that AF2Y created, or brought out of the closet, at least 5 anti-semites for every one he thought he either cured or protected me from.

I could not communicate my thoughts to him. I thought maybe a rabbi might help and proceeded to call every temple in and around Clifton, NJ. I tried to find out which congregation he belonged to, or at least, a rabbi that might be able to mediate.

Well I finally found one that knew Mr. Schwartzbard "a few years ago". I asked if he would help and he asked me to explain what was going on.

I expalined that, although I agreed with AF2Y's idea of standing up for the Jewish people, I felt he was doing more damage than good. I explained that his mission had taken on a life of its own; if there wasn't anybody being anti-semitic he would keep insulting people until they would hit back by attacking Jews and AF2Y's reason for living would be confirmed.

The rabbi's responce, THATS CHARLIE!!!

enough said.

Len

3666. AF2Y: more KE9RY hypocrisy

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-23 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19991123185914.17360.00001042@ng-cp1.aol.com>
Source record: 126664

In a most vicious way. KE9RY was telling everyone how much he loathes the "eastern liberal establishment" and refuses to watch the news off NBC,CBS and ABC. He's a Fox man and quite obviously,all foxed up. I've been listening to him parrot the screwiness of Rush Limbaugh who incidentally transmits from WABC studios, NYC, a so-called eastern liberal establishment. Democrats are bad. New York is bad. Guns are good; an Uzzi belongs in every crib and a handgun in everyone's pocket and a few small grenades too. Now Tom lives about 40 miles from Milwaukee which, as we know, has made a very great contribution to this nation. BEER. Compared to the magnificence in every way of New York City and suburbs, Eagle Wisconsin and even Milwaukee rate as flat tires. But what I can't understand is this: in April '98, to get away from the anguish and turmoil following the loss of his daughter, he and his wife could have driven anywhere in this country. ANYWHERE. Where did they go? You guessed it. Right here-Northern New Jersey-New York City's neighbor and a bastion of eastern liberalism, I think. And whom did they visit? Me and ever since the end of George Bush's first term, I haven't voted for a Republican and will not as long as they sponsor and cater to rightwing nut cases. And even Lenny Schaier, K2IVX, who acts as KE9RY's confidant, must belong to the eastern liberal establishment. Tom doesn't realize that we must have BALANCE in this nation and trying to stigmatize an area with a cockeyed name made up by his cockeyed and myopic icon, Rush, doesn't fly. Conservatism? Hell, it went out with Barry Goldwater who was a damn good man but let a few stupid comments spoil the broth. My suggestion for Tom is to vote for that crackpot Pat Buchanan. Two peas in a pod but before going out to vote in Nov.2000, Tom ought to read over a bit of the Old Testament which he professes to love so much and maybe he then will understand the basis for the liberal cornerstone of this nation.

Hi, I'm looking for info on a shinwa handheld radio model SH505G, Wondering if this is the 'field programming' version from the keypad. One radio didn't allow programming from the keypad, but I don't remember which does and which doesn't. this radio has the 'blister' type keypad. any info appreciated.
thanks,
Randy

3668. Re: To Riley: Handling Computer Errors

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-23 00:00:00 UTC
From: Trebb@webtv.net
Message-ID: <11595-383B2777-14@storefull-248.iap.bryant.webtv.net>
Source record: 126666

I'm no one's boy, simply an involved American who believes deeply in the spirit and letter of the Constitution. The issues I raise are American issues affecting all of us. We may not now be a party of real interest, but as Americans we should be keenly aware of any erosion in our rights.

The purpose of NG's is to share views--the deeper and more spiritual, the better, I would think. In no way am I trying to demean Riley; indeed I respect him and his mission. The higher the position folks occupy, the more receptive honorable men are to legitimate views and opinions, so I have my hopes. Do you have a different view?

But you see, Getback, that is my point. Any summary imputation of authorship is pre-judgement on its face. Your post supports my precise point.

Our tradition in such matters is to take evidence on the alleged error and furthermore to accept the prima facia of a party unless and until we prove otherwise. Thus, our society turns on an assumption of regularity; otherwise we'd be a paranoid society or one of unequal justice.

Hi,
Looking for a Direct TV DSS satellite dish setup. Have
ham gear to trade or cash. Used Ok. Must work.
Replacing one damaged by near strike and homeowners wont pay so looking
for something used. Most places out here want you to
subscribe for a year of service minimum, but I already subscribe.

Looking primarily for secondary receiver + card, but will consider
buying
entire setup including dish if UPS shipping is reasonable. I already
have the original dish which seems to work fine, so, just receiver +
card
is OK. Must be DIRECT TV since that is what I subscribe to now.

Please state what you have (model, etc), condition, and price.

I have ham gear for trade including HF, VHF, and UHF gear if you
prefer to trade instead of cash.

thanks,
Joe K7JOE

Hello and thanks for looking at this,

I am looking for a copy or even better a web site URL of the
construction details of the DK1OF 2m 4CX250 linear amp
I think it was published in VHF communications in the late
1970's (1977 ?)

Thanks Martin G1GYC

For all of you interestedf hams please go to this forum and read KC8JBO & KE4TEW " SPILL BEANS ". Why, because there is a very special event getting ready to take place and all amateurs will be reading about the involvement of AF2Y in ham radio related enforcement issues.

From what I have been able to gather, Rube K4RUB has been in the hospital undergoing heart surgery." Boob" has become a victim of all the abuse inflicted upon himself from chain smoking and overeating. I did get the chance to meet Rube about two years ago and I can honestly say that he had two cigs burning at the same time, one in each hand . He alternated taking puffs from both the right and left, and when I asked him why he had a cig in each hand he replied , " because I am ambidextrous".

I have been informed that Rube has sent information to the feds about the involvement of AF2Y, and his solicitation of jamming on the 20 meter band. It seems that AF2Y supplied tapes to amateurs for the purpose of jamming and interference. Rube has finally decided to come clean and has cooperated with the investigators. Way to go RUBE, get well soom and thanks for going straight !!!

up with af2y, I like you , think that Len should put the name and
address of the Rabbi on this forum so we could all contact him to
complain what a Horses Ass he is pastoring.

As for the Moron Fred, NU5M, he was turned in for threats on peoples
life on ham radio. He should be in a cell now instead of a truck cab.

Doctor Hate , AF2Y has written every one and any one about people he
does not like. There are people with stacks of copy of crazy letters he
has written to get people in trouble. There is no doubt he has called
many employers trying to get people fired. I hope no one goes "Postal"
on him, but he has caused a lot of trouble.

With the available bandwidth being as high as it is, objecting to excessive quoted text on the basis of "wasted bandwidth" comes across as rather silly. When people carp about "wasted bandwidth," they're either clueless about what bandwidth is (and how much is actually available), or they're using a technical term as a smokescreen for what's actually an aesthetic or practical objection. In either case, I release the safety catch on my Browning.

The funny thing is, the aesthetic and practical objections have merit in themselves; there's no need to try and borrow credibility for them by blowing smoke up people's asses with high-sounding cyberqueef that's intended to baffle and intimidate the technically unconversant.

3693. AF2Y: SNAKES LOOSE ON .313

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-23 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19991122210013.09946.00001109@ng-fe1.aol.com>
Source record: 126745

I don't seem to understand what the hell is going on on .313? Riley has made it plain that he dislikes confrontation due to instigation and so I ask how in the world is WA2EXQ, W4FQF,KE9RY and that obstreperous cackling giggling moron from McKeesport, Queenie,K3QAM allowed to carry on indiscriminately? While just listening today, I heard Lloyd Montnervous from High Anus, Mass., the jolly green Nazi who simply LOVES THE LIBERTY NET and who stands close to 7' and served in the navy as a torpedo, carry on about me with the "Queen." Does Riley actually believe that anyone so attacked should refrain from defense? And you know what the best defense is, don't you? A damn good offense! And that's how arguments start; the same arguments Riley detests. I really hope he's reading this and taking stock in my remarks because unlike the "14.313 snakes' false reports, mine are on target. I'm not "REPORTING" anyone for QRMing or collecting tapes like that guy from Long Island who backstabs, but rather laying it on the line. THERE IS A DOUBLE STANDARD PREVALENT on 14.313 and if Riley doesn't realize the message it's sending, he should. I wonder if he heard today how I was provoked by KE9RY? I was in QSO with John,WA8PBM,and right at the end, out of the blue comes this thunderous signal burying mine and it's KE9RY takeover time! Who the hell does this guy think he is? Perhaps the idea of being "RIley's pet" has given him the moxie to jam at will? And to insist on, without any proof whatsoever that I attacked the memory of his late daughter, is sheer machination, imagination and a product of being brainwashed. And so Tom, I admit you have it all over me on the air with that power and magnificent antenna which annoys half of Eagle, Wisconsin but right here my boy, when it comes to words and sentences and the ability to influence; you're history! The choice is yours. Riley told me to lay off dicing people up on the air and I've abided by it. Now it'd be only fair to tell you and Polly and Lloyd and Queenie and Youngblood and Schaier THE SAME THING. Stop instigating and there'll be peace. Additionally Tom, how dare you constantly ply your stinking slander about me regarding your daughter's passing? Where the hell is your reasoning? You say that just because YOU SAID that I said on or about 5/1/98 I was taking time off from a busy schedule to meet with you and Barbara, is degrading the decedent's memory? Are you nuts? Do you realize that I wanted to take time off for you and Barbara? No one forced me to do it; I did it willingly and voluntarily because I CARED ABOUT YOU AND HER. I felt for both of you and did what I could to cheer you up. You sat in my home and as far as I was concerned, we had a mutual admiration society going and now you turn around and do a Lenny? A shiv? There is definitely something more wrong with you than just misjudgment-I think you're schizophrenic and need counselling. What you've done is to overemphasize our political differences and why not since you advocate a gun in every house and an Uzzi in every crib while I say DAMN THE GUNS-THEY KILL-my stinging comeback to religiously intolerant Christians of which you are NOT-my unending and adamant oppostion to Schoenbohm and his motley crew and my support for civil rights because that's what America is all about, RESPECT FOR MEN OF DIFFERENT PERSUASION, into some type of potpourri of

anti-Steckbauerism nurtured by 20 meter screwballs who've gotten into your head. You're simply mixed up, utterly confused, brainwashed and ultra gullible. Furthermore if you think K2IVX's lack of response to bigotry is correct, consider this. You run into some vehemently anti-Catholic hams who run your faith into the ground at every turn. And you decide to hit back because you know it's unfair. Who turns up on the frequency? A Catholic who sides with those berating Catholicism and then calls your Priest to complain about your opposition. Think Tom-what would be your opinion of that Catholic landsman who stabbed you in the back? Congratulations, you've just walked a mile in my shoes! Tom, think about what I'm writing. Don't be influenced by lies and the same troublemakers who've been loose on 20 since Schoenbohm recruited them a decade ago. What is a decent man like you doing with vermin? Think, Tom-think!

I GOT MY RED PANTIES ON

I'M GOING DOWNTOWN TO MEET A BOY OR TWO

WE'RE GOING TO A BAR TO HAVE A REALLY GOOD TIME

AND THEN WE'LL ..... er ..... wha?

I'm terribly sorry. Please excuse me, I've been listening to 14.313 much too often lately. Whew!

3696. A Ham's Night Before Christmas

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-23 00:00:00 UTC
From: garypearce@ipass.net
Message-ID: <3839fd99.11263560@news.rdu.bellsouth.net>
Source record: 126748

A Ham's Night Before Christmas

(Yet another corruption of Clement Clarke Moore's
classic Christmas tale, this time distorted by
Gary Pearce KN4AQ, Raleigh, NC, December 2, 1996.)

T'was the night before Christmas,
And all through two-meters,
Not a signal was keying up
Any repeaters.

The antennas reached up
From the tower, quite high,
To catch the weak signals
That bounced from the sky.

The children, Tech-Pluses,
Took their HT's to bed,
And dreamed of the day
They'd be Extras, instead.

Mom put on her headphones,
I plugged in the key,
And we tuned 40 meters
For that rare ZK3.

When the meter was pegged
By a signal with power.
It smoked a small diode,
And, I swear, shook the tower.

Mom yanked off her phones,
And with all she could muster
Logged a spot of the signal
On the DX PacketCluster,

While I ran to the window
And peered up at the sky,
To see what could generate
RF that high.

It was way in the distance,
But the moon made it gleam -
A flying sleigh, with an
Eight element beam,

And a little old driver
who looked slightly mean.
So I though for a moment,
That it might be Wayne Green.

But no, it was Santa
The Santa of Hams,
On a mission, this Christmas
To clean up the bands.

He circled the tower,
Then stopped in his track,
And he slid down the coax
Right into the shack.

While Mom and I hid
Behind stacks of CQ,
This Santa of hamming
Knew just what to do.

He cleared off the shack desk
Of paper and parts,
And filled out all my late QSLs
For a start.

He ran copper braid,
Took a steel rod and pounded
It into the earth, till
The station was grounded.

He tightened loose fittings,
Resoldered connections,
Cranked down modulation,
Installed lightning protection.

He neutralized tubes
In my linear amp...
(Never worked right before --
Now it works like a champ).

A new, low-pass filter
Cleaned up the TV,
He corrected the settings
In my TNC.

He repaired the computer
That would not compute,
And he backed up the hard drive
And got it to boot.

Then, he reached really deep
In the bag that he brought,
And he pulled out a big box,
"A new rig?" I thought!

"A new Kenwood? An Icom?
A Yaesu, for me?!"
(If he thought I'd been bad
it might be QRP!)

Yes! The Ultimate Station!
How could I deserve this?
Could it be all those hours
that I worked Public Service?

He hooked it all up
And in record time, quickly
Worked 100 countries,
All down on 160.

I should have been happy,
It was my call he sent,
But the cards and the postage
Will cost two month's rent!

He made final adjustments,
And left a card by the key:
"To Gary, from Santa Claus.
Seventy-Three."

Then he grabbed his HT,
Looked me straight in the eye,
Punched a code on the pad,
And was gone - no good bye.

I ran back to the station,
And the pile-up was big,
But a card from St. Nick
Would be worth my new rig.

Oh, too late, for his final
came over the air.
It was copied all over.
It was heard everywhere.

The Ham's Santa exclaimed
What a ham might expect,
"Merry Christmas to all,
And to all, good DX."

ps:
Merry Christmas from Cyndi,
And Merry Christmas from me, too.
She's KD4ACW,
I'm KN4AQ.

: >VX5 has all the features you mention. However it is rather breakable
over what
: >we use in the military.
:
: Okay. That's strange. I've broken more PRC77's and 68's than you can
shake a
: stick at. I even broke some of the Sabre's and Satcoms (though the
earlier
: models of the latter were rather delicate).

Actually we are using radios that are more like the new IC-706
or FT-100. Light weight HF radios are making a come back.
SINCGARS has replaced the PRC-77 but still is nothing but
a big 5W radio (25W in mobile mode). Even the PRC-126
(5W handheld, 30 to 88 Mhz) is big. Range is lacking thus we
are looking at radio that will give us more coverage without using
repeaters like MSE does.

: > It would only good for short term emergencies. Not not for the "end of
the
: >world" situation that you suggest.
:
: Who said anything about TEOTWAWKI? The original poster mentioned a radio
for a
: Y2K scenario. In my personal opinion, Y2K will not be a TEOTWAWKI
scenario. It
: may end up being something where a person needs to receive as much
information
: as possible to keep abreast of the situation.

It is the sub message to Y2K that it is all going to be over,
that we are returning to a simpler age.

: >
: > : > For long range communication, the SGC-2000 is a commerical
: > : > radio used by boaters, the military and others for HF commo. It
: > : > covers 1.8 to 30 Mhz. With the little work it will HF data as well.
: > :
: > : Well, I'm unfamiliar with the SGC-2000 unless you made a typo and mean
the
: > : SCG-2000. But the SCG-2000 is a good radio, too. A bit large and
: > expensive for the purpose.
: > :
: >

: > It is a good rugged radio. If the world ends, like you are preparing
: > for, then you are going to need high power, long distance communication.
: > Not just something for local squad level communication.
:
: Look, bud, I don't know where you get this idea that all survivalists are
: preparing for the end of the world, but we're not. Many of us are
preparing for
: life's little bumps.
:
: And exactly why will I need high-power, long-distance communication? To
whom,
: exactly, am I going to speak? Transmitting my location in a TEOTWAWKI
situation
: would probably be counter-productive (yes, I'm fully aware that a receiver
can
: be found even when in Rx mode).
:

Given the end of the world type scenarios we are being given,
I doubt that their would be anyone looking. Long distance commo
would be very valuable, after a period of time. People would
have to trade and that means commo.

: > : Do you live in West Lafayette, Norwich or Sebago Lake? Which is your
middle
: >
: > : initial : A., L. or T.?
: > :
: >
: > You are a little too paranoid. Hell, I work for the government.
: > And do things for the military that would make you very nerous.
: > Hell, I made some of the guys nervous in the unit when I showed
: > them how to make my ICOM W2A scan Cellular frequencies.
: > Anyone with SigInt background gets nervous thinking about
: > civilians with the ability to do surveillance.
:
: Oh please. Sir, if you hold more heat than the three blankets I wore
(last one
: being the nifty little green color that you get when you complete JFK-SWC
and
: earn the 18Bravo designation (with both the W8 -and- W9), then lay your
: credentials on the table. I'd be willing to swap my DD214 with your 201
file
: anyday of the week. Just tell me who and where your CO is and I'll have
my VFW
: commander drop him a line to prove I am what I say.
:

Who gives a shit. My colonel would not care. Hell, a third of the unit
are Vietnam Vets. So what does it matter what you did 30 years ago.
That isn't today. Now you are an old man, with stories to tell your

grand kids. Your time has pasted.

: And modifying a radio to receive cell freqs is one of the most basic mods
: around. Both my Yaesu FT50 and VX5 do it all day long. Anyone with half
a
: brain and a soldering iron can do it with instructions found right here on
the
: net.

From what I am seeing there are no mods for the VX5 to allow
the receiving Cell Freqs. That is unless you have one shipped
in from Europe.

: I'd bet you're probably one of the 98-series guys, aren't you? I had a
: ditty-bopper that was originally a Level 2 98Charlie. He was one of the
: flakiest guys I've ever known. Dude could do some serious shi* when it
came to
: commo, though. He, too, had a high opinion of himself. But you don't
sound as
: if you've been through DLI, so let me guess. . .you're with the NRO and
are
: attached to a military unit. . right? Please.
:

The gunts do their thing, the rest of us do ours....

: . . .snip. . .
:
:
: >
: > I find offense that you are that paranoid. Or that you would
: > think the world is coming to end. I prepare for disasters but
: > I am not expecting life as we know it to end. It has taken us
: > too long to get here. And I will fight you or anyone else who
: > is willing to destroy our nation, our constitution or our freedoms.
:
: What in the hell are you talking about?
:
: You are offended because you think that I feel the world is coming to an
end?
:
: To begin with, I never said anything about the End of the world as we know
it.
: YOU did.
:

It is your general tone. You are outside the system.
You seem to have forgotten what our oath stands
for.

: And then you go on to say that you will fight me because I am willing to
". .

: .destroy our nation. . ."
:
: NOW who's being paranoid?
:
: I defy you to find one statement where I even mentioned a desire to
overthrow,
: assault or otherwise topple the federal government (I did make a comment
about
: overthrowing Illinois. . .but I consider that to be a third-world country.
.
: .Chicago most especially. . but then you are somewhat familiar with
Illinois
: being from a place not too far from the border, aren't you?).
:

I will agree that Ilinois is a real shit hole. Most conservatives
in that state agree as well. BTW, if you would check out my
callsign, you would have my address. I do not hide.

: > Your fear is more dangerous than what you fear. I just would
: > not go to the extremes that you have. However, within that
: > context, you are well prepared.
:
: What extremes? A guy asks a question about a radio and now I'm an
extremist
: because I recommended he get a HAM radio? Dude, you've been playing
around
:the electricity too much.

The general tone of the question in the first place. The survival
thought process, thinking of oneself not of helping others.

: If you think putting away some food, water and other supplies is extreme,
then
: perhaps you should stick to decaffeinated and stay away from newsgroups
such as
: misc.survivalism from whence this thread originated.
:

Perhaps survivalism should think more about emergency
preparedness rather just themselves surviving. If shit happens,
we are going to need trained and disciplined workers to
straighten out the mess. Not paranoia. That includes even
the average tornado.

: > I have too many within the military that are just as scared as you. My
answer
: > is that it seems that you do not trust God to save us or you think that
God
: > will turn his back on us (Rom. 8 would suggest otherwise).
:
: No, I don't EXPECT God to save us/me. I think God expects me to do as

much as
: I can to save myself. If I am willing of spirit and body, then He will
assist
: me. I'm not a Lazy Christian who believes that just because I go to
church on
: Sunday I'll be admitted to the Pearly Gates.

I see the paranoid right as not trusting God. In fact they expect
God to punish us all. They are looking for a hell on earth to justify
their self rightousness.

: Look dude, I don't know what stuck in your craw, but the fact is that
we're
: going to just have to agree to disagree. This is turning into little more
than
: TROLLING bait with your rhetoric. If you want to discuss the pro's and
con's of
: one system over another, then fine, let's go. Otherwise, as far as I'm

Having seen a number of ULS articles, but having not
really read them because my license does not expire
for another 4 years, I believe MOST hams have no
ideea they should be doing some tyoe of ULS registration
now..even if their license doesn't expire until 9 years from
now.

3705. No Code License

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-23 00:00:00 UTC
From: ARRL member <anonymous@cotse.com>
Message-ID: <199911230743.CAA27235@cotse.com>
Source record: 126757

I think it is best for all of us to welcome (perhaps lure) new member (or potential new member) and make it easier for those wanna be amateur radio to join us; no code is one of them.

Why you ask?
Well, we all know the gov. had taken and shrunk our amateur band and sell those frequencies to the commerce. This practices WILL continue; therefore, we NEED more amateur radio enthusiast to defend our rights; that is keeping the remaining frequency bandwidth.

The way I see it, is like the Canadian has lost their battle against gun control imposed by their gov. If we do not have enough people to defending our amateur band, the gov. will take it from us! The same thing happened to those Canadian losing their rights to own a gun or use the gun, we will losing our rights to use these amateur bands. The gov. WILL revoked all existing so called amateur callsign all together.

So, rather than losing it, I really think we need to get together to make ourself strong (but not to be selfish) and more amateur members will certainly help us with this dilemma.

Yes, the FCC (the gov.) had a plan to shrink the amateur band even more since the booming economy has increase the demand for the commercial band.
You said the trunking solved that problem. The answer is NO. The trunking did helped a little, however, the demand is a lot GREATER than the trunking network can handle.

You said the no code people gonna ruin or flooded the amateur band. The answer is NO!
Since no one can talk at the same time on the same frequency, time sharing is still needed to talk on the air. We, as the "expert", "know all", "the guru", of the amateur radio, we will teach them how to use the radio to those new members; we can supervised those new users as they will required to do all the amateur radio etiques.

Besides, as an amateur radio we always want to have new friends; we even buy the pricey IC706 to get those unknown friends from different countries. Why not just get a HT and

know all your neighbors in your neighborhood or in your town? I think we can reduce the crime rate drastically if we know our neighbors; that mean less local taxes for law enforcement. Your neighbor can help you if you have an emergency, such as a heart attack. As well as we will become a better person and have a stronger nation.

GOD bless.

Why are we going to send the league money? Selling off two megs of the 220 band?
Caving in to the no-coders? Incentive liscensing? Non enforcement of HF violations for five years? Selling out to the manufacturers and putting Technicians all over the HF band? To fund their catered lobster lunches? To fund
their slanderous publishing empire? To fund contests where entrants are discriminated against? The best thing to do to these pompous jerks is to cut
them off at the source. If you want to fund someone, help the Enforcement branch
of the FCC. They are doing their best to solve the stinking mess the league
threw in their lap last year. Give to the FCC, and write it off. Allow the ARRL
to finish withering and DIE.

For goodness sakes, Doc, you have intellect and a brain you could choose to use, as you wound up doing in the last public and private exchange with me.

Why put out such drivel when you are capable of so very much better? It's your election, of course. As for me, I put out the best that's within me, considering what I post carefully; writing, rewriting, proofing and rewriting some more.

You see, writing is a more finished form of expression than talking . With it, we have time to consider what and how we express in as much as we are taking up the time of the readers who voluntarily settled on our posts. To them we owe the best that we are capable of producing.

In my opinion, honorable Doc, merely stream-of-conscious emoting degrades the medium to a dumping ground.

I know how well-meaning you are, also how overwhelming your job must be. I think you'll agree that there is ordinarily no reason to suspend legitimate concepts of due process.

Courts of all types routinely deal with mailing errors and let parties off on the ground of excusable error when the error was inadvertent or not within the party's control.

Isn't the same true of computer errors? Can you find it within your heart and conscience to excuse a legitimate computer error as harmless, rather than arbitrarily labelling it prejudicial and final?

Forgive me for raising the issue, but I have assumed that you are an agent of character, and the FCC conducts itself according to the loftiest concepts of jurisprudence.

FUD. 2m is really bad with all those heterodynes, reverb mics,
amplified D-104s, 10 million users/channel, cusing etc etc.

And 6m is just a hot bed of people going up on chan 2 (TV) and causing all
sorts of interference to our kiddy programing.

>Big lame rant snipped<

So your participation in ham radio is dead, and you killed
it. So don't blame it on everyone else. Some of us are
working to keep it from being furthere trashed by the
hopelessly uninformed and thse who are inclined to ignore
all rules and conventions and who couldn't care less about
the future of the ARS.
If you don't want to continue your affiliation with ham
radio, certainly thats your privilege. Just don't waste your
time and ours in giving inaccurate explanations.

3723. Genave Mobiline III VHF FM Tranceiver Info Wanted

Newsgroup: rec.radio.amateur.misc

I have a pair of Genave Mobiline III VHF FM Tranceivers that I am modifying to operate in the low end of the 50Mhz-6meter amateur band. Does anyone have any kind of information on these radios, ie schematics, service manuals or know of any sources for these. I would also appreciate hearing from any poor soul who has attempted something like this with these rigs.
Thanks!
John Kile

Message-ID: <19991124084654.10059.00001408@ng-ci1.aol.com>
Source record: 126531

Hello
I am considering the purchase of an hf mobile. My first hf mobile rig. I have been
considering the ft100 with the ats100 antenna that works with this or is the recommended antenna for this rig. The radio will be installed in a Ford Expedition suv vehicle. My wife is stating she does not want the vehicle to look like a three ring circus as she calls it hi hi. Can someone offer some advice
as to antennas and rigs etc. I dont want to keep changing antennas when changing bands
Any help would be greatly appreciated
Many thanks

For Christ's sake,why in the world do I get this kind of trash dumped on me. Who gives a flying fig about such voodoo? Old man, if you want to believe this sort of stuff and you find happiness and solace in mysticism and mythology, then be my guest but as do millions upon millions of world religionists who don't accept Jesus as anyone more than a man whom the Romans feared as one creating a revolution against their filthy tyrannical rule, leave me the hell alone. You forget that Christianity is just ONE of the world's religions, not the ONLY one. As soon as you zealots realize it and stop trying to shove your philosophy down disbelievers' throats, you'll gain respect. And have a Merry Christmas too.

<< You are full of shit and you would have been smarter to mind your own fucking business >>

>>This came from an educated man like K2IVX? Listen up Lenny the Shiv, you can't hold a candle to Dan,W4NTI. He's got more class in the ass than you have in your own shallow cerebrum. No one tells Dan what to do and what to say and that day'll never happen. How dare you put words into my mouth? Dan and I have been and remain buddies because we stand for RIGHT; you on the other hand are mired in manure. What kind of man pleads for tapes to get AF2Y in trouble when it's obvious that he is one of the finest hams to ever hold a ticket, next to Dan and Jimmy Dale and Rich Whiten and anyone of the Goodfellas? We represent the real CLASS in amateur radio and would never under any cirumstances befriend, as you did, a common anti-Semitic thief from the Virgin Islands and to delude Tom,KE9RY, into believing that his friends are enemies. Nay. YOU ARE HIS ENEMY and so is each of your buddies. That guy in Eagle doesn't know which way to turn because YOU, not we feed him with misleading and vicious propaganda that's confusing him, anyways.It's youse guys who am befuddling Mr,. Steckbauer who used to be one of the finest guys I knew and who's become, like you, a blithering slobbering insult to ham radio. Lenny, I take it as a presonal insult the way your jump on my friend Dan and I'm telling you to lay off. Go pick on someone of your own mentality, like Dagwood Bumstead. W4NTI's a sensitive and wonderful man who gave his all for this nation while I ask,WHAT HAVE YOU GIVEN? Lenny you need salvation and you'll never achieve it hanging out with the crowd to which you now pledge allegiance. Come to us, the movers and shakers of ham radio. We will free you from the shackles of devious exploitation and show you the right road. And watch your language. We Jewish guys are supposed to be on a high plain and you besmirch our reputation. The next thing I know is that you'll be relocating to Memphis.

It goes like this. It's written in the New Testament that the Jews in the days of Jesus were hypocrites meaning the Pharisees and Saducees. Well it's carried over into modern Christendom as well and of course it's hurtful to any Jew to be so stigmatized. It seems that a Christian argument is that if a Jew has never converted, then he's a hypocrite. All's well and good but to offset the barrage of evangelists who are determined to make the Jews concede and to accept Jesus as their personal Savior, the one thing that's always worked for Jewish independence and it is FIERCE is the feeling of unity, oneness, solidarity among us. That might be difficult for a Christian to understand but it's this binding force which has and continues to work. That's not to say that evangelists should stop trying to convert us because if so they'd become unemployed and would have to work for Goldberg and Bromberg haberdashers in Montgomery Alabama. All kidding aside, the unity I feel for my fellow Jews everywhere in this world is significant and I am happy to say I feel absolutley no comraderie or oneness or unity for Len Schaier,K2IVX. Don't get me wrong; I'm not saying I'm more into Judaism than he because I'm NOT, in facty; one might classify me as unobservant but this I'll say. NEVER WOULD I BACKSTAB A FELLOW JEW AS HE DID ME. NEVER WOULD I UNDER ANY CIRCUMSTANCES CALL HIS SHUL TO COMPLAIN TO THE LUBAVITCHERS OF HIS LOVE FOR THE ANTI-SEMITES WITH WHICH HE ASSOCIATES. I wish Lenny well in life and may he and his family have long and fruitful lives but he'll always remain loathesome to me for the garbage he hands out on amateur radio in the name of Herbie Schoenbohm and his ilk. Amen!

My VHF/UHF dx books shows K2RIW amplifier, believe the main difference
to other designs for DK1OF type is the coupling capacitor at anode
side, perhaps some difficulties in obtaining this capacitor? Please
advice me if I am wrong.

I am considering the TS-570sg as my next hf radio. Curious if anyone in the group has one or could steer me to a critique on this radio. The DSP " cd quality " claim by Kenwood has me interested.

Yes, its codified. Part 95 prohibits code. Part 97 permits code. Do you
have any other points to make?

You know you are from Hiram, Georgia when:
You have a Hefty bag for a passenger-side window.
Your sewage system is a pipe running out the back of your
house.
The auto junkyard calls you to get spare parts.
Your CB's are worth more than your house is.

With trash like WB2OTK off the air and little sucklings like AF2Y.KE4TEW,KC8JBO, and W4NTI about to meet the same fate it will be a good Holiday indeed. For the rule following hams anyway. Got to hand it to the moron KA9BSD though, he urged the FCC to clean up ham radio. And they nailed all his friends jamming. BWAHAHAHAHAHAHA!!!!!!!

Available bandwidth is not very high. I'm not talking about the electronic media here, but rather the channel from my optic nerve into my consciousness. I suspect I've got as much, if not more bandwidth as anyone else here (comes with the job) but it still gets saturated.

The purely technical term has been hijacked as a useful concept in an information-glutted society. Deal with it.

A SAFER WAY TO QUICK CHANGE YOUR H.T.ANTENNA

Prevents damage to your radio's SMA antenna connection due to always having to change antennas to suit your needs. Adapter will take all the wear and tear,Instead of the chassis connector. Factory repairs are expensive! Use of my adapter allows you to safely and quickly change your BNC antennas or connectors at a low cost.

Adapter has gold contacts with a black neoprene rubber covering. Will fit all BNC connectors. Low profile(adds only 1/2"-to-5/8")(depending on radio model)to overall antenna length. Rubber base seals against moisture and dirt,plus provides a firm support for all your antenna applications. No need to remove once Installed to quick change antennas.

To view a photo of adapter(Installed on my VX-5)please go to:

Announcing the VK3RMH 10 meter beacon.
Comments and reports Welcome!

Frequency:
28.2565 MHz
Status:
Fully operational
Tx Power:
20 Watts ID and carrier + 2 Watt carrier step
Antenna:
1/2 wave vertical on North side of tower (directing North)
Location:
approx 25km N.E. of Melbourne, Victoria, Australia
Grid Square:
QF22JH
Operating times:
24 hours
CW ID:
Cycles through two messages, each followed by
a 20 Watt carrier and 2 Watt carrier for 5 seconds each.
Messages read:
"VK3RMH MELB QF22JH 25/2W VERT"

Message-id: <383B1CFC.7C415877@avotec.com>

AF2Y has been running off at the pen with his story about me calling "his Rabbi". Maybe I should detail what really happened.

Some time ago I concluded that AF2Y created, or brought out of the closet, at least 5 anti-semites for every one he thought he either cured or protected me from.

I could not communicate my thoughts to him. I thought maybe a rabbi might help and proceeded to call every temple in and around Clifton, NJ. I tried to find out which congregation he belonged to, or at least, a rabbi that might be able to mediate.

Well I finally found one that knew Mr. Schwartzbard "a few years ago". I asked if he would help and he asked me to explain what was going on.

I expalined that, although I agreed with AF2Y's idea of standing up for the Jewish people, I felt he was doing more damage than good. I explained that his mission had taken on a life of its own; if there wasn't anybody being anti-semitic he would keep insulting people until they would hit back by attacking Jews and AF2Y's reason for living would be confirmed.

The rabbi's responce, THATS CHARLIE!!!

enough said.

Len >>

That same Rabbi married my daughter and after the Ketubah signing he asked whatever happened to the nut who called him to complain about me. Enough said.

Doc, AF2Y. Radiosigs@aol.com
A man who refuses to stand up for something,
will sit down for anything.

Oh bullshit Lenny.....you have been suckered into the most bigoted anti-
semite group I have ever heard of. The BARF and the Stumpjumpers. You
are a fool, and that is being kind. If you believe a damn thing these
idiots tell you. I have avoided this group since the first of
September, and now I see you in here echoing the "party line" Lenny,
you are ignorant of the facts. You have NO CONCEPT of who and what you
are dealing with. Wake up before its too late.

No, Doc is not perfect, Dan is not perfect.....but this crap of you standing with known anti-semites is beyond my ability to understand. I have known Doc for years, he has not made me a anti-semite. You are sick Lenny, seek help.

Dan/W4NTI

3777. AF2Y slaps elderly lady in "Early Bird Line"!!??

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-24 00:00:00 UTC
From: getback <getback@my-deja.com>
Message-ID: <81fnp4$1r6$1@nnrp1.deja.com>
Source record: 126682

It was rumoured from a reliable source that AF2Y in a fit of rage, slapped a elderly lady who he stepped in front of in a line outside a local "All you can Eat for two dollars" buffet. The lady was reported to have contusions and welts and swelled lips from the blows that the Mad Dr hate rained on her snow white head. He said over and over"Take that you Christian B---!! Herbie is behind this" The elderly lady is recovering in a local hospital.

It seems that there was a special that required coupons and he did not have same. From reports, he proceeded to grab her coupons then strike her repeatedly on the face and arms. With out the before mentioned coupons, he would have been out an extra buck for the lunch that he was to purchase for himself and his long suffering spouse Iris. She was heard to say, "My father Moon Ling Sun told me he was a cheap bastard, now I know, this is very shocking, I should have married nice Chinese boy". Stay tuned , we will have to check this out for the facts as they come in.

But you see, Getback, that is my point. Any summary imputation of
authorship is pre-judgement on its face. Your post supports my precise
point.

Our tradition in such matters is to take evidence on the alleged error
and furthermore to accept the prima facia of a party unless and until we
prove otherwise. Thus, our society turns on an assumption of regularity;
otherwise we'd be a paranoid society or one of unequal justice.

Getback, sure, I am aware of the point you are making. And indeed, if your factual situation be the case, you are right. But the only way to make a just determination of the facts is by either sworn statement or evidentiary hearing. To merely assume your factual situation is to bypass due process, the point made by these posts.

Getback, not a licensed lawyer, I am not anyone's advocate. My interest is in exchanging views. No reason to thwart substantial discussion on this NG. After all, whatever is proffered here is fair game for anyone to use for legitimate purposes.

If you're looking to build a linear - may I suggest the W1SL in the VHF/UHF DX Book. A good design, reproducible and very stable.

Message-ID: <MPG.12a58e88fcd0b39e989680@news.imcnet.net>
Source record: 126706

Please, could anyone provide the information to properly attach a Bencher BY-1 Iambic keyer to a Yaesu FT 707?

Also, I really need an Owner's Manual and a Service Manual for the same radio. If anyone could help me any source, copies, scans sent be email, anything will deeply appreciated.

I am determined to get past this code test!

Thx

That's right! Very shallow indeed and non-constructive. He should
have said: " kiss the League's dxing/anti-net & contester ass ?" to be
thoroughly deap on the subject, and "get rid of them" to be
constructive.

3805. Re: AF2Y, Rabbi's and the Facts

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-24 00:00:00 UTC
From: Len Schaier <lschaier@avotec.com>
Message-ID: <383BDD16.ED692617@avotec.com>
Source record: 126710

Well, Dan, I guess now that OTK is limited to one liners on this newsgroup, you've become DOC's mouth piece. You say "I'VE BEEN SUCKERED".

Don't bother Dan with facts. Just find out where Chuckies position is and take that side. If Chuckie hates someone than Dan must. Because, like chuckie, if you don't have someone to hate you would have nothing to do.

Tell us what you think of DOC's antics. Did you enjoy his attacks on Douglas via his son? Is it ok to attack Tom. I guess you condone his stuff about wine and crackers, plastic symbols and general attacks on christianity just to "get something going". When Chuckie is bored, its ok for him to "get something going" anyway he can.

How about his constant and public harassment of me; his "holding the door opened" stuff, making fun of my name. Oh but wait, that's ok with you because K2IVX is on the other side and Dan/Chuckie hate the other side.

And his diatribes on Christianity are ok because its directed at the bad Christians, those people that Chuckie hates. He doesn't mean it for the "good Christians", those that pass his test that is. If someone talked about the "good Jews" Chuckie would hemorrhage.

All you can say is that Chucky is not "perfect". G-d you are insightful.

BTW, the guys I'm close to "on the other side" have more class in their pinkie fingers than you and chuckie have in your whole bodies.

Lastly, don't you ever tell me how to deal with anti-Semites or anti-Semitism; you don't have a clue. Stick to wire antennas and war stories, maybe these are things you know something about.

You are full of shit and you would have been smarter to mind your own fucking business.

Have a nice day you patsy.

Len
ps let me know if you need Chucks phone number to coordinate a responce to this posting.

:>You ask that because you don't understand the benefits of contests.

But as a lot of well educated people know, there is a very bad
side to "Contests" or "Competition" when not managed properly.
It can, and often does, bring out the worst in the "Human" animal.
We see this quite well in both contesting and DXing. Egos run
amuk will always out shine the so called "people who behave".

Seems like several of the sponsoring parties have just cut it loose
and let it run. Time to get rid of it, or fix right.

So, who all gave you tapes to jam 14.313 with? AF2Y? W4NTI? Your Drunk
buddy down in Georgia? We are all after the truth. Including Riley>

3817. KC8JBO, Known QRM'er, continues to rant in newsgroups after promising Riley he would not continue harassment. Poor KC8JBO, will join WB2OTK soon.

Boy, the known and convicted QRM'ers are really squirming now. Good luck on your retest Wiseman. Since you cannot follow Riley's instructions, I am sure you will get one. At your pace, you might even get a revocation hearing with your jammer pal, AF2Y.

Hard to believe W4NTI would defend AF2Y and KC8JBO here in public. Both the FCC and the ham radio community know what they have been doing the last year on HF. I am sure Riley could schedule multiple revocation hearings.

Prove that I _haven't followed Riley's instructions_, you ill-educated moron. Even if I was to retest my score would be comperable to the initial ones, either missing nothing or 3-4 at the most. Can you say the same? I doubt that you could pass the RFI exposure section of the test

> At your pace, you might even get a revocation
> hearing with your jammer pal, AF2Y.

Really? I bet Riley really enjoys have a "spokesperson" of low intellectual abilities such as yourself to speak for him.

Respectfully considered, I would safely
assert with some hesitation that as promulgated
in a Stanford feathered study that ethyl alcohol,
poop, and continual heavy traffic noise, when
combined at random levels, was shown to
produce mental instability in some subjects
who were predisposed to irrational
deportment.

yes-I have 80 mtr and 40 mtr versions.
have 5 acres but wanted to see what birdhouses were all about.
have had 80 mtr for abt 4 years, and 40 mtr for 2 years.
work mostly dx cw. matches up fairly well with the two cushcraft
verticals I have regards signal reception, but output to dx stations
not as solid. both are mounted about ten ft off the ground

It was roumoured by a reliable source, that AF2Y was bragging about his actions in the line at the "Green Fly" buffet, It was passed on to us that he was overheard shouting to the people who witnessed his mugging of the old lady for "Early bird " coupons. from what we were told he said, " The old gray headed Christian bitch,I am proud of the number I did on the old hag, she had coupons, and I need coupons, maybe a little beating will teach the old grandmother not to line up with the coupons showing, I was just getting my payday, if she had bleeding problems she can only blame it on herself for crossing the path of AF2Y, I never had a better meal in my life. I am going to tell WB2OTK about the easy pickings here" From what we can hear, this is not the first time AF2Y has punished old ladies for his warped amusement. I think he steers clear of males old or young.

The Rabbi at the synagogue that AF2Y attends commented "Thats our Charlie" This was after he was told about the beating that acording to roumours, was delt out by AF2Y to an old white haired grand mother who had the nerve to be in the buffet line ahead of AF2Y. AF2Y was said to comment, "She got what she deserved, I needed coupons" The Rabbi did not seem to be surprised, it was "Thats our Charlie" Time

There is a report that is coming out of Clifton, that states that AF2yY is under investigation for cruelty to animals for kicking the neighbors pooch. This report came after the stated individual was seen leaving his mailbox and shortly therteafter kicked the neighbors dog after yelling "RILEY', and " QUEENIE GOT ME". If anyone has any information on this event will you please contact this forum.

NEWSLINE 1162

Newsline report number 1162 with a release date of Friday, November 19th, 1999 to follow in

5-4-3-2-1.

The following is a Q-S-T. Hams respond to the wrath of Mother Nature and the A-R-R-L says the announcement of restructuring the
Amateur Radio service is imminent. These stories and more on Newsline report number 1162 coming your way right now:

(Billboard Cart Here)

**

HAMS RESPOND TO QUAKE IN TURKEY

For the second time this year, Turkish ham radio operators have been called into action after a strong earthquake rocked the western
portion of that nation on Friday, November 12th. The 7 point 2 magnitude quake was centered near the town of Duzce in an isolated
area some 115 miles east of Istanbul. The tembler collapsed buildings, set off explosions and killed hundreds of people and injuring
thousands more..

Even though the location of the quake's epicenter was directly between Turkey's two major cities of Istanbul and Ankara, news
reports say that most normal lines of communications into were cut off. Because of this, all initial communications was by Amateur
Radio.

Through hams in the Duzce area relief workers learned that many people were injured and in need of immediate care. They were also
told that some casualties were being treated in the garden of the local hospital which had been damaged by the quake. International
rescue teams rushed to Turkey from Greece, the United States, France, Germany, Italy and Algeria have been sent in to assist.

Ironically, the quake struck as Turkey prepared to host world leaders for a summit of the Organization for Security and Cooperation in
Europe. A quake last August 17th quake left more than 17,000 people dead in the same region. (Newsline from published news
reports)

**

TYPHOON HAM ASSISTANCE

And hams are still active in the wake of the devastation caused by the cyclone that hit the east Indian state of Orissa. The latest
reports say that radio amateurs are still busy assisting in relief operations. They are using 14 point 140 to 14 point 180mhz.
Communications is also taking place on 7 point 030 MHz as well.

The death toll from the cyclone jumped to over 9300 after 1,736 more bodies were discovered in Ersama, about 185 miles south of
Calcutta on Thursday November 11th. With thousands of people washed out to sea, the number of victims is still expected to rise
and the work of the hams providing relief communications could continue for several more weeks. (Q-News, published news reports)

**

IS AMATEUR RADIO RESTRUCTURING IMMINENT

Closer to home, the American Radio Relay League says that the release of a report and order by the F-C-C on restructuring the
United States Amateur Radio Service is imminent. Rick Lindquist, N-1-R-L, of the A-R-R-L Audio News has more:

Knowledgeable sources in Washington say the amateur license restructuring issue has moved to the front burner at
the FCC, and a Report and Order could be released before the end of 1999.

The Amateur Radio community has been awaiting license restructuring--known officially as the 1998 Biennial
Regulatory Review of Part 97 (WT Docket 98-143)--for nearly one year now. While no one has mentioned a hard
and-fast date to wrap up the long-awaited proceeding, reports from several sources suggest that the report and
order draft is in its final stages and could be complete within a month or so.

Last May, the ARRL had urged the Commission to "not leave the Amateur Service in limbo" on the matter of
restructuring but to act promptly. More recently, during a visit to top FCC officials in Washington, League officials
pressed again for early action on the license restructuring rulemaking. They were assured that the issue was not
stalled and that the Wireless Telecommunications Bureau was "working very actively" to move restructuring along.

One factor that's been cited for the FCC's perceived slowness on WT-98-143 was the Commission's move to new
offices in The Portals last spring. The FCC also has been under intense Congressional pressure in recent months to
act on several major telecommunications issues.

Whatever its final form--and no one has hinted at that--license restructuring poses significant implications for
Amateur Radio and its future direction and growth. On August 10, 1998, the FCC proposed to phase out the Novice

and Technician Plus licenses, leaving just four amateur license classes in place--Technician, General, Advanced, and Extra. The Commission also asked the amateur community to express its opinions on Morse code requirements for licensing and testing, but offered no specific recommendations.

At its July 1998 meeting, the ARRL Board of Directors--attempting to get the jump on restructuring--issued its own plan to restyle Amateur Radio. Among other details, the ARRL plan also calls for four license classes and for "refarming" Novice/Tech Plus subbands to provide additional spectrum for higher-class operators. Under the League plan, the Technician license remains unchanged, and the General would become the entry-level ticket to HF operation. The ARRL proposed Morse code requirements of 5 WPM for General and 12 WPM for Advanced and Extra class.

The restructuring debate generated more than 2200 comments to the FCC, many of them from individual amateurs. FCC officials have cited the huge volume of comments--which continued to arrive long after the comment deadline--as another factor in the length of time it's taken to deal with the restructuring issue.

The League says that the decision to approve and release the Report and Order could come at an FCC monthly meeting, but some predict it will be handled as a Memorandum Opinion and Order. (ARRL)

**

PARTIAL CALLSIGNS: WHAT THE FCC RULES SAY

I'm Robert Sudock, WB6FDF, with a follow up to last weeks story regarding the use of partial call signs to identify your station.

As reported, in a letter to net control operator Alan Strauss, WA4JTK, and later on the RAIN Report the FCC's Special Counsel for Amateur Radio Enforcement, Riley Hollingswoth, K4ZDH, stated that if only the last two letters of a call sign are given, that station identification doesn't meet the requirements of the Amateur Service Part 97 Rules. Hollingsworth also pointed out that if a calling station using an abbreviated call sign suffix is never acknowledged and given a chance to give a complete call sign, a legal station identification would be lacking for that communication.

This report brought a flurry of cheers from many D-X'ers who have been fighting the partial call sign problem for years. But it has also been very controversial with some other D-X operators, some contest operators and the control stations for numerous foreign D-X spotting nets. Some of the control operators for these nets are very vocal in opposing full

call signs. They say that a full call sign
wastes time. And there are even reports that some overseas net operators are turning away U-S stations that try to sign in using
their full calls.

But the bottom line is that hams in the United States is that they are not regulated by the D-X operators government. Rather United
States hams fall under the guidance of the FCC. It is the FCC that has determined how and how often a United States license holder
must identify. Its covered under Part 97.119(a) of the United States Amateur Service Rules. Its also something that all U-S hams
are supposed to know and it reads as follows:

"Each amateur station, except a space station or telecommand station, must transmit its assigned call sign on its transmitting
channel at the end of each communication, and at least every ten minutes during a communication, for the purpose of clearly making
the source of the transmissions from the station known to those receiving the transmissions. No station may transmit unidentified
communications or signals, or transmit as the station call sign, any call sign not authorized to the station."

The operative words appear to be the reference to identifying at the end of a transmission. Also identifying every ten minutes if a
single transmission exceeds that length of time.

By way of example. Suppose you call another station, or, sign into a net using only the last two letters of your call. You are
acknowledged but never given a chance to make another transmission. As a result, you have violated section 97.119(a).

To make your transmission legal, you must find a way to properly identify at some point in the communication with complete call.
And -- in the heat of the battle for a rare D-X contact or in dealing with some non U-S nets that might not be so easy.

For Newsline, I'm Roobert Sudock, WB6FDF, reporting. Roy. (Newsline, FCC Part 97 Rules)

**

THREE STATES HONOR HAMS

The Tennessee Emergency Management Agency Director John has honored a group of amateur radio operators for their assistance
during last January's tornado strike in Clarksville. White presented a framed certificate, signed by Gov. Don Sundquist, to the
Clarksville Amateur Transmitting Society Emergency Services Group during a meeting in the

State Emergency Operations Center.
According to the state, Amateur Radio was the only reliable means of communication for at least the first 12 hours after the tornado
hit. (Repeater Owners Remailer)

And Virginia RACES has received a Certificate of Appreciation from the Mayor and City Manager of the City of Franklin, Virginia.
This, for the support amateurs provided during the Hurricane Floyd flooding. The presentation came November 6 during a Virginia
ARES and RACES meeting in Hampton, Virginia. The certificate cites all seven for their invaluable service during the flooding. At one
point, ham radio was the sole means of communication in and out of the city. (ARRL)

Also, Seven northern New Jersey Amateur Radio operators attached to the Ramsey Office of Emergency Management have received
Emergency Communications Commendations from ARRL Northern New Jersey Section Manager. Section Manager Jeff Friedman,
K3JF, honored the hams for their efforts during and following Hurricane Floyd. According to the Hudson Loop electronic newsletter,
the seven not only operated under severe weather conditions during the storm. They also provided emergency communication for
Bergen County during a three-day telephone service outage as well. (Hudson Loop)

**

HOSPITAL HAMS

Repeater coordination is only one small area of ham radio. More important to most radio amateurs is assisting others in need. We
regularly hear about hams providing emergency communications for government agencies and the Red Cross, but what about
hospitals? According to Newsline's Joe Moell KZ0OV, hospitals could use help from hams more often than you might think:

Just a few weeks ago, I told you how members of the Hospital Disaster Support Communications System of Orange County,
California were able to provide vital backup communications following the Hector Mine earthquake, because they didn't wait for
activation by any government or private agency. What I didn't say then was that this marked the 68th time that HDSCS provided
emergency communications for the 34 hospitals of the county over the past 19 years. The last activation had been only a month
earlier, when a gas main ruptured near a 500-bed hospital in the City of Orange, requiring evacuation of a medical building and
activation of the hospital's disaster plan.

This same ARES group of almost 90 members activated for earthquakes in Whittier and Northridge, for the Laguna firestorm, and for
floods in Anaheim and Laguna. But there haven't been 67 major disasters that time, of course. Over three quarters of these
activations have followed failures of phone systems within a single facility. For example, activation number 69 came just two weeks

after the Hector Mine quake. As maintenance technicians were working on the phone system at a 192-bed hospital in Orange on
October 30, all the phones failed, and HDSCS responded immediately.

Once again, April Moell WA6OPS was Net Control and Rosie Falcon N3IVO was at the hospital Command Post.

"OK, just an update. Paul has checked in from ONC, that's the tactical call we're using for OICU and ONC (Oncology). So he's on
location, he's working. Two more additional check-ins, UFS has come in, he's going to the Emergency Department and he's going to
check in when he gets to that location. Ralph has come in and he's going to NICU (Neo-natal Intensive Care Unit), so we'll hear from
him when he gets situated. N3IVO."

"OK very good, and I'm assuming TSM is awaiting BWH's arrival and then you'll make assignments for those two."

"Affirm."

When phones go out in a large hospital, they call it an "internal disaster," because the normal flow of communications between
critical units such as ICU, ER, Pharmacy, and Surgery is disrupted. Five to ten HDSCS members go into all those critical spots to
pass this vital traffic. Fortunately, this most recent outage lasted only a short time, but HDSCS has handled other internal and
external phone failures that have gone on for almost 24 hours. These failures are rarely reported in the press.

From southern California, this is Joe Moell K0OV, for Amateur Radio Newsline

---

If you live in a major metropolitan area, the chances are that hospital phone outages are occurring near you every year, with no media
coverage at all. Amateur Radio could be providing vital help, but it can't happen unless hams in your town are prepared with training,
plus a rapid and robust alerting system.

For more information on how this pioneering group does it, go to HDSCS.org on the World Wide Web. That's HDSCS.org, which is
short for Hospital Disaster Support Communications System. (K0OV)

**

COAST GUARD TO HAM RADIO: HELP US WITH Y2K

The US Coast Guard is asking the Amateur Radio community to help during what it calls the so-called Y-2-K Event. The Coast
Guard defines this as being from 1700 UTC December 31, 1999, until 2400 UTC on January 2, 2000.

The Coast Guard is asking hams to be ready just in case a Y-2-K related outage disrupts normal reporting methods. The Coast
Guard requests that hams accept any reports destined for its National Response Center and forward them to respective state
Emergency Operations Centers via RACES, A-R-E-S or other available method at hand.

For those not aware, the National Response Center is the sole national point of contact for reports of oil, chemical, and other spills or
releases into the environment in the U-S and its territories. State Emergency Operations Centers will relay reports received to the
Coast Guard via telephone, the Internet or FEMA's high frequency radio network.

For more information on the National Response Center, visit its website at www.nrc.uscg.mil. (ARRL)

**

CEPT LIST UPDATE

The FCC has added the Netherlands Antilles to the list of countries that have adopted CEPT universal Amateur Radio License. As a
result, United States hams with Technician class and higher licenses may operate for short periods in these countries without
special authorization, subject to the regulations in force in the country visited.

Participating CEPT countries as of October 25, 1999, are Austria, Belgium, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus,
Czech Republic, Denmark, Estonia, Finland, France (participating for France, Corsica, Guadeloupe, Guiana, Martinique, St.
Bartholomew, St Pierre et Miquelon, St Martin, and Reunion/Dependencies), Germany, Hungary, Iceland, Ireland, Italy, Latvia,
Liechtenstein, Lithuania, Luxembourg, Monaco, Netherlands, Netherlands Antilles, Norway, Portugal, Romania, Slovak Republic,
Slovenia, Spain, Sweden, Switzerland, Turkey, and the United Kingdom. (ARRL)

PERFECT PAUL TO GET NEW VOICE

After a year and a half of listening to complaints from the public and from the broadcast community about its synthesized voice
weather warnings, the National Weather Service is doing something to make them more intelligible. The trade journal Radio World
reports that the N-W-S has begun work on two prototypes of concatenated voices for its Perfect Paul system that should be on-line
by June of 2000.

Hams who regularly listen for weather bulletins have become aquatinted with the metallic and robot-like Perfect Paul voice
synthesizer. The voice of Perfect Paul is computer generated and is a part of the personal computer based broadcast console used
by NOAA Weather Radio. It came on-line in 1998 and has been the target of both jokes and ridicule ever since.

In April of 1998, following numerous complaints, the N-W-S added a concatenated voice with limited vocabulary to Perfect Paul. At
that time the N-W-S said there was no funding to do any more. That has now changed. The N-W-S now says that it may have a new
Perfect Paul voice on the air this spring. A voice that sounds at least as good as those synthesized operators used by phone
companies, nationwide. (Radio World)

**

CONGRATULATIONS ROSALIE

A word of congratulations to a longtime friend and supporter of ham radio and ham radio in space. It comes with word that Rosalie
White, WA1STO, has been named to head AR-R-L Field and Educational Services, effective November 11th.

Rosalie's appointment, announced by the League's Executive Vice President Dave Sumner, K1ZZ, fills the gap left by the departure
of Rick Palm, K1CE. Palm has gone into semi-retirement Florida. November 10th was Rick's last day at ARRL Headquarters.
(ARRL)

**

MARCONI ARTIFACTS DISCOVERED

Has one of Marconi's early antennas been found in his hometown? According to newspaper reports out of Milan, someone may have
discovered pieces of an antenna wire hidden in the branches of a large tree in the park of the house where the young Guglielmo
Marconi lived and carried out his experiments at the end of the last century. According to the story, the searchers also found a metal
plate which may have been used by Marconi as a ground.

This story was first reported in ham radio circles by Giosalberto Lazzara, IK2AIT, and published in a recent ARRL Letter. Further
news reports say that other artifacts of Marconi's youth have also now have been found.
(ARRL)

**

STRAIGHT KEY NIGHT ON OSCAR

AMSAT is inviting the world of Amateur Radio to join it for the 28th annual and Y-2-K Edition of Straight Key Night on the OSCAR
satellites. As always, there are no rules, no scoring and no need to send in a log. Just operate CW with a straight, hand key using

any OSCAR satellite, or the moon at any time between 0000 and 2359 UTC on January 1st of 2000. Then, nominate the operator
with the best fist among those who you have worked. Nominations go by e-mail to w2rs@amsat.org or by snail-mail to W2RS at
his, Callbook adress. (AMSAT BBS)

**

5 GHZ AND THE SIDNEY OLYMPICS FOLLOW-UP

Hams in Australia may be able to keep telecasters from using a part of the 5 point 6 Gigahertz band that falls in the Amateur Satellite
Service. As reported last week, those planning t-v coverage of the 2000 Olympic games have asked for temporary loan of the
terrestrial 5 gigahertz ham band. But it is shared with an international ham satellite allocation and broadcasters may have to look
elsewhere. Q-News Graham Kemp, VK4BB, has more:

Our story last week of a request from the Olympics for a portion of the 5 GHz band was read by Paul Rinaldo, W4RI, from the ARRL,
who has passed along some more insight on this issue.

There might be some basis for gently asking the Australian administration to avoid the band 5650-5670 MHz amateur-satellite Earth
to-space allocation per RR No. S5.282, perhaps with the suggestion to consider an alternative of 5670-5830 MHz.

This would clear the amateur-satellite band but may conflict with something else locally, such as ISM at 5800 MHz +/-75 MHz.

Nevertheless, this potential interference problem is bounded in a number of ways that make it of limited impact. This assumes that
P3D will be operational by the time of the Olympic games 15 September - 1 October 2000.

I'm Graham Kemp, VK4BB, of Q-News reporting for Newsline.

Whether or not this argument will work still remains to be seem. (Q-News)

**

DX

In D-X, a report over the V-H-F Reflector that 6 meters is still live with some rarely heard stations for United States operators. Kevin
Bishop lives in Grid Square EM79 in Ohio. He says that on November 7th at about 15:30 U-T-C he began t observe European video
signals out of Europe 48.242 MHz. He began tuning around and heard the 7Q7SIX beacon on 50.002.4. At first it was in the noise
but signals grew. Kevin says that by 1555 U-T-C it was S9. At this time he started hearing HC2FG, YV4YC and HK3YH. All had S7

or better signals. But it wasn't until 116:38 U-T-C that Kevin worked Z22JE and Z23JOR. Kevin went Q-R-T at 1700 U-T-C but says
the band was still wide open with 9J2BO, worked by hams across the North-East. (VHF Reflector)

Also, users of the U-K's 136 kHz low frequency band should be able to work two new countries in the next few days. Jeremy Boot,
G4NJH, has more:

Several operators will be on the air this weekend from Northern Ireland, using a 120ft high Marconi tee. This comes only days after
GI3PDN made the first LF contacts from the province.

And, between the 20th and 22nd of November, three operators will put out the first 136kHz signals from the Isle of Man. The modes
used will be extremely slow CW and PSK31. Both expeditions are run by highly experienced LF operators, so signals are expected
to be excellent.

Jeramy Boot, G4NJH

Thanks Jeremy. (G4NJH)

**

VOA SPUR

And finally, the Voice of America says a problem at one of its transmitters apparently was responsible for causing a spurious signal
to appear in the top end of the 20-meter amateur phone band. According to Martin Potter, VE3OAT, a number of hams had reported
hearing a broadcast signal on 14.340 MHz in recent weeks It was tracked to a second harmonic of the 7.170 fundamental transmit
frequency.

Responding to one of those who complained directly, Dan Ferguson, K4VOA, thanked the listener and said the problem apparently
was related to a faulty harmonic filter at a VOA transmitter in the Philippines. Ferguson said he contacted the station prior to its
October 26 broadcast, and had them switch to an alternate transmitter until repairs can be made. (ARRL)

**

CLOSE

With thanks to the ARRL, the FCC, the Hudson Loop, the Radio Society of Great Britain and Australia's Q-News, thats all from the
Amateur Radio Newsline. Our web page is at www dot a r newsline dot org and our e-mail address is newsline at a r newsline dot org.

Before we go, we have an update on Newslines financial condition. According to Andy Jarema, N-6-T-C-Q, who is our Support Fund
Administor, Newsline has only received enough financial support to keep the service going though the middle of December. In other
words, the bills from October have been paid, but now money has to be raised to keep from loosing the phones and e-mail service in
as we pass into the new millenium.

Andy says that Newsline once again existing on a week to week basis. He says that once funds dry up, he pulls the plug and
Newsline will away. Its up to you the listeners to see that this does not happen. The address is the Newsline Support Fund, Post
Office Box 660937 in Arcadia California. The zipcode is 9-1-0-6-6. Please help keep Newsline on the air as we pass the threshold to
Y-2-K and travel well beyond.

For now, with Bill Pasternak W-A-6-I-T-F at our editor's desk, I'm _____ saying 73 and we thank you for listening.

>Thanks

Probably a better forum to ask your question would be
rec.radio.amateur.antenna.

If an isotron is a physically small antenna, then it will probably
be no better than a dummy load. Is he in a single family dwelling?
If so, how about running a small guage wire around the eaves of
the roof? That with counterpoise and a tuner will give very good
results. If he's in an apartment with a lanai, how about a loop
(again using small guage wire) running around the lanai, or a
"bent" dipole running around the lanai, or loading up the
metal balcony, or dropping a wire off the lanai at night?

Good luck!
Jeff KH6O

No the difference is in the anode tuning capacitor (maybe you mean
that?) - In the W1SL its a flapper arrangement - the VHF/UHF DX book has
the updated design with altered dimensions. Its from the house of GW4FRX
so its pretty safe. The PSU details in the book are also very useful and
very pertinent, plenty of good tips on choosing transformers, capacitors
etc.

The folks who got busted got busted under an old law for taping and distributing a two-way radio conversation, not for tuning the cell phone band. It's illegal to distribute a tape of a ham qso without the consent of all those who were taped. Tape your local police freqs and pass the tape around and find out how long it takes before ya have a Federal Marshal at yer door. Newt did bully the FCC into outlawing the distribution of radios capable of listening on the cell freqs.

Forum:

I read this report with interest. This beast AF2Y will have to be watched very closely. Bullys like him should be locked up. I will listen to his deportment on the ham bands and will take quick action. Keep the reports on this physcopath af2y coming. (On the ham bands and off the ham bands!!

Hellllloooo, hellooooo? Anybody home? There was already a law outlawing the sale/distribution of cell capable radios. Had been for a long time.

3849. Refinishing a golden eagle d104?

Radio friends:

Any one who reads the letter Posted by the disgraced dentist,AF2Y can tell who wants the qrming and ruckus to keep on on 14313, I myself heard the agreement between W4NTI and W4FQF and it was a fair one..

Finally there seems to be a chance that the back biteing and hating will stop. A chance for peaceful qsos on the frequency.

But no! AF2Y is trying to keep it going. This dangerous physopath wants the ham bands in a state of fighting all the time.

His advising Dan to keep on with the hateing is just a example of where he stands. He stands for the worst element in ham radio today.

Pay no heed Dan and George, continue on and make the 14313 frequency a pleasant place to enjoy amateur radio.

Plaintruth

I give thanks not only for living in this wonderful nation which has bestowed upon the world the greatest achievements possible but also for the invention of the tape recorder which I now use and will incriminate those lousy troublemaking buffoons on 14.313 who think they have Riley in their hip pocket. I am using a four track three speed reel to reel accommodating 7" reels. Each reel is 1,800' long which is equivalent , at 1.7/8ths rpm,to 3 hours and 20 minutes per side. Multiplying it by 4 allows for over 13 hours and each segment is preceded by date and time. I will therefore be able to prove how an upstanding fine operator like I, am victimized and jammed by the same louts who go running to Riley with all sorts of concocted reports, anyways. And so I give warning to all youse guys who are messing around, your times is up anyways. There is no excuse for the conduct I monitor and I would most certainly address the issue more conclusively to WA4KBX if I knew what the hell he was talking about. I have appealed for a translator but no one has stepped forward. And I wonder if anyone can tell me the diameter and height of "Sain Louis's" K0ECK's or W0ECK's halo? I hear it scraping against the ceiling and walls but do not know the size of the room or if has a Cathedral, 8', 10' or 12'. All I know is that he comes off perfectly in every way and will certainly sit with Jesus, even on his lap in heaven providing of course he doesn't come down to earth in Y2K and take with him 144,000 ruptured in the Rapture or is it a veloraptor prominently seen in that marvelous film "ET" by Speilberg that concerns a thing from outer space eaten up here by dinosaurs let loose from "Yourassic Park." If I have my films mixed up it's because I'm not a Stump Jumper and am therefore neither perfect nor a confidant of Mr.Hollingsworth's. And I do feel the man would understand the ugliness of anti-Semitism a but more if his last name was Holllingsberg instead of Hollingsworth and would have placed as much emphasis on shutting up anti-Semites as much as he did on anyone saying anything whatsoever about our black brothers, anyways. Youse guys, I mean can you appreciate what would have happened a few years back to KA4MUJ, KV4FZ, WB4GDP and WA2EXQ when spouting off their anti-Jewish garbage and saying that Inrercon was run by Jews to steal money from phone companies if enforcement had existed under someone named Sol Hollingsberg? Why Herbie and his clan would have not been just tossed off ham radio, they would have been shot! Oh well, beter late than never. Incidentally this morning I got a phone call from someone who died last May and I was astonished to hear that KE9RY is coming out here to file papers against me. If Tom needs directions, I'll lead him to the court at 900 Clifton Avenue,Clifton,NJ 07013. The man who'll preside is Judge Harry Fengya, a white haired immaculately looking gentleman. The oddest thing is that someone sent me a tape of KE9RY SLANDERING me on 20 meters, all day long, regarding insults I allegedly tossed his way regarding his late daughter-something which I never did and could not have been taped. Slander on the I-net can be costly and therefore I shall have no other recourse than to countersue him which will definitely make him look for more accidents waiting to happen especially if he's there. And so I wish all of you, anyways, a Happy Polish Thanksgiving

which is marked by Santa,wearing a pilgrim's hat, coming down your chimney holding a soot covered turkey in one hand, a few eggs in the other while Rudolph's pooping on your lawn.
Doc,AF2Y,radiosigs@aol.com

You can find the information you want at the following URL
http://www.icongrp.com/~sllewd/pcware.htm
This is VX-1 page but cable is useable with VX-5 also.
Your cheapest way to get a 4 conductor plug is to buy
a cloning cable from HRO and cut it in half, then you will
have 2 plugs already wired for $10.00. The only places I have
seen with the plugs, want about $8.00 each for just the plug.

3865. Where can I find plans for a Homebrew 6M SSB or 2M SSB Rig?

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-25 00:00:00 UTC
From: a1@home.com
Message-ID: <384483dd.71807561@news>
Source record: 126614

Hi...where can I find plans for such a rig?
Preferably one with a digital readout, but that does not matter.

Also, a special type of antenna is required for SSB, isn't it? If so,
how could I build such an antenna out of either wire or pipes?

Even better would be if you could come up with a PCB for such a
thing...one that could be downloaded and printed out...but it is not
mandatory. PCB would be nice, however, because all my wire-wrapping
attempts are very sloppy.

TNX,
Rick

KE1JA@home.com
actually...it's rick1 instead of ke1ja. But, many spam checkers pick
up on e-mails in the body...so therefore i did that.

Brian Kelly wrote
>It's illegal to distribute a tape of a ham qso without the
>consent of all those who were taped.

Not true. If it were, then Riley couldn't accept 75 meter garbage tapes to use in his enforcement campaign. They would be illegal evidence. He would be sending them on to your marshals instead of listening to them. And local hams would be breaking the law when they tape their latest jerk on the local repeater for later prosecution...

>Newt did bully the FCC into outlawing the
>distribution of radios capable of listening on the cell freqs.

I couldn't find any evidence of FCC bullying, or even contact. Maybe you could present yours. In any case, the cell phone listening law was already in place when the Newt taping incident occurred...

Are you saying that "bandwidth" is a high-sounding bafflegab word
that we shouldn't expect hams to understand?

I thought "bandwidth" is something that all hams would obviously
understand, far better than the population at large.

Odd you mention this stuff. I'm going to propose to both ARRL and CQ that someone put on a contest that does not allow amps of any king. Barefoot only and then everyone is on equal footing, or almost. Then the real operators will come to the forefront. I think a NON-AMP contest would go a long way toward evening the field and a lot more just plain ole hams would get involved.

Where has it been stated that Riley "accepts" tapes?? He accepts
complaints. He sits on the garbage freqs himself. The FCC
investigates the complaints and makes it's own evidence tapes the way
I read the articles on his recent busts. Which the FCC is allowed to
do.
>
Somewhere in the FCC regulations there is strong prohibition against
distributing tapes of anything heard on the air which originates in
this country and it includes everything from videotaped TV broadcasts
to with 2-way ham radio communications. I have no idea what Part,
chapter and verse it's in but it's there and I don't care enough about
it to take it any further.

Where has it been stated that Riley "accepts" tapes?? He accepts complaints. He sits on the garbage freqs himself. The FCC investigates the complaints and makes it's own evidence tapes the way I read the articles on his recent busts. Which the FCC is allowed to do.

The REAL bottom line here seems to have slipped past everybody. If you keep your transmissions legal you have nothing to fear from anybody. Simple as that!
What part of 'legal' do some Hams not understand? Is this not Riley's goal after all?
I applaud Mr. Hollingsworth for his efforts...what he is doing has long been needed and I hope the FCC continues to put monies into his budget in the years to come. It is money well spent.
Look at it another way...if you don't want to get a speeding citation from the local cops, DON"T SPEED! Simple as that! The same holds true insofar as Mr. Hollingsworth is concerned.
Why is this concept so difficult for some Hams to grasp?

Well put. I come up from the days where I had to go to the local FCC office and take the code and written test there. I don't think 'll never forget how proud I felt when I got the results. Nor the feeling of accomplishment after working my first cw dx pile up. I'm sorry to see the hobby fall to it's current state and I feel it's mostly due to how easy getting a ticket has become.
One example...the other day I heard two guys talking on 40 and one asked the other if he had been on 6 meters lately. The other responded "I don't know if I have meters here, let me see, the dial says 7 MHz...28 MHz.............." well you get the picture.

reported Overheard Thanksgiving day at the small house of AF2Y

Oh Jehovah!

-Thank you for giving me the strength to slap old ladies around.

Thank you for giving me a number 10 to kick dogs and pets around

Thank you for giving me the strength to bash the Christian religion

Thank you for giving me this old tape player to interfere with anyone
who does not believe in the things that that I think they should.

Thank you for the ability to lie about people and their families who I
do not know and have never met.

Thank you for this ham license whith I use in your name to punish
people with.

Thank you for the supscripton bingo cards I send to my enemys to have
the postal service deliver unordered magazines.

In other words oh great Jehova, thank you for making me the biggist
horses ass who ever lived!!

Your servant

Tim,

Your various screen names are quite obvious so don't go all pompus
of us. Sorry Tim but you have too many people watching you to get
away with much. If this offends you try shaping up.

I listened to your buddy KJI last night it is amazing anyone that
stupid remembers to breathe. As much as I would love to annoy
you business takes me away for a couple of weeks.

BTW your psychological profile is comming right along quite
interesting. More information about your finances has helped
explain your rage.

Titus,

The Aurora Borealus (sp) will cause severe interference to mainly HF signals that are propagated through the aurora area. It causes moderate to severe distortion of the signal and on the lower frequencies will actualy absorbe the signal so much as to make it unreadable. The good thing is that on bands such as ten meters, six and above to about 432mhz you can use this area as a reflective source for your signal. Much DX is workable in SSB and CW modes. Point your beam North to the lights and work the "BUZZ" signals.

Help, please.

I work for a company that provides a computer system that allows Travel Agents to book seats on airlines.

An agent is converting to us from one of our competitors. This Travel Agent makes a lot of bookings for members of ships crews. Apparently, our competitor has the ability to send and receive messages from the ships. When the agent wants to send a message he enters a function which then asks for a "telex number" (I know what telex is, I'm old enough to have used one in the past!). They enter a telex number (what I believe to be a domestic US number - 25-62813724). Then they type their message. The first thing they type in the message is a code identifying the ship which I understand is usually 3numbers followed by some letters.

I've had a look at the Inamarsat web site and the ITU web site and I've talked to someone in a British Telecom Telex Bureau. From those sources I'm guessing that what's happening is that the telex is going to some form of relay station which is then passing the message to the ship using the ID typed at the start of the message. What I need to find is two things:

1) The name and a contact for the relay station. I have phone, fax, e-mail but no telex (otherwise I'd simply send a tele to the number!).
2) Some suggestions as to how else these messages could be passed.

Many thanks.

Graham Harrison.

Anyone who tries to make a point with foul mouthed profanity like yourself has absolutely no credibility here.This is misc, idiot, and my posts are not off topic. You are a pathetic newbie netcop, and obviously suffering through a miserable holiday, so you can take your profanity and your ignorance and go spin it somewhere else. As far as being anon, you are stupid there as well. You forged your header, your post is spam, and that violates the Front Range Internet agreement right off the bat. Hopefully they will be in a better Holiday mood than you are. Otherwise you just netcopped your idiotic self. Later, newbie.

Scanning through the newsgroup this morning, I see nearly A HUNDRED HATE MESSAGES that were posted yesterday on this forum. A HUNDRED hate-filled messages ON THANKSGIVING DAY!

You know, I used to read this group for it's humorous content. It was always good for a laugh when I had a few extra minutes to kill and wanted some cheap entertainment. But this is no longer funny. It's sick. To think that grown men have nothing better to do with their holiday besides spending it in front of a computer screen, sending messages of hate and libel to each other, instead of spending the day with their families and loved ones. It scares me to know that I have to share this planet with the likes of you psychotic fiends.

Please seek professional help for your illness. Soon. For the sake of yourselves as well as others who have to live amongst you.

Note: this address does not accept unsolicited e-mail. Please contain all discussion regarding USENET posts to the appropriate newsgroup thread.

Very well said Al, I also came up from those days when I had to go to the
FCC office
and take the tests and when I didn't pass a written test, I had to take the
code and all
over the next time I went.(I had to pass the 20wpm 3 times).
Sure does make you feel good when you have done something to get the ticket.
I will always think it should be the way it was then. It's the same in most
everything
now-a-days. Lots (not all) think everything should be handed to them on a
silver platter
without having to work for it. If they had to work for things they would
appreciate it and
try to take care of it.
Just my 2 cents worth.
73 de Tony, KD4K

Combine unresolved anger resulting from
a broken childhood home, alcoholic parents,
an absentee father, bird poop, traffic noise,
drug abuse, alcoholic binge drinking, a CB
radio background, easy access to a ham
license by memorizing questions, ability to
purchase a computer on time payments, and
the result is what you see in this forum.

One of the tragedies of ham radio is the the ability of newer hams to request and receive call signs that don't show their seniority. Respect the old pharts cause one day you will be one of them.

Greetings,

Can anyone provide me with a schematic for a two tone board for a plectron R8000 series reciever? I have the R8000 and two 2-tone boards but need to recalibrate them for my frequencies. A friend has a tone generator, etc. needed
to do the work, but we need the schematic. Any other info that you think might
be helpful would be greatly appreciated.

Please reply to glenr@actel.com as well as here in the newsgroup.

Thanks in advance for any help,
Glen

Nothing more than bored individuals looking for some way to express themselves and be noticed. It's also easy and safe to hide behind a microphone or a keyboard and say things that are offensive.

To paraphrase Oscar Wilde, "It's amazing what a man will say when he's wearing a mask."

An impressive quad! Prop pitch motors come in small, medium, and large
sizes with the large being about 12 inches or so across. Sizing will be a
factor when mounting on/in a tower.

Jack

SB DX @ WW $OPDX.437
Ohio/Penn DX Bulletin No. 437

The Ohio/Penn DX PacketCluster
DX Bulletin No. 437
BID: $OPDX.437
November 29, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KH2D, N2OO, WB2RAJ/WB2YQH & The 59(9) DXReport, K3ZO, NG3K, N4KG, K7WX, K8YSE, 9A3ZG, 9M2TO, A35RK, BA1DU, DJ5AV & DX News Letter, DL1EK, ES1AKM, G4UZN, G0OFE, IK8VRH, JF6OJX, JI3DST, JS6BLS, LU1DZ, LX1KQ, OK1YM, PA3FDO, PA3GIO, PP5LL, RA3SL, VE2PJ, VK3BYY, VK8NSB and YO3FWC for the following DX information.

3W & XU, VIETNAM AND CAMBODIA (Update/Reminder). Jack, ES1AKM, reports that he and ES1AX "will" start their Asian DXpedition next weekend. The members of the "Tallinn Youth Radio Club" (TYRC) will start in Vietnam December 5th and be active as 3W6KM until January 4th (2000). Activity will be on all bands and modes. They will move on to Cambodia and expect to be there January 5th through February 4th. Their callsigns are not known yet, but it should be XU7***. Activity will also be all bands and modes. For more information, send E-mail to: asiaexpedition@hotmail.com QSL via ES1AKM, PO Box 2907, Tallinn 13102, Estonia or via ES bureau.

10 METERS BEACON. The VK3RMH 10 meter beacon is now active 24 hours a day on 28.2565 MHz. Its QTH is approx. 25km N.E. of Melbourne, Victoria, Australia. Grid Square is QF22JH. The CW ID cycles through two messages each followed by a 20 Watt carrier and 2 Watt carrier for 5 seconds each. The CW messages read: "VK3RMH MELB QF22JH 25/2W VERT" (error in power to be corrected - should read 20/2W) and "VK3RMH AT HOTMAIL.COM QSL" QSL currently only via internet E-mail to: vk3rmh@hotmail.com or if no response, send to: m.harrison@medoto.unimelb.edu.au Operator of the beacon is the North East Radio Group, Inc. (the NERGs!)

6Y, JAMAICA. Look for Alan, G3XAQ, to be active as G3XAQ/6Y5, between November 29th and December 9th.

9M6, EAST MALAYSIA. The 9M6AAC Hillview Gardens Resort in Borneo is now active. Operators N2OO, N4PN and K8MR spent the first part of last week in Brunei as V85OO concentrating on the WARC bands as much as possible. They made about 5,000 QSOs from V85. Remember the Hillview Gardens

station 9M6AAC will be in the CQWW CW Contest. For current updates and photos, check the Web page at: http://www.qsl.net/n2oo/borneo/

A3, TONGA. Paul Kidd, A35RK, reports to OPDX that all his ham radio equipment is broken: 3 transceivers, 3 antennas, 2 TNCs, and laptop computer. "I'm QRT until replacements arrive", states Paul. Replacement equipment is now being purchased in the United States and is being assembled in the Seattle area for transport to Tonga. Paul requests that if you know anyone who is planning on coming to Tonga between now and Christmas, and would be willing to hand carry any or all of this gear, please contact his QSL Manager: Bob Preston, W7TSQ (w7tsq@aol.com), as soon as possible. If a "visiting ham" brings this stuff into Tonga, it would save him a big shipping hassle, save him big green stamps on customs duty, and would get Paul back on the air in time for the New Millennium celebrations.

BY, CHINA. Remember that BY1PK, headquarter station of the Chinese Radio Sports Association, will participate in the CQ World Wide CW DX Contest as a Multi-Single category. Operators include Tong/BA1AA, Yan/BA1AB, Alan/BA1DU, Wang/BA1OK and others. QSL via P.O.Box 6106, Beijing 100061, China.

GJ, JERSEY (Update/Correction). Bert, PA3GIO, reports to OPDX that he has to use the MJ prefix instead of the GJ as first reported (Please refer to OPDX.436). So, look for him to be active as MJ/PA3GIO/p or /m, December 11-16th.

GU, GUERNSEY (Updated QSL info). Jim, G0OFE, who will be active as GU0OFE from December 8-13th, primarily for the 10M ARRL Contest (Please refer to OPDX.436), informs OPDX that his QSL information has changed. QSL info for both GU0OFE and MU0C is via G0OFE, and not as previously stated. The address is "ok" in any callbook. Requests for bureau cards can also be sent by email, to: g0ofe@currantbun.com

HS, THAILAND. Fred, K3ZO, reports that stations in Thailand (like HS0AC) will be able to use 160 and 80 meters during the CQWW CW Contest:
160 meters: 1.824-1.826 MHz
80 meters: 3.524-3.526 and 3.534-3.536 MHz

IOTA NEWS.....
AF-NEW. IK8VRH reports that the Web site for next year's SU9DX DXpedition to the Egyptian island of Giftun is now up and running at: http://www.qsl.net/su9dx

AS-049. Take, JI3DST, will be active from Tokara Archipelago (Kuchino-shima, Kogashima-Ken, GL-PL49) from December 29th and January 9th as JI3DST/6 and 7N3UXO/6. Two stations will be used: A STATION (FOR NA, SA) and B STATION (FOR EU,AS,AF,OC). Activity will be on 40/17/15/12/10 meters SSB. QSL via the JARL Bureau (the best) or direct to: Takeshi Funaki (JI3DST,7N3UXO), 2-18-26 Hannan-Cho Abeno-Ku, Osaka-City Osaka 545-0021 Japan

EU-016. Frane/9A5V, Fredi/9A5KV, Matko/9A3VM and perhaps Tom/9A2AA will activate the island of Jakljan (CI-033, JN82VR) on December 3rd (the evening hours) and on December 4th. On December 5th they will be active from the island of Olipa (CI-079, JN82VS). They will be active on all HF bands and modes. QSL via home call.

EU-038. Johan, PA3FDO, will activate Ameland Island (North Sea Coast) from December 10-13th. He will be active during the ARRL 10M Contest using a 3 element yagi for 10 meters. Outside the contest he will use a vertical for the other bands. QSL direct or via Bureau.

SA-008. The Radio Club Ushuaia station, LU8XW, will be active from Tierra del Fuego Island on 21 MHz during the CQWW DX CW Contest. QSL via call book address or Radio Club Ushuaia, Box 58, Ushuaia - 9410, Tierra del Fuego, ARGENTINA

SA-027. A new date has been set for an operation to Arvoredo Island (DIB-46). The DXpedition will take place January 13-17th in the new year. Look for the callsigns PW5W (SSB) and PR5L (CW) to be active on all bands. QSL via PP5LL.

LX, LUXEMBOURG. Look for LX4B to be active in the CQWW CW Contest as a Single Op/Single Band (21 MHz) entry. QSL via LX1TI.

NEED HAWAII ON CW. Thanks to Jim, KH2D, for the following: If somebody needs Hawaii on CW.... This is the weekend to get it. Look for the following Hawaii stations over the weekend during CQWW CW Contest:
KH7R on 10 meters - KH6ND operator.
AH7DX on 15 meters - NB1B operator.
KH7U on 20 meters.
AH6OZ on 160 meters.
NH7A on all bands - multi single.

OOOPPPSS!! In last week's bulletin, your editor somehow mixed Holger/ DL7IO and Birgit/DL7IQ callsigns. Remember to look for them this week from Fiji.

OT, BELGIUM. RA3AUU will be active as OT9T and as a Single Op/ All Bands/ Unassisted High Power entry in the CQWW CW Contest.

QSL INFO AND NEWS......
PIRATE INFO. Tony, G4UZN, reports that he is still receiving lots of cards showing him as QSL manager for ZA1SRB. This station was a pirate and seems to have been active on all hf bands for quite a while in November and December 1998.

Karlfried, DL1EK, reports that if anyone is looking for a QSL Manager, he would like to do this job. He states the station should be (very) active. Foe more details, send E-mail to: dl1ek@ qsl.net

ED8CMT QSLS. QSL Manager Fritz, DL7VRO, reports that he received from Spain 5 kg of QSL cards and expects to send the cards out within a

month.

9M2TO DIRECT QSLS MISSING. Tex, 9M2TO, informs OPDX that a problem has developed with direct QSLs which were delivered to JA0DMV between October 20th and November 24th. These cards came up missing during transportaion between JA to 9M2. Tex states that he knows some cards included were registered mail from LUs, CXs and South America. He is sorry, but anybody needing a direct QSL must please send it again.
SPECIAL NOTE:
1. All the QSLs before November 10th (1999) have been sent out through the JARL Bureau.
2. All the direct QSLs for JA0DMV received before October 19th have been replied to.
3. All the direct QSLs for 9M2TO received before November 10th have been replied to.

SM, SWEDEN (Attention Prefix Hunters!). John, SM0DJZ, states to look for a lot of new Swedish callsigns. Some stations will begin using 2x1 like SM0A and SL3A. Also, look for many 7S's and 8S's prefixes. A special Web page has been set up which gives a very large list of information concerning Contest, Special Events/Anniversary, and Special Callsign in Sweden at: http://www.sk3bg.se/contest/speccall.htm

SV, GREECE. Look for SV1DKR to be active in the CQWW CW Contest as a Single Op/Single Band (40m) entry. QSL via bureau or CBA.

VC, CANADA. Terry, VE2PJ, informs OPDX that he will be using the special callsign VC2K from December 31, 1999, through January 31, 2000.

VK8ML AND VK8CI WEB SITE. Allan/VK2CA/NNN, Steve/VK2SRN and Stuie/VK8NSB have decided not to burden Rusty/KG4AU (Teams webmaster/Pilot) with more info on their IOTA DXPEDITIONS to VK8ML and VK8CI. The reason given was Rusty became a Daddy while the operators were on Melville Island. However, a new homepage for this DXpedition has been set up containing online logs, pictures and information on the two islands that the team operated from. Check out the Web page: http://www.vk2nnn.com/IOTA

VP5, TURKS & CAICOS. "The 59(9) DXReport" reports that Fred, K4LQ, will be active from Providenciales, December 8-15th, as VP5/K4LQ and as VP5W in the ARRL 10 Meter Contest with Bruce, W4OV. QSL via K4LQ.

VP8, ANTARCTICA. "The DX News Letter" reports to look for Niall, VP8NJS (until February 1, 2000), and Art, KC4/KL7RL (QSL via K4MZU), to be active from Antarctic Base Patriot Hills. So far no QSNs have been reported on the cluster network.

XU, CAMBODIA. Yoh/7L1MFS and Koji/JS6BLS will be active as XU2C on December 4th and 5th. Activity will be on 40-6 meters SSB/CW/RTTY with 100 watts into a R7000 and a 5 element yagi for 6 meters. QSL via JS6BLS Bureau (only this operation, the others to 7L1MFS) or E-mail requests can be sent with data to " js6bls@qsl.net " and QSLs will be returned through the Bureau.
Meanwhile, Andy, G4ZVJ, signing XU7AAV, has announced that he has

extended his stay and will be active until 0030z December 5th. Reports indicate that he is doing a good job providing CW QSOs on all bands from 40-10 meters. Also, begin looking for him on 80 meters. He is working on an antenna.

XZ, MYANMAR. Excerpts from a large press release, states the Central Arizona DX Association announces the first major DXpedition of the new year (OPDX InterNet Subscribers will receive the complete press release as an additional bulletin). Beginning on January 13, 2000, and lasting until February 6th, XZ0A will be active from Thatay Khun Island, off the southern most tip of the Union of Myanmar (XZ, Zone 26, Southeast Asia). They will have a total of eight stations with amplifiers and full size antennas active on all bands. Although the great majority of contacts will be made on 80 through 10-meters, there will also be dedicated stations with specialized operators for Top Band, RTTY and 6-meters. This will be the first ever XZ IOTA, and a brand new prefix. The XZ0A DXpedition team will be represented by seven countries: England, Indonesia, Japan, Mexico, Spain, Thailand, and the United States. As of yet, a license is not possible for Myanmar nationals, but they are hopeful that this will change in the near future. XZ0A operators are: EA5XX, G3VMW, G3NOM, JA1UPA, JA1UT, JR0CGJ, KM5EP, N5IA, K6RKE, KD6XH, AF7O, K7TR, K7VS, K7WX, K7ZV, N7XYR, NA7DB, V73GT, WF5T, WA6CDR, WY7K, W8AEF, XE1L and YB0ARA. For several days they will also be joined by members of the Radio Amateur Society of Thailand (RAST). More complete details can be found at the DXpedition web site: http://getnet.com/~k7wx/myanmar.htm
QSL requests can be made directly, or via the appropriate bureau. Direct QSLs: XZ0A QSL Request, c/o Bob Myers, W1XT, 37875 North 10th Street, Phoenix, AZ 85086 USA. Bureau QSLs: Cards should be clearly marked - XZ0A via W1XT. Any questions about XZ0A QSLing may be directed to: Bob Myers, W1XT at: w1xt@superphoenix.com

YO NEWS. News from Romanian Amateur Radio Federation report that the logs from YR99E (special callsign of Total Solar Eclipse seen from Romania) are now available on the Web and stations can search for their logged QSOs. Also, the final scores of the 1999 YO-DX HF Contest are now available at the same Web site. All the above information can be obtained by visiting the Romanian Amateur Radio Federation web site at: http://www.qsl.net/yo3kaa

>I read the articles on his recent busts.
>

Do you really think Riley spends 24-7 sitting bleary-eyed in front of racks of receivers listening to 20 frequencies at once while he chugs coffee? If anything, he seems to spend more time on his "Riley-O-Rama Hamfest Tour 99".

Of course there are supposed to be other FCC personnel who monitor the frickasees, but, like traffic cops, they can't be everywhere. Most of the worst jamming I've heard has never, as far as I know, been monitored by the FCC. If it has, then they dropped the ball. The jammers still run amok on, for example, 3950 khz. Just listen to how the Liberty Net on 3950 continues to be jammed despite the FCC's supposed monitoring.

3930. ICOM AH-4 ANTENNA TUNER EXPERIENCES

Newsgroup: rec.radio.amateur.misc

KK7HO lies again:

> Your just a NO NAME Coward. Spin Doctoring the facts. Using "liberal" buzz
> words like
> >mean spirited

Wait a minute Timmie. You're the liberal here. And it was you that
was badgering Harvey. One need only listen to:

http://members.xoom.com/_XOOM/sixisone/volz.wav

To learn the truth. It runs several minutes, and the
context is all there. None of your lies and spin can
change that. Its one of the meanest things I've heard
you do on HF. No wonder you're upset that you were
caught on tape again, showing your true colors.

>
> >badgering
>
> Twisting the Truth to fit your LIE.
> Taking a "sound Byte" and Lying about it's context
>
> Claiming i stated things that I didn't.

Again. Just listen to:
KK7HO's "mean spirited badgering" of Harvey:
http://members.xoom.com/_XOOM/sixisone/volz.wav

to learn the truth about KK7HO, and his true character!

Please stop the jamming KK7HOï¿½.

KK7HO and fellow jammers describe what they will do at
the funeral of a fellow amateur operator (urinate in casket)

Paul, I don't have the G model but I do have the MKII and AH-4, I will try to give you some information on my experience of using the rig and tuner in my mobile (saturn), the biggest gripes I have are: The noise blanker dosen't work very well, it will work somewhat on a single pulse type of interference, but not on multiple pulses or electric motor (fuel pump) type interference, I don't know why Icom cannot include a decent NB in this rig, I have owned CB transceivers with NB's that work great compared to this rig, QST did a review of the G model and said that the blanker on the mkII and the G worked about the same, the DSP is pretty effective but it also suffers from a common DSP problem of losing some of the audio quality when engaged on SSB, but it does work great for CW, I owned a Yaesu FT-1000mp for about 2 years and I found the DSP on the 706MkII to be superior to the DSP in the mp. On the MkII, not sure about the G, you need to change the mic gain setting between HF and VHF, (I get better reports on the audio for 2 m FM if I set the mic gain to 5, usually run the gain full open (10) on HF. Other than what i've mentioned the 706mkII works great and I would buy the rig again. The tuner works pretty good, it will tune a 102 inch SS whip down to 80 meters in about 5 seconds (although icom does not recommend this), the tuner does exhibit some loss on receive, this is more noticiable on 20 meters and higher, and gets pretty severe on 10 and 6 meters the last time I tested this on 10 meters against a resonant antenna hooked up directly to the rig I think I lost something like 4 or 5 S units on receive, but I am not sure If my antenna system is 100% because the antenna system does exhibit some severe directional properties, if I drive around in a circle I can notice up to a 3 S unit difference from local stations on receive on the 10 meter band (probably due to the antenna being mounted to the left rear of the bumper. I am still experimenting with different configurations. Hope this information is helpful, if you have any specific questions let me know and I will try to answer them for you, 73 Jim/AB4D

3934. AF2Y: anyways continued.....

I am happy to report that last week, my son Richard, a lawyer in Washington,D.C. attended a breakfast seminar in which FCC Commisioner Willliam Kennard was guest speaker. Rick met and talked to him and reported that he is short,intelligent, elegant and said nothing about 14.313
Anyways,I have received word that the dildoes who keep pestering Riley Hollingsworth about me have added a new dimension. Once Pres. Franklin Delano Roosevelt remarked after being badgered in Congress, "they even attack my little dog Fala." Believe it or not, these mangy curs are now attacking my treadmill. So help me. My agents report that e-mails are being sent about how it squeaks from 2.5 kHz away. Have you ever heard anything so ridiculous. so idiotic and childish? The nuts are FRANTIC and FRUSTRATED and Riley must be hysterical getting such reports because he sure as hell isn't complaining to me about them. The clowns are simply giving him a chuckle after a day's work. And besides, I fixed that squeak. The problem was coming from some screws that came loose that were holding the walking board to the framus and the sepulon. I called Guthy Renker in California for new screws and they obliged quickly. By the way I PAID for the call; no access numbers were stolen. The replacements screws were inserted, silicone spray was spritzed under the tread and on the rollers and KY Jelly was going to be used but at the last moment I decided to rub it onto the soles of my shoes and slip going up the steps of a bus in order to sue in a negligence case. Apparently big bucks can be made in frivolous suits which may bring me a Cadillac and a boat. Now I don't know anyone who's tried this way of making a living but I believe the course is taught at the Milwaukee branch of the University of Jerusalem. Well anyways, and this comes from someone in the liberal eastern establishment; I wish you'd stop bitching and moaning about my treadmill and begin using one. I estimate the clowns doing the complaining are way out of shape and the worst seems to be K0ECK, Bill, from "Sain"Louis who sounds not only fat but is suffering from upper denture slippage. He spits all over the mic and drenches our resident war hero, Jacques Strap, a.k.a Jacko Vroom unrelated to Va Va Va" Vroom." And as Bill's spittin' and Jacko's wiping, K2IVX is leafing through the North Jersey Yellow Pages for more Rabbis to call. That's quite a group who have Riley is their pocket! And that brings me to Walter,W2YEE. I thought he was on the wagon? That's not what I heard today. He was slurring something awful and I predict in about another week of snootfulls, he'll be on 75 or 20 telling everyone how evil the Jews are which will take him off the air for yo months. Not that Riley is involved in religious squabbles but rather because he doesn't like broadcasting and Walter is another Larry King interviewing Larry King. But then again Walter Miller pretending to be Larry King interviewing Larry King will prove to be a hell of a lot better than Larry King interviewing "Queenie" K3QAM, the guy who laughs like a hyena and giggles like Gidget. But who knows-maybe Harold has been rehearing for a voice overs job? And speaking of voice overs, what ever happened to Glenn Baxter's "indespensable" I.A.R.N. reports? His was not a case of voice over; it was a case of voice OUT. Incidentally I got a call today from

someone who was trying to explain KE9RY's spontaneous irresponsible and slanderous outbursts directed at yours truly. He still seems to be falling for the nonsense fed to him by mental retards concerning my alleged attacks on his late daughter. I told said caller that his name is Steckbauer which is German and Germans are bright. Then he told me he's half German. When I asked what the other half was I found out but why go into it because I'm not out to hurt anyone's feeling? There's brilliant and stupid in every nationality and Carroll O'Conner as Archie Bunker made a hell of a living digging the heck out of
....
Thanksgiving is over and we're entering the season of good will and cheer and brotherhood what with Chanukah and Christmas. And so my Jewish and Christian fellow hams, let me leave you with some monumental thoughts about our faiths. The seventh commandment is thou shalt not admit adultery. Lot's wife was a pillar of salt by day but a ball of fire by night. When the three wise guys from the east side arrived, they found Jesus and the manager. A Christian should have just one spouse; it's called monotony. Solomon,one of David's sons, had 300 wives and 700 porcupines. Samson was a strong man and a judge and brought down the temple of the idol- worshipping Finkelsteins and lastly, Jesus was born because Mary had an immaculate contraption.

Bill,
For two years I had excellent results on 15-80 meters with a pair of
co-fed inverted vees, one cut for 80meters the other cut for 40. Could have
operated 80, 40, 20, and 15 meters without a tuner with no worse than 2.0:1
SWR. Had 59 reports here in the NorthEast from as far away as Slovenia and
Argentina. I used this pair of antennas on 10 meters, but found that my 11
meter vertical actually gave me better performance.

Bill,
For two years I had excellent results on 15-80 meters with a pair of co-fed inverted vees, one cut for 80meters the other cut for 40. Could have operated 80, 40, 20, and 15 meters without a tuner with no worse than 2.0:1 SWR. Had 59 reports here in the NorthEast from as far away as Slovenia and Argentina. I used this pair of antennas on 10 meters, but found that my 11 meter vertical actually gave me better performance.
I've just recently started using an 80 meter Carolina Windom antenna. This is a hybrid antenna. Looks like a dipole with one shortened leg, with a vertical radiator added on. Seems to work okay on all bands and rivals the 11 meter vertical for performance on 10. A search for Carolina Windom on the internet provided me with the name of a company that not only sells the antenna, but they also have diagrams with dimensions! If you're an antenna builder, you'll have all you need to build the antenna yourself. Can't remember the name of the site, but do the search and you'll be able to find it...

Basically......a low dipole works well on high angels, and short skip.
A vertical will be better for low angels, DX. Actually the best simple
setup is use both antenna's and switch as needed.

As usual Jeff, very well put. I can only find fault with one part of
it. I run basic wires and verticals, a training wheel amp (AL811H) but
a great rig, the 1000MP. I have contested for over 30 years, and find
the best of the best are there. Competition and improving my last
score is my game. I do not run illegal power and don't jump on a
ragchew. With these limitations I have won the Southeast in the WWDX,
single band. Several clean sweeps in the SS, many wins and almost wins
and of course a box full of certificates. Nice to work DXCC in one
weekend. hi. And oh yeah, I do it all, SSB, CW , RTTY.

I took my tech/general exam at the FCC too. blew the code test but
another class member passed his 20 wpm and extra in the same session. the
next weekend I went over to his shack and set up his whole station from
tuning antennas to grounding. he couldn't do anything in ham radio except
CW at 20 wpm and memorize bash books.

Yea, 20 wpm makes one a *real* ham alright <snort>

after spending 6 months trying to beep real fast, I got a clue and spent my
time on more productive efforts like running fox hunting and kit
construction classes for my repeater club. Lately I've been trying to get
local hams to pull their thumbs out of their a**, and build a high speed
radio network.

there is more ways of defining accpmplishment in ham radio than beeping real
fast.

Many 70 cm ham trancievers can be easily modified to operate on
UHF CB which is from 476.425 to 477.400 Mhz. They still may not
be used as CB requires type approval. Max legal CB power is 5 watts.

3958. Beacon Wizard

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-27 00:00:00 UTC
From: Jim <jim@taborsoft.com>
Message-ID: <s40kki85a4r18@corp.supernews.com>
Source record: 126508

Greetings,

Please feel welcome to visit this web site and download any of the available software. One small app, win3.1 and up, is Beacon Wizard.

The "Beacon Wizard" will help id the currently active beacon. The new beacon system is lots of fun and very useful. It can be a bit confusing to try and figure out which beacon should be heard at a particular time; the "Beacon Wizard" solves this problem and will be welcome by many.

The Beacon Wizard displays the following information:

Active beacon
Distance between your location and beacon
SPath & LPath Azimuth
Local beacon time
Sunrise/Sunset UTC time at beacon
Users local UTC Sunrise/Sunset time
Gray line flag between beacon and user

The Beacon Wizard has the following features:

Run on Windows 3.1 and above
User can edit beacon file to update as needed
Bring up Windows clock from Beacon Wizard
Info tip hot spots on display

Good DX,
Jim

billgatewood@my-deja.com wrote:

> Living on the east coast which antenna would be better suited for
> operation on 10-40 meters, a flat dipole at 40ft.up or a store bought
> vertical. Thanks Bill

Depends on what your looking to do Bill, as an example I prefer a vertical for 10/17/15 meter operation since I want a low angle of radiation for DX, I'm not looking for work stations 200-300 miles away on those bands. On 40 and 80m I prefer a dipole which provides a higher angle of radiation giving me better coverage within 500-600 miles, for DX on 40 I use a vertical which gives me an advantage SOMETIMES. I have been stronger on each antenna when compared to the other for short range and DX depending on how the ionophere is behaving.

Depending on your level of interest and budget, I'd go vertical for the higher bands and dipoles for 80/40/30m

Good luck,

Tim ka8ddz

I was not saying 20 wpm makes you any better ham.
I have never liked CW and never used it after I got my
Extra. I just think it should be in there.
If something is worth having, it is worth working for.
With no code and memorizeing books we just got to many
hams that don't know the first thing about radio.
When I took the test there wasn't any memorizeing Bash books.
You had to study the books and learn the formules and stuff
cause when you took the test you would never have seen the
exact question that you would have. In other words you had to
know the theroy.

>

Hi,
Just seen this thread on UK amateur radio but I don't know who the
original author was.
I have a copy of the article on 6 pages of A4 from VHF comm 2/1978.
If it is still needed I will see if it will copy and post it on. Please email me
direct.

Although the voices due sound similar kkkevin. I'm curious as to where the other 4 minutes of the recording may be? How do we, or anyone know, that it was "unidentified, when there are only 6 minutes of recording? The guy "obviously" knows quite a bit about you, was your motivation revenge?
One more question, now in the recording I couldn't really tell if the person was talking to anyone or not. The "other" 4 minutes of recording may be able to clarify this. But, my question is, the tape that was played, how is that any different than the "tapes" k4gar plays every damn week on the liberty net? I see no difference except for the fact that you didn't like that one. Also the guy didn't give 1-800 number commercials after the tape like k4gar does every week telling everyone to buy this or that.
Kevin the tape isn't continous, you've edited portions and it's missing the complte 10 minute period. You obviously had some motivation for editing it, mind sharing that with us.

Oh, an _American_ indiscretion, is it? S'matter, Walt, are you still
smarting over the fact that we came over there and pulled your country's
fat out of the fire not once, but twice?

Listen, old bean, it's not anyone's fault but yours if you don't have
a better ISP or a more customer-oriented ISP industry in general.
That's either your problem or your nation's problem -- nobody else's.
Kindly deal with it offline, on your own time, and spare those of
us from your advanced countries your caterwauling.

Expecting other Internet users to to compensate for your set-up's
incapacity is like expecting your fellow drivers on the motorway
to slow down for your benefit when you totter on in a wheezing
Austin A7.

> The more lines of excessive quotes I am forced to download from
> Usenet newsgroups due to the thoughtlessness/laziness/discourtesy
> of others, the higher is my telephone bill at the end of the month.

If you can't afford the cost of this pastime, then perhaps you should
sell your computer, don your anorak, and take up trainspotting. USENET
was never intended for the use of the proles anyway, and so you could
very well be rising above your station.

Furthermore, considering the speed at which computers run, I find it
exceedingly difficult to believe that any amount of quoted text
makes a significant difference in the time it takes you to scroll
through (or download) an article. At least as much time is probably
accounted for by your normal hesitation between keystrokes.

But of course why should Americans be forced to scale back because our free market system gives us unlimited telephone and internet services??
Simply using your own newsreader to full advantage should keep your phone bill manageable, without begging others to be more brief.

>The more lines of excessive quotes I am forced to download from Usenet
>newsgroups due to the thoughtlessness/laziness/discourtesy of others,
>the higher is my telephone bill at the end of the month.

In another American term, bull. Although I have unlimited service, I minimize my use of the phone line so others in my family can use it. On a bad day I use maybe 5 minutes downloading and uploading Usenet articles. You can download headers first and and mark what you want, avoiding large postings easily. Then reconnect for the download. In the early years when I was paying high prices for 5 net hours a month, I seldom exceeded 3 of those hours on Usenet. That's the beauty of this (mostly) text based system. (God help you if you spot one of our HTML or binary groups.)

>And yes, I *know* I can download headers only ... but there is no way
>I can download the bodies of messages I want to read and exclude the
>excessive quotes.

Ah yes, you want to have your cake and to eat it too. That is awfully American of you...

3972. Burn Rome and blame the Christians "PROJECT MEGIDDO"

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-28 00:00:00 UTC
From: "Lloyd A. Davies" <n0vfp@bellsouth.net>
Message-ID: <Gah04.56081$Hk.542708@news1.mia>
Source record: 126386
Cross-posted to: rec.radio.amateur.misc,rec.radio.shortwave

"PROJECT MEGIDDO" is the title of an F.B.I. analysis giving their strategic assessment of the potential for domestic terrorism in the United States, undertaken in anticipation of, or response to, the arrival of the new millennium.
This assessment consists of thirty two pages and has been made available to law enforcement offices nationwide. The document is posted at the F.B.I. web site, www.fbi.gov.
You may also view the document by clicking here: "PROJECT MEGIDDO"
There are three outstanding and significant points about the F.B.l.'s "PROJECT MEGIDDO":

1) It targets only those of the conservative right as potential domestic terrorist- "As the millennium approaches, various right wing groups pose a threat to American society."1

2) It is basically devoid of any evidence or documentation backing up the outrageous claims that religious convictions and/or militia paranoia will cause some to attempt to bring on the end of the world. The F.B.I. even admits, in their analysis, that they do not have specific indications of any threats from any such right wing group: "The Project Megiddo intelligence initiative has identified very few indications of specific threats to domestic security."2 Lacking any evidence or documentation, the F.B.l.'s "Project Megiddo" alludes to some potential new clandestine group that "may conceivably form" to engage in violence: "Armed with the urgency of the millennium as a motivating factor, new clandestine groups may conceivably form to engage in violence toward the U.S. Government or its cilizens."3 Lacking any documentation or even indicators, the report incredibly gives, as its "final analysis", the illogic that their hypothesis is as likely to happen as not: "In the final analysis while making specific predictions is extremely difficult, acts of violence in commemoration of the millennium are just as likely to occur as not."4

3) The report gives the specific date of January 1, 2000 as the time for these unknown, undocumented clandestine groups that "may conceivably form " to strike: "The majority of domestic terrorist, like the general public, place a greater significance on January 1, 2000."5
The illogic, false assumptions. lack of evidence, and hearsay, which is throughout the analysis, causes the judicious to summarize the report as either stupid or sinister. Considering the contents of the report and the present reputation of the F.B.I. and their bed fellows (the Jewish ADL and the Southern Poverty Law Center), the latter seems to be the most likely.
As elaborated upon on page 6 of this document, the sinister plan appears to be the framing of conservative, right wing, Christian groups and patriotic militias using agent provocateurs. It's an age old plan used by the Roman

emperor, Nero, who burned Rome and blamed the Christians.
This report outlines a plan of action for the enlightened Christian and others to take to foil any such sinister plan.

Yeah? So?

If you can't afford it, dear boy, perhaps you should find a cheaper
hobby/time waster/resource...maybe you could afford paper dolls?

If it's a work related expense, then either consider it the cost of
Doing Business or find a different way. I understand the Post Office
delivers letters and there are these nifty things called "papers"
wherein one can get the latest news.

ObPeeve: People who grouse about the cost of recreation. Either
enjoy it or don't, but shut up about the cost already.

: And yes, I *know* I can download headers only ... but there is no way
: I can download the bodies of messages I want to read and exclude the
: excessive quotes.

Oh, heavens, well you certainly shouldn't be inconvenienced in any
way, should you? After all, the world exists merely to serve your
tiny whims, doesn't it? I can see why you'd be upset. Why, those
nasty people on USENET...they...they're *thwarting* you at every
turn, aren't they? Digging into your wallet, wasting your bandwidth,
taking up your precious time...and no one seems to be listening.

Tell you what, why don't you save some money (and bandwidth) and just
turn your computer off for a decade or so?

That's actually pretty cheap when you consider you're buying
exclusive use of 44 MHz of spectrum providing reliable interference
free hemispheric range. Buying the time in larger blocks is even cheaper,
with one hour blocks going for as little as $200 an hour.

Think about that, $200 an hour for more spectrum than the equivalent of all
of HF, but with reliable scheduled hemispheric coverage for every Hz of it.
In an emergency situation, how much is that capability worth? Is it worth $10
a minute? I expect people in the emergency area would think so.

Television usually hogs it all, but a transponder's bandwidth can easily
be used by many users at the same time, either by multiplexing one
broadband uplink (as the telcos do), or by using many fractional transponder
uplink stations (SCPC, as many businesses do). Cost per user is then
down in the fractional cent per minute range for a voice bandwidth slice
of the transponder's capacity.

That's why FEMA now maintains a number of flyaway Earth stations
for use at disaster sites. It gives them reliable out of area communications
at a lower cost per user than any other system available except terrestrial
fiber (which might be knocked out in a disaster).

A full transponder flyaway pack (the size of two suitcases) can be on
the bird and ready for 24/7 operation within 15 minutes of arriving on site.

Fractional transponder systems are smaller (briefcase size), and quicker to erect than that.

With most of today's satellites, an uplink power of 15 watts is sufficient for full transponder usage (though a few of the older birds need as much as 300 watts for full transponder usage). Fractional transponder systems require even less power, so it is possible to run them off of solar panels if no other local source of power is available.

Uplink stations used to be expensive, but prices have fallen sharply in recent years. A SCPC system costs about the same as a typical HF rig. Full transponder video uplinks still cost much more, but that's because not many of them are made, so they can't benefit from economies of scale.

3995. FOR SALE - JPS ANC-4 NOISE CANCELLER

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-28 00:00:00 UTC
From: kd6aw@home.com
Message-ID: <3840a8d3.2659881@news>
Source record: 126519

This unit reduces locally generated noise and did a great job for me.
I am no longer on the low bands and don't require it anymore. The cost
new was $179.95 and I will sell it in new condition for $100,00.

3999. N0KED Case: The Recording

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-28 00:00:00 UTC
From: Kevin Alfred Strom <kevin.strom@innocent.com>
Message-ID: <3840DF75.8F2D6420@innocent.com>
Source record: 126523
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

The recording I promised a few days ago, containing six minutes' worth of excerpts of an illegal unidentified monologue by N0KED, containing broadcast tapes, music, and threats of violence, is now downloadable as a .wav file at:

http://www.3950.net

Paired with this file are two other recordings of N0KED in QSO, so you can compare his voice with that in the un-id monologue.

With good wishes to all,

Kevin, WB4AIO.

Cross-posted to: alabama.birmingham.radio.amateur,nl.radio.amateur,rec.radio.amateur.misc,uk.radio.amateur

Dear ols and om,

Beginning with the first Monday of December, DTC will start
regular Morse exercise transmissions using the call DK0DTC. These
transmissions will be on every Monday at 19:00 CET on 3575 +/- 1 KHz.
Transmitted exercise text will be accessable at

http://www.muenster.org/dtc/cwtext.html

by every Tuesday to provide a possibility to check one's capabilties
to put the Morse code transmission down into writing. The text
transmitted may also be obtained from

DJ5QK, Otto A. Wiesner,
Feudenheimer Str. 12,
D-69123 Heidelberg (send SASE please).

Transmission speed will be moderate, about 15 WpM.
Transmissions are intended to training the
listening abilities of would-be CW operators rather than being a
Morse code teaching. Comments and requests are welcome.

Date: 1999-11-28 00:00:00 UTC
From: guido@mail.icongrp.com
Message-ID: <38414be6.2278028@news.comnetcom.net>
Source record: 126527

Looking for a way to keep track of all of those frequencies you have discovered?

SCANNER is the answer. The program features:
* Import and Export ASCII files
* Printed reports by Service, Departmen, or Frequency
* Ability to sort by any field (or fields)
* Ability to select by any field (or fields)

Take a look at the scanner homepage located at:

http://www.comnetcom.net/~guido//scanner/scanner.htm

and check out the screen shots.

Only $20.00 brings this fantastic program to your doorstep. Send check for disk or send check with e-mail address and I can send the program to you as an attachment.

Actually, I prefer the reply at the top - there is much less scrolling that way. For example, if I'm reading through the message thread, I have to constantly scroll down to get past the stuff I have already read and to read the reply. With the quoted materal at the bottom, I do not have to scroll to read each reply (unless I need to refer to something in the quoted message that was mentioned in the reply). And if I pop into a thread in the middle, I can always scroll down then to read the quote to see what is being discussed.

The only exception to this is if the quoted materal is very short, such as the quote above. This short quote and message will usually open in a window without scrolling.

I was not aware that this was a protocol that had to be complied with.
Everything that I have seen on this subject appears to be more of a
guideline than a rule. I have certainly never heard of anyone being
kicked out of a newsgroup for failure to comply with this rule (assuming
it is a rule), so it must not be that important.

Okay Peter, I took your suggestion to Charles and read the articles in Usenet's news.newusers newsgroup. And I was not able to find a single comment in the "Rules for posting to Usenet" article concerning where quoted text should be placed. And there is also absolutely nothing there about putting replies at either the top or bottom of a message.

Perhaps you saw something about this in one of the other articles (I didn't), but those articles are not the "Rules for posting to Usenet." The materal in those other articles are simple guidelines, not rules.

However, perhaps I'm wrong. Please look over the rules yourself and show me where it states that quotes and replies have to be put in a certain place in messages.

How do you know that, Tim? How do you know that the "rest of the
600,000 plus hams in this country are sicken by the words and action of
these trouble makers?" How do you know "their issues are only important
to them..not to the vast majority of ham operators?"

I'm not defending these groups, or anything they say. In fact, I
don't even know what they have said to offend you (they're on HF and I'm not).

What bothers me is the gross generalizations in your statements above.
What make you think that you know how 600,000 ham operators feel about
anything? What makes you think that you know what issues are important
to anybody other than yourself and your friends?

You'd better be able to PROVE it, you sorry bastard.
I was listening, not QRMing, although an ill-educated dolt such as
yourself would not be expected to differentiate between the two.

It says quite a bit when these "Old-time" hams cannot even figure out
to use an ohmmeter to check continuity. These fools couldn't even wire
up a simple 4 pin mic jack/plug. They spent over an hour yesterday
trying to figure out the pin configuration for Badmouthing, hunchback
lovin' bob mxl yesterday.

Well hello, Jeff. Why are you posting your comments about the hams in rec.radio.cb in the rec.radio.amateur.misc newsgroup? Were you hoping the hams in rec.radio.cb would not see it? Don't worry, I'll post a copy of this into rec.radio.cb so that the ham operators in that newsgroup won't miss what you've been saying behind their backs.

You might also be interested in the fact that the U.S. military has been conducting terrorist threat war games with a theme of fighting right-wing groups within this country.

Even military recruits are getting this type of training. For example, all Army Basic Training recruits go through a week long field exercise as part of the training. The theme for this exercise at Ft. Leonard Wood (MO), and many other Army Basic Training centers around the country, is military personnel fighting right-wing groups right here in this country.

By the way, none of these military personnel are being taught about civil rights, the law, or the Constitution - they are being taught how to kill. And they are being taught how to kill members of these right-wing groups.

Who are these right-wing groups? Well, a training instructor at Ft. Leonard Wood recently described them as "white conservative men who

resist government control."

The plug has been pulled on the admitted qrmer KC8JBO, trashy qrmer from West Virginia. Mr Hollingsworth advised him in a no nonsense way to knock off the interference to amateur radio that has been coming from the utility shack he exists in.

Too bad "Sloophead", Mr Hollingsworth was advised long ago about your qrming. The decent hams of the USA can take credit for the removal of a screwball!!

Merry Christmas to my friends in the BARF, the STUMPJUMPERS AND the ARG!! May we have many more years of successful amateur radio. 1999 was a wonderful year for us, Porkbutt is gone, Herbie is still here, Big Al will be back shortly. Let us take time to give thanks for our blessings. And let us remember Mr Riley Hollingsworth in our prayers.

Poor Georgie, can't figure out a simple 4 pin mic plug. Mr. H. knows
ALL about W4FQF's activities of not iding, making comments and qrming
with over legal limit amplification. Your retesting should be funny,
Polly, because I doubt you could even pass the Novice element.

Too bad it was JUST A WARNING LETTER. In fact, despite many calls and a
written letter, Riley has YET to get back to me. I guess he doesn't put
too much credence in the braindeads that operate on 313.

For everyone's information, this is one post from Lloyd I can agree
with. And for anyone that cares...David began screwing with 3.950 in
1992. He then took the "war" to 40 meters, to a frequency used by
certain people of his "opposition group". The intent was to disrupt
them there also. Neither effort worked. And yes...David is a "fruit
loop."

Indeed there are no "rules", only guidelines as funnily explained in
news:FLwH07.JGG@tac.nyc.ny.us

Of course, following guidelines is boring, because you need not to follow
them, unless they are declared to be a rule. Oh well, questioning these
guidelines is just as stupid as the LID next door calling a DX-Station on
its own frequency instead of 3 up as announced. The results are pretty much
the same: You don't get a QSO with the DX-station, you annoy a lot of peple
and waste your time.

Have fun

Yes I agree but I don't think KK4TL would like it anymore than you do, and here we go again you have indirectly accused someone (KK4TL) of being your harasser, I don't see where I have caused any harm, I have never said or represented myself as you. I have never posted anything about you, I have only posted comments to you or commented on your posts. You post things on the internet that offend me and many others, you post items to the group with links to pages that spew racisim and hatred for others, not for their actions, but because of their race or religious beliefs, I have nothing to aplogize for, the only thing I am sorry for is this country has laws that protect people like you. If I had my way people like you would become nothing more than an organ donor. Sustanined on a life support system until all of your organs have been harvested and than cast away like a piece of trash. .

The Emily Postnews article was quite funny; thanks for pointing us to it. I particularly liked the bit about (N.B., "scrollaphobics") how it takes an _entire_ keystroke to get to the beginning or end of an article. Hilarious! (By the way, I seldom scroll: I mostly use the Page Up and Page Down keys to navigate.)

Trimming quotes and replying underneath quotes (or, when really necessary, interspersing your replies underneath quoted sections) are standards -- and they are standards for good reasons.

In many ways, Usenet is like a real life conversation. When discussing a complex subject, no one minds if you _briefly_ summarize the other person's position before you reply, just to make sure you've got it right.

But it would be bizarre to repeat, word for word, the other person's entire previous statement, even including his summaries of others' positions when you did so!

And it would be doubly bizarre to do so _after_ making your reply. It's contrary to any sensible standard of written or spoken communication, and it would be -- and is -- nearly impossible to follow.

If you are violating the standard, think about that block of quotes, and quotes of quotes, below your writing. These days, some of it was probably written with replies below; some of it with replies above; and some may respond one way while quoting material that was written the other way. With the logical flow of ideas thus totally scrambled, it seems extremely unlikely that anyone is going to read the mess.

Just delete it all, or carefully select the quoted points you wish to address and reply beneath them.

With every good wish,

--

Kevin Alfred Strom.

Stay tuned for some VERY BIG NEWS about 'ole Charles (the Clifton idiot). All I can say right now is that it has to due with AF2Y & the IRS. Posting will be this week after I get all the "hard copy" back.

I'm also starting to dig up dirt on KC8JBO.....It's funny to know what a friend who works for the IRS can get on these guys!!!!

And WB2OTK? 'Ole fatass is still selling his Amway junk door to door......hohohoho.

Never mess with a pitbull!!!

Table manners are guidelines too. You probably won't get kicked out of
a restaurant for complaining about the way the menu is arranged. Here
in adfp, however, we reserve the right to refuse service to anyone who
can't grasp the value of standards.
Don't let the maitre d' hit you on your way out.

That's what's really discouraging with the way people's behaviour is going these days : unless something is imposed on people and enforced by a law for which non-observance is sanctionned with death, people will just take guidelines as some infringement on their "civil liberties" and pour scorn on it.

The "I'm alright Jack" and "Fuck you ! You can't make me do anything !" attitudes really make me want to murder people some times.

Peeve: fucking freeloaders.

Knackos
P.S. in case anyone's thinking I'm an old fart : I've barely cleared the 30 mark.

4046. Newsline 1163 - 11/26/99

From: "William M. Pasternak" <newsline@ix.netcom.com>
Message-ID: <81ul0i$9um$1@nntp4.atl.mindspring.net>
Source record: 126320

NEWSLINE 163

Newsline report number 1163, with a release date of Friday, November 26 1999 to follow in

5-4-3-2-1.

The following is a Q-S-T. Post cyclone relief efforts continue in India, the F-C-C keeps the heat up in the U-S-A
and A-P-R-S tracks down a stolen car in Canada. All this and more on Newsline report number 1163 coming your
way right now!

(Billboard Cart Here)

**

HAM RELIEF EFFORTS CONTINUE IN INDIA

Ham radio is still providing much of the communications in the aftermath of a cyclone that devastated the Indian
state of Orissa on November 11th. As reported last week, the storm wiped out all normal lines of communications
into and out of the region. Much of the communications infrastructure is still in a state of disarray making Amateur
Radio an essential part of the relief effort. Jeramy Boot, G4NJH, has more on the post cyclone ham radio lifeline:

Pkg Here

Again, those frequencies are 14 point 135 and 14 point 160 MHz on the 20 meter band. Unless you are involved in
the relief communications effort, you are asked to keep clear of these two frequencies until further notice.
(G4NJH)

**

THE FCC vs. WA4JTK - LETTER NUMBER FOUR

The F-C-C's has written a forth letter to Alan Strauss, WA4JTK, of Carol City Florida. This, regarding his operation
as net controller for the 14.247 D-X Group Net. Newslines Bill Burnett, KT4SB, has this follow-up report from
Miami:

The November 19th note comes in response to a letter from Strauss to the chief rules enforcer Riley Hollingsworth,
K4ZDH. A letter that apparently questioning earlier notes to him. Also asking about alleged statements credited to
the FCC regarding net operations and callsign suffix only identification.

In his latest letter to Strauss, the FCC's Riley Hollingsworth reiterates that an earlier letter should be looked at as
a warning that the FCC does not consider this matter closed. It also reminds Strauss that the FCC will continue to
monitor the DX nets operations. Also that the FCC will expect the net to share the frequency and not
commandeer it from already ongoing Amateur Radio communications.

Regarding station identification. Strauss had apparently questioned statements attributed to Hollingsworth that
were allegedly made to at least one other ham. To quote Hollingsworth's response: "our letter does not conflict
with statements made to Mr. Wilson regarding proper identification. Our letter to Wilson plainly stated that
stations must comply with Part 97 of the Commission's rules."

Hollingsworth continues by saying what he has said before. That a station identifying by only two letters of its call
sign, that is not recognized or acknowledged so that it can eventually give its call sign within the time limits of
Part 97, is in violation of the rules. He adds that as long as Part 97 is complied with, it does not matter how a
station identifies in the meantime, so long as it is not deceptive.

>From Miami, I'm Bill Burnett, KT4SB, reporting for Newsline. Ken.

Hollingsworth's letter also reminds Strauss of something else in his earlier letter. A statement that two-letter
identification, where Part 97 is violated, must not be condoned by his net group. (FCC)

**

WIDE SIGNAL GETS SECOND WARNING

And a ham who the FCC claims to be transmitting an excessively wide signal on 20 meters has received a second
warning letter from the FCC. He is identified as Glen Craft, N5RQW, of Stringer Mississippi and last March 5th the
FCC wrote him regarding what the commission says is his unusually wide signal.

Now, more than half a year later the Commission has again written to Craft regarding the same situation. In his
latest letter to Craft, FCC rules enforcer Riley Hollingsworth says that Commission monitoring continues to indicate
that N5RQW has been operating on the 20-Meter Amateur Band emitting an unusually wide

signal or one that is
over-power, or both. But that's not all. Hollingsworth says that information also indicates that Craft may have
ignored requests from other licensees operating on adjacent frequencies to correct his transmitter emissions in
accordance with good Amateur practice.

Section 97 point 303 of the Commission's rules prohibits Amateur stations from occupying more bandwidth than
necessary for the information rate and emission type being transmitted, in accordance with "good Amateur
practice.". Also, Section 97 point requires Amateur stations to use the minimum power necessary to carry out the
desired communications.

Based on these rules, Hollingsworth has cautioned Craft that failure to remedy this type of operation may
jeopardize his Amateur Radio license. (FCC)

**

ACCUSED CALIFORNIA HAMS RESPONDS TO FCC

Two California hams accused of interfering with a repeater says that they are not the cause of the problem.
Newslines Roy Neal, K6DUE, has more:

Newsline has heard directly from Todd Young, W6TLY and Brian Frobisher, WA6JFK. The FCC had alleged that the
two had been the source of interference to a number of Southern California repeaters.

But Young and Frobisher say that they have never been the cause of interference to the repeaters and Young
says that he not even used these repeaters in a long time. According to Young, he left the systems after disputes
arose between one of the system owners and several users. Disputes that he says he wanted no part in. Young
says that he moved his personal on the air operations to other repeaters on 220 MHz and 70 centimeters. He says
that he first became aware of the accusations against him when he heard them on Newsline and later received a
copy of the warning letter from the FCC.

Since getting the FCC warning note, Young says that he has taken to listening in on the repeaters in question. He
says that he is hearing numerous unidentified transmissions and what appear to be tape recordings played on the
449 point 920 and 445 point 680 repeaters. But says Young, these transmissions are not coming from his station
and that he has told this directly to the FCC's.

Frobisher's story is very similar. He says that he received a warning letter from Hollingsworth claiming that

evidence had been collected that he was responsible for ongoing interference on the KJ6TQ and the Crescenta
Valley Radio Club's 2 meter and 70 centimeter repeaters. Frobisher says that he told Hollingsworth that the last
time he used the KJ6TQ machine was back in 1997. He says that he left the system after hearing a young woman
allegedly told not check into a net on the machine. Frobisher says that he also heard the system being turned off
in the morning hours when the same young lady was just making a call on the repeater.

As for the Crescenta Valley Club, Frobisher says that he has used the 2 meter repeater in question sparingly, and
only recently found out about the club even had a 440 MHz system. He says that he has done nothing on the
Crescenta Valley club repeaters that could be in any way be considered malicious.

>Roy Neal, K6DUE

Both hams tell Newsline that they have been in contact with Hollingsworth to discuss the allegations. According to
the F-C-C the matter is still under review. (W6TLY, WA6JFK)

*****

BREAK 1

This is newsline, heard on bulletin stations around the world, including the K-J-Zero-A repeater serving Maryland
Heights Missouri.

(5 sec pause here)

**

APRS TRACKS DOWN STOLEN CAR

For most of us, having a car stolen is a traumatic experience. But for one Canadian ham it became more of the
thrill of the chase. Newsline's Fred Vobbe, W8HDU, has more:

When Bill Guthrie VE6OLD of Bentley Alberta Canada woke up to find his van missing from his driveway, he did one
thing before he called the police. Bill ran down to the computer, and had a quick peek. Almost instantly, the APRS
beacon in his car told Bill's computer that his vehicle was enjoying a leisurely drive around the town of Red Deer.

Then, calmly, Bill picked up the phone and called the Royal Canadian Mounted Police. He reported the stolen van,
adding that they could recover it and catch the thieves if they sent someone the red to the Red Deer location.

They did, and the arresting officers got even more than they were looking for . It seems some young teens
needed a vehicle to haul their loot from a recent spate of break and enter robberies. Not only did the alleged
thieves get caught red handed for grand theft auto, but the stolen goodies in the van tied them to those other
crime scenes as well.

But that's not all. Obviously, the Royal Canadian Mounted Police wanted t know how the owner of a stolen vehicle
could possibly know where it was. That was an opening for VE6OLD to begin explaining the magic of Amateur
Radio's Automatic Position Reporting System. He also invited some of the officers to his house to demonstrate how
APRS works. The mounties were impressed.

>From Lima Ohio I'm Fred Vobbe, W8HDU, reporting for Newsline.

This is the second time we've heard of APRS helping retrieve a stolen vehicle. The first occurred in San Diego a
couple years ago. (N4NEQ)

**

INSTANT CORONATION IN THE BIG APPLE

Southern California is not the only area where last months D'wana Terry letter on repeater coordination is having
an almost immediate impact. New York City and the surrounding areas may soon find the 144 to 148 MHz repeater
subbands filled with repeaters trying to operate within 7.5 Khz of one another.

The idea to try to populate the splinter channels comes from a self professed instant coordinator calling itself the
Greater Metro New York Coordinating Committee goes forward. Headquarters in the town of Maspeth New York,
this group says that the time has come to make more repeaters available on the very crowded two meter band.

None of the F-M involved hams in the area that we have spoken with have ever heard of the Greater Metro New
York Coordinating Committee. They remind us that there has been no publicly recognized repeater coordinator
operating in the New York City for well over three years. That's when the problem plagued Tri State Repeater
Council went away.

With no radio gear on the market for hams to use on 7 point 5 Khz repeater centers, and none planned by any of
the major equipment suppliers, the Greater Metro New York Coordinating Committee is going have a fight to simply
survive. (Press release)

**

BUSINESS REPORT

A ham antenna company calls it quits and makes the announcement on a ham radio Internet Remailer. Don
Wilbanks, K-C-5-M-F-A has the information in this weeks ham radio business report. Don:

We start this weeks business report with word that yet another ham radio peripherals supplier is gone. According
to reports on the V-H-F Reflector, K-L-M Antennas has reportedly left the Amateur Radio supply business as of
October 31st.

>From the Newsline business desk in New Orleans, I'm Don Wilbanks, KC5MFA.

More with Don in future Newsline reports. (W6YX VHF Reflector)

GEORGE RACE WINS THE RACE

The ARRL Great Lakes Division will have a new Director and Vice Director in January, but the Director really is not
new. He is George Race WB8BGY and his selection brings him full circle in what can best be

called an ARRL election
dicotome.

Back in 1995, Race -- the Great Lakes Vice Director since 1990 --
assumed the Director's position when former Director Al Severson, AB8P resigned. In 1997, Race was defeated for
election to the Director's post by Joe Falcone, N8TI. But after only three months into his term, Falcone resigned.
This elevated then-Vice Director Dave Coons, WT8W, to the Great Lakes Director's . Race subsequently was
named to again serve as Vice Director.

Earlier this year Race filed nomination papers seeking to regain the top job in the Division. The ARRL Committee of
Tellers on November 19th to tally votes. The count showed that George Race, WB8BGY, had once again been
elected as Great Lakes Division Director edging out both Dave Coons and Murry Scott KE8UM in a three way
contest, bringing this odyssey full circle.

Gary Johnston, KI4LA, will be the new Great Lakes Vice Director. He defeated Lawrence Solak, WD8MPV. Race
and Johnston will serve three-year terms. (ARRL)

INSTRUCTOR OF THE YEAR NOMINATIONS SOUGHT

Still with League news, nominations for the ARRL Instructor of the Year awards are due to section managers by
January 31 st of 2000. For more information on both these items visit the leagues website at www dot arrl dot
org. (ARRL)

**

US NAVY ABANDONS RADIOMAN RATING

First the United States Military decided it no longer needed to use the Morse Code. Now the Navy is about to do
away with the last vestige of its ties to traditional terrestrial two-way communications. This as it announced that
it is abandoning the rank of Radiomen.

In a not so unexpected announcement dated November 4th, the Navy said that the rating of Radioman would be
changed to Information Systems Technician, effective immediately. The announcement said that the Navy made
the change because doing so is consistent with ongoing efforts to properly man and train its personnel to handle
the changing environment of the information age.

But the Navy has made one concession to the past. It says that in keeping with the tradition of the Radioman
rating, the rating badge of electronic sparks associated with the rating is being retained

for the new Information
Systems Technician. (Hudson Loop, TWIAR, published news reports)

**

AMSAT NET WEBCHANNEL MOVE

Bruce Paige, KK5DO, reports the Houston AMSAT Net has moved to a new Internet Relay Chat channel. Bruce
says that listeners will find instructions on how to connect to the new IRC site on the KK5DO home page at
www.amsatnet.com.

Bruce also says that the live stream Real Audio server is working and in order to listen to the live stream, you must
have the Real Audio G-2 player. A free basic version of G-2 is available for download at www.real.com. (KK5DO)

**

AO-10 QSB ALARM

Jerry Brown, K5OE, also from Houston asks over the AMSAT Remailer if you have ever been stuck trying to find the
AO-10 ham satellite and hear nothing but silence? Well Jerry says that he may have a way to know when that bird
is coming into range.

K5OE says that there appears to be an alarm of sots that he has noticed that alerts him when AO-10 is emerging
from a deep fade. It manifests itself as a low-volume carrier moving across the passband from high frequency to
low frequency at about 1 Hz and about 3 d-b above the band noise. Jerry says that all he needs to do is to keep
his receiver set to the downlink of 145.904 MHz. He can then go about his other business until he hears the
telltale carrier as it travels by this frequency. Invariably, the next attempt at an uplink to AO-10 produces a
return. (K5OE via Internet Posting)

**

DX

In D-X, Asia's biggest station A61AJ will once again hit the airwaves for the C-Q World Wide C-W DX Contest
November 27th and 28th. Ali Al-Futtaim, A61AJ, has invited last year's Asian record breaking multi-multi back to
Dubai. Team members started to arrive late on November 20th. While there they plan to do some minor
maintenance on the existing antenna farm and install two new antennas for 160 meters and multiple beverage
antennas for 80 and 160 meters. Look for activity on 10 through 160 meters, including 12,17 and 30 meters on C
W, S-S-B, and R-T-T-Y before and after the contest. Q-S-L via W3UR. (W3UR)

And W0YR, K6CT and HA5JI will be active as 3A/W0YR from Monaco from November 26th to the 30th. Activity
includes the C-Q World Wide C-W Contest. Q-S-L as directed on the air. (OPDX)

And less we forget a still very hot six meter band. There, Alan Steivenart, ON4KST, reports that November 11th
was a great day for propagation in Europe. Alan is in grid square JO20. On the 11th he heard and contacted
stations in Australia, Japan and South Africa. Talk about your truly world-wide six meter D-X. (VHF Reflector)

**

CHURCH BELLS IN VK

And finally, church bells down-under may soon have ham radio and C-B operators helping them ring. Q-News
Graham Kemp, VK4BB, says a famous ham is trying to make it happen:

VK2DIK Dick Smith, is Chairman of the National Council for the
Centenary of Federation, the still 14 months or so away.

VK2DIK plans to use CB and Amateur Radio operators for a project
to ring church bells in relays right across the continent from
Perth to Sydney.

It should take about two hours.

Everyone knows Dick Smith as an energetic, dynamo-like person with a clear idea of his targets and the paths he
needs to tread, to reach them.

This story in the Orange and District Radio Clubs newsletter came from their local Observer newspaper article by a
Mr. Graham Cooke and is the first that I, personally, have heard of Dick's plan to have the citizen radio and
amateurs share the ringing of celebratory bells for the Federation Centenary.

Nevertheless, when he engages with the WIA to organize for Australia's hams to help, I trust that each of us will
do our best for this historic occasion. After all, how often have CB-ers and radio hams ever been called-upon to
work together, let alone help coordinate the pulling of ropes to belt out tunes on bronze?

>Im Graham Kemp, VK4BB, of Q-News reporting for Newsline.

For those of you who have not yet made the connection, this is the same Dick Smith who brought his famous
Australian electronics chain to the United States over a decade ago.

**

CLOSE

With thanks to the ARRL, the F-C-C, the Hudson Loop, the Radio Society of Great Britain and Australia's Q-News,
thats all from the Amateur Radio Newsline. Our web page is at www dot a r newsline dot org and our e-mail
address is newsline at a r newsline dot org.

Before we go, we have an update on Newslines financial condition. According to Andy Jarema, N6TCQ, who is our
Support Fund Administer, Newsline has only received enough financial support to keep the service going though the
middle of December. In other words, the bills from October have been paid, but now money has to be raised to
keep from loosing the phones and e-mail service in as we pass into the new millennium.

Andy says that Newsline once again existing on a week to week basis. He says that once funds dry up, he pulls
the plug and Newsline will away. Its up to you the listeners to see that this does not happen. The address is the
Newsline Support Fund, Post Office Box 660937 in Arcadia California. The zipcode is 91066. Please help keep
Newsline on the air as we pass the threshold to Y-2-K and travel well beyond.

For now, with Bill Pasternak WA6ITF at our editor's desk, I'm Ken Butler, W1NNR hoping you had a Happy
Thanksgiving -- and we thank you for listening. Newsline is copyright 1999 and all rights are reserved.

4047. Yaesu Ft 100 Series Newsletter

How does where one places their Usenet reply make them any kind of
freeloader? The first thing a Usenet reader should see when they open a
message is the most recent info..that being the latest reply. Scrolling
down through requotes is a real drag..even if some of you have now decided
that way is some kind of " standard. "

>guideline than a rule. I have certainly never heard of anyone being
>kicked out of a newsgroup for failure to comply with this rule (assuming
>it is a rule), so it must not be that important.

Usenet is an anarchy - no one has the authority to kick anyone out
for using bad posting style.

But it's also a community. If you want to write something and have other
people read it, you should write in a way that makes it as easy as possible
for the readers to figure out exactly what you're responding to, and
exactly what you yourself have to say on the subject.

The "netnews protocol" of starting with the message you're replying to,
REMOVING everything that you can from it and leaving only the points
you're responding to, then interleaving those points and your reply,
facilitates this. It creates a posting that looks rather like a
conversation: they say something, you reply to it, they say something
else, you reply to that.

On the other hand, just quoting the entire previous article, either at
the top or bottom, creates a large "blob" of text that's difficult to
root through to find just what points you are responding to. With
modern threaded newsreaders, the whole article that you are quoting
is available to the reader with (typically) one keystroke even if
you *don't* quote it at all, so there is no need to include the whole
thing. It's pointless, and shows you don't care enough about making
yourself understood to edit the original article.

As a result, I generally read articles that have quotes and new text
interleaved in the form of a dialog, and I generally skip any article
that has a bit of new text at the top (or bottom) but most of it is
just quoting a previous article.

I figure if it wasn't worth your time editing the quote when writing it,
it probably isn't worth my time reading it either.

>> articles that contain more quote than new content.

> Your idea may prevent a short reply (such as this one), when a short
>reply may be adequate enough.

I agree that a strict new/old ratio test, without any threshold for very
short articles, is a bad idea.

The rule in the "junk checking" news posting software goes something
like this: If the amount of quoted text is greater than the amount of
new content *and* the amount of quoted text is greater than some
fixed threshold, then reject the message. I hope I explained this
in the article you were quoting.

If the threshold was 10 lines, it would allow through articles where
the quoted context is up to 10 lines, even if the new content is only
1 line. That seems fine. At the same time, it would reject most
articles where the whole previous article is quoted - which is the
desired effect.

Yes, you might occasionally miss an interesting article this way.
But by trashing all of the articles that are mostly quote, you get
rid of many articles that experience says aren't worth looking at.
Then you would have more time to read other articles in other threads,
or just finish reading news sooner and have time for a walk.

Dave

How appropriate that they call themselves BARF.. >>

<<Negative. I'd say, "Youse guys are sick,anyways." Furthermore here's
something to ponder. The festival of Chanukah predates the Christian era by
more than 1000 years.We know that the Maccabees revolted against horrendous
Greek rule with their false Gods in the month of December. The temple was
cleansed and the Greeks tossed the hell out to play with their Aphrodites. We
also know that Chanukah was a time for gift giving, especially to children.
With that in mind can anyone explain why the birth of Jesus, which the experts
pin down as being in April,was conveniently placed next to Chanukah except to
minimize and trivialize the great Hebrew holiday? And why Christmas is gift
giving time too? Sumpin's fishy.

I think it's about time for all Jews in this world to demand from the Papacy a change in the date of Christmas to April where it belongs!But then again how can it be moved since the Christians already put their Easter on top of our Passover? For cryin' out loud, can't you guys get anything straight? I suggest you find your own months for your own holidays and stop cramping us.

Not over here. The CQWW just concluded. Here in Asia the bands were wall to wall signals nearly around the clock. Activity was taking place higher in the bands than I've seen in past years. There was no shortage of DX or excellent, courteous operators. It was exhilarating to work blocks of W/K's from here on 40M. -- CW contesting seems healthy enough.

CW isn't about to die in many parts of the world. I often hear JA's, UAs, HL's pleading for W/K a response. Those guys dream of running a pile of NA stations or ragchewing with a W4 (big DX!) ....

I don't know where you got this "other 4 minutes" business, Timmy.

I clearly stated that the file is a six-minute series of excerpts
from a monologue of well over an hour.

> The guy
> "obviously" knows quite a bit about you, was your motivation revenge?

Although Berg's threats of violence are not proper, and though many
of his accusations are foul, revenge is not a motive. Stopping the
unidentified jammers is my motive. It looks like some progress is
finally being made in that department.

And as for Berg knowing "quite a bit" about me: that is hardly the
case. Virtually everything he says about me and my family -- except
for the statement that we live in Rochester, Minnesota -- is an
outright lie.

> One more question, now in the recording I couldn't really tell if the person
> was talking to anyone or not. The "other" 4 minutes of recording may be able to
> clarify this.

I recorded the entire evening of September 3d into September 4th on
3950 on the audio tracks of an eight-hour (T-160) VHS cassette. Send
me a T-160 and a prepaid return mailer and you can have a copy of
the entire eight hours, including preceding and subsequent QSOs.
Berg's monologue takes up perhaps a couple hours of that. A C120
cassette would hold most of the monologue if that's all you want.

> But, my question is, the tape that was played, how is that any
> different than the "tapes" k4gar plays every damn week on the liberty net?
[...]

The differences are that 1) K4GAR has permission of the copyright
holder to play the recordings, N0KED didn't; 2) N0KED played music,
K4GAR doesn't; 3) the QSO participants expect to hear K4GAR's
recordings and are standing by for them, N0KED wasn't in QSO with
anyone; 4) N0KED laced his tape-playing with obscenities and
threats, K4GAR never does that; and 5) K4GAR does not play tapes to
cause interference or when not in QSO, N0KED did.

> Kevin the tape isn't continous, you've edited portions and it's missing the
> complte 10 minute period. You obviously had some motivation for editing it,
> mind sharing that with us.
>
[...]

A six minute file of the highlights was about 2 megabytes -- a
pretty big download.

The full tape would have been 160 megabytes. Not only would no one
have been willing to download such a monster, but it wouldn't have
fit on my web server.

With good wishes to all,

--

Kevin Alfred Strom.

I'm interested in a little integrity kevin not an eight hour tape of your
excerpts.

>> But, my question is, the tape that was played, how is that any
>> different than the "tapes" k4gar plays every damn week on the liberty net?
>[...]
>

>The differences are that 1) K4GAR has permission of the copyright
>holder to play the recordings,

Let's see the permission

2) N0KED played music,
>K4GAR doesn't;

No K4GAR plays commercial content newgathering Broadcast tapes.
3) the QSO participants expect to hear K4GAR's
>recordings

Oh so now we determine what is legal or illegal by what the qso participants expect
S T R E T C H I N G a little aren't you kevin?
N0KED wasn't in QSO with
>anyone;

Not that we could tell from your blatantly edited "excerpts"
4) N0KED laced his tape-playing with obscenities and
>threats, K4GAR never does that;

hell no GAR just has "commercials" giving out 1-800 numbers after every tape.
and 5) K4GAR does not play tapes to
>cause interference

GAR's tapes cause interference all the time a as alate as last NITE SAT hitape playing caused interference down on 3945 and some of the fellas came up to tell him and were met with nothing but arrogance. As soon as the one tried to contact GAR he "knew" what it was about and wouldn't acknowledge him, he then started with his arrogant blurbs and name calling. NOW?

>
>
>
>> Kevin the tape isn't continous, you've edited portions and it's missing
>the

>
>The full tape would have been 160 megabytes. Not only would no one
>have been willing to download such a monster, but it wouldn't have
>fit on my web server.
>
>
Obviously it would serve YOU better to edit and "select" which excerpts and in what order to present them, regardless of the size of the file.

Try exhibiting a little integrity kevin, your tape is just more spin doctoring, even if he is guilty, misrepresenting the facts and events is quite dishonorable. Editing and selecting by cut and paste, which excerpts to use could make anyone look bad. hell if his statements were strung out over the two hour period that you claim he took they may sound innocuous. But, compiled into a 6 minute WB4AIO rendition of the events...things are not as they seem to be.

Ooh I am so scared.

Where have I used your call sign in a manner that would make me liable? Let me clue you in on a few facts, your so called call sign is an identifier issued by the FCC for you to use when your on the air, you don't own it, it is not your property, and it has no meaning on the internet. I haven't used your call sign on the air or the internet, just because there happens to be letters and numbers in my screen name that are similar to your FCC issued call sign, you feel like someone is doing something to you, I don't know what you are talking about, but then again, it appears that you don't even know what your talking about. You say that you think you know who I am, well I could care less. So you can report me all you want. AOL may do something but I doubt it considering your NOT EVEN A CUSTOMER, but if they do I can always find another ISP, like AOL is the only game in town. I am glad to see that you switched to Bellsouth as your ISP, it helps my portfolio grow just a little bit more. Thank you.

Unfortunately my computer is very spartan, without audio capability, so I can't hear these files. However, I did hear N0KED in QSO one night with KK7HO, K5BLB, and I think WB0CXJ and/or K1GKM. N0KED was trying to do a real smear job on WB4AIO, making all kinds of claims about Kevin's family, spewing forth all kinds of hatred and diatribes against WB4AIO, and so on. KK7HO and K5BLB really enjoyed this, and gleefully cheered him on. Obviously, the reason KK7HO is so upset about WB4AIO's recordings of N0KED, is because KK7HO doesn't want the truth to be known about one of his radio friends.

Integrity? Try a little yourself, KK7HO!

And, yes, I don't sign my name. But so what? It doesn't mean that what I say is not true!

Okay, I went to the article that you suggested above and it still
gives no clear guidelines about putting quotes and replies in a certain
place in a message.

Lets face it Peter, Usenet intentionally left the rules loose on
matters such as this to allow as much freedom as possible on Usenet -
they did not want to control Usenet to that degree.

Guidelines, taken as an obligation, are just as restrictive as rules,
and goes against the basic idea behind Usenet - the free exchange of
ideas and opinion. That freedom also includes how the person wants to
present his/her ideas and opinions.

That is your opinion, Dave. I don't agree that it is a "bad posting style."

> The "netnews protocol" of starting with the message you're replying to,
> REMOVING everything that you can from it and leaving only the points
> you're responding to, then interleaving those points and your reply,
> facilitates this. It creates a posting that looks rather like a
> conversation: they say something, you reply to it, they say something
> else, you reply to that.

But, if I'm following the conversation, than I don't want to read what was just said. I've already read it. For example, you quoted me at the top of your message. I already know what I said, so why do I want to read it again? Anybody that just read my previous message already knows what I said, so why would they want to read it again? All of us want to read what you said, not read over what was already said and already read.

So, my argument is that quoted material should be placed at the bottom of a message (unless you are commenting on pieces of a long message, such as this one). The only person this puts out is the person who joins a conversation in somewhere in the middle and perhaps did not read the previous message. However, in that case, he can just scroll down to read the quoted material.

> On the other hand, just quoting the entire previous article, either at
> the top or bottom, creates a large "blob" of text that's difficult to
> root through to find just what points you are responding to.

You're adresssing this to me like I have taken an opposing view on this. I have not said anything in defense of long quotes - my only dispute in this thread is the position of quotes and replies in a message (top or bottom).

In fact, I have said in previous messages that I agree that quotes should be short. Perhaps you would be better off complaining about large quotes to someone that disagrees with you.

Well, Ms Elizabeth, you don't have the power to "refuse service" to anyone in these newsgroups, and I think it is rather rude for you to even suggest that you do. You don't speak for anyone other than yourself, and you certainly don't speak for the others in any newsgroup, so please drop the pompus "we" when posting your opinions. Your opinions are yours alone, not the opinion of a group, so the use of "we" is entirely self-serving.

Hello,

I recently added a PREFIX look-up form on the QSL page. If you need to know where a prefix is from, simply enter the call or prefix and see what country it is assigned to.

You are invited to http://hfradio.org, a non-commercial site offering:

+ Azimuth Map / Equidistant Map Creation (choose any QTH as center, many options)

+ Propagational Resources (live, real-time reports, eAlert service (sign up for automatic email solar/geo reports, complete with Aurora index))

+ News, and DX information and reports

+ QSL Manager and Callsign Lookup center

+ Swap and Shop

+ FREE HOME PAGES THAT YOU CAN USE TO POST YOUR OWN HAM OR SWL SITE

+ Bookstore - SWL and Ham related books. Over a 1000 titles so far.

+ Plus more (Directories, etc.)

73!

Sure!! You have a 2 year grace period to renew your license without retesting. You cannot operate during this grace period.

Just get an FCC form 610 and fill it out and send it in.

You can go to a license site such as http://www.qrz.com and check the status of your license. As soon as it shows that it has been renewed, you can start operating again. The FCC has a site also but I don't know what that is right off the top of my head. I know the "QRZ" site is updated regularly and at most, is only a day behind the FCC records.

Depends entirely upon your definition of the term "service", now doesn't
it? Not to mention levels of rudeness. I was referring only to
alt dot peeves, m'boy, to which this thread has been cross posted. I
assure you, as far as newsgroup posting guidelines are concerned, that
group, at least, does indeed agree with me.
Tsk. Try to do a guy a favor and point out when he's got stray food on

I'm glad that you, of all stubborn fuckwits, have replied. I already had a good feeling about your what-the-fuck attitude and am glad to be able to address you directly.

OK : if you don't care about the re-quotes you're posting back and forth, don't care wheter anyone else reading your tripe should be interested in the re-quotes or not, could you then tell me why you include them in the first place ? You have a setting somewhere in your news/mail reader that says "Include original message in reply". Uncheck it. Would that be to much to ask ?

If you've got a problem with that because you've decided that to piss people off is one of your basic human rights, why don't you just attach a humongous picture of a close-up of your ringpiece chewing on a fresh turd to each and every mail you post on usenet ? It would definitely have the same effect and you'd be exercising your god-given right to be a fuckwit TO THE MAXIMUM.

The problem here is not even netiquette or bandwidth. It's a question of there being people who would really prefer if you at least pruned your replies. The real problem is that when someone says "hey, would you mind snipping a bit ?" your attitude is "why the fuck would I do that ?". And that is the attitude of a freeloader. A freeloader's satisfaction comes at the cost of the dissatisfaction of others. I spit on freeloaders.

Good advice, but out of date. The FCC has gone to a new on line data
base thingy called the "ULS" Universal Licensing Service I think. And
the 610 is defunct. Go to http://www.fcc.gov/wtb/uls/

Good luck.

Perhaps your right, I don't remember the "exact" date I heard it
first. But it was definetly in the 70s. You see I was in/out of the
country during the mid 60s to 1979. I operated briefly in the states
in 1974. I am reasonably sure I heard it then, if not, it was late 79
when I returned from Germany for the last time. But it was definetly
on LONG BEFORE you and Castle showed up. Thats a FACT JACK.

This is a crude attempt at sarcasism, right Tim? Even you are bright
enough to see a certain contradiction considering your stance against
the "Liberty Net" and THEIR RIGHTS.

>

It's easy to visually skip the careted quoted material, if you don't
want to read it; and many newsreaders, such as Netscape, even allow
you to make the quoted material show in a different color or type
size, which facilitates this.

> So, my argument is that quoted material should be placed at the bottom
> of a message (unless you are commenting on pieces of a long message,
> such as this one). The only person this puts out is the person who
> joins a conversation in somewhere in the middle and perhaps did not read
> the previous message. However, in that case, he can just scroll down to
> read the quoted material.
[...]

Not only does the standard protocol help the person who begins
reading a thread in the middle, but it also helps the person who
rejoins reading the thread after a day or two -- and these two
groups added together may well be the vast majority of readers.

Further, and most important, quoting at the top and replying
underneath or interleaved allows those who _do_ need to refer to the
quotes, and quotes of quotes, to see an orderly, sensible
conversation -- instead of a muddle of quotes, some in reverse order
mixed with some in correct order.

Navigating past quotes you don't want to read takes only a single
tap on the "Page Down" or "Ctrl-End" keys -- figuring out a jumble
of forward/reverse mixed quotes is often difficult, and makes
quoting almost a pointless exercise, and waste of article storage
facilities.

With all good wishes,

--

Kevin Alfred Strom.

> dangerous situation where we are left with only one "super power"

I still wonder if we didn't come teo your rescue too
quick..your 'good neighbors' who were trying to bomb you
back to the stone age would have done a REAL job on you if
we'd waited much longer. Wonder what your story would have
been then?

> which believes it has a God-given right to set itself up as the
> world's policeman.

Yeah, its a dirty, thankless job but your history has
proven that someone has to do it. I dont' like it, as you
fine folks should be able to hold your own as we have always
been able to, but.....

> In fact, this view has recently been expressed in
> several major European newspapers.

All of which would prefer the the OTHER superpower had been
the one that survived, right???

> I believe it was Senator Barry Goldwater who once opined that
> "Extremism in the defense of liberty is no vice". Hmmm ....

The hard decisions have to be made, don't they Mr.
Chamberlain?

HAMFEST/COMPUTERFEST CALENDAR 1999/2000 - NORTHERN ILLINOIS
last updated November 16, 1999 |

o Please report additions or changes to Bob Parnass, AJ9S, office phone: (630)979-5414, electronic mail: parnass@bell-labs.com. Thanks to Dennis Dale, Rick D. Wilson, Tom Harker, and ARRL for providing some of the information.

NOVEMBER 1999

Nov 13 (Sat), Wheaton, IL - Giant Computer show (see below). Dupage County Fairgrounds.

Nov 14 (Sun), Orland Park, IL Giant Computer Show & Sale (see below). orland Park Civic Center.

Nov 28 (Sun), Wheaton, IL - GMRS fest. Dupage County Fair- | grounds.

JANUARY 2000 |

Jan 23 (Sun) - Cicero, IL - Wheaton Community Radio Amateurs Mid Winter Hamfest - 2000 at the Chicago Motor Speedway. 3301 S. Laramie, Cicero. Located between Central and Cicero, between the Ike and the Stevenson. Tickets $5.00 in advance with 4 stubs. Free parking. Info: www.w9ccu.org or send email to hamfest2k@hotmail.com.

COMPUTER SHOW NOTES

Computer Central computer shows are held at the College of DuPage, Main Arena of the Physical Education Building Park Blvd & College Road, Glen Ellyn, Il. 847-940-7547. $5 admission with card, normal admission $6.00. Opens 9:30 am - 3:00 pm. See http://www.computercentralshows.com web site.

Giant Computer shows are held by Micro Media, Inc. Shows are usually held at the Orland Park Civic Center, 147th St. & LaGrange Rd., Orland Park, IL or at the DuPage County Fairgrounds, County Farm & Manchester Rds., Wheaton, IL. Admission is $6. Show hours are 9:30 AM - 3 PM. To get on the mailing list or get more information, call (708)974-3123. See http://www.giantcomputershow.com

Computer Country Expo is Lake County's largest computer
expo. The event is held on designated Saturdays from 9:30
AM to 3:00 PM. This show features computers, supplies,
games, parts, software, accessories, CD-ROM, monitors,
diskettes, printers, keyboards, modems, disk drives, cables,
expansion boards, services, etc. Lake County Fairgrounds,
Route 120 (Belvidere Rd.) & Route 45, in Main Exhibit Hall
Building #1=9720,000 sq. feet. For a show map, exhibitor
info, and discount coupon, visit the web site at
http://www.ccxpo.com.

You waste a whole post just for insults? Other of your posts seem to be the same, nothing but insults (>Deirdre What a dumb name! Bwaaaahahahaha!). Weren't you the one complaining of the big phone bill? Excessive quoting wasn't it? Doesn't excessive insulting bring up the phone bill also?

Well since you don't seem worried about bandwidth anymore, I thought I'd send you a little Basic program. Enjoy...

Take it easy Michael.....why all the use of the ' F ' word? Run out of meaningful vocabulary?

As they say - " Profanity is simply a weak mind trying desperately to express itself "

Take yourself and your weak mind someplace else........

4138. Changed my SMA to BNC on the Icom T-8

Newsgroup: rec.radio.amateur.misc
Date: 1999-11-30 00:00:00 UTC
From: "Adam T. Cately" <atcately@bright.net>
Message-ID: <38440F1F.80FEF718@bright.net>
Source record: 126217

I got tired of breaking those little bullet antennas designed for the SMA-style mounts on the new radios, so I spent a couple of hours one night and changed my T-8 over to a BNC antenna mount. It wasn't REAL easy, but it can be done, and it works SO much better now for me because I swap antennas all the time (that's MY personal problem, I know.) The stock SMA connector on the T-8 is a little long for those little dual-band bullet antennas and it pushes the middle right up into the cover. Not any more. Got an after-market duck for low-band, if I need it...

>>the real operators will come to the forefront. I think a NON-AMP
>>contest would go a long way toward evening the field and a lot more
>>just plain ole hams would get involved.

Let's say that 100w is "barefoot." Now, can you tell the difference
between someone running 100 and 1000 watts? It's only two S-units:
10log(1000/100) = 10 dB = 2 S-units. How can you be so sure that
anyone is running high power? One-hundred watts efficiently fed
into a beam with attention to all the fine details is going to
sound better than 1 kW inefficiently fed into a vertical.

> YOU SHOULD PROPOSE A NO CONTEST CONTEST WHERE YOU JUST TALK AND NOT
>RIP UP THE BANDS ALL WEEKEND BUT ARRL AND CQ WOULD NOT LIKE THAT THEY
>WOUNT SELL ANY MAGS THAT WAY..

Use the WARC bands if you're bothered by other folks having a grand
time (cursing at rush-hour traffic won't make it go away). Also, a
week consists of 168 hours; a contest might run as long as 48 hours
-- that's only 29% of the week (and not every week has a contest).

Historians have now proven that Emporer Constantine needed a way to keep the Holy Roman Empire unified, at the same time, different ethnic groups within the empire were celebrating xmas at different times. Each one was claiming their date was the right one, and that everyone else was wrong. This started small wars and skirmishes within the empire (sound familiar?!?). Emporer Constatine decided to move xmas to Dec. 25th, which also happened to be (at that time) a major pagan holiday. This way he united not only the christians in his empire, but non-christians, too.
It's amazing the things they show on the History Channel between world war two specials.

I would swear that when I first got my license, I got an offer
in the mail for a credit card with my callsign on it. I told
a friend about this, and they wanted to see it. I tried searching
the net and looking through my old files, but I couldn't find it.
Does anyone have any idea about what I'm talking about?

(Just to make it clear: I don't work with any credit card companies,
I don't want to make anyone get one, I don't want to get another
one myself, or anything; I just thought it was nifty that some
company was doing this.)

stewart@amouse.net writes:

> But, if I'm following the conversation, than I don't want to read what
>was just said. I've already read it. For example, you quoted me at the
>top of your message. I already know what I said, so why do I want to
>read it again?

I never quote *everything* that you said, I trim it to just enough to
provide the context for my comments.

And it isn't what you "just" said, it's what you said one or two days
ago, typically. You may well remember what you said in this thread
a few days ago, but it's not really there for your benefit. It's there
for the benefit of the third party who is reading this, and perhaps
vaguely remembers what you said two days ago, but who also read 10
other articles in the same thread, and needs a bit of help in determining
the context of my comments.

For this person, providing a *small* quote to give context makes it
much easier to read my article. Providing a *complete* quotation of
what you said does not, regardless of whether it's at the top or at the
bottom, because it's much more work to figure out what part is significant.
And completely leaving out what you said also makes it difficult, since
they actually have to switch to the previous message to read it.

Now, in case they're reading the whole thread at once, they don't need
this help. In that case, the quotes are clearly marked with >, and
can be skipped. If it's been a day or two since they read the previous
article, the quotes are helpful.

At least, they're helpful to me. They're helpful enough to enough other
people that they have become a convention - worth the extra effort of
the writers to put in.

> You're adresssing this to me like I have taken an opposing view on
>this. I have not said anything in defense of long quotes - my only
>dispute in this thread is the position of quotes and replies in a
>message (top or bottom).

And, in that respect, you do have an opposing view. I think that
quotes and replies should be interleaved.

Hello All:

I am preparing to "upgrade" the station here and some items are on the "chop" list.

ALINCO DX-70TH, HF/6M, Transceiver, near new condition. Comes with EDS-4 (remote cable kit) and EMS-14 desktop microphone. Radio does have the MARS/CAP modification due to MARS affiliation. Also have the MFJ-1272BYH TNC adapter for it. $650.00.

ICOM IC-2710H, Dual band transceiver, near new condition. Comes with the UT-104 CTCSS tone decoder module. Radio had the MARS/CAP modification due to MARS affiliation. Also have the MFJ-1272MYV TNC adapter for it. $350.00.

DENTRON DTR-1200L, HF amplifier, very good condition. Amplifier covers 80, 40, 20 , 15, and 10 meters. Unit has two very new Sevetlana 572B tubes (one year old, little use). Full output on all bands (~700W). $400.00.

JPS ANC-4, Antenna Noise Canceller, near new condition. $150.00.

KENWOOD AT-230, Antenna Tuner. Covers 160 - 10 Meters @ 200W. Very good condition. $175.00.

If you are interested in any or all items, please, e-mail me directly: n3yyp@arrl.net

I would like to move the items fast as the "new" stuff cost money (don't they all).

Cheers,

Cliff Owen

I have a FT101ZD that I can not get more than 60 w. pep out on any band or signal type. I just bought it this past summer. I thought the tubes were weak so I ordered a brand new set of 6146W (matched pair) and a 12BY7A tube from RF parts in CA. After installing them I have made no forward progress. I am still getting 60 watts at the max out. I have tried tuning the final output stage until I am blue in the face. I am making an assumption but I would think I should be able to get 100w at least.
Any help or suggestions would be great.
Thanks,
Mark

Have you considered the calibration of the watt meter? How about the power supply bias? Just a couple thoughts.

Hello; Has anyone had experience with sound stop or any other product similar to it?
I am building a new shack adjacent to a bedroom and need to make it sound proofed so as not to disturb the occupant of the adjacent bedroom. Any suggestions on sound proofing?
Any Help Appreciated. Direct replies are OK..
Thanks Rich

Anyways,

Here we are, Dec 1st 1999. One month before we all know what is going to happen. Y2K, or some people like to call "The end of the World as we know it" I really don't know what to really say. Anyways,

Could be we occupied by United Nations Troops? As a part of keeping peace during Y2K?

Could Bill Clinton declare martial Law? I heard there was a PDD to come effective Dec 7th that would begin National gun confiscation.

Anyways, Whatever the the outcome, Here in Athens, Alabama, We at Papa Johns Pizza might have "Papa Johns Pasification" We give free pizzas to unruly black folks down here in the rough neighborhoods. LOL! This is joke, but anyways, it was meant to lighten your heart!

From: rskup@my-deja.com
Message-ID: <81v9gj$g2t$1@nnrp1.deja.com>
Source record: 126351

I've only been on 2m since getting my license and am thinking about getting radio shacks 10m 25W SSB radio. I was thinking about using it in my car with a Wilson 1000 trimmed for 10m. I'm wondering how far I might get with it.

I already have an idea how far I can go on a 2m mobile, but no idea on a 10m mobile as described above--50 miles, 500 miles ???

Sorry if it's a dumb question, I just would like to try out the lower bands sometime and thought this might be an easy and inexpensive way to do it. It would also be nice to talk to someone who's further away than the next city.

Thanks,
Robert

This message describes the rec.radio.amateur.*, rec.radio.cb,
rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet
mailing list counterparts and complements. It is intended to serve as a
guide for the new reader on what to find where. Questions and comments may
be directed to Jeffrey Herman, KH6O, jeffreyh@hawaii.edu, or Paul
Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list
for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions
were held on the mailing list, and sent to the mailboxes of those who had
signed up for it. When the Usenet software was created, and net news as we
now know it was developed, a newsgroup was created for hams: net.ham-radio.

The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any amateur radio-related message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions.

There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the group includes Cary Oler's daily solar progagation bulletins, ARRL bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis-trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists
==========

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas. PLEASE BE SURE TO SAVE THE WELCOME MESSAGE YOU RECEIVE AFTER SUBSCRIBING -- IT WILL CONTAIN IMPORTANT INFO REGARDING UNSUBSCRIBING!

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send an email to cq-contesting-request@contesting.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to:
majordomo@piobaire.mines.uidaho.edu and only write:
subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's headers (before the first blank line). This will cause followups to your article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

: charity, and joy?

Lloyd, you post a helluva lot of HATE. I've read some of your neo-Christian Identity links, and they are filled with hatred of Jews and blacks. The only "love, charity, and joy" I see in your postings are your backslapping "Hail B.A.R.F.!" messages.

You feel "libeled" when someone comes online with the username "n0vfpsucks": ever consider how libeled the Jewish readers of this newsgroup must feel with your anti-semitisim? The basis of your "Christian Identitiy" belief is that modern Jews are satanic imposters, and not the "real" Jews of biblical times is historical libel, IMO.

The belief that people of English Isles descent are the "true" Jews of biblical times is utter nonsense: Jesus is supposed to have spoken the Aramic langauge, modern Jews speak Hebrew and other mideastern peoples speak Arabic: all of these are SEMITIC ROOT langauges. Cultures change and migrate, but their linguistic roots show their original origins. I defy you to prove any extensive semitic link to the English Isles. Please use mainstream sources, not 19th century crank tracts or 20th century fringey WWW links.

--Leigh Marrin/KM6JE in Santa Barbara, Calif.

P.S.: Given the recent violent history of right-wing fringe extremists, I strongly support the FBI's continued monitoring of them, although I certainly hope the FBI uses far better judgement in the next Waco or Ruby Ridge-type situation.

World wide DX is a real possibility with relatively low power on 10 mtrs. Just listen for openings. Not much power is needed when propagation is good on this band. You might even try DXing with a 10 mtr. bicycle mobile. (I once had some interesting results operating 15 mtr. QRP bicycle mobile.)

If the experts say that Immanuel(Jesus in Greek) was born in April, for what other reason than to diminish the Festival of Lights, Chanukah, did the goyim flop Christmas down right on top of it? Any biblical expert will tell you of Jesus's April birth but if April is chosen, then what do the Gentiles do with Easter which flops down on Passover to diminish it too? What's with all this flopping? We Jews must stop 'em from floppin'.Maybe it was the first Pope who invented the floppy disk? And what about this gift giving at Christmas? The idea was STOLEN from the significance of Chanukah. Chanukah predates Christmas by 1000 years, that's Y2K minus 3,000 for all the birdbrains who do not understand mathematics as well as the meaning and importance of the Hebrew holiday. The Greek idol worshipping beasts who desecrated the temple with their foul smelling statues of mythological gods and goddesses were attacked and beaten by the Maccabbes. The temple was cleansed and rededicated as prescribed while the Greeks got the hell out of the Holy Land to go back to Europe to open greasy spoons. Soon thereafter the concept of gift giving, especially to children, came into vogue and that idea was pilfered by the same jet set who decided to place Christ's birth on top of Chanukah since the Jews were making too much money in the toy business. That's when Saint Woolworth made the first toy metal fish to later adorn cars called goymobiles. Hell, that's as silly as catching a fish and seeing a Ford emblem displayed on its dorsal fin. I call on my fellow Jews to write or e-mail the Pope to lodge a complaint about the placement of Christmas. His address is Johnny@guidotown.com/ Then came the Reformation in Europe under the maniacal influence of a wannabe priest named Martin Luther commonly known in Rome as "Big Marty." Marty disliked all the money and power of the Holy See and therefore tried to muscle in on the setup. Pretending to hate, for example Catholic indulgences which meant that one could buy his way to heaven, which incidentally was an enterprise owned by a Jewish travel agent named Hyman Bialystock-it was called CLOUDS FOR YOU, Luther warned the Pope that he had better get some of that loot or he'd form a gang called Protestants who'd protest with weapons. And to add insult to injury, the rifle manufacturing plants were also owned by two Jewish guys named Siegel and Lansky. With all this detailed history before you, events that altered, illuminated and cheated Jews out of holiday significance, is there any wonder why beginning on Dec.1st a campaign of Christmas reform should not be begun? By resettling Christmas and Easter to other months, there will be none of this penny ante garbage between faiths about who can put up bigger and brighter symbols since the holidays won't collide any longer. Competition will end and everyone will be better off. Another chapter on divisiveness will end and in the holiday spirit we can all sing "St.Peter don't you call me because I can't go..I owe my soul to the company store" which by the way is owned by Sol Bernstein and Nathan Shapiro.

: I already have an idea how far I can go on a 2m mobile, but no idea on
: a 10m mobile as described above--50 miles, 500 miles ???

Robert, with the good radio conditions we are having now, you can sometimes talk for thousands of miles on ten meters with a mobile antenna and just a few watts.

However, I'd suggest you get a rig other than the current Radio Shack ten meter, as it does not have the second-most-used HF mode: CW. Someday you may actually want to try CW and/or upgrade your Tech-Plus to General.

If you can afford a few hundred dollars, I suggest finding a multi-band ham HF rig that covers the other HF bands you can use, 15, 40 and 80. The 15 meter CW Novice band is a lot of fun, as it can have a lot of real "DX" on it.

But if you just want ten meters, I'd suggest trying to find the older Radio Shack HTX-100 or a Uniden HR-2510, as both have CW. Once you get a decent 10 meter rig, you might also have fun monitoring or even working the several satellites that use 29 mhz as a downlink, like RS-13.

In any event, 'hope to catch you on the great ten meter band.

I believe there is also a meter adjustment that adjusts the relative power reading. I helped an old ham who had a concern that his newer Yaesu had low power out. He had somehow turned the meter adj. on the back of the rig. I have the ZD mark III as my HF rig and all indications show 100 watts plus. I do not have a calibrated power meter but my antenna tuners both show relative readings over 100 watts. Sounds very much like the meter is lying to you.

It's what I know, and anyways (statement taken from AF2Y) I'm just scared
about Y2K - Listen to David J. Smith on WWCR, and Brother Stair.

Hope you hold nothing against me

I seemed to notice this is a Bible course I took, and we must have been
talking about something other than just the Bible at the time-- Americans
seem to have a far, far greater concern for and attachment to life, as we
know it, than most Europeans. I began scratching my head at this and
seeking a reason, but it does appear marked. Do we have LESS of a belief in
the Bible and in sacrificing our lives for liberty than on other continents?
Are we far, far, far too selfish? (Don't answer that?) Does this stem from
the American Dream??

>> All of which would prefer the the OTHER superpower had been
>>the one that survived, right???
>
>Many of us are reluctantly coming around to that view ... yes.

I am not one who is holds some overly popular opinions these days-- that
America and that Christianity are grossly superior ways of life, as many
staunch, fervent folk must believe. They are ideals, and these utopian
ideals are far from reality. I came to realize that any and all religions
and governments developed with an ideal of what was best for that particular

culture and population. For extreme example, I do believe that Communism developed due to the excessive amount of uneducated peasant citizens of Russia. Uneducated, less intelligent types can not adequately make decisions regarding religious beliefs and government, therefore those of superior intelligence, wisdom, and education, the Wise Men, so to speak, developed an appropriate culture. Sure, the religion and the government deteriorated, corrupted, or what have you. We are, after all, human beans, are we not??

If one looks at things in that light, it puts us, citizens of a country governed by a President having sex with trash (or perhaps by the Media exposing this, ooooh.....), and probably not in much better of a light in forcing countries of differing cultures to conform to our "superior" ways, and thusly throwing them into a cultural tailspin taking years to recover from.

And that is my verbal diarrheal discourse (or Dat Course) for today......

Many blessings all,

Sue

>newsgroup of my own too?

Squatter's Rights, actually. Or a better monikker might be Scorched Liberties, taking a few too many flames. This group was abandoned (as are many were I tend to discourse). If you really want, you can have my (and truly created for me, but by a Hell Flames Wars member) old group, which was abandoned as it's not on lotsa servers. That'd be alt.fan.sister-pooh, my former life. This group's dead and all are welcome here, long as they put up with my opinion and occasional whining (I'm a h....h.....HOUSEWIFE!!.......from an Upper-Middle Class upbringing, snotty High School, Class of '75, then 75% Jewish and I a minority, 99% of them ran from this state upon graduation).

The best humorous ng I've been in for quite some time is welcoming Odd Folks, alt.dont.get.even.get.odd.

It IS possible to create your own ng (but the need's not really there--there are many abandoned where you can squat). Don't forget how easy it is to create your own online discussion list via OneList and several of the other new servers, at the push of a virtual button. They're kinda nice.

To all those concerned about me as exemplified by your e-mails and phone calls, I'm afraid I must now be candid and say that apparently the tapes collected by K2IVX and the phone and e-mail complaints about me by Bob Youngblood,KT4TR, "Quennie" Mort,K3QAM ,Tom Steckbauer,KE9RY, Jacques Vroom,W1ZZE and Malcolm Swan,AB4PW, have gotten me in serious trouble with Riley Hollingsworth and I'm faced with license revocation. The person mentioned as being in Clifton on Hap Holly's RAIN REPORT is indeed me. Apparently my battle against evil forces on ham radio have been in vain and at times, bad triumphs over good. I thank my friends for all their support and if you no longer hear me on the air, I wish all of you the happiest of holidays and a great 2000.

news:821pva$d0l$1@news1.Radix.Net...
| Hello All:
|
| I am preparing to "upgrade" the station here and some items are on the
| "chop" list.
|
|
| ALINCO DX-70TH, HF/6M, Transceiver, near new condition. Comes with EDS-4
| (remote cable kit) and EMS-14 desktop microphone. Radio does have the
| MARS/CAP modification due to MARS affiliation. Also have the MFJ-1272BYH
| TNC adapter for it. $650.00.
|
| ICOM IC-2710H, Dual band transceiver, near new condition. Comes with the
| UT-104 CTCSS tone decoder module. Radio had the MARS/CAP modification due
| to MARS affiliation. Also have the MFJ-1272MYV TNC adapter for it.
| $350.00.
|
| DENTRON DTR-1200L, HF amplifier, very good condition. Amplifier covers
80,
| 40, 20 , 15, and 10 meters. Unit has two very new Sevetlana 572B tubes
(one
| year old, little use). Full output on all bands (~700W). $400.00.
|
| JPS ANC-4, Antenna Noise Canceller, near new condition. $150.00.
|
| KENWOOD AT-230, Antenna Tuner. Covers 160 - 10 Meters @ 200W. Very good
| condition. $175.00.
|

| If you are interested in any or all items, please, e-mail me directly:
| n3yyp@arrl.net
|
|
| I would like to move the items fast as the "new" stuff cost money (don't
| they all).
|
|
| Cheers,
|

I'd have to guess at least general class since they were in the phone portion of 40. Maybe this is one of the reasons I've seen where the FCC is starting to re-test some VE licensed hams.

>Any help or suggestions would be great.
Mark,
From memory, the FT101 has a series of trimmer capacitors for each band
and also a couple of slugged coils for each band on the tx side. These
are accessible on the underside of the rig. The slugged coils have a
considerable effect upon the drive level to the finals and are worth
adjusting, particularly if the set hasn't been aligned for some time.
AFAICR, they are under a metal screen with access holes for a trimming
tool. Each hole is marked with the band.
The trimmer caps adjust i/p and o/p tuning for the driver, a 12BY7A.
This is from memory some 25 years ago, check the manual, it shows all
this info.

gl Trev G3ZYY ...-.-

PS, The above applies to the FT101B, I believe the 101ZD is similar.

I don't think you and I viewed the same video clip, Walt. I
saw demonstrators breaking store-front windows of privately
owned businesses, blocking traffic and taunting drivers (a
woman driver and her children were in a state of panic
because demonstrators were kicking her car and hitting her
windows). Fires were set, and delegates to the conference
were physically abused and prevented from entering the
venue. I think the Chicago police showed a great deal
of restraint facing such a riot.

The news showed the London police having to cope with
demonstrators, too. I like their baton techniques.

P.S. Why cross-post this thread to the DX NG, Walt?

No, the real shame is that you put yourself above everyone else at a time when a guy like me could really use a knowledgeable ham to help me learn what you know. I didn't even know what ham radio was until I was nearly 30. I've thrown away at least a dozen projects because I couldn't figure them out myself.

Get off your high horse, do something today, and quit living on your accomplishments of the past. The fellows that helped you out would be ashmamed to know you now.

4221. I bought an AOR SDU5500, what a mess!

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-01 00:00:00 UTC
From: Helmut Wabnig <hwabnig@aon.at>
Message-ID: <fjpa4s0m9d3a2l8kl5igrngh5q2lu5chab@4ax.com>
Source record: 126155
Cross-posted to: alt.radio.scanner,aus.radio.scanner,rec.radio.amateur.misc,de.alt.radio.scanner,alt.radio.scanner.uk

This piece of equipment is rather expensive, and AOR has
a good reputation, they know how to build radios,
so I decided to buy the SDU5500 spectrum display unit
without prior testing.

A complete disappointment.

The device generates so much HF noise in certain frequency bands
that it is impossible to scan for weak stations with the connected
AR5000. Scanning and displaying takes 2 seconds for one pass
which is too slow to catch eg. Acars transmissions.
No instantanious display of activity is possible.
Resolution is 5 kHz min, which makes the device useless
in shortwave bands or below. Remote control of the AR5000 from SDU
is tedious, the front end of the AR5000 is much better than
the SDU. Disconnect the data line between the units, then
frequency is not displayed. Would like a different software,
which could be flashed into the SDU unit.

The spurious radiation of the SDU can be fixed, or improved
at least, have done such work on various equipment,
no problem with this, but why did not AOR take care?

I advice everybody to spend their money on a surplus FFT analyzer
from Hewlett Packard or something similar, not this toy.

W.

P.S.:
For sale, SDU5500, brand new.

Also suggest you check with the manual on ALC settings and bias. Could be that the ALC is just throttling everything back. Is it the same on all bands i.e 60Watts on 10 thru 75? Often a clue there. I would not expect much more than 60 - 70 w on 10, so it looks like it may be bias / ALC or screen voltage. As other respondants state, also check your wattmeter or other measuring device. .

Why would it go out of alignment with modern stable components?

How many Hams twiddle their factory built sets regularly?

Any particular order or can you twiddle at random?

Gary7SLL, makes you wonder why the manufacturers spend all that money on
test gear when you can just twiddle for maximum smoke.

4230. Re: 4MHz VFO Circuit

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-01 00:00:00 UTC

Holy smoke! I trimmed the distribution a bit...seemed excessive.

You should be able to scale the frequency of a VFO on other freqs...in general, you can scale all the capacitors and inductors, though if you're not moving it very far, you can usually leave the bypass and coupling caps unchanged.

The oscillation frequency should be 1/(2*pi*sqrt(L*C)), where L is the inductor (usually only one inductor) and C is the net capacitance across the inductor. In practice, you might well have capacitors in series and parallel, and you have to just think about it from the inductor's point of view: what does the inductor "see"? You might want to include a guess for the input capacitance of the oscillator transistor, and maybe a little for the stray circuit capacitance, though at 4MHz all that should be a pretty small effect.

Usually one of those capacitors is variable, to get your tuning. There might be another one that's variable for trimming, and/or the inductor might be trimmable. But you can figure out the tuning range by plugging in the min and max values of the tuning cap while leaving everything else the same. You could do some math acrobatics and moosh your formula around to give you the tuning capacitor capacitance required for min and max frequencies you want to cover.

How do I do this sort of thing in practice? One easy, useful way is to use a spreadsheet like Excel. You can make a column of tuning capacitor values (corresponding to, say, 0degrees through 180 degrees rotation, in 20 degree increments), then a column of net total capacitance (the tuning cap combined with fixed caps), then the frequency (net capacitance and inductance, in the formula above). You can put all the "fixed" values into cells at the top, and use formulas in the columns that get the "fixed" values from those cells...then it's trivial to change one of the "fixed" values and see the new set of frequencies that results.

And you can plot freq versus cap rotation easily, and see visually both what range is covered, and how linear it is.

The spreadsheet lets me compare different parts values and also different circuit topologies quickly. I use spreadsheets for this sort of thing quite often in both hobby and professional work. They're not just for accounting!

Cheers,
Tom

There is an adjustment for the drive to the finals. Hopefully you have the manual and can look up the adjustment procedure. Insufficient drive is the only thing that will cause the radio to perform as you have described assuming you are using accurate metering equipment. You MUST neutralize the finals and then adjust the drive to obtain the proper output power. Do not overdrive the finals or you will materially reduce their life. You should be able to get 100+ watts out of the 101ZD on any band when coupled to a reasonable antenna system.

When you consider that Riley has a mandate to clean up ham radio, you must realize that Due Process is merely a dollars and cents issue. In the past, the FCC has been hesitant because of vast, potential expense. However, one delegee tilting at the mahlstrum of ham radio is different, especially when he can shortcut Due Process.

Using the FCC cloak, Riley can exercise arbitrary power. Right or wrong, he can shut you up or close you down. The burden will be on you to resurrect yourself. (Information for the wise)

You see, fellow hams, there is a difference between right and remedy. You can shout the righteousness of your position till hell freezes over. But if Riley concludes that taking you off the air is in the interest of his mandate, he will. And we all must admit that he is succeeding as Hercules did.

Of course, lots of lofty Constitutional principles and ham casualties are falling by the wayside. But in the war to rid ham radio of trouble, officials cannot be choosey. Consider: To preserve the Union, President Abraham Lincoln walked all over the Constitution.

4235. AF2Y Gets A Warning Letter!

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-01 00:00:00 UTC
From: Lloyd Davies <n0vfp@bellsouth.net>
Message-ID: <l4m14.5656$lc5.73149@news3.mia>
Source record: 126169
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.shortwave

This is the best news I have ever heard! Thanks for the Christmas gift Mr. Hollingsworth!

Well Done B.A.R.F members!

CLIFTON, NJ: The FCC notified Amateur Extra licensee Charles Schwartzbard, AF2Y, on November 22 that Commission monitoring information continues to indicate that the licensee has been operating on 20 meters "emitting an unusually wide signal or one that is over-power, or both." Special Counsel for Amateur Enforcement Riley Hollingsworth told Schwartzbard the FCC has information indicating that the licensee "may have ignored requests from other licensees operating on adjacent frequencies to correct your transmitter emissions in accordance with good Amateur practice." Hollingsworth cited FCC rules prohibiting Amateur stations from occupying more bandwidth than necessary for the information rate and emission type in accordance with "good Amateur practice" and requiring amateur stations to use "the minimum power necessary to carry out the desired communications." Hollingsworth asked Schwartzbard to certify that he has read and understood those sections of Part 97, which he enclosed. The FCC also requested information from Schwartzbard regarding his use of a linear amplifier, automatic level control, an microphone gain settings for his home and mobile 20-meter operations, as well as other relevant information. Hollingsworth cautioned the licensee that failure to respond fully and completely in a timely manner could result in administrative sanctions. Hollingsworth further cautioned the licensee that "airing personal conflicts with other licensees on the Amateur bands, or slander or deliberate interference of other licensees will result in the loss of your Amateur license."

>>contest would go a long way toward evening the field and a lot more
>>just plain ole hams would get involved.

It's a detriment to one's score to run high power; in many
contests, the less power you run, the higher your multiplier
will be. This inverse power multiplier handicap *does* even the
field.

I've lost count of the number of QRP clubs which sponsor international
contests. If operating 5 W or less (more points if your output is
one watt or less) is what you like, subscribe to the QRP email list.
Lots of home-brewers are attracted to that aspect of the hobby/service.

> YOU SHOULD PROPOSE A NO CONTEST CONTEST WHERE YOU JUST TALK AND NOT
>RIP UP THE BANDS ALL WEEKEND BUT ARRL AND CQ WOULD NOT LIKE THAT THEY
>WOUNT SELL ANY MAGS THAT WAY..

December 31: Straight Key Night is a non-contest in which everyone
rag-chews -- it's about the most fun non-contest contest!

getback <getback@my-deja.com> wrote:
: I do know that AF2Y has a treadmill that
: takes up about ten kcs of the twenty meter band, If you can blind your
: eyes to the fact, that is your problem.

How can I "blind [my] eyes to the fact" that AF2Y allegedly has a wideband jamming device when there is no obvious evidence? You claim to "know", but you won't share your information. How do you "know": does Lloyd's TinyTenna send you secret telepathic messages??

If you do have such evidence that AF2Y or anyone else is jamming HF, I strongly encourage you to contact the FCC. In the meantime, both you and Lloyd are doing more harm than good by encouraging others to waste Mr. Hollingsworth's time with UNSUBSTANTIATED accusations.

: I hate to think there is another Jew in the world like AF2Y. If there is
: and your are he, God help us.

This "thread" has been about AF2Y's alleged jamming: what does Doc's religion have to do with anything? Why are you suggesting I might be Jewish? What is your hang-up about Judaism?

: I find that most jewish people are very fair and I have no
: problem with them.

Glad to hear it, though given your strange comments in the previous sentence, I frankly don't believe you. You've made several BARF "Christmas Messages", so you appear to be a BARF member. I've seen the strange BARF homepage, with its links to other even stranger webpages that alledge bizarre "Judeo-Masonic" conspiracies. Lloyd, your high minister of miscommunication, is forever flaunting his "Christian Identity" beliefs: so do you also believe that modern Jews are "imposters"?

But 73 and Happy Holidays, anyway, Mr. Getback.

The fellow in Clifton,NJ who got "the letter" was not me but a new ham named Nate Snerdley of Vincent Street. He just got on with one of those KF2 something 2 x 3 calls and was unintentionally running 10 kw by way of a CBer who sold him a Harris amplifier that supposedly was running 1KW and had to be hauled in to this basement by six guys built like moose. I went to take a look at it and it impressed me more than W7CPA's stuff shown in a recent photo. Randy's stuff looks legal but he doesn't. I was quite suprised however by his small snoot since he come across on the air as if it touches the ceiling. Well anyway I helped Snerdley compose a letter to Riley because his English is terrible. Not Riley's, Snerdley's. He came over here last year from Hungary; Snerdley, not Riley, and he changed his name from a long one with nothing but consonants to an English one that sounded a bit like it did in Hungarian. And his first name is not Nate; it's something like Nachu or Nachos or Ninachusov. The guy's about 20 and being that I'm part Hungarian on the Traum side of the family and speak a bit of it, I got friendly with the fellow. An awfully nice guy who thought that the FCC letter was an invitation to a dance. When I explained that the Feds were after him and he might be deported, he ran to get his black leather jacket, cigarettes and sandals. That's how you tell the Hungarians around here. No matter the weather, you'll find them on street corners with slicked back black hair, puffing on a coffin nail, wearing green slacks, a T shirt, black leather jacket and in sandals with bare feet. In the snow too; I've seen it, anyways. Despite the Hungarian in me, I don't smoke; I don't drink and I don't run around with women which makes for a damn boring existence come to think of it. I have a few BROWN leather jackets, none black, since it symbolizes Marlon Brando in that wonderful motorcycle movie about a gang that invades a town and he's the leader who says nothing but, "Uh...duh...nah...yep...nope...wha.." which sounds a lot like 14.313 come to think of it, anyways.

Well. Well. it looks like the Clifton Treadmill Monkey AF2Y has his
tail in the gears. Personal attacks, wide signals, etc getright boy,
thats orders from "HEADQUARTERS", FCC that is! Get it all on the Rain
Report. Its gotta be Dr Hate!! Knock it off Treadmill Monkey or you
gonna be on the endangered list for sick primates..

C'mon Lloyd, not only do you represent yourself as a racist hate monger you also hate morse code too? Let me get this straight, you are the chief of communications for a group (B.A.R.F.) who communicates on HF, but because you won't learn morse code your not allowed to communicate on HF with the group...ROTFLMAO..., and the "JEWS" are the cause to all of your problems, I think YOU are the cause to all of your problems.

Well thats just dandy. From what I read I have to have a seperate dial-up connection to dial direct into their network to do online filing. Unfortunately I have a cable modem. I can't fit the little round connector into the little square connector. There has to be another way. I can't believe that they require anyone wanting to file for a change of address or renewal to have a computer..... I'll have to keep looking but thanks for the info just the same.

Put dead air space between the two walls. Say 4 to 6 inches of space between the bedroom wall and the shack wall. they can still be connected, use double drywall with overlapping seams on the wall closest to the bedroom, or all walls for that matter. Build the walls and ceiling "unequal dimensions. For example, one wall may be ten long by eight high, make the opposite wall different dimesions. Say,12'x8'.5". Also angle, pitch or multiple pitch the ceiling. Doing these things will break up the sound, eliminate standing waves and create an acoustically dead area. The sound proofing comes from double walls with air space inbetween. These "basic" principles are applied in recording studios and rehearsal rooms all the time.

: happen. Y2K, or some people like to call "The end of the World as we know
: it" I really don't know what to really say. Anyways,

If you don't know what to say, then try following the old saying: "Tis better to be silent and thought a fool, than to speak and remove all doubt."

: Could be we occupied by United Nations Troops? As a part of keeping peace
: during Y2K?

Lloyd, once again, you've REMOVED ALL DOUBT! I suggest you stop listening to fringey shortwave radio programs, and start reading the newspapers.

: Anyways, Whatever the the outcome, Here in Athens, Alabama, We at Papa
: Johns Pizza might have "Papa Johns Pasification" We give free pizzas to
: unruly black folks down here in the rough neighborhoods. LOL! This is
: joke, but anyways, it was meant to lighten your heart!

Do you suppose the black readers of this newsgroup found it funny? I'm certain that they must find YOU funny: a racist, anti-semitic buffon who disproves white supremacy with every unintentionally funny utterance.

So what do you do at "Papa Johns Pizza" in Athens? Do tech support for the Spellink and Grammar's chekkers used for their corporate e-mail, or are you a Field Service Representative, delivering pizza?

I feel the good black people of Athens should do their own "Pasification" (sic) program by taking pity on those mentally poor white people thoroughly confused by shortwave broadcast psychopaths. Perhaps some good ol' down-home soulfood will allay your fears of Y2K and UN-takeovers.

I agree with most of what you are saying. But I disagree with the manner in which you did it. If you feel as strongly as you do on this matter, why not sign your name and/or call? As for you being superior to the rest of us...well that remains to be seen. No man is superior to another in my eyes...no matter what his accomplishments in life. Jeez...look who the heck we put in federal offices....obiviously there are a lot of us inadequate people around.

Hmmm .. Leigh, you just may be on to something here. Maybe have the UN troops over for supper and serve collard greens and black eyed peas. And country ham. And sweet tea. And pecan pie for dessert. That should pacify them just fine.

This should be on a Saturday night. So after supper we could all belly up to the radio and listen to The Great Liberty Net The UN guys should get a big kick out of Doofus Jammer.

Now Leigh, since you brought it up, I'm going to have to ask you this. What kind of vinegar goes best with collard greens?
(I see you're from the "left coast", so you can think of it as a trick question.)

Here's another one, then. What's the difference between butter beans and lima beans? And why would you recommend collard greens instead of turnip greens or mustard greens? And why do they call it country ham? Does that make it the opposite of city ham?

One last one. Is Doofus Jammer a really a jammer or is he a KGB agent posing as a jammer so he can broadcast subliminal messages back to Moscow during Liberty Net time?

Just wondering.

4266. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-01 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <822iti$4dn$1@news.hawaii.edu>
Source record: 126272
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate audience, below is a list of the rec.radio newsgroups. In most cases, a group's name will explain its purpose. Cross-posting should rarely be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefixed with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-running thread results from a single cross-posted article, and its content drifts further and further away from being "on-topic" in the various NGs which receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups" posted on the 15th of each month.

Jeffrey Herman, KH6O
(rec.radio.amateur working-group)

*It's been sadly reported that the moderator was lost to us in an automobile accident; the future of this newsgroup is not known. 73 Bill...

Sorry, there's nothing nearby that would be soothing enough. The
Huntsville, Decatur, and Athens papers take their orders from THEM (TM).
And we all know who THEY (TM) are. He should listen more to WWV. I hear
they've gone to an all-"ambient" format. It rocks.

> certain that they must find YOU funny: a racist, anti-semitic buffon who
> disproves white supremacy with every unintentionally funny utterance.

You know Lloyd, I'm not in the mood to try to convince the world that
not everyone from around here shares your outlook. All I can say right
now is that it's because of that outlook that my home state is the punch
line for countless jokes TO THIS DAY.

Look at the fscking calendar! No, not the predicted UN invasion dates
you may have circled...just look at the number of years since the War
Between the States. You know, the one where the South fought to preserve
slavery and the North fought to preserve a resource base and neither
side really gave a fsck about the slaves themselves? Think about how

silly this Confederate fetishism will look in another 50 years or so. Many of us have much better things to do than regurgitate a false legacy of the Noble Cause (that goes for Northerners wanting to pile on as well; remember Andersonville - AND ELMIRA while you're at it).

The worst part about this entanglement of racism, bigotry, and anti-government paranoia, is that it makes people shy away from a healthy paranoia over the increase in our own government's control over the life of the individual, and its increasing willingness to use force to impose its policies. Bet you thought I was going to say everything's okay, huh? Not really. There is an palpable slide toward fascism right here in this country, "enabled" by the gullibility of its own citizens. It goes by several names: national security, the War on Some Drugs, the Fight against Domestic Terrorism.

So far it's been just fine for most people. Don't worry. Be happy. Buy Micro$oft.

But the infrastructure and the psychological conditioning are coming online rapidly. Metal detectors, teacher-conducted searches in schools. Monitoring of internet traffic by our government (and yes, private enterprise). Calls for increased monitoring (Australia's taking the lead here). A general willingness to turn in basic freedoms for, what is it this week - getting rid of child pr0n, or stopping terrorists? Abusive and bizarre confiscations of private property declared by law enforcement to have been connected with Some Drugs. I'd worry about these issues first, then I'd worry about the Blue Helmets storming into Limestone County.

I currently trust our government about as far as I can throw an old Hammarlund HQ-129 (mandatory ham-related content). I don't like what went down in Ruby Ridge. I don't like what went down in Waco. But I also don't like what went down in Selma, or in Berlin. Those were government actions too.

Finally Lloyd, you can't have it both ways. The disclaimers on your web pages are not convincing. You can't fear the real abuses of our government one one hand and ally yourself with purebred templates for oppression on the other. That's doublethink at best, deliberate bait-and switch at worst.

Some Libertarian.

Explain how I have "qrmed for years" with a Kenwood R-5000 RECEIVER,
which is what I owned before getting my ham license, then I after I
acquired my ham license I ONLY had a 2 meter transceiver. When I made
Tech Plus, and in 12/1998 was when I got my BRAND NEW FT-920, something
only a beer can gathering system for gas money.
Why are you using 20 year old technology in your shack?

Bob, Bob, Bob... still whining you whimp! Riley is doing a job that hasn't been done effectively since the late 60's. Your ham license is a privilege just like your drivers license. If you don't follow the rules, you'll get a ticket... you have the right to explain your position to the judge, but usually it's a question of guilty or stupid as charged.

You can access the new ULS (Universal Licensing Service) at

http://www.fcc.gov/wtb/uls/

You need to do this to register on-line (all FCC license holders
have to register on-line, though I don't recall the details on
how long of a period is being allowed). However, you need to call
an 800 number to actually renew a license, and, I assume, change
information such as an address. The number is 1-800-844-2784. QST
had a very good article about the process a couple of months ago
I registered and renewed my license (it arrived exactly one week
later) with no problems; it was even easy to set up the dial-up
connection profile in Windows 98. Once connected, the renewal went
smoothly using Netscape.

Here is an extract from the ULS Web site with support information:

ULS Status

The Universal Licensing System is currently operating.

If you are having trouble accessing the system at this time, or if
you have any comments or questions about this information, please
contact our Technical Support Staff at (202) 414-1250 or by E-mail
at ulscomm@fcc.gov

Please note: ULS Dial-up has been upgraded to support 56k modems.

Actually Dave, notice the silence coming from the NCI group? Amazing, a non member criticizing an organzation that he is not part of. I did that and the Bod attacked me at every turn. That NoCode Double standard again. Just wait, I am sure the NCI mouthpiece from MI will chime in any time now. Funny how it was not OK for me to discuss NCI policies while a non member but it's OK for a non ARRL member to have his say. Just shows that NCI is not what they profess as in ARRL.

just keeps on getting better and better

BTW, he sounds more like that Ploude guy than anything else. The two of them must share a common brain. Too bad, the batteries in it are so low.

Good observation, Gerd: the license is a privilege, not a right. Big distinction, giving the FCC more regulatory authority, tipping the scales of Due Process more in their favor. Thanks for your worthwhile input.

>
>Sue, dear, you're posting your comments to five NGs.

I posted to no ngs whatsoever. I replied to a bunch of posts posted here by some others. Period. I did not alter headers in any way, nor did I start any conversations.

It seems the question is whether I have a right to include myself in discourse which appears to be occurring in MY ng. I suppose I could ignore it, but why?? If the posts appear here, I assume that those posting desire those in this ng to read and join in. Would this not be an accurate assumption?

Looking up, you, and all others who began and since are conversing, all have 5 ngs listed at the top. Doesn't bother me. Does it bother you?? TELL THEM, NOT ME!!!

>>Perhaps those of you who are illegally crossposting had best stop such a
>>practice.
>
>Foot + mouth = sue.

sue= how stupid?

To reply and remove all but one ng, what kind of reply will I receive?? None whatsoever. And know what????? My reply will be received nowhere nor replied to BUT..... you can bet the post of those others will still show up in THIS ng!!

So

foot + Jeffrey Someone= one to stupid to recognize the truth.

Again I urge-- you are talking to the wrong person. Tell those posting in my ng to delete the name. I feel no need NOT to reply to posts posted here, INCLUDING YOURS WITH 5 LISTED NGS, doh.

Larry,

I believe that the XLR mic has a balanced feed system, and most HF rigs require an unbalanced microphone input. You may need to get an XLR to unbalanced line transformer for it to work.

Tim, you have a good point - The Intercon net makes the Liberty Net look like a Sunday School picnic - They (INTERCON) run people off of 14.300 every day. They even are pushing to have KV4FZ removed from the radio.

Read the THE KV4FZ Story at:

http://members.tripod.com/~N0VFP/KV4FZ.htm

Source record: 125996

So you've tried the truckers without response, urged everyone to influence the FCC by email, hoping Riley might respond to the truckers with something like the following: "The FCC possesses information that you may be interfering with legitimate net operation. You are required to respond, or you may be sanctioned."

Even under Stalin, the USSR had a few fairer systems to resolve conflicts. Folks, what are we doing: burning the Constitution to ashes to rescue ham radio? To some of us, justice by vote appears tantamount to unacceptable McArthy tactics.

Shouldn't the FCC retain the imperative of precision in allegations, so a man knows with what he's charged? Shouldn't we expect the agency to have direct knowledge of its allegations? Should the FCC be taking sides: Good vs Bad, when good and bad are usually a mixed bag? Is there any basic fairness in making justice subject of an email vote?

Think about it, fellow hams. Me thinks we should conduct the war on ham radio anarchy with some semblance of justice. Or would you prefer interning those suspected, as we did, the Japanese-Americans in World War Two. In the minimum, can we agree on an absence of witch-hunting???????????

4291. Computer Logging Program

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-02 00:00:00 UTC
From: Larry Benko <benko@aztek-eng.com>
Message-ID: <3847445A.E1C0275@aztek-eng.com>
Source record: 125997

I am looking for a computer logging program which runs under Win98/NT. I would like it to be usable for both DX/local contacts and light duty contesting. I also would like it to be able to import QSOs from a contest program such as WriteLog (ADIF format). I have downloaded Logger ver. 6.11 and the demo version of DX4Win ver. 4.05. I have played with both of these programs for several hours each and am pretty familiar with them. I do not have a need to import any QSOs from a previous logging program since I have been inactive on HF for a number of years and my previous HF logging was on paper.

Any suggestions or comments?

Thanks very much and 73,
Larry Benko, W0QE

I agree that Castle is not running with all his cylinders pumpin...but
now on to your problem...I just figured you out, me boy.....your a
frustrated no coder....you are chompin at the bit to be able to talk on
3.950 and join your "friends". How about working on your CW? Or are
you just waiting for the FCC to "Give it to you in Y2K?". I'll even
help you out. Do you have a HF receiver? I'm not too far, Ill send
you code practice...any day/night you want. You name it, when and
where, and what speed.

And as with most everything there is a price for this "service". Get
your general, and get the hotel off this newsgroup.

In all fairness, both sides of this discussion have valid points. I have found a lot of the "newguys" are really not willing to receive any help. They seem to "know it all". Others are afraid to ask because of previous bad experiences with "old fart know it alls". What say we drop the "superior" attitudes and go about the business of helping each other. Like we did BEFORE the ARRL and the FCC crammed the caste structure system down our throats called "incentive licensing"?

You know something Roger? I am willing to bet, and I'm not a betting
man, that if you took a poll here on r.r.a.r.m you would find a LOT of
people here have done smoke, pills, etc. Legal or otherwise. If you
are intent on keeping this stupid war going, why not use something more
reasonable...like his past ham radio, or internet activities? Or don't
you really know anything about it....really? Probably not. And if you
don't mind....keep my name and call out of your silly little crap
shoveling activities.

Thank You.

John,

How does the ARRL discriminate against nocode licenses?

This morning while treadmilling I had an excellent QSO with KA9PGT, Todd from Chicago, IL. in which we discussed the attributes and faults of Pete Rose andwhether or not he should be in the Hall of Fame as well as reinstated into Major League Baseball. After I signed, the tape recorder was still running while I prepared to go upstairs to shower after the workout. Incidentally I use a reel to reel recorder every time I'm on the air primarily as a defensive measure because it seems that tapes of me made by K2IVX and sent to Mr. Hollinsgworth have been very effective in creating a pack of trouble for yours truly. On the frequency appeared KE9RY who referred to me as his friend which I find highly insulting. Mr. Steckbauer than went into one of his famous rightwing monologues about affirmative action, sports and pro basketball in particular. He said he didn't see any merit in watching "10 freaks of nature run up and down the floor'" followed by the use of the term "boogie ball." I took no offense at his description of "10 freaks of nature" since the players, both black and white, are exceptionally and unusually tall, however "boogie ball" is something else. Unfortunately I have heard throughout my entire life bigots refer to men of color and especially Negro Americans as "boogies." And this is exactly what the bigot from Eagle Wisconsin meant. It is in violation of good amateur practices and if WB2OTK had to be put through the ringer for using perjorative terms while talking to N9GOR, an AfroAmerican, then I wonder if the same standards will apply to KE9RY when I send the tapes and letters of complaint to both Riley Hollingsworth and FCC Chairman William Kennard.

>John,
>
>How does the ARRL discriminate against nocode licenses?

Short version: By doing everything it can to perpetuate telegraphy testing requirements in the ARS. With your background, Bill, I'm surprised you need to even ask. For the last 25 years, the ARRL has done nothing but fight tooth and nail against any proposed changes to Part 97 that would have eliminated or reduced telegraphy requirements for amateur licensing. That seems to me to be about as discriminatory as you can get.

In the mid-1970's there was a proposed "Communicator Class" no-code license. This proposal was shot down, almost entirely on the basis of opposition by the ARRL.

In 1990-91, the current Technician Class (no-code) license was instituted by FCC, but ARRL fought against it tooth and nail every step of the way.

In January of 1996, the ARRL's board of directors realized that another round of discussions about license restructuring was upcoming, and created a committee to look into the matter. That committee's report was submitted to the board in December of 1996, the results appanages in QST in February 1997 if you want to refer to them.

The board formally received the report in January 1997 (although the committee reported to the board a month previously). This committee made a number of recommendations for changing the license structure at the entry level, which reflected the fact that the no-code license had become the primary entry level license as opposed to the Novice Class license with its code requirement. The board received those recommendations, which also appeared in QST, but the board took no action on the report or on the recommendations of the committee.

Another year went by, the board met again in July of 1997, and again in January 1988, still the board took no action on the recommendations of its committee which were based on the opinions of ARRL members. The board took no action until after February of 1997 when FCC indicated that it was going to examine the matter with or without ARRL input.

Then, of course, the ARRL board was forced to come up with its own proposal for license restructuring...which, of course, includes no HF

privileges whatsoever for no-code licensees.

In the FCC's own NPRM (see WT Docket 98-143), the Commission makes several references to the inappropriateness of continuing to require code testing for amateur radio licensing. I quote from the NPRM:

"In the early days of amateur radio, radiotelegraphy was the primary communication mode of all radio operators, including amateurs. Testing for knowledge of Morse code telegraphy was necessary to ensure that amateurs could recognize and stay away from Government and commercial stations as well as stay clear of maritime distress messages. Today, radiotelegraphy is just one facet of many diverse modes of radiocommunication that require a technologically literate licensee. In 1990, in response to the sentiment of the amateur community, we established a codeless Technician Class operator license. In so doing, we stated that the amateur service should attract technically inclined persons. We also stated that we believed that telegraphers would be in less demand than electronics and communications experts. Therefore, we provided an entry level opportunity to otherwise qualified persons who found that telegraphy was a barrier to pursuing the purposes of the amateur service. Those purposes include encouragement and improvement of the amateur service by providing opportunities for advancing both communication and technical skills, and the expansion of the existing reservoir within the amateur radio service of trained operators, technicians and electronics experts.

"The decreasing role of telegraphy as a communications mode also is demonstrated in our implementation of the Global Maritime Distress and Safety System (GMDSS). In permitting GMDSS to replace the mandatory Morse code equipment and operator, we recognized industry movement to newer and better technology for distress situations. The GMDSS relies on satellite and automated terrestrial communications systems for distress and safety communications. The Commission noted that by incorporating these advanced communications techniques into the safety system, GMDSS would significantly improve safety of life and property at sea throughout the world."

Despite the above observations by FCC, the League continues to oppose any HF privileges without code testing. The ARRL comments relative to the examination of the international radio regulations pertaining to the code requirement for amateur radio, merely proposed reduced speed requirements and a different method of testing. The ARRL did not say anything about eliminating the code requirement completely at the WRC conferences in 2001, just that the Commission should lower the speed levels and change the testing procedures.

The League even took a swipe at examinees with a disability by requesting that examinees be required to attempt the higher-speed telegraphy examination before examination credit is given pursuant to a doctor's certification. In addition, the League requested that VECs be authorized to request medical information from the certifying physician pertaining to the examinee's disability.

These issues are a moot point if the higher CW speeds are eliminated, since in that event, a person with a disability would not have to apply for examination credit. The League proposal merely places an unfair burden on examinees with disabilities, as well as invading their privacy and ignoring the principle of doctor/patient confidentiality. Nor would this proposal do anything meaningful to combat abuse of physician certification procedures. The proposal does nothing except serve as a vehicle for the League to throw up yet another roadblock to people getting HF privileges without first jumping through what the League feels are the appropriate hoops.

To me, it seems obvious that this is the true aim of the ARRL. I, for one, feel that the ARRL agenda is not in the best interests of the ARS and thus I am not about to join such an organization.

Therefore, I state for the record that I have not and will not become a member of ARRL until such time as the League supports a proposal for amateur radio licensing that grants at least some meaningful HF privileges to no-code licensees for voice and data operations.

Gary, I usually find your comments interesting, but lately your useful output (which admittedly can be considerable) is being hidden by a smokescreen of rather snide comments such as that above. Indeed, the FT101 can be adjusted for max smoke with or without the aid of a power meter; taking care not to overdrive the finals and to check neutralisation (all in the manual).

You will note from my comments above that the FT101 series is over 25 years old. Modern it is not!

That, by itself, is not discrimination as I see it. The ARRL
can't be all things to all people. You may not like their
stand on the code issue, but their position doesn't make
them discriminatory towards nocode techs. Indeed, if I
use your logic, the Extra's that want to retain the status
quo can also argue that the ARRL is discriminating against
them because the ARRL supports lowering code speed tests.

>In the mid-1970's there was a proposed "Communicator Class" no-code

>
>Then, of course, the ARRL board was forced to come up with its own
>proposal for license restructuring...which, of course, includes no HF
>privileges whatsoever for no-code licensees.

Like it or not, there is still an ITU treaty requirement that
calls for code testing to operate below 30MHz.

>In the FCC's own NPRM (see WT Docket 98-143), the Commission makes
>several references to the inappropriateness of continuing to require
>code testing for amateur radio licensing. I quote from the NPRM:
>
>"In the early days of amateur radio, radiotelegraphy was the primary
>communication mode of all radio operators, including amateurs. Testing
>for knowledge of Morse code telegraphy was necessary to ensure that
>amateurs could recognize and stay away from Government and commercial
>stations as well as stay clear of maritime distress messages. Today,
>radiotelegraphy is just one facet of many diverse modes of
>radiocommunication that require a technologically literate licensee.
>In 1990, in response to the sentiment of the amateur community, we
>established a codeless Technician Class operator license. In so doing,
>we stated that the amateur service should attract technically inclined
>persons. We also stated that we believed that telegraphers would be in
>less demand than electronics and communications experts. Therefore, we
>provided an entry level opportunity to otherwise qualified persons who
>found that telegraphy was a barrier to pursuing the purposes of the
>amateur service. Those purposes include encouragement and improvement
>of the amateur service by providing opportunities for advancing both
>communication and technical skills, and the expansion of the existing
>reservoir within the amateur radio service of trained operators,
>technicians and electronics experts.
>
>"The decreasing role of telegraphy as a communications mode also is
>demonstrated in our implementation of the Global Maritime Distress and
>Safety System (GMDSS). In permitting GMDSS to replace the mandatory
>Morse code equipment and operator, we recognized industry movement to
>newer and better technology for distress situations. The GMDSS relies
>on satellite and automated terrestrial communications systems for

>distress and safety communications. The Commission noted that by
>incorporating these advanced communications techniques into the safety
>system, GMDSS would significantly improve safety of life and property
>at sea throughout the world."
>
>Despite the above observations by FCC, the League continues to oppose
>any HF privileges without code testing.

Not true. The ARRL proposal called for nocode techs to be allowed
to operate CW on the former Novice segments WITHOUT having
passed a test. Furthermore, the FCC also acknowledged in the NPRM
that there is an ITU treaty requirement calling for code testing to
operate below 30MHz.

>The ARRL comments relative to
>the examination of the international radio regulations pertaining to
>the code requirement for amateur radio, merely proposed reduced speed
>requirements and a different method of testing. The ARRL did not say
>anything about eliminating the code requirement completely at the WRC
>conferences in 2001, just that the Commission should lower the speed
>levels and change the testing procedures.

But that doesn't mean the ARRL discriminates against
nocode techs. It merely indicates that the ARRL position
is not one in which you agree.

>The League even took a swipe at examinees with a disability by
>requesting that examinees be required to attempt the higher-speed
>telegraphy examination before examination credit is given pursuant to
>a doctor's certification. In addition, the League requested that VECs
>be authorized to request medical information from the certifying
>physician pertaining to the examinee's disability.
>
>These issues are a moot point if the higher CW speeds are eliminated,
>since in that event, a person with a disability would not have to
>apply for examination credit. The League proposal merely places an
>unfair burden on examinees with disabilities, as well as invading
>their privacy and ignoring the principle of doctor/patient
>confidentiality. Nor would this proposal do anything meaningful to
>combat abuse of physician certification procedures. The proposal does
>nothing except serve as a vehicle for the League to throw up yet
>another roadblock to people getting HF privileges without first
>jumping through what the League feels are the appropriate hoops.
>
>To me, it seems obvious that this is the true aim of the ARRL. I, for
>one, feel that the ARRL agenda is not in the best interests of the ARS
>and thus I am not about to join such an organization.

Indeed you are certainly free to join or not. I just disagree
with your broad brush characterization of the ARRL being
discriminatory against Nocode Techs because the ARRL
position isn't 100% in agreement with what you want. The

ARRL position isn't 100% in my opinion either, but I don't feel
discriminated against because of that.

>Therefore, I state for the record that I have not and will not become
>a member of ARRL until such time as the League supports a proposal for
>amateur radio licensing that grants at least some meaningful HF
>privileges to no-code licensees for voice and data operations.

As is your right.

Cheers,
Bill K2UNK

Actually, like it or not, the ARRL is the only organization trying to promote
radio that the Feds WILL listen to, with any amount of decent consideration.
Everyone else the Feds listen to, as regards radio, are self-serving
commercial industry lobbyists...
If more people joined the ARRL they could effect some change rather than leave
it and let them dry up and blow away.
Mike

Subject: Re: GB> WNU/WCC/KFS/KPH CW QRT (fwd)
I worry about the future of maritime communications. We have most of our eggs in one basket: satellite communications and the SITOR stations really don't have enough traffic to survive financially, in the long run, without government support. I don't really see Globe Wireless (KPH/WCC/WNU) and Mobile Marine Radio (WLO/KLS) being around 10 years from now.

On most of my voyages, even though deck officers have the new GMDSS licenses and are now doing much of the communications work, they often don't understand what they are doing.

The GMDSS false alarm rates still exceeds 95% due to transmission errors, improper forwarding of DSS transmissions, etc. Either the deck officers make the mistakes themselves or they get exasperated and turn the equipment off. Thus the reliablility of the GMDSS system for ships that are truly in distress is being compromised.

This has been a subject at internatinal conferences but no one wants to "rock the boat" and admit that the GMDSS system isn't perfect and that a licensed WELL TRAINED operator is still needed. Cost savings are the orders of the day.

It will take a major maritime tragedy before this is truly addressed.

To answer your question: Last year, when I got my GMDSS license, the FCC was still offering the commercial radiotelegraphy licenses thru the volunteer examination system. It may have changed by now but I doubt it - I've heard of no regulatory changes and the FCC is always slow to react.

73,

(ex-maritime Radio-Electronics officer
and ex-owner/operator of WKM/West Haven, CT
Radio).

Absolutely. Even though KC8JBO and AF2Y are both facing revocation hearings, they continue to show their stupidity here in the news groups and STILL are jamming on 20 and 75 meters. You just cannot fix stupid.

>
> >John D. Kasupski

Actually... The leage was not very conducive to the average person
for a long time. But the only way to get things to change is to be a
member so you have a RIGHT to bitch. And the league HAS come
around. They weren't the initial impetus for no-code or novice
enhancement. In my opinion, that was all the result of the original
efforts by the QCWA. Yep, the old farts! Soon I'll be proud to be
a member there. The league 'came on board' once the ball was
rolling.

As to this resturcturing... Well, again, the league seemed officially
quiet until NCI was getting ready with their proposal, then the FCC
made some noise, and everybody seemed to panic to get 'something'
out. Prior to that, while the league was 'quiet', from the trenches
there was a perceived attitude of 'status quo'.

So give the league credit, they are 'waking up', and it is unnerving
some,
and making some radical suggestions. But just remember that it was
originally the league, I believe someone named DeSoto, who originally
proposed 12 and 1/2 WPM CW as a requirement to officially "Limit
the number of HAMs" back in the 1930's. The FCC didn't like the
1/2, so they made it 13WPM, and we've had it in one form or another
ever since. And yes, it was OFFICIALLY to "limit the number of
operators". But don't shoot the current league management just yet.

Let's see what comes out of the latest firestorm.

As to the suggestion to drop league membership for not supporting the 'status quo' on CW? Does anyone think the league wants to wither and die? Seriously, they are going to go where they can be alive and be a viable influence in the future, and that sure ain't gonna be the "CW or die" crowd once things change.

You sound like another guy painting himself as a victim. Neither the
ARRL nor the FCC is guilty of "discrimination" against those who have
not passed the code. They've obtained amateur radio licenses with
certain privileges. If you wanted to expand those privileges, the same
avenues open to others are open to you.

73 and I already enjoy good DXing,

Forgive me, but since I don't know you and since I'm a skeptical individual by nature, I'll believe it when I receive an issue of QST and a membership card and all that other stuff they talk about when they send you their new ham package shortly after you get a license. But assuming for the moment that you actually did this...WHY? So that I'd have a membership to cancel? Please explain.

>Dork. The League was instrumental in creating the no-code tech license.

As I recall, ARRL was dragged kicking and screaming into the no-code Tech era by the FCC, following the loss of part of the 1.25 meter band due to underutilization and after the FCC flat out told ARRL that since it had opposed the Communicator Class license in the 1970's and since the bands above 30 Mhz were underutilized partially as a result of ARRL's stubborn resistance to no-code licensing, that the Commission could no longer guarantee the continuance of ARS allocations in VHF/UHF. The only way ARRL was instrumental in creating the no-code Tech license is that their previous opposition to no-code licensing set the stage for the loss of part of 1.25m to the ARS - a loss which served as a wake-up kick in the pants to the community. Without ARRL opposition, we'd have had no-code licensing some 15 years sooner, and we might still have all of the original 1.25m band, too.

Well, here we may have a common interest, OM. Do you still listen to CG comms? I've been an SWL for some 33 years. I have a receiver here that's parked on one USCG frequency or another all the time, usually one of the safety of flight frequencies, but sometimes on 2182.0 or on one of the SCN frequencies. CAMSLANT's signal is impossible to NOT hear here when they're on the air, and I hear the aircraft CAMSLANT is talking to more often than not, but it's not at all unusual for me to hear CAMSPAC and aircraft working CAMSPAC. I've also logged CommSta Kodiak a few times, and also caught Group Honolulu on HF at least once that I can recall. So those CG signals from the Pacific area do make it up here to the northeastern U.S. fairly regularly. Depending on how long it's been since you were at Point Reyes and/or Honolulu, who knows, I might even have heard you on HF in that capacity?

I've also logged some cutters - probably less than a dozen, though if I went through my logs and counted them I might surprise myself - but I'm pretty sure all of those were in the Atlantic when I caught 'em. A few that come to mind because I logged them more recently are Monomoy, Spencer, Hammerhead, Legare, Point Batan. Then there's GANTSEC and countless stations working antidrug interdictions on the "secure" channels and on the DEA/Customs COTHEN freqs, which I can't really identify properly from their trigraph tactical callsigns, but which I know are CG assets because I'll also here them on 5696 or 3E11 working CAMSLANT or GANTSEC. Then there are countless fixed-wing aircraft and helos. One helo from CGAS Cape Cod I have even logged on four bands - on HF talking to CAMSLANT, on VHF-FM talking to Group Buffalo, on UHF talking to another helo, and on the civilian aircraft band talking to the tower at Niagara Falls IAP. And various other Group stations, including Group Buffalo, have also been heard on HF here, the most recent being Group Miami earlier this week. So, I found it interesting to see the CG callsigns in your signature lines.

73 and good DX'ing,
John D. Kasupski

4342. anyone made a HF mic from an XLR mic?

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-02 00:00:00 UTC
From: law <law@nh.ultranet.com>
Message-ID: <3846F8F1.AEEFF60D@nh.ultranet.com>
Source record: 126078
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

I was wondering if someone has successfully taken a regular mic
($30 Radio Shack
from ~15-20 years ago) and made a HF mic. I have a yaesu FT-920 and
thought it
should be relatively simple but am not sure what pins to use on the
8-pin mic jack vs. the 3
pins on the XLR mic. I used an meter and 2 of the XLR pins seemed to go
to ground.
Do I bring the signal pin of the XLR to the PTT pin of mic jack, and the
GND on XLR
to the GND or MIC GND of the mic jack? And then just put a simple
momentary switch
in-line with the ground or signal to make it go into xmit mode? I
believe the mic and the jack
are both at 600 ohms but I could be way off.

Any response would be appreciated.

Only problem is that the cutoff date was 12/1/98, a year ago, not today!
We're still waiting. The last note that I read in the ARRL members-only
section a week or two ago was that there was optimism that the FCC would get
around to releasing a decision fairly soon (by year's end)?

Lloyd Davies admits what a lot of others are thinking:
>I'm just scared
>about Y2K - Listen to David J. Smith on WWCR, and Brother Stair.

It's been done before, Lloyd. Fear mongers making a wad off of people who will listen to them and buy their books. The technology is different now. They're selling video tapes, survival kits, gold coins, portable generators, etc. But the message is the same as ever. And the profits are greater for them.

If you need a portable generator, wait till about Jan. 15, 2000. You should be able to take your pick of new Honda's at about 9 or 10 cents on the dollar. Even bigger bargains will be had on videos that give absolute, irrefutible, conclusive proof that the US goes to hell in a hand basket on Jan. 1, 2000.

Don't take my word for it. Look up some information on the Millerites. Date setting preachers are NOT a new thing. And these date-setters have never had a shortage of gullible "believers" who just "knew" that these men were "true prophets of God".

Don't worry. As soon as the 2k thing comes and goes, David J. Smith and "Prophet" Stair and all the others will have another story cooked up. And the "faithful" will be jumping over each other to send in a donation to "keep this gospel broadcast on the air to reach those poor lost souls out there in radio land".

The 2k crisis was a sure thing. When they come up empty on that one, the next one is going to have to be a REAL WHOPPER in order to keep the cards and letters coming in. I can't wait to see what they do to save face and stay on the radio.

Let not your heart be troubled. They will survive. They will have a new "revelation" ready just in time to rescue us from realizing that they are nothing more than fear mongers. I just can't wait.

Why would you put this crap on the rec.radio.amateur.dx? Why not just
keep it on "rec.piss & moan" or whatever?

Listen up "FATASS"

The facts are, you and your Master AF2Y have both received official warnings from the FCC. You are both Been marked as QRMERS. FACT plain and simple, all your deny and lie BS, will not work Roger "FATASS", Go peddle your chintzy Amyway crap and leave important people like the Stumpjumpers alone, do not qrm us or you will get into deeper trouble than you already are "FATASS" If you will listen to 14313, you will notice a new day has arrived, a day with out skum like you and your Boss Doc around!! Now talk to him on the telephone about that, "FATASS"!

BOB

You are finally waking up and smelling the coffee. Your letter is true in every respect. If you want to play, now you gotta pay. You can cry constitution and due process all you want to. I think it is a good thing and I support Mr Hollingsworth. Let the bad boys go to court and try to over turn their conviction, in the mean time they are out of ham radio. They should respect part 97 and Riley Hollingsworth!!!

CBS rented 13 hours and had to pay $600 per hour. How many hours
of rental time would it take to get the $200/hr rate?

Ask him right after he comes back from the field exercise in the fifth
or sixth week of basic training (the exact week varies around the country).

By the way, is your son in the new extended basic with the full week
of diversity training? Basic used to be eight weeks, but is supposed to
be extended to 12 weeks to allow for extra diversity and ethics
training. The 12 week basic was supposed to have started by now, so I
was just wondering if it had.

Ignition Noise - bruit d'allumage

Lorsque le moteur de ma voiture tourne (une Dodge Caravan 1999), je constate qu'il g'n're des parasites qui brouillent la r'ception de mon 'metteur-r'cepteur radio-amateur (Icom IC-706). La r'ception de la radio AM-FM est 'galement tr's affect'e. Le probl'me se pr'sente de la fa'on suivante : lorsque le moteur est 'teint (la clef sur ' accessoires '), je syntonise une station 'loign'e dont les signaux sont faibles mais clairement audibles. D's que je d'marre le moteur, je perds la r'ception du signal. Le bruit d'allumage g'n'r' par le moteur est audible avec un fort signal sur tout le spectre couvert par ces deux r'cepteurs. En d'modulation AM, j'entends tr's clairement le bruit du moteur dans le bruit de fond; le bruit d'allumage d'modul' ' sortant ' du haut-parleur varie avec la vitesse (RPM) du moteur, et ce sur les deux r'cepteurs en question. Sur mon r'cepteur amateur, j'ai un indicateur de l'intensit' du signal re'u (s-m'tre), qui monte pratiquement ' la moiti' de son 'chelle lorsque le moteur tourne. Lors de l''coute de cassettes, le probl'me n'est pas pr'sent. En bon technicien que je suis, j'ai tent' d'investiguer la source du probl'me par moi-m'me.

J'ai d'abord suppos' que le bruit atteignait mes r'cepteurs radio (auto et radio-amateur) via l'alimentation 12 V. DC. Pour m'en assurer, j'ai branch' tour ' tour ces deux r'cepteurs sur une seconde batterie ' ind'pendante ' (une gel-cel), donc compl'tement isol'e du reste du circuit. Malgr' cela, le probl'me est toujours pr'sent, et ne diminue pas d'une miette! L'interf'rence ne provient donc pas du circuit d'alimentation, et il serait donc inutile d'ajouter une filtration (genre choke R-L) sur le 12 volts DC.

Lorsque je d'branche l'antenne (autant sur le AM-FM que sur la radio-amateur) alors que le moteur tourne, le bruit dispara't. Si j''loigne l'antenne du v'hicule en la laissant branch'e au r'cepteur, le bruit diminue progressivement. J'ai aussi constat', lors de mes essais, que je brouille aussi les r'cepteurs des v'hicules gar's ' c't' du mien'!

Voici les lectures du niveau de bruit prises ' diff'rentes fr'quences, avec mes antennes habituelles; on constate que le niveau de bruit d'allumage est encore tr's 'lev' ' une fr'quence radio aussi 'lev'e que 446 MHz :

fr'quence antenne radio lecture

31.000 MHz AM fouet ' onde Icom IC-706 8 (sur 60)
144.100 MHz AM fouet ' onde Icom IC-706 7 (sur 60)

446.100 MHz AM fouet onde Icom IC-706 5 (sur 60)

640 KHz AM fouet Chrysler AM-FM Chrysler bruit tr s lev
92.9 MHz FM fouet Chrysler AM-FM Chrysler perte de sensibilit

J en arrive donc la conclusion que l interf rence (le bruit) est irradi , c est dire que le moteur met des ondes radios dont les harmoniques s tendent jusqu 500 MHz (fr quence la plus haute sur laquelle je suis brouill), et qui enterrent donc les signaux radio faibles quelques m tres autour du v hicule. J en arrive cette conclusion pour trois raisons : 1- une batterie isol e ne diminue pas le probl me. 2- D brancher l antenne fait dispara tre le probl me 3- la cassette n est pas affect e.

J ai fait une petite visite chez mon concessionnaire Chrysler, tant donn que le v hicule est neuf et garanti. Apr s avoir inspect le moteur, ils n ont rien trouv . Le c blage des bougies et ces derni res sont de type r sistifs, install s de s rie, donc un point d limin . L ordinateur de bord est d j prot g contre les EMI (electromagnetic interference) dans sa conception, selon les ing nieurs de Chrysler. Les mises la terre des diff rentes pi ces du moteur sont d j bien faites lors de la fabrication.

Je me suis fabriqu une petite antenne (dip le de 4 pouces de longueur) au bout d un long c ble coaxial branch sur mon r cepteur radio, et je me suis promen autour du v hicule en coutant l interf rence re ue, afin de localiser plus pr cis ment la source de bruit radio. C est en approchant l antenne du circuit d allumage (cap distributeur, c bles de bougies, bougies, coil) que je capte le maximum de bruit. En fait, l augmentation y est radicale. On m avait sugg r que la source de bruit pouvait tre la pompe essence, mais en y approchant la petite antenne je ne re ois aucun bruit. J ai tent aussi de d brancher l alternateur; le probl me reste pr sent.

Existe t il des dispositifs de filtration qui peuvent tre install s sur le circuit d allumage? J imagine que d autres amateurs ont v cu le m me type de probl me avec leur voiture; y ont-ils apport des solutions? Une recherche dans les newsgroups sur internet n a rien r v l de pertinent pour ce type de probl me. J ai aussi consult la litt rature radio-amateur (Radio Interference handbook) sur le sujet, et tout ce qu ils sugg rent comme piste a d j t tent , sans r sultat. Si vous avez une id e pour mon probl me, vos suggestions seront tr s appr ci es.

> meaningful vocabulary?

No, it indicates a level of irritation induced by your stubbornness. Do you think I just wander about looking for someone on whom to unleash some misguided anger ? Has it ever occurred to you that I may actually have a point ? ... that the people who are asking you to prune your posts may actually have a point ? I think you don't give a damn.

> As they say - " Profanity is simply a weak mind trying desperately to
> express itself "

Personal quote I made up myself : "People use quotes when they're unable to produce a valid argument".

> Take yourself and your weak mind someplace else........

Using neutral vocabulary, consider this paragraph I wrote in my previous post to you :

> OK : if you don't care about the re-quotes you're posting back and
> forth, don't care whether anyone else reading your post should be
> interested in the re-quotes or not, could you then tell me why you
> include them in the first place ? You have a setting somewhere in your
> news/mail reader that says "Include original message in reply".
Uncheck
> it. Would that be to much to ask ?

If you can not agree with this point of view or even meet this question with a valid answer, if you can't even adress the point without resorting to some pirouette or disingenuous smokescreen, I will feel completely entitled to address you in any manner I see fit and I will treat you as the troll I think you really are. On the other hand, if you can actually even address the real issue here, you will have gained my respect.

Mike G,

Why do you persist in stiring the pot? Frank and I have been in near daily contact via the internet. He has tried, and I believe accomplished, to remove himself from the stupid war. As you did, albiet with somewhat less "flair". Leave him alone. He is a impressionable young man, as we all were once. That deserves a chance to join the ham fraternity. So drop it before it comes back to bite you on the butt.

Hey lardass,

Your bed won't support both you & your sisters weight!!!!! It's time to go on a diet. I know you live in the poorest state in the USA.....So these helpful hints won't cost you much.

1. Visit more homes per day selling your Amway shit.
2. Walk to the monster truck event next time.
3. Check your "moonshine" stills more often.
4. Find your out of wedlock kids.
5. Bondo your rust-bucket pickup truck.

KK4TL wrote in message <19991201213459.27591.00000339@ng-bg1.aol.com>...
Lloyd Davies admits what a lot of others are thinking:
>I'm just scared
>about Y2K - Listen to David J. Smith on WWCR, and Brother Stair.

It's been done before, Lloyd. Fear mongers making a wad off of people who
will
listen to them and buy their books. The technology is different now.
They're
selling video tapes, survival kits, gold coins, portable generators, etc.
But
the message is the same as ever. And the profits are greater for them.

If you need a portable generator, wait till about Jan. 15, 2000. You should
be
able to take your pick of new Honda's at about 9 or 10 cents on the dollar.
Even bigger bargains will be had on videos that give absolute, irrefutible,
conclusive proof that the US goes to hell in a hand basket on Jan. 1, 2000.

Don't take my word for it. Look up some information on the Millerites.
Date
setting preachers are NOT a new thing. And these date-setters have never
had a
shortage of gullible "believers" who just "knew" that these men were "true
prophets of God".

Don't worry. As soon as the 2k thing comes and goes, David J. Smith and
"Prophet" Stair and all the others will have another story cooked up. And
the
"faithful" will be jumping over each other to send in a donation to "keep
this
gospel broadcast on the air to reach those poor lost souls out there in
radio
land".

The 2k crisis was a sure thing. When they come up empty on that one, the next
one is going to have to be a REAL WHOPPER in order to keep the cards and letters coming in. I can't wait to see what they do to save face and stay on
the radio.

Let not your heart be troubled. They will survive. They will have a new "revelation" ready just in time to rescue us from realizing that they are nothing more than fear mongers. I just can't wait.

Thanks for your well put, well thought and concise comments.
Unfortunatly wasted on that wannabe southerner, jackbooted idiot. I've
only been in the South a scant 25 years. I learned more here about
harmony between the races than anywhere I have ever been. The sixties
are over, and the south is a great place to be, for black and white.
Its not perfect, but no place is. This fool Llllloyd is just a
ignorant fool not deserving you wasting your time on him. He has not
the capability to understand a thing you said.

I'm not claiming to me a mathematical genuis, but.....
Correct me if I'm wrong please.

The first year was listed as 1 (one),not 0 (zero).
That was the first century. Right?

Add 100 years to the number 1 and you get 101, correct.
That would be the second century. Right?

Thus, 2000 is the END of the 20th century.
And 2001 is the beginning of the 21st? Right?

And I did this all without a calculator.

We get the $200 rate if we rent a single 1 hour block. CBS must have bought the time in blocks of 5 minutes for a total of 13 hours over a period of days rather than buying it in blocks of 1 hour (or they have a really inept person handling their transponder time buys). If you only buy 5 minutes at a time for spot news reports, you pay the top rate. If you buy in larger blocks, the price goes down.

Ruzzo,

I'd have to ask... Do you smoke?

I won't buy a car from a smoker.... I won't stay in a 'smoker' room
at a hotel, if I had a choice.

Sure, sometimes I have no choice, but it IS a premium to me! No,
let me rephrase that. Having smoke is a detriment. And I'm either
not interested at all, or I expect a big discount...

Tom is not that stupid. The minute you are though trying to fake out Hollingsworth you will go back to libeling and jamming the other amateurs on 14.313. Besides, you have more mail on the way, and it is not from Riley.

alt.config is the configuration ng that is generally discussed in the US, and then many localities have their own, for example ny.config, courts.usa.config, nm.config, nj.config, nyc.config, japan.config, ethiopia.config, mensa.config, israel.config, etc., etc., etc. there are other ways to configure a newsgroup, yes, but this is the most commonly discussed here in the US.

I'll take the dirt build-up, stains, and corrosion from a couple of decades
of "jet plane exhaust" in my electronics over a couple of months of 2
pack-a-day yellow nicotine stains and tar deposits, thanks... Go have a butt
and relax - just don't sell me your radio.

Have you ever purchased a piece of gear from a heavy smoker? Of course not!
You are one! The equipment wreaks! Regardless of what it does to the
innards. It stinks! And yes I smoked for 26 years. Just thought I'd start an
argument. :)

You missed "Novice Enhancement." It fits in the Spring 1987 time frame.
After passage, the ARRL got behind it and produced - "Now You're Talking."

NEW INTELLIGENT SIGNALS FROM SPACE

ARECIBO, PUERTO RICO -- Gannett News Service reports that on November 29,
1999, the world's largest radio telescope, picked up what appeared to be an
intelligent signal coming from a small star named HD119850. What's more a
backup telescope at Jodrell Bank near Manchester, England was hearing the
same beacon a clear sign the signal was not from Earth. Astronomer Jill
Tarter 55, is chief scientist with the SETI Institute of Mountain View. Jody
Foster played Jill in the movie "Contact." Other tests were conducted from
the Arecibo control room to determine if the signal coming from 106 trillion
miles away was real. The telescope was moved away from the target star. The
signal vanished and only returned when it was aimed again at the target
star. (ed's note: the signal was in morse code, of course ;-)

Rich, Point well taken but hyperbole. No one is shooting anyone, putting anyone to death, ripping and burning their businesses to the ground.

It is true that the FCC may be overstepping, which I hardly condone. Yet, on the other hand, we have to realize that all agencies of government walk on the Constitution. It has been held by the Supreme Court that it is of no significance whether one branch oversteps into the power of another. It is only significant when an aggrieved party brings the matter before a Court of competent jurisdiction.

What this means, Rich, is that you either act pragmatically or fight the good fight. If you win, you'll be considered a hero by many; lose and you'll be a bum (so to speak). Either way you'll lose in the end, as it will break your bank!!!!

That's absolutely correct. The 21st Century starts on 1/1/2001 as does
the next millenium. (I'm sooooo tired of hearing people talk about the
"last of this millenium"... heck, we still have over a year left.)

For goodness sakes Peaeyes1, are you trying to exacerbate trouble. Every rational being knows Doc's message is a step in the right direction for ham radio.

Whether he will comply with his own pronouncement remains to be seen. But why take him at his word--or assume regularity? Fellow hams, are too hateful to accept resolution of an express problem on its face? Or are we gonna read nefarious motives ad infinitum into everyone and everything? Truth is, the majority of us are not malicious at the core, just messed up.

Wasn't this an addendum, i.e., not part of their initial proposal? Why didn't they propose this with Novice Enhancement instead of fighting everything? It might have prolonged their position.

Lloyd, please pardon me for focusing on you; however, I've stood by reading your many posts in silence. Tonight I feel pressed to speak out on the KV4FZ story, in which I participated in a helpful way for Herb and of which I have intimate knowledge.

The trouble with your "KV4FZ Story" is that it ignores Herb's real culpability.

He did indeed play around with Calls' (Caribbean Long Lines Services) access codes. He did it on more than one occasion over the ham radio 20 meter airwaves, as if it were mischievous fun. At the time, he didn't realize the storm gathering under enforcement of new statutes designed to thwart credit card fraud, which were the federal laws under which he was prosecuted.

Lots of what you report, Lloyd, is absolutely correct: The government surely overreached, fabricating evidence, putting on the appearance of high-tech chains and irons by placing bogus printouts around Herb as he was forced to testify. No doubt in my mind the felony trial was unfair, a travesty of justice. But the travesty was corrected by the Judge when she reversed two guilty verdicts. (Of course, the verdict that remains may not have been entered by the Jury if the government hadn't fabricated evidence for the other two counts.)

The only real question remaining is whether the statute unpinning the existing conviction is really applicable or too vague. How possessing a counterfeit access device with intent to defraud equates to a number in Herb's head strikes me as unconstitutionally vague.

But, readers, be not confused. Herb surely did possess numbers in his head that could and did gain access to Calls. And he used them illegally on more than one occasion. Save for the questionable number in his head violation, Herb did not engage in felonious behavior, in my view.

And Herb's testimony was indeed less than candid. I know because I looked on in the Courtroom, watching him squirm, fidget and appear traumatized, as his testimony trickled out uncharacteristically haltingly. Naturally, he had trouble reconciling his unenlightened lawyer's rendition of the case with its reality. You see, his lawyer had portrayed him as someone who knew nothing of computers because the lawyer's strategy was not to put Herb on the stand.

When the government foisted fabricated evidence on the Court that brought Herb's alleged crimes to the felony level of one thousand dollars, the lawyer changed his mind. Poor Herb. None of us could have

weathered testifying under those circumstances. And I believe Herb maintained the same testimony before the FCC.

Mistake, mistake. When you've been put through that meat grinder and have culpability, you come clean quickly. But that message was lost on Herb, who appears as if he is a man who has done no wrong. Notwithstanding the governments travesty, Herb did do wrong. He should have done damage control, admitting it, apologizing for it, and moving on.

If he had handled the episode that way, he wouldn't be fighting with the FCC now over his ham license for being less than candid with them. So Lloyd, why do you propagandize, cover-up, whitewash, propagating the Mr. Clean myth, when you know otherwise?

Not only that, but Tom has an advanced class ticket. Much better than otk's short wave listening status. I doubt that post was made by Rich. He cannot post more than two lines without his fifth grade education being evident.

4445. Crosstalk between wireless mic and _CB_ intercom?

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-03 00:00:00 UTC
From: van@crl.com
Message-ID: <827ql9$p6p$1@nnrp9.crl.com>
Source record: 125942

Do FM wireless mikes interfere with either cellphones or 49 MHz intercoms?

Probably simple question: our church group stages Christmas-concert-like events where the performers use FM (170MHz?) wireless microphones and the stage crew uses 49.830MHz intercoms. Lately we've been encountering intermittent buzzing interference through the mikes.

(Incidentally, the intercoms also have been getting interference on the "A" (49.830MHz) and "B" (49.845MHz) channels. It sounds digital, so I suspect it could be from neighborhood R/C cars. Switching to channel "C" (49.860MHz) seems to aoivd the problem.)

The sound guy (usually a DJ volunteering his time) says the buzz from the mics are because of the intercoms. Another is saying it's due to cell phones in the congregation. Does either explanation seem reasonable?

It doesn't seem likely to me -- the harmonics don't add up -- but then, what do I know? Thanks in advance.

The League is not choosey, it discriminates against ALL its members. 2000 is the year I stop paying for the high nose holier than thou clan in Newington. Time for them to go get a real job.

Oh, bullshit. You're going to go to Shipiro, Lipshitz and Epstein and have them draft a letter from you playing the "persecuted Jew" card. It will go to one of Riley's superiors, who in turn, will notify Riley that you're to be left alone. Riley will then go on notice at the ARRL site and at the RAIN Report that he was mistaken to have come after you, and will turn around and kiss your ass with ruby-red lipstick.

(Drew)

Discriminate against no code licenses???? Gimme a break! There are plenty of articles that are targeted towards the no-code people. And how do you know if they discriminate if you have never been a member?

And just for your information, the majority of hams have passed their code tests. It really isn't that difficult. But in these days of GIVE IT TO ME NOW attitudes, (read: I dont want to work for it), it is no wonder we have a no code license group.

I know that my response makes me sound like I am about 80....actually I am 37. I have had my license since I was 14 (Jeeez, I am almost ready for QCWA!!! yikes!!). I failed my code exam at least 6 times for Novice, and at least 3 times for General.

So as they would say in South Park..... Quit Ur Bitchin'.

Kent Winrich, K9EZ
EXTRA - and busted my butt for it.

This is a statement that has amused me for years. May I ask,
do you allow automobile, big truck, or jet plane exhaust into
your shack when you open the door? Does anyone down the
road from you have a wood burning stove, fire place heating
oil or coal fired furnace (since you are in the northern part of
the USA)? Do you live within 15 miles of a large metropolitan
city? Are there any unpaved roads within 15 miles of your QTH?
Have you done any remodeling of your shack or house since
you have owned this equipment?

I've purchased one-owner rigs that I wished had been owned by
a smoker when I got to the house and opened them up. Just
another way to try and squeeze a few extra dollars out of that
Ham who is not a local.

>instrumentation I could.

Thank you for your response Gary. If I accused you incorrectly then I apologise. Your comments though (which I have snipped for brevity) do not leave the average amateur much if any room for adjustment of their equipment or modification of, for example, PMR kit for the amateur bands. Both of these activities are as much a part of the hobby as operating and the ability to be allowed to do this is one of the cornerstones of the amateur licence. It is no co-incidence that the amateur bands are harmonically related:)

A poorly adjusted pi tank output stage or overdriven PA can do as much damage from the interference viewpoint as misalignment in the earlier stages yet we still fit Load and Tune controls and Mic gain pots.

Regarding the specific case of the FT101, from what I recall, these adjustments solely alter the drive levels to the PA stage and have no significant effect upon spurious emmissions. I am one of the fortunates with a spectrum analyser which was in use at the time I owned my early FT101. The fault in question related to low output and was not 'twiddling for twiddlings sake', my response was one of several possible solutions that had been suggested and I think it quite reasonable that any amateur willing to take the covers off his kit (certainly most of my generation) should attempt this adjustment.

I would certainly agree that adjusting modern kit (my definition) should not be attempted without full knowledge of the consequences; for example the IC706 series and its ilk. It will be a sad day though when we have to turn to the manufacturer to carry out every adjustment and repair. That day is getting closer and when it does, I have no doubt that type approval will come with it. Moves towards painless access to the amateur bands are not helping.

Not so.

Its all Dionysius Exiguus fault. Also know as Dennis
the small or Denny the runt depending on who is doing the
name translation. He was a monk assigned by the Pope to
calculate the exact date of Easter. Which he did and now
we have his calendar which begins in the year AD 1 after he
calculated *that* to be the year of Christ's birth. He started with
the year 1 because the Roman numeral system which was in
use at that time didn't have a "ZERO" so he just went with it.

And what takes the cake on this foolishness is the fact that
he was actually off on his calculations of the "beginning" year
by as much as 4 to 6 years. So that means we have already
passed into it and didn't even know it.

But for mathematical accuracy we have "ammended" his
calendar to suit our increasing need for time accuracy.
What is funny though is how so many are trying to be
"specifically accurate" about this thing when the calendar
is off by 4 to 6 years.

Ruzzo..its the nicotine film on and in a radio that people "in the know" try to avoid. Obviously you've never tried to clean up a radio from a smoker. If you are a smoker I guarantee that you and your radio stink.

Have you ever fired up a used rig and smelled automobile, big truck, or jet plane exaust? Not me, I have however purchased rigs that were in a shack of a heavy smoker mostly older tube stuff but the smoke particles had created a heavy yellow film on every part of the radio and it smelled horrible. I'm a smoker myself but the stench from the two radios forced me to clean the entire chassis.

If someone is willing to spend more for a rig that is not covered in yellow tobacco film why would it matter to you?

4473. I got an e-mail from W7CPA,Randy Worst.

Newsgroup: rec.radio.amateur.misc
Date: 1999-12-03 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19991203115158.12915.00000319@ng-cp1.aol.com>
Source record: 125970

Now I have someone else jumping all over me over my misfortune,W7CPA who sent me an awfully ridiculing e-mail last night. Hasn't he and his buddies ever heard of being good winners, anyways? You got what you sought because I will not answer Riley Hollingsworth thereby automatically calling for a cease and desist and goodbye Doc.
Anyways one thing I'm not guily of is tagging a racist epithet on a sport dominated by AfroAmericans. Hell, I give them all the credit in the world for literally coming out of nowhere in major sports and thanks to the bravery and courage of the great Jackie Robinson, have
emerged as dominant in everything except hockey and who the hell cares about that event in which a schmuck chases a puck, anyways?
That's the way we think here in the eastern liberal establishment where PEOPLE come first instead of guns and RIGHTS dominate MIGHT.
And I resent that caustic statement yesterday by the eminent Stan Coon, K2SOP (unrelated by the way to Cancun) whom I considered a friend and who turned out to be a betrayer. "The letter from Riley couldn't have happened to a better guy." said he. That cut me to the quick and my quick is in a very sensitive location.
Furthermore I resent KE9RY's blasting affimative action and the reason is because for hundreds of years, regarding our black brothers and sisters, we' ve had nothing but "INFIRMATIVE ACTION." The racial issue was simply covered by a bandage. The wound festered, enlarged and exploded in the mid '60s in places like Watts, Newark, Detroit and elsewhere. We were jolted into conscientiousness and the
time for redress began. Keep in mind that the race riots did not touch Eagle Wisconsin therefore an "Eagler" is a Johnny Come Lately having no idea of the nature and bestiality of racism.
We hams have an obligation because we're heard worldwide on shortwave-keep racism out of our QSOs. And also since 14.313 has been cleaned up to great degree, let's look for minority participants such as AfroAmericans, Hindus, Buddhists, Jews, Jehovah Witnesses, gays, sads and uncomiited noncomittals, huh? Stop to think of this:N9GOR is the only black man to appear on .313. Why? Because all of this racist garbage stops them from being a part of a fine frequency. You jackasses who toss epithets around (I just got a call from KE9RY, Tom Steckbauer-it's 1547 UTC. I hung up on the guy and don't want anything to do with him because any man whom I welcomed personally in his hour of need and then who turns around and falsely accuses me of besmirching the memory of his late daughter is NO GOOD). Well anyways, getting back to matters, I'm now 61 and suffer from short term memory loss and can't remember what the hell I was going to write, so goodbye for now.

Pretty neat. Some idiot on this NG deliberately crossposts
his drivel to several others for the express purpose of
spreading crap across Usenet, since he knows that most users
can't automatically see where all the crossposting is going,
and few people check every post to trimm all that sort of
nonsense... So then a couple participants proceed to stomp
on Sue for responding. That's nice and gentlemenly. NOT!
